FOREWORD

It is with great pleasure that I present the updated Study Manual on Business Planning: Taxation & Compliance, comprehensively revised for Professional Level students of The Institute of Chartered Accountants of Bangladesh (ICAB). At this advanced stage of the chartered accountancy curriculum, the study of taxation shifts from basic statutory comprehension to strategic business planning, risk mitigation, and corporate governance. This manual is specifically designed to cultivate the sophisticated analytical capabilities and advisory acumen required of tomorrow's financial leaders in navigating complex business landscapes.

This revised edition meticulously incorporates the latest developments in fiscal jurisprudence, reflecting the significant legislative changes introduced through the Finance Act, 2026, alongside recent Statutory Regulatory Orders (SROs), rules, and regulatory notifications. By consolidating the advanced provisions of the Income Tax Act, 2023, the Value Added Tax and Supplementary Duty Act, 2012, and the Customs Act, 2023, this manual serves as an authoritative and indispensable resource. It equips examinees with deep regulatory insights, blending technical theory with intricate corporate scenarios to ensure readiness for both professional examinations and real-world practice.

I sincerely acknowledge and appreciate the Chairman and Members of the Board of Studies (BoS) of ICAB for their unwavering commitment and valuable contributions to this academic initiative. I also extend my profound gratitude to the panel of distinguished experts for generously sharing their professional expertise in the preparation, review, and refinement of this publication: Mr. Ranjan Kumar Bhowmik FCMA (Former Member, National Board of Revenue), Mr. Mohammad Fakhrul Alam (Former Director General, Customs Intelligence and Investigation Directorate, NBR), Mr. Snehasish Barua FCA (Partner, Snehasish Mahmud & Co., Chartered Accountants), Mr. Rakesh Saha FCA (Partner, Ernst & Young Advisory Services Bangladesh Limited), and Mr. Muhammad Abu Hanif Meah FCA (Partner, Hanif & Arif, Chartered Accountants).

Finally, I express my sincere appreciation to Mr. Mohammad Redwanur Rahman FCA, Vice President (Education & Training), the Chief Executive Officer, the Director of Education & Examination, and the entire team at the Education Department for their collective efforts and dedication in bringing this publication to fruition.

I wish our Professional Level students every success in their examinations and their future professional journeys.

Sabbir Ahmed.

Sabbir Ahmed FCA
President
The Institute of Chartered Accountants of Bangladesh (ICAB)

CA OVERVIEW

The ICAB chartered accountancy qualification, the CA, is one of the most advanced learning and professional development programmes available. Its integrated components provide an in-depth understanding across accountancy, finance and business. Combined, they help build the technical knowledge, professional skills and practical experience needed to become an ICAB Chartered Accountant.

Each component is designed to complement each other, which means that students can put theory into practice and can understand and apply what they learn to their day-to-day work.
The four components are:

ICAB constantly reviews the content of the CA qualification to reflect real life business challenges. Today's most urgent business challenges range from sustainability, to rapid changes in technology and the role of ethics in the profession. We work closely with employers, tuition providers, academics and examiners to ensure that the CA equips the chartered accountants of the future with the skills and knowledge they need to meet these challenges and to be successful.

THE CA QUALIFICATION AND SUSTAINABILITY

Finance and accounting professionals need to move beyond simply measuring and reporting the impact of climate change, environmental regulation, supply chain pressure and rising energy costs. They must focus on understanding those implications and integrating them into financial management and business planning. ICAB has been at the forefront of this movement over the past decade and has adapted the CA qualification to reflect that. We see its role as not simply integrating knowledge and understanding the broader implications of environmental, social and governance issues into organisations, but also seeding this thinking into the mindset of our members.

Our syllabus and ethical and professional development framework contribute towards creating ICAB Chartered Accountants who recognise that sustainability is at the core of what they do and are capable of actively using their business skills to analyse how to make the new sustainable economy work for their business.

THE CA QUALIFICATION AND TECHNOLOGY

Rapid growth in technology has automated many compliance elements of accountancy. But, with technology also comes complexity and risk. Accountants need to adapt and develop new skills to manage these technological changes such as data analytics, automation and cyber security.

While there are many new technology capabilities that have broad application across the business and consumer environment, four trends have the greatest potential to transform the accountancy profession: **A**rtificial intelligence, **B**lockchain, **C**yber security and **D**ata (ABCD of technology).

These and other innovations are likely to have a significant impact on the way that accountants access, move and manage business finances.

Technology can provide information more quickly and often more accurately than humans, but it cannot replicate human intelligence and quality decision making. Therefore, chartered accountants hold a key role in data analytics, in validating the source of the data, interpreting and analysing the outputs. Technology provides opportunities for chartered accountants to use their professional skills to add value to their clients and/or the businesses in which they work.

As routine and compliance work reduces, there is greater focus on the development of skills which equip professionals to work with the outputs of automated processes, with other specialists, and in a changing world.

We believe that skills such as analysis, interpretation, professional scepticism, communication, collaboration, adaptability, resilience, and commerciality are essential for tomorrow's business leaders; these are imbedded throughout the CA exams and professional development framework.

THE CA QUALIFICATION AND ETHICS

Culture and values are central to long-term success. How a business adopts an ethical approach towards its staff, shareholders, customers and regulators, as well as within its own operations, has a bigger impact than any performance measure or operational improvement.

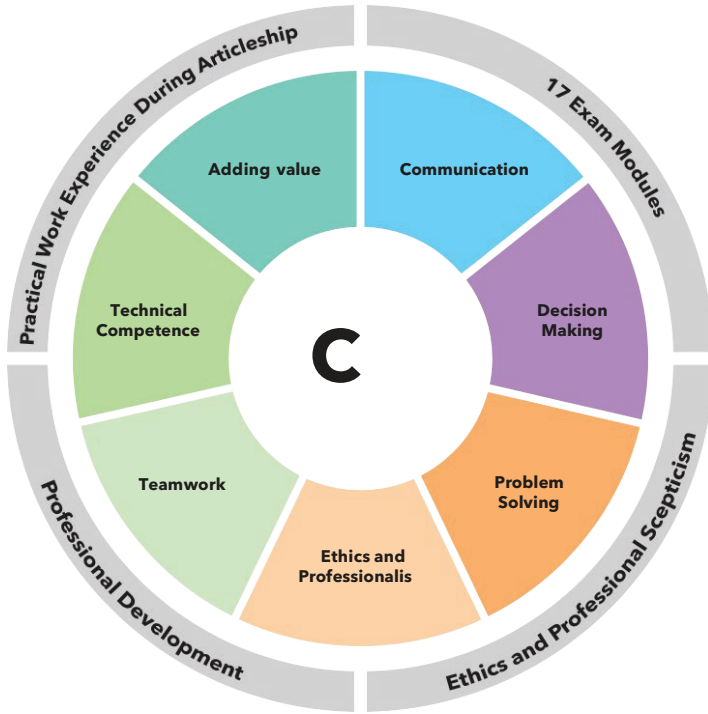

Demonstrating a clear commitment to ethical behaviour is one of the main drivers of better performance; it delivers an advantage when recruiting, it adds value to a brand, and it instils trust and confidence in partners, suppliers and others that the organisation is well run and resilient.

Achieving that is not a matter of simple knowledge. Few ethical challenges will have simple right and wrong responses. They require technical understanding, rigorous appraisal and skillful handling. Accountants must have the necessary skills to apply professional judgement in a given situation, taking into account what has been learned as a CA student about their ethical responsibilities as a Chartered Accountant.

There will be unique ethical challenges throughout any Chartered Accountant's process of learning and career. They serve a variety of masters: senior management, external stakeholders, regulators; and above all the public interest responsibility of their profession. Because of the rigorous and effective training (and continued professional development) chartered accountants can speak up and take a lead. None of this can happen without one critical element: professionalism. That goes beyond merely knowing the Code of Ethics: it means embodying the right behaviours and having the ability and willingness to push back against those who might compromise the integrity of the business.

That confidence comes from a qualification that prioritises not only technical knowledge of the ethical framework but also challenges accountants with scenarios that accurately reflect the ethical dilemmas a Chartered Accountant may face in business.

PROFESSIONAL DEVELOPMENT

ICAB Chartered Accountants are known for their professionalism and expertise. Professional development prepares students to successfully handle a variety of different situations that they encounter throughout their career. The CA qualification improves students' ability and performance in seven key areas:

- Adding value – add value to the organisation, team or role in order to achieve objectives
- Communication – communicate effectively at all levels, using oral, written and presentational skills to achieve positive outcomes
- Decision making – gather, interpret and evaluate data to make effective decisions
- Ethics and professionalism – behave ethically and sustainably while respecting others to uphold the values of the organisation and the accountancy profession
- Problem solving – analyse a problem, generate options and make recommendations to arrive at appropriate solutions

- Teamwork – work collaboratively as a member or leader of a team to achieve shared goals
- Technical competence – seek, learn and use technology and technical information to support the achievement of organisation or team goals

There are 17 exams over three levels – Certificate, Professional and Advanced.

CERTIFICATE LEVEL

There are seven exams at this level that introduce the fundamentals of accountancy, finance and business. Students may be eligible for credit for some exams if they have studied a qualification we recognise.

The Certificate Level exams are each 1.5 hours long except Business Laws and Information Technology which are 1 hour long and can be sat three times in the year.

PROFESSIONAL LEVEL

The next seven exams build on the fundamentals and test students' understanding and ability to use technical knowledge in real-life scenarios. The exams are taken in two times in the year.

The Professional Level exams are 3.5 hours long except IT-governance 4 hours.

The Professional Level exams are flexible and can be taken in any order to fit with a student's day-to-day work. The Business Planning: Taxation & Compliance and Business Strategy and Technology exams in particular help students to progress to the Advanced Level.

The suite of Business Planning: Taxation & Compliance and Business exams is based on the same syllabus structure and skills frameworks, and will give students the opportunity to demonstrate their learning and use this in the context of taxation.

Financial Accounting and Reporting is in the contexts of IFRS Standards.

ADVANCED LEVEL

The Corporate Reporting and Strategic Business Management & Leadership exams test students' understanding and strategic decision-making at a senior level. They present real-life scenarios, with increased complexity and implications from the Professional Level exams.

The Case Study tests all the knowledge, skills and experience gained so far. It presents a complex business issue which challenges students' ability to problem solve, identify the ethical implications and provide an effective solution.

The Advanced Level exams are taken two times in the year.

The Corporate Reporting and Strategic Business Management & Leadership exams are 3.5 hours long. The Case Study exam is 4.5 hours long.

If a student is studying the CA independently, they should consider their future ambitions while selecting which exams to sit.

FLEXIBILITY

There are no regulations stipulating the order in which students must attempt the exams, allowing CA Firms to design Articleship programmes according to business needs. The exception to this rule is the Case Study. For attempting Case Study, students must be attempted the other subjects of Advanced Level.
Students have the unlimited attempts at all levels of exams.

CREDIT FOR PRIOR LEARNING (CPL)

Students with previous qualifications may be eligible to apply for CPL for modules which have been allowed by ICAB. For more information, visit https://www.icab.org.bd/page/credit-for-prior-learning-cpl-exemption.

DATA ANALYTICS

Chartered Accountants are increasingly using more advanced approaches to interrogate client data. To respond to this, ICAB has incorporated data analytics software within the Audit and Assurance and Corporate Reporting modules.

Embedding data analytic techniques within our exams ensures that we continue to reflect the current and future workplace and will also help to develop students' judgement, professional scepticism and critical thinking skills.

SYLLABUS
PROFESSIONAL LEVEL
Business Planning: Taxation & Compliance - 100 Marks

MODULE AIM

To develop students' understanding of the critical aspects of Bangladesh Taxation; application of the knowledge gained at the Certificate Level study in the areas of tax compliances, tax principles, management, administration, computation, collections, payments, return preparation, filing, dispute issues and Value Added Tax (VAT) rules.

On completion of this module, students will be able to:

- recognize the ethical issues arising while performing tax work and identify the obligations the Bangladesh system of taxation imposes on taxpayers and the implications for taxpayers of noncompliance;
- deal with tax research, tax compliances, tax planning, and decision making in complex tax scenario and calculate tax payable by individuals, and businesses;
- deal with provisions of double taxation relief, transfer pricing and other important areas of international taxation;
- calculate the amount of VAT and other indirect taxes payable by businesses.

METHOD OF ASSESSMENT

The Business Planning: Taxation & Compliance module is assessed by a 3:30-hour written exam. The questions cover the areas of the syllabus in accordance with the weightings set out in the specification grid. **Students will be assessed through computations, advice, planning and problem solving in case-based scenario.**

Students will be assessed based on latest tax legislation, rules, regulations, etc. in a way that exams in November-December session may cover changes up to August and exams in May-June session may cover changes up to February of the respective year.

SPECIFICATION GRID

This grid shows the relative weightings of subjects within this module and should guide the relative study time spent on each. The marks available in the assessment will equate to the weighting ranges below.

Syllabus area	Weighting Range*
A. Income Tax	
A1. Critical aspects of income tax, administrative functioning, dispute resolution, gift tax including ethical aspects in income tax practice.	10-15
A2. Tax planning for individual, business or profession	25-30
A3. International taxation: Treaties and transfer pricing	10-15
B. Value Added Tax	30-35
C. Customs	15-20

*Total marks in examination will be 100.

Following learning outcomes should be read with in conjunction with the relevant sections of the technical knowledge grids.

A. Income Tax

A1. Critical aspects of income tax, administrative functioning, dispute resolution, gift tax including ethical aspects in income tax practice

Students will be able to identify critical aspects of Bangladesh income tax system, structure of tax administration, different aspects of tax compliance and dispute resolution process in Bangladesh Income Tax Regulations. In the examination, students may be assessed through problem solving in complex scenario in following areas:

a) Sources and structure of Bangladesh income tax law

Objective and importance of income tax; role of income tax in economic development of Bangladesh; Bangladesh tax structure; scope of Bangladesh income tax; sources of tax law and practice; legislation; Case Law; NBR Publications; structure of Income Tax Act, 2023; the concept of income; capital or revenue; tax residence; tax and income tax; tax liability on income; different rates of tax; changes in Finance Act; changes through SROs and other notifications.

b) Administration and Tribunal

Various income tax authorities; appointment of income tax authorities; subordination and control of income tax authorities; jurisdiction of income tax authorities; exercise of jurisdiction by successor; officers to follow instruction of the board; guidance to the deputy commissioner of taxes; exercise of assessment functions; system of Tax Zone and Circles; powers of income tax authorities; establishment of Appellate Tribunal; exercise of power of the tribunal by Benches; decision of Bench; exercise of Power by one member; taxes Appellate Tribunal's procedures; organization structure of income tax authorities.

c) Return, statement, and furnishing certain information

Return of income; Form of submission of return; signature and verification of return; tax day; delay interest for filing return after tax day; documents to be submitted along with the return of income; return of withholding tax; obligation to furnish annual information return; concurrent jurisdiction; notice; filing of revised return; production of accounts and documents; statement of assets, liabilities, and expenditure and life style statement; production of other information; requirement of furnishing certain information regarding payment of salary, dividend, interest and etc.; any other requirements of return, statement, furnishing information under income tax Act.

d) Assessment

Provisional assessment; assessment on the basis of correct return; self-assessment; minimum tax; spot assessment; assessment on the basis of hearing; assessment on the basis of report of the chartered accountant; best judgment assessment; income escaping assessment; any other types of assessment as per income tax Act; limitation for assessment.

e) Tax appeal and references

Appeal against order of DCT and IJCT; tax payment before appeal; fees for appeal; time limits for appeal; appeal before the Appellate Joint Commissioner or the Commissioner [Appeals]; appeal against order of TRO; appeal to Tax Appellate Tribunal; reference to high court division of the Supreme Court; appeal to appellate division; certified copy.

f) Alternative Dispute Resolution

Alternative Dispute Resolution (ADR); eligibility for application; application procedure for ADR; procedures of disposal by the ADR; eligibility for appointment as Facilitator; decision of the ADR; effect of agreement; limitation of appeal where agreement is not concluded; fees to be paid to facilitator.

g) Power of tax authorities

Power to call for information; power to inspect registers of companies; power of survey; additional powers of enquiry and production of documents; power of search and seizer; power to verify deduction or collection of tax; retention of seized assets; application of retained assets; power of IJCT to revise orders of DCT; revisional power of commissioners; power to take evidence on oath.

h) Gift Tax

Imposition of Gift Tax, exempted gifts, methods of determining value of the gifts, submission of return, payment of tax, any other important provisions related to gift tax.

i) Ethics and law

- The five fundamental principles and guidance given in the ICAB Code of Ethics for Professional Accountants;
- Legal and ethical issues arising from tax work undertaken and explain the significance of these issues;
- Fundamental principles, threat and safeguards;
- Ethical conflict resolution;
- Confidentiality and disclosure of information;
- Conflict of interest;
- Basic principles of taxation work;
- Anti-money laundering;
- Tax planning, tax avoidance, and tax evasion.

A2. Income tax of individuals, business or profession

Students will be able to deal with computations, professional advice, tax planning and problem solving in complex case-based scenario in various areas of individual and corporate tax including but not limited to taxation of companies having both manufacturing and trading activities, minimum tax as per section 163 and non-163, reduced rate and full rate, export income and local income, carry forward and losses, discontinued operations, amalgamation or merger and acquisition, business restructuring, and etc.

In the examination, students may be assessed through problem solving, tax planning, tax research and writing professional advice in following areas:

(a) Charge of tax

Charge of income tax; charge of surcharge; charge of additional tax; charge of minimum tax; scope of the total income; income deemed to accrue or arise in Bangladesh; special tax treatment in respect of some expenditure, investments etc.

(b) Heads of income

- **Income from employment**
  Concept of salary and perquisites; valuation of perquisites, allowances, and benefits to be included in income from salary; contribution to different types of provident funds, and other funds; non assessable income under the head salaries.

- **Income from financial assets**
  Scope of interest on securities; nature of securities; types of securities; cum-interest vs. ex-interest; bond washing transaction through sale and buy back of securities; expenses admissible; tax free securities.

- **Income from rent**
  Scope of property; computation of annual value; Impact of self-occupancy; allowable deductions; non-assessable income; formalities to be followed by landlord; tax to be deducted at source from house property.

- **Income from agriculture**
  Basics of agricultural income; characteristics of agricultural income; categories of agricultural income; non-agricultural income; income from agricultural house property; allowable deductions; non-assessable agricultural income.

- **Income from business**
  Scope of income from business and profession; allowable deduction in computing income from business and profession; expenses not admissible income from business and profession; capital and revenue expenditure; test for determining an expenditure as either capital or revenue nature; balancing charge; compensation received from insurance company; fractional income in certain cases; entertainment expense; foreign travel allowance of employees; free sample distribution; perquisites; expenses allowed up to a certain percentage; expenses which are capital expenditure as per IFRSs but allowable as revenue expenses as per ITA; minimum Tax.

- **Capital gains**
  Determination of fair market value; Offer to buy the capital assets by the Government; Transfer of capital assets used in the business; Tax exempted capital gains; No exemption on certain assets if investment allowance is received; Tax rate in respect of capital gain; Special tax rates on capital gain from sale of shares of listed companies; Apportionment of sale proceeds between original cost and subsequent improvements.

- **Income from other sources**
  Identify income from other sources; royalty; fees for technical services; income from letting of factory building along with machinery; deemed income; allowable deductions; inadmissible deductions.

(c) Depreciation allowances

Basics of depreciation allowances; depreciation allowance for different heads of income; depreciation allowance on assets used for agricultural purpose; depreciation allowance on assets used in business or profession; types of depreciation allowances; normal depreciation allowance; initial depreciation allowance; other depreciation allowance; written down value of assets for depreciation purpose; disposal of assets and treatment of gain or loss; amortization of license fees; limitation in respect of depreciation allowance; assignment of unabsorbed depreciation; computation of depreciation allowance.

(d) Set-off and carry-forward of losses

Set off of losses; procedure to set off; carry forward of business losses; set off and carry forward of loss in speculation business; set off and carry forward of loss under the head 'capital gains'; set off and carry forward of loss from agriculture; carry forward of loss of firm and partner; carry forward of loss of succeeded business or profession; carry forward of unabsorbed depreciation; carry forward of loss of tax holiday undertaking; procedures of carry forward.

(e) Exemptions and tax holiday

Tax holiday schemes; exemption under Part 6; types of business eligible for tax holiday; categories of industries within the meaning of industrial undertaking; categories of infrastructure within the meaning of physical infrastructure facilities; conditions for eligibility; application procedure and its disposal by the NBR; withdrawal and cancellation of tax holiday; period of tax holiday for industrial undertaking; period of tax holiday for physical infrastructure facilities; conditions to be fulfilled after getting tax holiday; documents to be submitted with tax holiday application; tax exemption of industry set up at EPZ; special tax exemptions/reduced rates/ concessions in respect of certain industries.

(f) Payment of tax before assessment

Deduction or collection at source; advance payment of tax; person responsible for tax deduction at source; time limit for payment of tax deducted at source; manner of payment of tax deducted at source; issuance of certificates for tax deducted at source; rates of TDS; TDS treated as minimum tax under section 163; other important areas related to TDS; consequence of failure to deduct; requirement to pay advance tax; computation of advance tax; installments of advance tax; estimate of advance tax; advance payment of tax by different types of assessee; failure to pay installments; levy of simple interest for failure to pay advance tax; credit of advance tax; interest payable by Government on excess payment of advance tax; interest payable by assessee on deficiency in payment of advance tax; payment of tax on the basis of return.

(g) Income tax of individuals

Definitions; scope of income of individual assessee; residential Status; non assessable and tax credit income; tax rate of individuals; investment allowances; minimum Tax; computation of total income and tax liability of individuals; preparation and filing return of income of individuals; assessment procedures.

(h) Income tax of companies

Definitions; residential status of companies; tax rates; exemptions and allowances; computation of taxable income and tax liability of companies; set-off and carry forward of losses; minimum Tax; tax credit; corporate social responsibilities; preparation and filing return of income; assessment procedures.

(i) **Income tax of partnership firms**

Assessment of partnership firms; special provisions regarding assessment of partnership firms; rate of tax applicable to firm; set-off and carry forward of firm's losses; computation of partners shares in the firm's profit or loss; liability of a firm for unrecoverable tax due from partners.

(j) Assessment of non-residents and liabilities in special cases

Liability of representative in certain cases; persons to be treated as agent; right of representative to recover tax paid; liability of firm for unrecoverable tax due from partners; liability of partners

for discontinued business of a firm; liability of directors for unrecoverable tax of private companies; liability of liquidator for tax of private companies under liquidation; liability of tax in case of shipping business of non-residents; liability of tax in case of air transport business of non-residents; taxation of discontinued operation, merger and acquisition and etc.

(k) Special provisions relating to avoidance of tax

Avoidance of tax through transactions with non-residents; avoidance of tax through transfer of assets; avoidance of tax by transactions in securities; tax clearance certificates required for persons leaving Bangladesh; form of tax clearance and exemption certificates.

(l) Recovery of tax

Tax to include Penalty, Interest, etc.; notice of demand; penalty for default in payment of tax; certificate for recovery of tax; method of recovery by Tax Recovery Officer; power of withdrawal of certificate and stay of proceeding; validity of certificate for recovery; recovery of tax through collector of district; recovery of tax through special magistrates; other methods of recovery.

(m) Refunds

Requirement to issue refund voucher; entitlement to refund; claim of refund; correctness of assessment, etc., not to be questioned; refund on the basis of appeal order; form of claim and limitation; interest on delayed refund; adjustment of refund against tax.

(n) Appeal and references

Appeal against order of DCT and IJCT; tax payment before appeal; fees for appeal; time limits for appeal; appeal before the Appellate Joint Commissioner or the Commissioner [Appeals]; appeal against order of TRO; appeal to Tax Appellate Tribunal; reference to high court division of the Supreme Court; appeal to appellate division.

(o) Penalty, offences and prosecutions

Penalty for not maintaining accounts in the prescribed manner; penalty for failure to file return, certificate, statement, accounts of information; penalty for using fake TIN; penalty for failure to pay advance tax; penalty for non-compliance with notice; penalty for failure to pay tax on the basis of return; penalty for concealment of income; bar to impose penalty without hearing; previous approval of IJCT for imposing penalty; penalty to e prejudice to other liability; any other penalty as per income tax Act.

Punishment for non-compliance of certain obligations; punishment for false statement; punishment for improper use of TIN; punishment for using fake audit report; punishment for obstructing income tax authority; punishment for unauthorized employment; punishment for concealment of income; punishment for disposal of property to prevent attachment; punishment for disclosure of protected information; sanction for prosecution; power to compound offenses; trial by special judge.

(p) Accounting

Methods of accounting; change of accounting method; requirement of a company to furnish audited accounts.

A3. International taxation: Treaties and transfer pricing

Students will be able to understand implications of key provisions in treaties and transfer pricing regulations in Bangladesh, undertake strategic planning, identify transfer pricing compliance requirements and deal with compliance process including identification of international transactions, selecting most appropriate method, using transfer pricing databases to determine arm's length price and etc.

In the examination, students may be assessed through problem solving, strategic planning and writing professional advice in following areas:

(a) Double Taxation Relief and Treaties

- Meaning of Double Taxation;
- Agreement of Avoidance of Double Taxation;
- Relief in respect of income arising outside Bangladesh;
- Methods of avoiding double taxation;
- Tax treaty and OECD Model Tax Convention;
- Enforceability of the treaties;
- Interpretations of the important concepts used in treaties;
- Important areas addressed in treaties between Bangladesh and other countries;
- Understanding difference in the definition of 'Permanent Establishment' in ITA, 2023, traditional treaties, and OECD model tax convention;
- Attribution of profits to a Permanent Establishment;
- How is business profit of a foreign company carrying out activities in Bangladesh through a Permanent Establishment to be taxed in Bangladesh?
- How are capital gains, dividend etc. taxed using treaties?
- Provision for obtaining certificate from NBR to avail treaty benefit;
- Other commonly used provisions of treaties.

(b) Transfer Pricing

- Concept of transfer pricing;
- Overview of OECD guidelines related to transfer pricing;
- Transfer pricing regulations in Bangladesh;
- Understanding 'International Transaction' in ITA, 2023;
- Who are required to comply with transfer pricing regulations in Bangladesh?
- What are the compliance requirements under transfer pricing regulations in Bangladesh?
- Arm's length price;
- Methods of determining arm's length price;
- Application of different methods of determining arm's length price;
- Selection of most appropriate method for different nature of transactions;
- Benchmarking and use of databases;
- Comparability adjustments;
- Transfer pricing adjustment;
- Submission of statement of international transactions;
- Maintenance of transfer pricing documentations;
- Key contents of a transfer pricing documentation report;
- Certificate from an accountant;
- Assessment of transfer pricing cases;
- Penalties in transfer pricing regulation;
- Recent developments in transfer pricing global best practice;
- Strategic planning in different areas of international taxation.

B. Value Added Tax

Students will be able to identify various compliance requirements under Value Added Tax (VAT) system in Bangladesh, compute VAT payable, and deal with compliance process in relation to VAT. They will be able to design industry specific Standard Operating Procedure (SOP) for major industries in Bangladesh. In the examination, students may be assessed through complex scenario in following areas:

A) Concept of Value Added Tax

Similarities and dissimilarities between VAT and Income Tax; advantages of VAT over Sales Tax and Excise Duty; impact of VAT on national development; role of VAT chain in establishing financial integrity; tax expenditure; distortions in Bangladesh VAT system; introduction of online VAT systems.

B) VAT Planning

Planning for the components of VAT SOP for major 5-6 industries considering rates, place of imposition, registration, threshold, exemptions, zero rating, VAT administration, cross-border transaction, accounting, return filing, central or branch registration, compliance checklist and Complex areas for each industry.

C) VAT Compliance Issues

(i) Registration

Central and branch registration; Conditions for branch registration; preparation of registration application; Submission of application; Registration suspension and cancellation; Transferring Commissionerate; Updating registration information, Shifting Enlistment to Registration and vice versa; VAT Agent, VAT Consultant, Registration and enlistment related forms; DOs & DON'Ts checklist for registration.

(ii) VAT Assessment

Valuation: Preparation of value Declaration for major industries; Use of Fair market price for value determination, Valuation for services; Value declaration form preparation for manufacturer, commercial trader and service renderer. Review process for value declaration; Preparation a review application in case of increase value by commissioner; Art of presenting arguments before commissioner during personal hearing; Price determination in various special case, Costing and Valuation; Declared value versus transaction value complexity in ledger adjustment, DOs & DON'Ts checklist for valuation.

Output Tax: Determining adjustment process for real-time price and declared value in case of differences; Case studies; DOs & DON'Ts checklist for output tax calculation.

Input Tax Credit: Critical situations for credit: payment through banking channel, in case of bank guarantees, bartered transaction, partial credit for different situations; credit mechanism for real estate sector, construction sector, etc., DOs & DON'Ts checklist for credit.

Adjustments: Debit note and credit note; defining different scenarios of adjustment and developing checklist of legal & procedural requirements for each adjustment; DOs & DON'Ts checklist for adjustments.

Net Tax Calculation & Payment: Determination of net tax using different set of business transaction for different industries.

(iii) VAT Accounting

Invoices: Issuance of different types of invoice in different situations; designing invoices for different industries and technologies like POS, ECR/EFD; use of software and integration with NBR system;, use of Electronic Fiscal Device (EFD), Electronic Fiscal Printer (EFP), and Point of Sale (POS) software, list of NBR enlisted software, special provisions for invoice: utility services, telco services, banking services, ride sharing services, C&F service, Insurance service, etc., DOs & DON'Ts checklist for invoicing system.

Inventory: Case study and practical exercise on the filling up of the inventory register (Purchase Register & and Sales Register) with different data set of different industries from both Goods and service sectors. Maintaining different forms, filing process, adjustment for input-output coefficient mismatch, DOs & DON'Ts checklist for inventory management.

Account Current: Ways of reducing account current balance to reasonable amount; Migration from 1991 VAT act-based account current to new system under 2012 act-based system; Prepaid Vs Postpaid system in VAT system; Process of maintaining account current, DOs & DON'Ts checklist for cash flow management.

Other books of records Debit Note: Develop SOP for use of debit note, credit note, commercial books of records.

(iv) Return Filing

Preparation for backward excel based calculations for each component of return; data extraction from General Ledger for preparing return; synchronizing existing software with return; relation for return with price declaration form, invoice, inventory registers, account current and other VAT and commercial documents.

D) Zero rates

Process: Develop SOP for Exports (Deemed and Direct exports) including bonded warehouse.
Duty Drawback: DOs & DON'Ts checklist for drawback; Parallel Cash incentive and drawback.

E) Refund

Develop SOP for refund process covering critical situations.

F) Litigation

Case Management: Techniques of reviewing case, Seizure report and SCN and preparing review check list; Art of writing a good reply for SCN; Presenting in Hearing; Techniques of giving good arguments and counter logic in hearing; code of conduct in quasi-judicial courts.

Appeal: Reviewing Adjudication order, preparing a good petition; Presenting in Hearing; Techniques of giving good arguments and counter logic in hearing; code of conduct in quasi-judicial courts**.**

G) VAT Audit

Dealing audit

H) Miscellaneous

Different relevant issues.

VAT on Cross-border Transactions

- Place of taxation rules;
- Modes of cross-border transactions;
- Electronic transactions;
- Taxation in different situations and design the solutions;
- Future threats of VAT.

Skills	How skills are assessed?
Assimilating and using information: • Understand the situation and the requirements • Identify and use facts, figures and relevant information • Identify and priorities key issues	Candidates may be required to identify tax implication, and compute tax liability in given scenario; demonstrate technical skills, use accurate calculations to illustrate a solution; and decision making in complex tax scenarios.
Structuring problems and solutions • Structure data in accordance with the requirements • Apply technical knowledge and skills to develop evidence-based solution	Candidates may be required to identify tax implication, and compute tax liability in given scenario; demonstrate technical skills, use accurate calculations to illustrate a solution; and decision making in complex tax scenarios.

Applying Judgment Candidates may be required to critically evaluate.

Apply professional skepticism fact, figures and tax implication in given tax.

Demonstrate critical thinking scenarios, assess alternative options and consequences of various courses of action.

Concluding, recommending and communicating: Apply technical knowledge to support conclusion; Present analysis and recommendations in accordance with the requirements; Present solution in a clear and concise style.	Candidates may be required to analyze given circumstances, determine tax implications, develop solution and reach a reasoned conclusion.

Chapter 1

Sources and Structure of Bangladesh Income Tax Law

Introduction

Learning objectives

Examination context

Topic list

1.1 Introduction

1.2 Bangladesh tax structure

1.3 Sources of tax law and practice of income tax

1.4 Scope of Bangladesh income tax

1.5 Structure of Income Tax Act, 2023

1.6 Objectives and importance of income tax

1.7 Role of income tax in economic development of Bangladesh

1.8 Some definitions & important concepts relating to tax

1.9 The concept of income

1.10 Capital and revenue

1.11 Tax and income tax

1.12 Different rates of tax

1.13 Liability to pay tax

1.14 Tax liability on income

1.15 Some significant issues of income tax

Worked examples & solutions

Introduction

Learning objectives

- Identify the objectives of tax in terms of economic, social justice and environmental issues;
- Recognize which taxes apply to different taxpayers e.g., individual, partners and companies;
- Identify the sources of tax law;
- Get the idea about the income and income tax;
- Know the history of income tax;
- Recognize different rates of income tax applicable to individual, corporate and others;
- Understand the concept of capital and revenue expenditure;
- Identify the residential status of an assessee.

Practical significance

Every person in Bangladesh is affected by our tax system in some ways, often on a daily basis and without even realizing it. We pay tax on the money we earn and, on the things, we buy and this tax is of course used by the government to pay for our development purpose such as schools, hospitals, roads and so on.

In Bangladesh we have an annual budget cycle which begins with the pre-budget report in late May/early June and ends with the enactment of a Finance Act in June every year. This is supplemented by a huge body of case laws and practical interpretation.

The Income Tax Act, 2023 ("ITA, 2023"), Value Added Tax and Supplementary Duty Act, 2012, Customs Act, 2023 are the main sources of tax law. The National Board of Revenue (NBR), a statutory body is the highest authority for the purpose of these acts.

Income of different types are taxed at different rates. Before calculating income tax liability, one should have the concept of income, tax, tax rate and other relevant issues. Residential status has significance for determining tax liability.

One way of helping people to deal with complexity in the tax system is to use technology. Presently people can use computerized system to calculate tax on his/her taxable income. NBR is actively incorporating automated processes to streamline and enhance tax compliance procedures.

Stop and think

It is likely that you have been paying tax personally on your various sources of income/gains for some time. Have you stopped to think about how this affects the actions that you take?

Working context

The impact of taxation on the overall economy and the society is increasing day by day. Tax is charged on different types of assesses like individual, companies and others. The volume and complexity of tax law is now such that many business houses have to spend considerable amounts of money and time just on tax administration and planning. Many business decisions will have tax consequences. Most large corporate houses operate their business on a global basis.

Without advice from an accountant, a business can easily find itself paying too much tax and missing deadlines. It is important to have a good overall feel for the tax system early in your studies so that you know where to look for the detailed rules when you actually need them later on.

Syllabus links

The topics covered in this chapter are essential background knowledge which will underpin the whole of your Taxation studies.

Examination context

Exam requirements

In the examination, candidates may be required to:

- Identify the social justice principles being applied for taxation purposes;
- Understand which taxes apply to different taxpayers;
- Identify the sources of tax law in Bangladesh;
- Define some terminologies relating to income tax;
- Determine the residential status of an assessee based on given information;
- Identify the five-tier tax rate for individual and other tax rates for other assesses.

Question practice

For question practice on these topics, go to the suggested questions and answers covering the basic idea about taxation.

Objectives

Section overview

- Taxation system of Bangladesh has developed gradually and has been changed by successive governments in accordance with their political philosophy;
- Governments use taxation to encourage or discourage certain types of economic activity;
- Taxation may be used to promote social justice but there is no political consensus on what is meant by this term;
- Environmental concerns have led to changes in taxation policy;
- Income tax is tax on income;
- The Act got its root from the then British India in 1860;
- Different tax rates are applicable for different types of assessee and classes of income;
- Income tax is levied on income and not on capital receipts;
- The distinction between capital and revenue receipts is much more difficult than between capital and revenue expenditure;
- Residential status is very vital for determining tax liability.

1.1 Introduction

Among direct taxes, income tax is one of the main sources of revenue of Bangladesh Government to generate funds for running its administration and also funding development expenditure. Income tax is broadly classified in two categories namely **"personal income tax"** and **"'corporate income tax"**. "Personal income tax" is tax on income of individuals, partnership firms etc. It follows a progressive rate structure, i.e., the rate of tax increases with income. However, starting from the assessment year 2026-27, partnership firms will be taxed at a flat rate. While "corporate income tax'' is tax on income of companies. It has a flat rate i.e.; rate of tax is same irrespective of level of income. Income tax is basically imposed on the principle of ability to pay. "The more a taxpayer earns the more he should pay''- is the basic principle of charging income tax. It aims at ensuring equity and social justice.

Bangladesh taxation system has developed over centuries from the then British India in 1860 to the present condition on a piecemeal basis. The system, however, developed on the basis of generally accepted canons and there had been efforts towards rationalizing the tax administration for optimizing revenue collection, reducing tax evasion and preventing revenue leakage through system loss.

In the fiscal scheme of our country, at present, income tax is levied along with other direct and indirect taxes like VAT, Excise duty, Customs duty, Gift tax etc.

Direct tax and Indirect tax

Direct taxes are those taxes incidence of which cannot be shifted on others. The person paying the tax shoulders the entire burden of tax. This is basically tax on person (both physical & legal person).

Whereas indirect taxes are those taxes incidence of this is shifted by the person paying the tax to others like his customers. These are basically tax on goods or services.

1.2 Bangladesh tax structure

The tax structure of Bangladesh consists of both direct taxes (income tax, gift tax, foreign travel tax, land development tax, non-judicial stamp, registration, immovable property tax, etc.) and indirect taxes (customs duty, excise duty, motor vehicle tax, narcotics and liquor duty, VAT, Turnover tax, SD, etc.). Analysis of revenue collection activities in Bangladesh reveals that tax revenue accounts for 85% of government revenue.

In the national budget, tax revenue is classified in two categories (on the basis of tax enforcing agency). They are NBR tax and non-NBR tax. The nomenclatures of NBR tax are income tax; value added tax, excise duty, turnover tax, export duty, import duty, regulatory duty, supplementary duty, travel tax, gift tax etc. The share of NBR tax to total tax revenue is around 96%.

The nomenclatures of non-NBR tax are land revenue, non-judicial stamp, motor vehicles tax, registration fees, narcotics and liquor duty etc.

The significant features of Bangladesh tax system are as follows:

A) Multiple tax system

The tax system of Bangladesh consists of various types of taxes which are as follows:

(1) Taxes on income and profit

1. Income tax – Company;
2. Income tax – Persons other than company.

(2) Taxes on property & capital transfer

1. Gift tax;
2. Land Revenue;
3. Stamp Duty - non judicial.

(3) Taxes on goods and services

1. Customs Duties (both on import and export);
2. Excise Duties;
3. Value Added Tax (VAT);
4. Turnover tax;
5. Supplementary Duty (usually on luxurious and socially undesirable items);
6. Road tax;
7. Electricity Duty;
8. Narcotics Duty;
9. Other taxes and duties (for example travel tax).

B) Tax administration in Bangladesh

National Board of Revenue (NBR) is the supreme authority for tax administration in Bangladesh and collects around 85% of total revenue for the country. Various reform measures have been taken and still in consideration to make the tax system of the country more effective and efficient.

C) Tax avoidance behavior of the taxpayers

The culture of tax compliance is low. Due to weakness of enforcement the level of tax evasion & avoidance remains high. The reliance on indirect taxation has been treated as one of the main obstacles in attaining economic progress in Bangladesh since only a few tax payers share the burden of taxes. Despite NBR's untiring effort, the progress is not still satisfactory. People especially corporate entities use various measures to evade tax using loopholes of the current tax system.

D) Narrow tax base

Our tax base is too narrow and the tax law is full of exemptions and allowances. Agricultural sector provides employment for around 60 percent of the population contributes only 20 percent of GDP and virtually pays little in the form of income tax. Narrow tax base remains a big obstacle in augmenting tax revenue.

From the above discussion, it is clear that attaining an optimal tax structure is one of the most important issues for the government of Bangladesh to increase the revenue generation from taxes for accelerating growth and to improve the quality of life of the citizens. A long-term sustainable solution to enhance transparency, promote growth, improve tax compliance and thus to increase tax to GDP ratio is a much desirable issue in the context of Bangladesh.

Furthermore, the tax collection in Bangladesh is more skewed towards collection on indirect tax. In OECD countries the trend is normally opposite where direct tax contributes more than 60% of the total tax collection of the country. These also somewhat indicate inefficient tax structure of the country.

1.3 Sources of tax law and practice of income tax

A. Legislation

The legislations behind income tax regulation are as follows:

1. Income Tax Act, 2023
2. Income Tax Rules
3. Finance Act/Ordinance of the respective year and its clarification given by the NBR
4. Double Taxation Avoidance Agreements (DTAA)
5. Statutory Regulatory Order (SRO).

B. Case laws

Over the years, many hundreds of tax cases have been brought before the courts where the interpretation of the tax law is not clear.

Decisions made by the honorable judges to resolve these cases form case laws. Many judgments are precedent for future cases which means that they must be followed unless superseded by legislation or the decision of higher court.

C. NBR publications

The National Board of Revenue (NBR) is a statutory body having the highest executive authority and empowered to make necessary rules relating to income tax matters. NBR makes available some forms, notifications, brochures, and guidelines of income tax, VAT and customs duty through its websites and other forms of communication for public at large. NBR also issues instructions & guidance to subordinate tax office which is a binding on them. There are many SROs and circulars on income tax and VAT published by NBR providing guideline for tax purpose.

1.4 Scope of Bangladesh income tax

Some provisions, rules and regulations have to be kept in mind in order to determine income tax. These are as follows:

(a) **The Income Tax Act, 2023**: The Income Tax Act, 2023 came into force on 22nd June 2023. It is divided into 25 chapters with numerous sections, sub-sections, clause, sub-clause, proviso and eight schedules.

(b) **Income Tax Rules**: The procedural matter required to implement the tax regulations is incorporated in Income Tax Rules. NBR is empowered to make or amend rules. Additionally, Rules for Tax Deducted at Source, 2026 and Rules for Income Tax Return Preparer, 2023, Rules for Alternative Dispute Resolution, 2024 have already been issued by the NBR. Moreover, some of the rules in the Income Tax Rules, 1984 have not yet been replaced and thus remain in effect.

(c) **Finance Act/Ordinance:** To give effect to the various proposals in the annual budget covering the areas of direct and indirect taxes. It contains:

- tax rates.
- amendments of the clause/sub-section/section/schedule in laws relating to government tax or non-tax revenue.
- insertion of new clause/sub-section/section/schedule in the existing laws relating to government tax or non-tax revenue.
- deletion of old clause/sub-section/section/schedule in the existing laws relating to government tax or non-tax revenue.

- introduction of new laws relating to government tax or non-tax revenue.
- Refinement of existing law.

(d) **SRO (Statutory Regulatory Order):** SROs are subordinate law. Section 343 of the Income Tax Act, 2023 empowers NBR to make Rules and section 76(1) of the Income Tax Act, 2023 empowers to issue notification via government gazette to exempt tax of a class of persons.

(e) **Income tax case law:** During assessment proceedings, dispute may arise between the NBR and the assessee over the interpretation of some of the provisions of the act and rules. The assessee can go the court objecting the NBR's interpretation, and the judgments given by the courts act as guidance to the assessing officers and the assessee in similar nature in the future.

1.5 Structure of Income Tax Act, 2023

The Income Tax Act, 2023 came into force on 22nd June 2023. A brief description regarding the workbook is enumerated below:

I. The Income Tax Act, 2023 – Parts and Sections

Part	*Title*	*Sections*
1	Preliminary	1-3
2	Tax administration	4-12
3	Taxes Appellate Tribunal	13-17
4	Charge of income tax	18-28
5	Computation of income	29-75
6	Exemptions, deduction, and tax holiday	76-85
7	Payment of tax	86-162
8	Special provision relating to advance tax, final tax and turnover tax	163-164
9	Return, statements, and records	165-179
10	Assessment of tax and audit	180-196
11	Limitation of time	197
12	Collection of information	198-211
13	Recovery of tax evaded	212-213
14	Recover of income tax, set off and refund	214-229
15	Prevention of tax avoidance	230-243
16	International agreement management	244-251
17	Agency, representative and related matters	252-260
18	Registration of assessee	261-265
19	Penalty	266-284
20	Revision, appeal and reference	285-308
21	Protection of information	309
22	Offences and prosecution	310-326
23	Authorized representative	327
24	Electronic tax management	328
25	Miscellaneous	329-345

II. The Income Tax Act, 2023 - Schedules

SL #	*Schedule*	*Title*
1	First Schedule	Voluntarily disclosure of income
2	Second Schedule	Approved funds
3	Third Schedule	Depreciation allowances, depletion allowances, and amortization
4	Fourth Schedule	Computation of the profits and gains of insurance business
5	Fifth Schedule	Computation of profits and gains in certain cases
6	Sixth Schedule	Tax exemption, rebate, and credit
7	Seventh Schedule	Special tax rate
8	Eighth Schedule	Special provisions

III. The Income Tax Rules

The Income Tax Rules comprise rules to supplement various sections and provisions of the Income Tax Act, 2023. National Board of Revenue (NBR) enjoys flexibility to amend or change any rules through the notification in the official gazette.

IV. Rules of Tax Deducted at Source, 2026

The TDS rules have been published to align with the new tax law, which has essentially replaced certain provisions in the IT Rules, 1984 concerning tax deduction, source collection, and related statements.

V. Rules of Income Tax Return Preparer, 2023

This is in line with the appointment, terms of activities, and related provisions for Income Tax Return Preparers, which constitute a new addition in the tax legislation.

1.6 Objectives and importance of income tax

Taxation is one of the major sources of revenue to Government. The main objectives of taxation are (a) to meet the country's development expenditure (b) to accomplishing some economic and social objectives, such as redistribution of income, encouraging savings, price stabilization and discouraging consumption of harmful and socially undesirable goods. Importance of income tax is as follows:

(a) Revenue collection: Income tax is a major source of revenue for the government. In Bangladesh, income tax revenue accounts for nearly 35% of total tax revenue. Therefore, the first and foremost aim of income tax is to raise public revenue to meet the ever-increasing public expenditure.

(b) Re-distribution of income: An effective, efficient and fair taxation system can reduce inequalities in income and wealth. This is possible by taxing rich people heavily and to confer benefit to the poorer section through progressive income tax.

(c) Increase in savings: An effective and efficient tax system encourages people to save through providing tax credit facilities on investment allowance.

(d) Increase in capital investment: An effective and efficient tax system encourages local and foreign investors to invest in the country through providing various facilities like tax credit facilities on investment allowance, tax holiday scheme, depreciation allowance, tax incentives etc.

(e) Economic development: The income tax revenue can be used by the government to ensure the economic development of the country. It can be used to build the infrastructure, to

invest in social security programs, in various poverty elevation programs. The incentive to investment also encouraging production & there by growth of GDP.

So, from the above discussion it is clear that, income tax plays a very significant role in the economic development of a country. For this reason, various reform strategies have been taken to modernize NBR.

1.7 Role of income tax in economic development of Bangladesh

As it has been discussed before, taxation is one of the major sources of public revenue to meet a country's revenue and development expenditures with a view to accomplishing some fundamental economic and social objectives, such as redistribution of income, price stabilization and discouraging harmful consumption. The contribution of income tax is playing a pivotal role in the economic development of Bangladesh. The government of Bangladesh has taken various measures to modernize the tax system and imposed various provisions in the Income Tax Act, 2023. Some of the provisions are as following:

(a) **Tax holiday scheme:** As per Section 81 of the Income Tax Act, 2023, board may grant tax holiday to an entity whose income shall be fully or partially exempt from tax, or eligible for a reduced tax rate. To qualify, the entity must be either a statutory body established under Bangladeshi law with its head office in Bangladesh or a company incorporated under the Companies Act, 1994 with a minimum paid-up capital of BDT 2 million at the commencement of commercial operations and a registered office in Bangladesh. Additionally, the entity must be newly established (not formed through the splitting, reconstruction, or reconstitution of an existing business), use new factories, machinery, and other significant fixed assets, obtain TIN, and maintain separate books of accounts in accordance with the Income Tax Act.

This arrangement is commonly referred to as the Tax Holiday Scheme. The primary aim of implementing this scheme is to foster economic growth via industrialization, thereby attracting investments in targeted sectors.

(b) **Income tax exemptions to exporters' income:** From July 1, 2023, to June 30, 2028, a 50% exemption will be granted for income derived from export conducted by individuals, partnership firms, and Hindu Undivided Families (HUFs). For other taxpayers, the applicable tax rate will be 10% or 12%. 10% rate is applicable to income from export derived from Leadership in Energy and Environmental Design (LEED) certified factories. This arrangement is outlined in SRO No. 210, dated June 26, 2023.

(c) **Certain IT-enabled services are eligible for tax exemption:** In accordance with Paragraph 21 of Part I of Schedule Six, specific information technology-based services are granted tax exemption from July 1, 2024, to June 30, 2027, with the aim of fostering growth within the IT sector.

(d) **Accelerated depreciation allowance:** Accelerated Depreciation allowance is allowed on the new plant and installation used in various industries at a specified rate (60% of the cost in the 1st year and remaining 40% in the 2nd year).

(e) **Tax incentives for small & medium industries:** As per Paragraph 24 of Part I of the Sixth Schedule, tax incentives are granted on the income and profits of small and medium enterprises, aimed at promoting investments in industries that hold the potential to make substantial contributions to the economy.

(f) **Tax incentives for encouraging savings:** The government also encourages savings providing tax rebate and investment tax credit facilities on certain types of investment and expenses such as, purchase of shares and debentures, savings certificate, Deposit Pension Scheme, insurance premium, provident fund etc.

(g) Tax exemptions in certain expenditures: Certain expenditures to enhance social welfare like contribution to designated relief fund, zakat fund, some specific institutions engaged in social development program and wellbeing of the society are exempted from tax payment.

(h) Tax incentives for foreign investors: For· attracting foreign investors various concessions like tax holiday, tax exemptions for interest, royalty, technical assistance and fees, remittance to own country have been allowed.

(i) Allowance for scientific research: For developing new products, technologies in the industrial sectors certain allowance is allowed. Tax rebate is given on the cost of relevant scientific research.

(j) Tax incentives for remittance to Bangladesh: A significant number of Bangladeshi people work abroad and to encourage them remittances through banking channel has been declared tax exempted.

So, it can be said that to ensure the economic development of the country certain provisions have been introduced in the ITA, 2023. These provisions encourage not only foreign investors but also the local entrepreneurs.

1.8 Some definitions & important concepts relating to tax

1. **Assessee [u/s 2(22)]:** "assessee", means any taxable income earner and includes following person, namely –
   (a) a person by whom any tax or other sum of money is payable under IT Act, 2023;
   (b) every person whose income, or income of any other person assessable;
   (c) person for whom proceedings under IT Act, 2023 have been taken to determine the amount due to him;
   (d) person by whom a minimum tax is payable;
   (e) person liable to file or furnish any return, document or statement;
   (f) person desires to be assessed and file return;
   (g) person deemed to be an assessee or assessee in default under this IT Act, 2023;
   (h) person against whom any proceedings under the Act have been taken.
2. **Assessment year [u/s 2(24)]:** "assessment year" means the period of 12 months commencing on the first day of July every year; and includes any such period which is deemed, under the provisions of this Act, to be the assessment year in respect of any income for any period.
3. **Business [u/s 2(70)]:** "business" includes –
   (a) Any trade, commerce or goods manufacture;
   (b) Any trade, commerce or production of goods related risk undertaken or endeavor;
   (c) Exchange of goods or services of any for profit or not for profit entity;
   (d) Any profession or occupation.
4. **Capital asset [u/s 2(77)]:** "capital asset" means
   (a) Property of any kind held by an assessee;
   (b) Any business or undertaking entirely or unit wise;
   (c) Any securities.
   (d) Any non-business goods such as personal gold, silver, jewellery, gems and diamonds, metallic coins, precious metals, paintings, antiques, and club memberships.

However, following matters shall not include –

(a) any stock-in-trade, consumable stores or raw materials held for the purposes of his business;

(b) personal effects, that is to say, movable property (including wearing apparel, furniture, fixture, equipment and vehicles), which are held exclusively for personal use by, and are not used for purposes of the business or profession of the assessee or any member of his family dependent on him.

5. **Charitable purpose [u/s 2(43)]:** "charitable purpose" means –

(a) Relief for the poor, education relief, medical relief; and

(b) The improvement and extension of any purpose of general public utility.

Provided that the improvement or extension of any general-public utility shall not be deemed to be a charitable purpose –

(i) Unless it is approved by the Commissioner of Taxes;

(ii) If it is involved in any of the following activities -

- Any activities in the nature of trade, commerce or business whatever its nature or type
- If any services rendered in exchange of consideration and the total value of consideration exceeds Tk. 1 (one) crore in any income year.

6. **Child [u/s 2(84)]:** "child", in relation to any individual, includes a step-child and an adopted child of that individual.

7. **Company [u/s 2(31)]:** "company" means a company as defined in the Companies Act, 1994 (VIII of 1994)] and includes-

(a) The liaison office, representative office or branch office or permanent establishment of a foreign entity;

(b) Any entity registered under or by the laws of any country outside Bangladesh;

(c) Entity engaged in activities of bank, insurance or leasing or finance;

(d) Any organization registered with NGO Affairs Bureau or Microcredit Regulatory Authority;

(e) Any firm, Association of Person, artificial judicial person if any partner or any person participating in its formation is a company under the Companies Act, 1994;

(f) State owned entity, company, corporation, board, statutory or autonomous Body or authority having business activities;

(g) Any such foreign association or body not incorporated by or under any Act, which may be declared as a company by the Board by general or special Order for the purpose of this Act.

8. **Deputy Commissioner of Taxes [u/s 2(17)]:** "Deputy Commissioner of Taxes" means a person appointed to be a Deputy Commissioner of Taxes u/s 4, and includes a person appointed to be a Transfer Pricing Officer, Assistant Commissioner of Taxes and an Extra Assistant Commissioner of Taxes.

9. **Dividend [u/s 2(81)]:** "dividend" includes--

(a) any distribution by a company of accumulated profits, whether capitalized or not, if such distribution entails the release by the company to its shareholders of all or any part of its assets or reserves;

(b) any distribution by a company, to the extent to which the company possesses accumulated profits, whether capitalized or not, to its shareholders of debentures, debenture-stock or deposit certificates in any form, whether with or without interest;

(c) any distribution made to the shareholders of a company on its liquidation to the extent to which the distribution is attributable to the accumulated profits of the company immediately before its liquidation, whether capitalized or not;

(d) any distribution by a company to its shareholders on the reduction of its capital, to the extent to which the company possesses accumulated profits, whether such accumulated- profits have been capitalized or not;

(e) any profit remitted outside Bangladesh by a company not incorporated in Bangladesh under the Companies Act, 1994 (VIII of 1994);

(f) any distribution of profit of a mutual fund or an alternative investment fund

(g) any payment by any company of any sum (whether as representing a part of the assets of the company or otherwise) by way of advance or loan to a shareholder director or any payment by any such company on behalf, or for the individual benefit, of any such shareholder, to the extent to which the company, in either case, possesses accumulated profit.

But does not include –

(i) a distribution made in accordance with sub-clause (c) or sub-clause (d) in respect of any share including preference share for full cash consideration, or redemption of debentures or debenture-stock, where the holder of the share or debenture is not entitled in the event of liquidation to participate in the surplus assets;

(ii) any advance or loan made to a shareholder in the ordinary course of its business, where the lending of money is a substantial part of the business of the company;

(iii) Any dividend paid by a company which is set off by the company against the whole or any part of any sum previously paid by it and treated as dividend within the meaning of sub-clause (e) to the extent to which it is so set off;

(iv) any bonus share issued by a company.

(v) Distribution of after-tax profit of a Joint Venture arrangement to its partners other than a natural person.

10. **Employer [u/s 2(47)]:** "employer" includes a former employer.

11. **Employee [u/s 2(25)]:** "employee", shall include directors or managing directors and any person performing management affairs of the company or business irrespective of their designation. Employee also includes any person receiving salary from the employer and working under the direction of the employer, including all persons receiving income from employment as per section 32, but does not include any daily labour and tea garden labour.

12. **Fair market value [u/s 2(48)]:** "fair market value" means, value determined by the Board.

13. **Fees for technical services [u/s 2(30)]:** "fees for technical services" means any consideration including any lump sum consideration for the rendering of any managerial, technical or consultancy services (including the provision of services of technical or other personnel) but does not include:

    (a) Consideration for any construction, assembly, mining or like project undertaken by the recipient, or

(b) Consideration which would be income of the recipient classifiable under the head "Income from Employment'.

14. **Income [u/s 2(13)]:** "income" includes:

(a) any income, profits or gains, from whatever source derived, chargeable to tax under any provision of this Act;

(b) any amount which is subject to collection or deduction of tax at source under any provision of this Act;

(c) any loss related to income, profits or gains;

(d) the profits and gains of any business of insurance carried on by a mutual insurance association computed in accordance with paragraph 8 of the Fourth Schedule;

(e) any sum deemed to be income, or any income accruing or arising or received, or deemed to accrue or arise or be received in Bangladesh under any provision of this Act;

(f) any such money, payment or transaction on which a tax is imposed.

15. **Income year [u/s 2(15)]:** "income year", means financial year immediately preceding the assessment year and includes:

(a) the period beginning with the date of setting up of a business and ending with the thirtieth day of June following the date of setting up of such business;

(b) the period beginning with the date on which a source of income newly comes into existence and ending with the thirtieth day of June following the date on which such new source comes into existence;

(c) the period beginning with the first day of July and ending with the date of discontinuance of the business or dissolution of the unincorporated body or liquidation of the company, as the case may be;

(d) the period beginning with the first day of July and ending with the date of retirement or death of a participant of the unincorporated body;

(e) the period immediately following the date of retirement, or death, of a participant of the unincorporated body and ending with the date of retirement, or death, of another participant or the thirtieth day of June following the date of the retirement, or death, as the case may be;

(f) in the case of bank, insurance financial institution or any financial institution the period of 12 months commencing from the first day of January of the relevant year.

Provided that the DCT may allow a different financial year for a company which is a subsidiary, including a subsidiary thereof, or holding company of a parent company incorporated outside Bangladesh or a branch or liaison office thereof if such company requires to follow a different financial year for the purpose of consolidation of its accounts with the parent company.

16. **Person [u/s 2(69)]:** "person" includes an individual, firm, company, Hindu Undivided Family (HUF), Association of Persons (AOP) formed whether for income, profit or not, and any Artificial Juridical Person (AJP) not covered by the preceding categories. For this purpose, an AJP includes all types of private institutes, trusts, funds, religious or charitable organizations, endowments, and any asset or establishment that earns income, owns wealth, holds rights, incurs tax liabilities, or is recognized as a taxpayer.

17. **Association of Persons (AOP) [u/s 2(69A)]:** AOP is a body, association, society, joint venture, or other arrangement formed, constituted, or deemed to be formed by two or more persons, whether voluntarily or otherwise, for a common purpose and engaged in activities intended to generate income, profit, or economic benefit. However, the term does not include a company, firm, Hindu Undivided Family (HUF), or an artificial juridical person created by law.

18. **Recognized Provident Fund [u/s 2(90)]:** "recognized provident fund" means a provident fund which has been, and continues to be, recognized by the Commissioner of Taxes in accordance with the provisions of Part III of the Second Schedule.

19. **Resident [u/s 2(45)]:** "resident", in respect of any income year, mean

    (a) an individual who has been in Bangladesh-

        (i) for a period amounting in all to, 183 days or more in that year; or

        (ii) for a period of, or periods amounting in all to, 90 days or more in that year having previously been in Bangladesh for a period of, or periods amounting in all to 365 days or more during 4 years preceding that year;

    (b) a HUF, firm· or other association of persons, the control and management of whose affairs is situated wholly in Bangladesh in that year; and

    (c) a Bangladeshi company or any other company the control and management of whose affairs is situated wholly in Bangladesh in that year;

    (d) a trust, a fund or an entity, the control and management whose affairs is situated wholly in Bangladesh in that year.

20. **Royalty [u/s 2(79)]:** "royalty" means consideration (including any lump sum consideration but excluding any consideration which is classifiable as income of the recipient under the head "capital gains") for --

    (a) transfer of all or any rights, including the granting of a license in respect of a patent, invention, model, design, secret process or formula, or trade mark or similar property;

    (b) the imparting of any information concerning the working of, or the use of, a patent, invention, model, design, secret process or formula, or trade mark or similar property;

    (c) the use of any patent, invention, model, design, secret process or formula, or trade mark or similar property;

    (d) the imparting of any information concerning technical, industrial, commercial, or scientific knowledge, experience or skill;

    (e) any transfer of rights, including copyright or licensing of the film, other than sale, distribution or exhibition of the cinematograph film;

    (f) the rendering of any services in connection with any of the aforesaid activities.

21. **Tax [u/s 2(21)]:** "tax" means income tax, any types of additional tax, excess profit tax, penal tax, super tax, surcharge, penalty, interest, fee, and other chargeable or payable amount under this Act.

22. **Total income [u/s 2(78)]:** "total income" means the total amount of income referred to in section 26 computed in the manner laid down in this Act, and includes any income which, under any provision of this Act, is to be included in the total income of an assessee.

23. Transfer [u/s 2(93)]: "transfer", in relation to a capital asset, includes the sale, exchange or relinquishment of the asset, or the extinguishment of any right therein, but does not include-

(a) any transfer of the capital asset under a gift, bequest, will or an irrevocable trust;

(b) any distribution of the assets of a company to its shareholders on its liquidation; and

(c) any distribution of capital assets on the dissolution of a firm or other association of persons or on the partition of a Hindu undivided family.

24. Year [u/s 2(59)]: "year" means a financial year.

1.9 The concept of income

Concept of income in the Income Tax Act, 2023 is an inclusive definition but not exhaustive. It describes sources of income, but it refrains from saying what is income. It is also important to note that the word 'income' used in ITA, 2023 is not limited only to 'profit or gains' and hence in order to consider as income it is not necessary that it should constitute or provide a profit or gain to the assessee.

The illegality of income does not exempt it from tax; the revenue shall not be concerned with the tainting of illegality of income or its source.

There is no exhaustive definition of "income" in the Income Tax Act, 2023. The term income is easy to understand but difficult to define. What is taxed, as so often has been pointed out under the income tax law, is nothing that is real; it is the statutory income measured in a way.

The object of the Act is to tax "income". The term is expanded in many sections into income, profits and gains; but the expansion is more a matter of words than of substance. The word "income" is an expression of elastic ambit and the courts when describing income have almost always qualified their description by saying that it is not exhaustive.

From various judicial decisions, the following are held to be characteristics of income:

(a) Income should be received in the form of money or money's worth;
(b) Income should be in the form of revenue nature;
(c) It should arise from some definite source or a source with some sort of regularity;
(d) It should be derived from a person other than the recipient;
(e) Income tainted with illegality is also classified as taxable income under tax law.

Income is a more general term than profits or gains. The words "income, profits and gains" are used in a distinctive sense, and the word "income" is not limited by the word "profits" and "gains". A receipt may be taxable as income, although it may contain no element of profits or gain. Profits or gains mean something which is interest or fruit, as opposed to principal or tree. "Gains" is really equivalent to "profits". The profit of a trade or business is the surplus by which the receipts from the trade or business exceed the expenditure necessary for the purpose of earning these receipts.

Section 2(13) of the Income Tax Act, 2023 gives a definition of income which includes any income, receipts, profit or gains chargeable to tax and any loss thereof, any amount which is subject to collection or deduction of tax at source, any profit or gains of insurance business computed as per paragraph 8 of the Fourth Schedule, any sum deemed to be income or income deemed to arise or received in Bangladesh, any amount or payment or transaction on which tax is imposed. Income also includes acquisition of property which are not natural, not created by one's own effort, not obtained through foreclosure against liabilities or mortgages, not acquired by inheritance, bequest, estate, or trust, and not obtained through exchange or purchase.

(a) Shaw Wallace & Co case:

"Income in the Act connotes a periodical monetary return coming in with some sort of regularity or expected regularity from a definite source. The source need not be continuously productive, but it must be one where object is the production of a definite return, excluding anything a mere windfall. Income is essentially the product of something which is often loosely spoken as 'capital'. It is not correct to say that every receipt which is not a capital is assessable. On the other hand, it is only receipts that are of the nature of income receipts that are assessable……."

(b) Rani Amrit Kunwar case:

"Income, in order to be taxable, need not arise from any business activity, investment of enforceable obligation to pay, but may arise from voluntary or customary payments. Nor is it necessary that it should be the result of some outlay on the part of the assessee……"

Therefore, for the purposes of the Income Tax Act, 2023, income is a periodical monetary return coming in with some sort of regularity or expected regularity from a definite source, not excluded by the Act.

1.10 Capital and revenue

Difference between capital and revenue is of vital importance. **Income tax is levied on income and not on capital receipts.** While ascertaining the profits of a business or profession, the revenue expenditure is deductible from the trading receipts, not the capital expenditure. Courts have often observed that it may conclusively be judged that a receipt is a capital or a revenue receipt. Decided cases merely illustrate and not all are perfect guides.

The distinction between capital and revenue receipts is much more difficult than between capital and revenue expenditure. There are no hard and fast rules which may help in determining whether a receipt is a capital or a revenue receipt.

Whether expenditure is incurred solely to earn profit or whether it is a capital expenditure depends in each case on the nature of business, commercial practice, the nature of the expenditure and other relative circumstances. No rigid rules can be laid down in this connection.

Debt versus equity

Debt and equity classification is also very important for tax purposes because servicing of debt through interest payment is an allowable tax deduction but servicing of equity through dividend is not allowable tax deduction. In order to maximize tax benefit at times corporates structure their balance sheet gearing or debt-equity mix in such way that it can achieve highest tax benefit.

1.11 Tax and income tax

Income tax is the tax on income. Section 2(21) of the Income Tax Act, 2023 defines tax as follows: "tax" means tax payable on income and includes income tax, any types of additional tax, excess profit tax, penal tax, super tax, surcharge, penalty, interest, fee, and other chargeable or payable amount under this Act.

1.12 Different rates of tax

The different tax rates for different types of assessee for the assessment year 2026-27 are as follows:

(1) Tax rates for individual and Hindu Undivided Family:

The general threshold limit of total Income not liable to Income tax remains at Tk. 400,000.

Tax exempted ceiling of income for female assessee, and senior citizens ageing 65 or above is Tk. 450,000 and that for third gender assessee, handicapped/disabled person is Tk. 525,000 and for gazetted war wounded freedom fighter and July 2024 fighter is Tk. 550,000. The threshold limit in case of parents or legal guardian of any person with disability will be Tk. 50,000 more for each disabled dependent. If both father and mother of the disabled person is assessee then any one will avail this benefit.

Tax rates for the assessment year 2026-27 for general taxpayers are given below:

Tier	Income slab	Tax rate
1	First Tk. 400,000	0%
2	Next Tk. 300,000	10%
3	Next Tk. 400,000	15%
4	Next Tk. 500,000	20%
5	Next Tk. 2,000,000	25%
6	On rest of income	30%

(2) Tax rates for companies

Applicable tax rates for companies for the assessment year 2026-27 are as follows:

Type of taxpayers		Tax rates
Publicly traded companies off-loaded over 10% of shares via Initial Public Offer (IPO) or direct listing or Repeat Public Offer (RPO)		22.5%*
Other publicly traded companies		25%*
Private limited companies as defined in section 2(31)		27.5%*
Banks, insurance, and finance companies	Publicly traded	37.5%
	Non-publicly traded	40%
Cigarette, bidi, zorda and other tobacco product manufacturing companies		45%
Mobile phone operator companies	Publicly traded	40%
	Non-publicly traded	45%
Taxpayers other than company manufacturing cigarette, bidi, zorda, gul and other tobacco products		45%
Trust, association of persons and firm		27.5%
Co-operative societies		20%
Private university, private medical, dental and engineering college, and college of information and communication technology education		5%

*If all transactions in the income year are made through the banking channel, tax rate will be decreased by 2.5%.

Please note, employers will receive a tax rebate at a rate of 5% of the total tax liability or 75% of the salary paid to disabled persons if the employer offers jobs to disabled persons constituting over 10% of the total manpower or more than 25 persons. A similar tax rebate shall be applicable if the employer offers employment to third-gender people.

(3) Tax rate on dividend income for assessment year 2026-27:

Tax on dividend under Section 2(81) shall be:

(a) For individual taxpayers–15%, and
(b) For other taxpayers–20%.

(4) Tax rate on income from capital gain:

(a) For a company, Association of Person, or trust – 15%.

(b) For a taxpayer other than a company, Association of Person, or trust – 15% on capital gain arising from the transfer of listed securities.

(c) For a taxpayer other than a company, Association of Person, or trust, on capital gains other than from listed securities –

- If the capital asset is disposed of within 5 years from the date of acquisition, tax shall be payable on the total income including the capital gain at the regular rate;
- In other cases, tax shall be payable @ 15% on the capital gain.

(d) If any person receives an amount in excess of the deed value upon transferring any land or building, such excess amount shall be treated as capital gain, and tax shall be payable in accordance with this Clause. Provided that the excess amount shall be substantiated by bank statements and other documentary evidence.

(e) Tax at 5% will be applicable on capital gains derived from the sale of personal gold, silver, gold ornaments, silver ornaments, gems and diamond, metal coins and precious metal, which are not commercial goods.

(5) Tax on winning of lottery, word games, card games, online games or games of any similar nature shall be at the rate of 25%.

1.13 Liability to pay tax

A. Individuals

- Income tax: An individual may be liable to pay tax on the following income:
  - income from employment
  - income from rent
  - income from agriculture
  - income from business or profession
  - capital gain
  - income from financial asset, and
  - income from other sources

An individual used to be taxed annually on his total income at the rate prescribed at the Finance Act/Ordinance enacted every year.

B. Partnership

A partnership is a group of persons carrying on a business together with a view to making profit.

A partnership firm is a taxable entity. Previously tax was calculated at the normal slab rates applicable to individuals. However, from the assessment year 2026–27, income will be taxed at a flat rate of 27.5%. The share of income from the partnership firm shall be included in each partner's personal income, and tax shall be computed accordingly, as prescribed under section 80 of the Income Tax Act.

C. Companies

A company is an artificial person who is legally separated from its owners (shareholders) and its managers (directors). For the purpose of income tax, the meaning of company is defined under section 2(31) of the Income Tax Act, 2023.

A company is liable to pay income tax; the rate being determined with reference to the Finance Act enacted in every financial year.

1.14 Tax liability on income

Tax is payable in the assessment year on income earned during the income year, which is generally the immediately preceding year. However, the Income Tax Act, 2023 provides for the collection of tax during the income year through mechanisms such as tax deduction at source (TDS) and advance tax payments under Part VII of the Act.

1.15 Some significant issues of income tax

Assessment year:

The term assessment year refers to the twelve-month period that begins on 1st July and ends on 30th June immediately following the income year. It is the period during which the income of the preceding income year is assessed for tax purposes.

From the following example, we can see how to find out the assessment year:

Accounting year ended on	Income year	Assessment year
Financial year ending 30th June 2026	2025-26	2026-27
Accounting year ending 31st December 2025	2025	2026-27

Exceptions to the rule of assessment year:

Generally, income is taxed in the subsequent year to the income year. But, in certain cases, to protect the interests of revenue, the income is taxed in the year of earning itself. Thus, in those cases the assessment year and the income year are the same. The exceptions to the normal rule of assessment year are discussed as under:

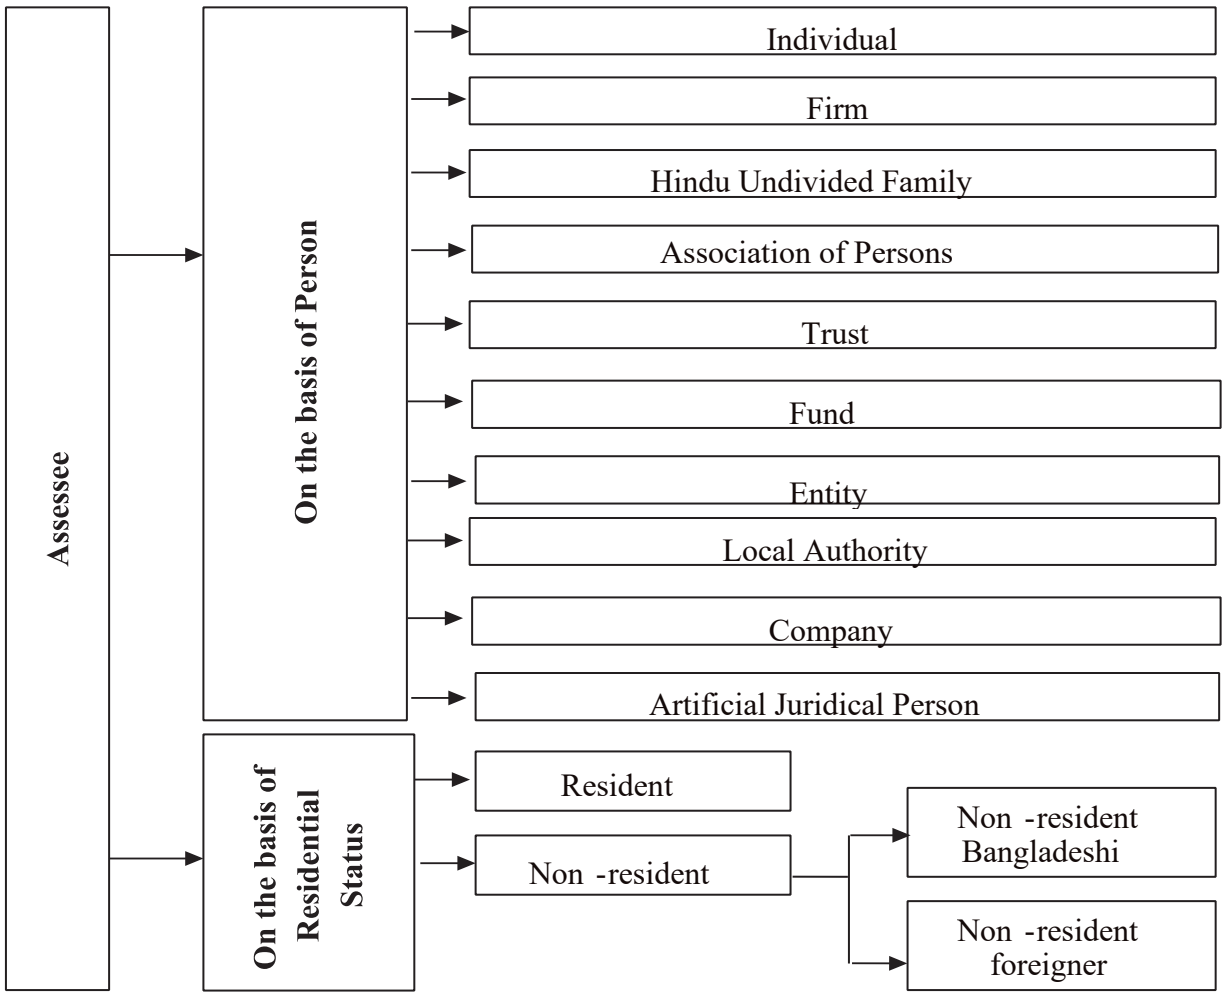

(a) **Income of discontinued business [Section 191]:** Where any business or profession is discontinued in any assessment year, the income of the period from the expiry of the last income year up to the date of such discontinuance may be charged to tax in that assessment year.

(b) **Persons leaving Bangladesh [Section 193]:** When it appears to the Assessing Officer that an individual may leave Bangladesh and has no intention to return, the total income of such individual for the period from the expiry of the income year in relation to the current assessment year up to the probable date of his departure from Bangladesh is chargeable to tax in current assessment year itself.

(c) **Income of non-resident shipping companies and airlines [Section 259 and 260]:** Section 259 and 260 of the ITA, 2023, provides for the taxation of income of non-resident shipping companies and airlines in the year in which they earn their income in Bangladesh, provided that such companies do not have any representative here.

Different classes of assessee:

As per ITA, 2023, assessee is a person who is liable to pay any sum under the Income Tax Act, 2023 or in respect of whom the proceedings have been under this Act. The below diagram depicts the different classes of assessee:

Residential status of an assessee:

Section 2(45) defines the term 'resident'" as follows: - 'Resident', in respect of any income year, means-

(a) An individual who has been in Bangladesh-

(i) for a period of, or for periods amounting in all to, 183 days or more in that year; or

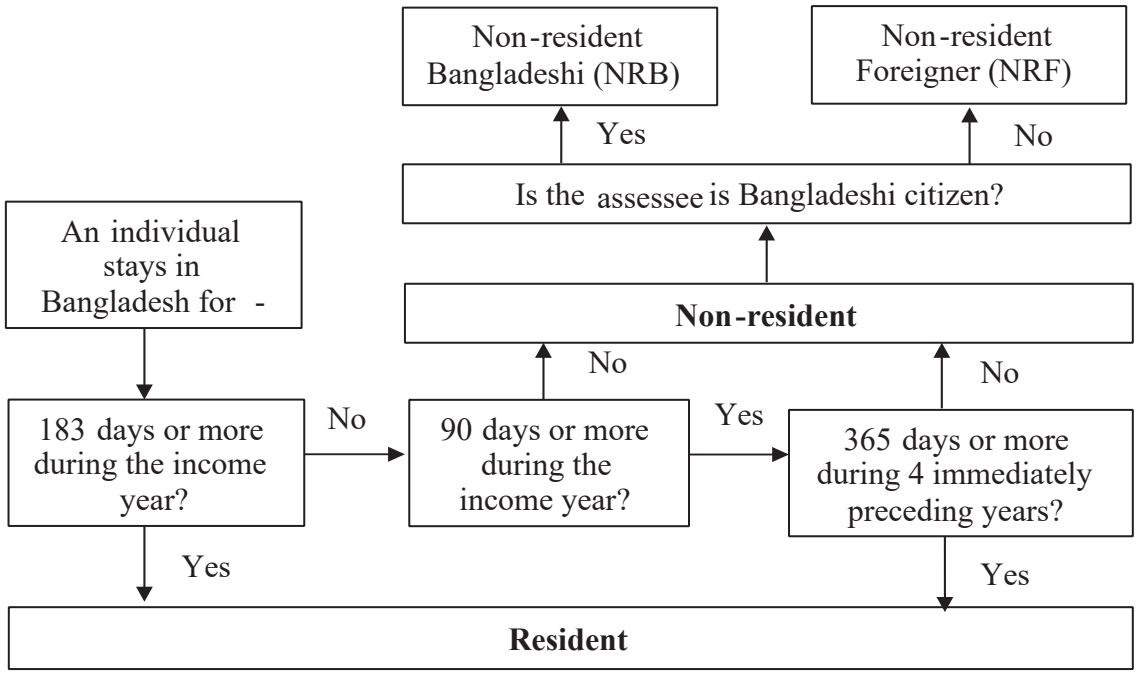

(ii) for a period of, or for periods amounting in all to 90 days or more in that year having previously been in Bangladesh for a period of, or for periods amounting in all to 365 days or more during 4 years preceding that year;

(iii) a Hindu un-dividend family, firm or other association of persons, the control and management of whose affairs is situated wholly or partly in Bangladesh in that year; and

(b) a Bangladeshi company or any other company the control and management of whose affairs is situated wholly in Bangladesh in that year; and, under section 2(4), 'non-resident' means a person who is not a resident.

It is important to note here that the concept of resident as defined in the Income Tax Act has nothing to do with the nationality of a particular individual. A foreign national may be treated as 'Resident' for a particular year if he or she fulfills the legal requirements as above, whereas a Bangladeshi national may be treated as a 'Non-resident' if he, or she does not fulfill the said requirements.

To test residential status of an individual, the following flow chart will be helpful:

In case if an individual is found to be resident in more than one country due to his/her physical presence, normally 'tie breaker rule' is applied. As per this rule first it needs to be ascertained which country is his/her citizenship. If it is found that he/she is a citizen of both countries, then it shall be ascertained where is his/her habitual residence is.

Bangladeshi resident company

Section 2(61) defined Bangladeshi company as those company formed and registered under the Companies Act 1994 as well as established or constituted by or under any Bangladeshi law and having its registered office in Bangladesh. As per Section 2(45(c)) of ITA, 2023 all such Bangladeshi company as well as any other company the 'control and management' of whose affairs is situated wholly in Bangladesh in that year shall be treated as Bangladesh resident.

Control and management

The concept of control and management generally refers to the place where the key decisions relating to the overall direction and management of a business are made, such as where board meetings are held, strategic decisions are taken, and senior management exercises its authority. It is possible for a company to be resident in one country while carrying on its trading or business activities in another. In India, this concept is expressed as the "Place of Effective Management (POEM)," which is defined as the place where the key management and commercial decisions necessary for the conduct of the business of an entity as a whole are, in substance, made. Accordingly, control and management do not necessarily depend on where the company's day-to-day trading or physical business operations are conducted. A landmark case on this principle is De Beers Consolidated Mines Ltd. v. Howe (1906), where a company

incorporated in South Africa was held to be resident in the United Kingdom because its central management and control were exercised from London. This principle has also been incorporated into many Double Taxation Avoidance Agreements (DTAAs) based on the OECD Model Tax Convention, which use the concept of effective management to determine corporate residence.

Taxation implication of resident or non-resident

Determination of residential status of an assessee has a significance bearing on the tax liability as incidence of income tax varies according to the residential status of an assessee. In this regard we can consider the following issues:

I. **To determine the amount of total income:** Determination of total income is different for residents and non-residents. Global income of a resident is deemed as his "total income". Whereas only income earned in Bangladesh of a non-resident is deemed as his "total income".

II. **To determine minimum limit of taxable income:** A resident or non-resident Bangladeshi individual is required to pay tax if their total income exceeds the prescribed tax-free threshold, which currently stands at Tk. 400,000 for general taxpayers. However, this minimum exemption limit does not apply to non-resident foreigners, who are liable to tax on any amount of income earned in Bangladesh.

III. **Tax rate**: For an individual– whether a resident or a non-resident Bangladeshi – income tax is calculated based on progressive slab rates, depending on the level of income. For example, the first Tk. 400,000 is taxed at 0%, the next Tk. 300,000 at 10%, and so on, following the applicable tax slabs. In contrast, a non-resident foreign individual is subject to a flat tax rate of 30% on their total taxable income, with no exemption threshold or slab benefit.

IV. **Investment tax credit**: An individual being a resident or non-resident Bangladeshi gets tax credit on certain investment. But, for a non-resident foreigner no investment tax credit is applicable.

V. **Tax liability**: The average tax rate applicable for a resident and non-resident Bangladeshi is less than that of a non-resident foreigner since tax is calculated using different tax rates based on income slabs. But a non-resident foreigner must pay tax straight at 30%.

Thus, determination of residential status of an assessee has a significant bearing on the tax liability as total income; and tax rate are found to vary according to the residential status of an assessee.

Impacts of residential status in assessing income:

Determination of residential status of an assessee has a significant bearing on the tax liability as incidence of income tax varies according to the residential status of an assessee as per section 26 of the ITA, 2023. Therefore, the scope of total income varies according to the residential status of an assessee. These provisions may be summarized as under:

Particulars of income	To be taxed or not	
	Resident	Non-resident
Income received or deemed to be received in Bangladesh	Taxable	Taxable
Income accrued or arose or deemed to accrue or arise in Bangladesh	Taxable	Taxable
Income accrued or arose outside Bangladesh	Taxable	Non-taxable

Worked example – 1.1

Mr. Uzzal, an Indian citizen, stayed in Bangladesh from 1st August 20X1 to 31st December 20X1 and left for London. What will be his residential status in the income year?

Solution

Mr. Uzzal is a non-resident since his stay in Bangladesh during income year is [31+30+31+30+31] = 153 days which is less than required 183 days.

Worked example – 1.2

Mr. Arif, a Bangladeshi citizen, stayed in Bangladesh from 1st July 20X1 to 31st December 20X1 and left for Japan. What will be his residential status in the income year?

Solution

Mr. Arif is a resident because he resides in Bangladesh during the income year is [31+31+30+31+30+31] = 184 days, which is more than required 183 days.

Worked example – 1.3

Mr. Akash stayed in Bangladesh from 1st September 20X1 to 31st January 20X2 and left for Trinidad. He came back on 1st May 20X2 and still staying in Bangladesh. What will be his residential status in the income year?

Solution

Mr. Akash is a resident because he resides in Bangladesh September 20X1 to January 20X2 [30+31+30+31+31] = 153 days and from 1st May to 30th June 20X2 [31+30] = 61 days. In total he stayed for [153+61] =214 days in the income year, which is more than required 183 days.

Worked example – 1.4

Mr. Rakesh Jason, a citizen of USA, has been staying in Bangladesh since 1st January 2021. He leaves Bangladesh on 16 July 2025 on a visit to USA and returns on 1st March, 2026. What will be his residential status in the income year 2025-26?

Solution

His stay in Bangladesh during the income year 2025-26 is:

July 2025	– 18 days
March 2026	– 31 days
April 2026	– 30 days
May 2026	– 31 days
June 2026	– 30 days
Total staying	**– 140 days**

His stay in proceeding 4 income years:

2024-25	– 365 days
2023-24	– 366 days
2022-23	– 365 days
2021-22	– 181 days [from 1st January 2021 to 30th June 2022]
Total stay	**– 1,277 days**

As his stay was more than 90 days in the income year 2025-26 and more than 365 days in the preceding 4 years, he is a resident.

Worked example – 1.5

Mr. Juris Reinhards, a British citizen comes every year to Bangladesh for 100 days since 2021-22 income year:

(a) Determine his residential status for the income year 2025-26.

(b) Will your answer be different if he comes to Bangladesh for 90 days instead of 100 days every year?

Solution

(a) He is a resident as he stayed in Bangladesh for 100 days (minimum 90 days) in the income year 2025-26 and 400 days (100 x 4) (minimum required 365 days) in the preceding 4 income years i.e., 2021-22, 2022-23, 2023-24 and 2024-25.

(b) Yes, the answer will be different. He will, in this case, be a non-resident as he stayed in Bangladesh for 90 days (equal to required minimum 90 days) in the income year 2025-26 but 360 days (90 x 4) (less than required 365 days) in the preceding 4 income years i.e., 2021-22, 2022-23, 2023-24 and 2024-25 as he failed to fulfill the required conditions.

Worked example – 1.6

Mr. Jashim Uddin was outside Bangladesh from 20thAugust, 2024 for an employment contract valid for two years, i.e., from 1stAugust, 2024 to 31st July, 2026. Mr. Jashim Uddin did not come to Bangladesh at any time during the year 2025. He finally came to Bangladesh on 10th January, 2026 and did not go back. Determine his residential status for the income year 2025-26.

Solution

Total number of days Mr. Jashim Uddin stayed in Bangladesh during respective years:

2025-26 (From 10th January, 2026 to 30th June, 2026): [22+28+31+30+31+30) = 172 days.

2024-25 (From 1st July, 2024 to 20th August, 2024): [31 +20) = 51 days.

2023-24 (From 1st July, 2023 to 30th June, 2024) = 365 days

2022-23 (From 1st July, 2022 to 30th June, 2023) = 365 days

2021-22 (From 1st July, 2021 to 30thJune, 2022) = 365 days

Mr.Jashim Uddin is a resident since he fulfills the second condition. His duration of stay in Bangladesh during the income year 2025-26 is 172 days which is more than required 90 days in that year, and [51+365+365+365) =1,146 days during previous 4 years which is more than required 365 days.

Worked example – 1.7

Mr. Jayed provides the following particulars of his period of stay in Bangladesh over last 6 years:

Year	Days
2020-21	40
2021-22	55
2022-23	182
2023-24	200
2024-25	94
2025-26	110

(a) Determine his residential status for the income year 2025-26.

(b) What will happen if he stays for 85 days in the year 2025-26?

(c) What will happen if he stays for 80 days in the year 2023-24?

(d) What will happen if he stays for 185 days in the year 2025-26 and total 360 days during last four years?

Solution

a) Mr. Jayed is a resident since he fulfills the second condition. His period of stay in Bangladesh during the income year 2025-26 is 110 days which is more than required 90 days in that year, and [55+182+200+94] = 531 days during previous 4 years which is more than required 365 days.

b) Mr. Jayed would be a non-resident since he doesn't fulfill the second condition. His stay in Bangladesh during income year 2025-26 is 85 days which is less than required 90 days in that year, although he stayed [55+182+200+94] = 531 days during previous 4 years which is more than required 365 days.

c) Mr. Jayed is a resident since he fulfills the second condition. His stay in Bangladesh during income year 2025-26 is 110 days which is more than required 90 days in that year and his total stay during previous four years is 411 days [55+182+80+94] which is more than the required 365 days.

d) Mr. Jayed would be a resident since he fulfills the first condition. His stay in Bangladesh during income year 2025-26 is 185 days which is more than required 182 days of the first condition. In such a case, it is not important to know regarding his stay during 4 preceding years.

Worked example – 1.8

Alex Associates is a partnership firm whose:

(a) Control and management of affairs is situated wholly in Bangladesh.
(b) Control and management of affairs is situated partly in Bangladesh.
(c) Control and management of affairs is situated wholly outside Bangladesh.

Determine the residential status of the firm.

Solution

(a) Resident; since control and management of affairs is situated wholly in Bangladesh.

(b) Non-resident; since control and management of affairs is not situated wholly in Bangladesh.

(c) Non-resident; since control and management of affairs is situated wholly outside Bangladesh.

Worked example – 1.9

HSBC is non-banking financial institution in Bangladesh whose:

(a) Control and management of affairs is situated wholly in Bangladesh.

(b) Control and management of affairs is situated partly in Bangladesh.

(c) Control and management of affairs is situated wholly outside Bangladesh.

Solution

(a) Resident; since control and management of affairs is situated wholly in Bangladesh.

(b) Non-resident; since control and management of affairs is situated partly in outside Bangladesh.

(c) Non-resident; since control and management of affairs is situated wholly outside Bangladesh.

Worked example – 1.10

Mr. Akanda has earned following income from various sources during the year 2025-26:

1. Salary income earned and payable in Bangladesh Tk. 100,000.
2. Profit of Tk. 40,000 from a business in London.
3. Profit of Tk. 60,000 from a business in Singapore. The Business has been managed and controlled wholly from Singapore.
4. Profit of Tk. 70,000 from a business in Dubai has not yet been brought in Bangladesh.

Compute the amount of total income of Mr. Akanda, assuming that he is a –

(a) Resident;
(b) Non-resident

Solution

Mr. Akanda
Computation of total income

Particulars	Resident Tk.	Non-resident Tk.
1. Income earned in Bangladesh: Salary income	100,000	100,000
2. Foreign income: Profit from business in London	40,000	-
Profit from business in Singapore	60,000	-
Profit from business in Dubai	70,000	-
Total income	**270,000**	**100,000**

Worked example – 1.11

The following are the particulars of income of Mr. Zaman for the income year 2025-26:

1. Rent from a property in Dhaka received in India Tk. 40,000
2. Income from a business in USA controlled from Bangladesh Tk. 150,000
3. Income from a business in Dhaka controlled from Pakistan Tk. 180,000
4. Rent from a property in Canada received there but subsequently remitted to Bangladesh Tk. 60,000
5. Interest from bank deposits in Canada Tk. 20,000

   Gifts received from his parents Tk. 45,000 which has been included in the returns of the both parties.

Compute total income of Mr. Zaman, assuming that he is a –

(a) Resident;
(b) Non-resident

Solution

Mr. Zaman
Computation of total income

Particulars	Resident Tk.	Non-resident Tk.
Rent from property in Bangladesh (wherever paid)	40,000	40,000
Income from business in USA controlled from Bangladesh (as income accrues outside Bangladesh)	150,000	
Income from business in Dhaka controlled from Pakistan (as it is received in Bangladesh)	180,000	180,000
Interest on bank deposits at Canada	20,000	
Total income	**390,000**	**220,000**

Note-1: Rent from a property in Canada received there but subsequently remitted to Bangladesh Tk. 60,000 is exempted from payment of tax as per 6th Schedule (Part –I) para-17.

Note-2: Gift from parents is tax free income if it is shown in the returns of both recipient and the donor.

Worked example – 1.12

From the following particulars of Mr. Rahman for the income year 2025-26, compute total income if he is resident or non-resident:

(a) Income from employment received in Bangladesh for services rendered in Afghanistan Tk. 40,000

(b) Income from profession in Bangladesh, but received in Nepal Tk. 150,000

(c) Profits earned from business in Chittagong Tk. 60,000

(d) Property income in South Africa Tk. 180,000 (out of which Tk. 90,000 was remitted to Bangladesh)

(e) Income from agriculture in Bhutan Tk. 20,000

Solution

Mr. Rahman
Computation of total income

Particulars	Resident Tk.	Non-resident Tk.
Income in Bangladesh (a) Income from employment received in Bangladesh	40,000	40,000
(b) Income from profession accrues in Bangladesh,	150,000	150,000
(c) Profits earned from business in Chittagong	60,000	60,000
Foreign income: (a) Property income in South Africa (b) Income from agriculture in Bhutan	90,000 20,000	-
Total income	**360,000**	**250,000**

Chapter 2

Tax Administration and Taxes Appellate Tribunal

Introduction

Learning objectives

Examination context

Topic list

2.1 Various income tax authorities

2.2 Appointment of income tax authorities

2.3 NBR and its functions

2.4 Subordination and control of income tax authorities

2.5 Power and functions and jurisdiction of income tax authorities

2.6 Taxes Appellate Tribunal

2.7 Alternate Dispute Resolution (ADR)

Self-assessment questions

Introduction

Learning objectives

- Identify the different income tax authorities;
- Powers and functions of NBR and other income tax authorities;
- Powers and functions of the Taxes Appellate Tribunal.

Practical significance

The income tax authorities are outlined in section 4 of the Act. Each class of authorities has definite functions and responsibilities.

Taxes Appellate Tribunal is not the income tax authority. The power and functions of the Tribunal are normally exercised by its Benches constituted by the President of the Taxes Appellate Tribunal.

Understanding of the structure of income tax authorities and the Tribunal's procedures are essential for both tax advisers and the assessee for dealing the tax matters when required.

Stop and think

Do you have the clear idea of the income tax authorities? Did you know that in case of practical income tax cases, the knowledge on the tax authorities is very important?

Working context

The knowledge on the administrative structure of income tax authorities and the Tribunal's procedures covered by this chapter are important for both the taxpayers and tax advisers to deal with it.

On behalf of assessee, the accountants are sometimes required to assist in submission of tax return, hearing to the court etc., so they should have a clear idea about income tax authorities and its powers and functions and the Tribunal's procedures in their mind to assist their clients in resolving relevant tax issues.

Syllabus links

The topics covered in this chapter are important to your understanding of income tax authorities and The Taxes Appellate Tribunal.

Examination context

Exam requirements

In the examination, candidates may be required to:

- Show the structure of various income tax authorities;
- Discuss the appointment procedures of income tax authorities;
- Mention the powers and functions of different income tax authorities;
- Identify the Taxes Appellate Tribunal.

Question practice

For question practice on this topic, please go to the suggested answers of this chapter.

ADMINISTRATION AND TRIBUNAL

Section overview

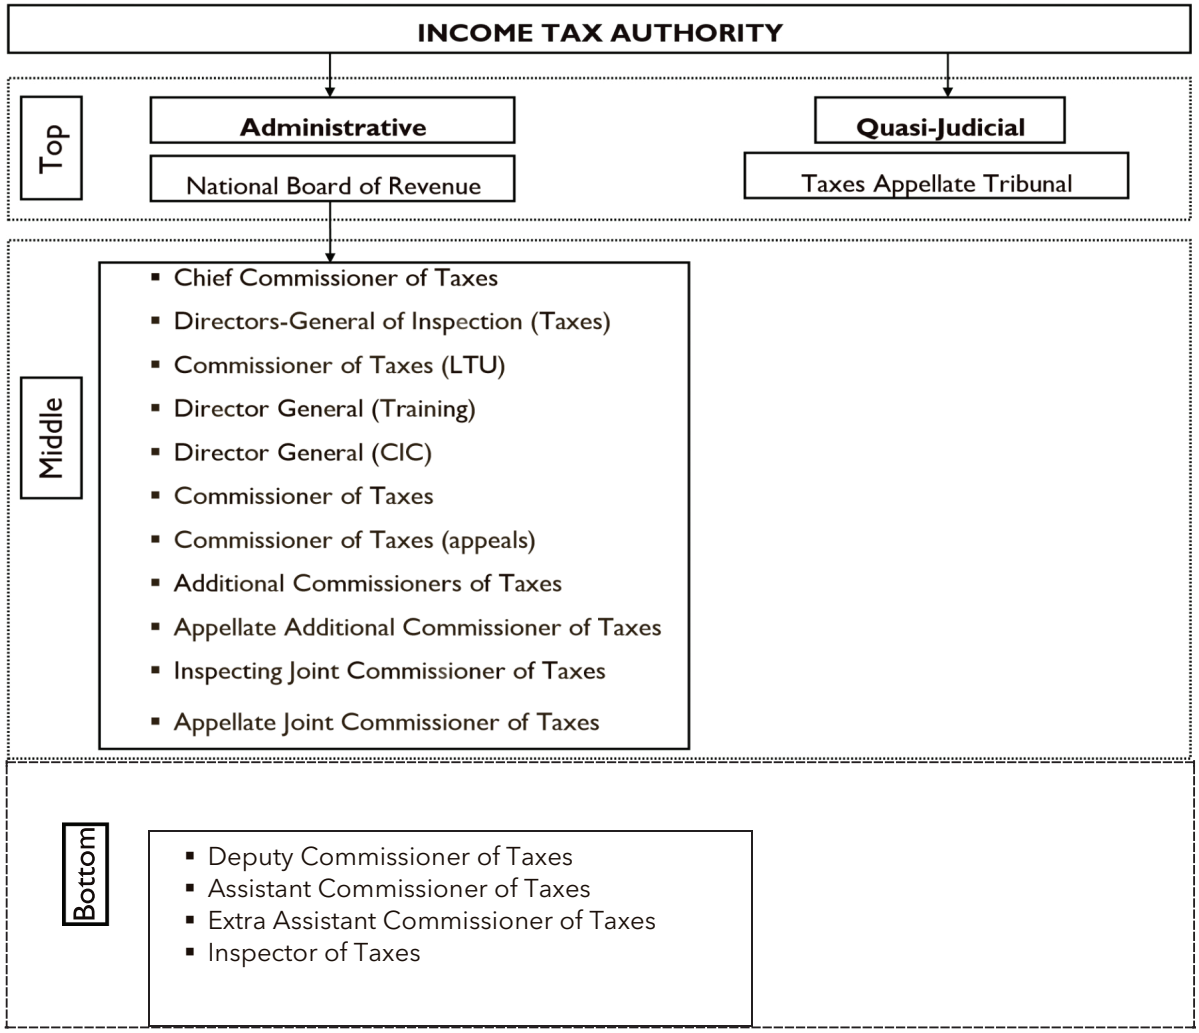

- Income tax authorities have been divided into 15 classes for the purposes of the Act.
- NBR is the highest income tax authority and Inspector is the lowest authority.
- Each class of authorities has definite powers and functions.
- Government shall constitute a Taxes Appellate Tribunal consisting of a President and other members.
- The procedures followed by the Taxes Appellate Tribunal in disposing of the appeals.
- The procedure followed by the Alternate Dispute Resolution (ADR) to resolve disputes.

2.1 Various income tax authorities

Depending on the functions, income tax authorities may be classified into two major groups, namely,

(a) Administrative: Executive looking after the overall tax administration;

(b) Quasi-Judicial: They are not income tax authority, only exercising judicial function in appeal cases.

2.2 Appointment of income tax authorities: section 5

Income tax authorities are appointed in accordance with the applicable laws, rules, and regulations. The National Board of Revenue (NBR) is empowered to appoint any person as an income tax authority in the prescribed manner and may also appoint the required number of employees, subject to the approved organizational structure, to ensure the effective administration of the income tax system.

2.3 NBR and its functions

National Board of Revenue (NBR) is the highest executive tax authority. It is a statutory body and its members are appointed by the Government to manage, control and supervise the whole income tax department. The NBR is empowered to make necessary rules concerning income tax matters. It cannot act by issuing any instructions to be construed as interference to the authority of judicial personnel like the Commissioner of Taxes (Appeals), Appellate Additional Commissioner of Taxes, Appellate Joint Commissioner of Taxes and the Taxes Appellate Tribunal when they exercise their judicial powers.

Main functions of the NBR

The National Board of Revenue (NBR) is the apex authority responsible for the administration of income tax in Bangladesh and is entrusted with a wide range of statutory functions. Its powers include declaring a foreign unincorporated association as a company for tax purposes; delegating the powers of one income tax authority to another; determining the functions and jurisdiction of income tax authorities, including the Director General (Inspection) and the Director General (Central Intelligence Cell); and specifying the place of assessment of taxpayers. The NBR is also empowered to issue orders, directions, and instructions for the effective administration of the Income Tax Act, direct the timely deposit of tax deducted or collected at source into the Government treasury, and recognize qualified professionals, such as practicing chartered accountants, cost and management accountants, chartered secretaries, income tax practitioners, and other authorized persons, to represent taxpayers in income tax matters. In addition, it may take disciplinary action against authorized representatives for professional misconduct, grant or withdraw tax holidays and tax exemptions for eligible entities, accord or withdraw recognition of superannuation, gratuity, and pension funds, and reward tax officials or other persons for detecting tax evasion and assisting in the recovery of taxes.

2.4 Subordination and control of income tax authorities: Section 7

Board, by issuing order may make rules related to subordination and control of income tax authorities.

2.5 Power and functions and jurisdiction of income tax authorities: Section 8

The Income Tax Act assigns specific duties, functions, and jurisdictions to different income tax authorities to ensure the effective administration and enforcement of tax laws. The Member (Tax) is authorized to exercise all powers of the National Board of Revenue (NBR) under the Act. The Director General (Inspection) is responsible for overseeing the implementation of tax laws, monitoring the performance of tax offices, recommending administrative reforms, and reporting to the Board. The Director General (Central Intelligence Cell) is entrusted with intelligence gathering, analysing tax records, identifying tax avoidance schemes and concealed income, investigating tax fraud and evasion, and recommending appropriate prosecution or recovery measures.

The Commissioner of the Income Tax Intelligence and Investigation Unit is responsible for detecting and investigating tax evasion, collecting taxpayer information and complaints, conducting intelligence operations, carrying out searches and seizures, gathering and analysing information and documents from various sources, recording statements of taxpayers, preparing investigation reports for the relevant tax offices, assisting in the recovery of evaded taxes, conducting search and seizure operations at airports, ports, and other locations, and performing any other functions assigned by law or the Board. The National Board of Revenue also has the authority to determine the jurisdiction and functional responsibilities of income tax

authorities, transfer powers or pending proceedings from one authority to another at any stage, and determine the place of assessment for taxpayers.

2.6 Taxes Appellate Tribunal

Establishment of Taxes Appellate Tribunal: Section 13

For the purpose of exercising appellate functions under the Income Tax Act, the Government is required to establish a Taxes Appellate Tribunal consisting of a President and such other members as may be appointed from time to time. A person is eligible for appointment as a member of the Tribunal if he or she:

- has been a member of the National Board of Revenue;
- is a District Judge, Session Judge or Additional District and Sessions Judge;
- is a Commissioner of Taxes;
- is a tax lawyer recognized under the Act with at least ten years of professional practice;
- is a legislative expert with a minimum of ten years' experience in drafting and formulating financial and tax laws.

The Government appoints one of the members as the President of the Tribunal, who must be a member of the National Board of Revenue or hold the current charge of a Member of the Board.

Exercise of power of the Tribunal by Benches: Section 14

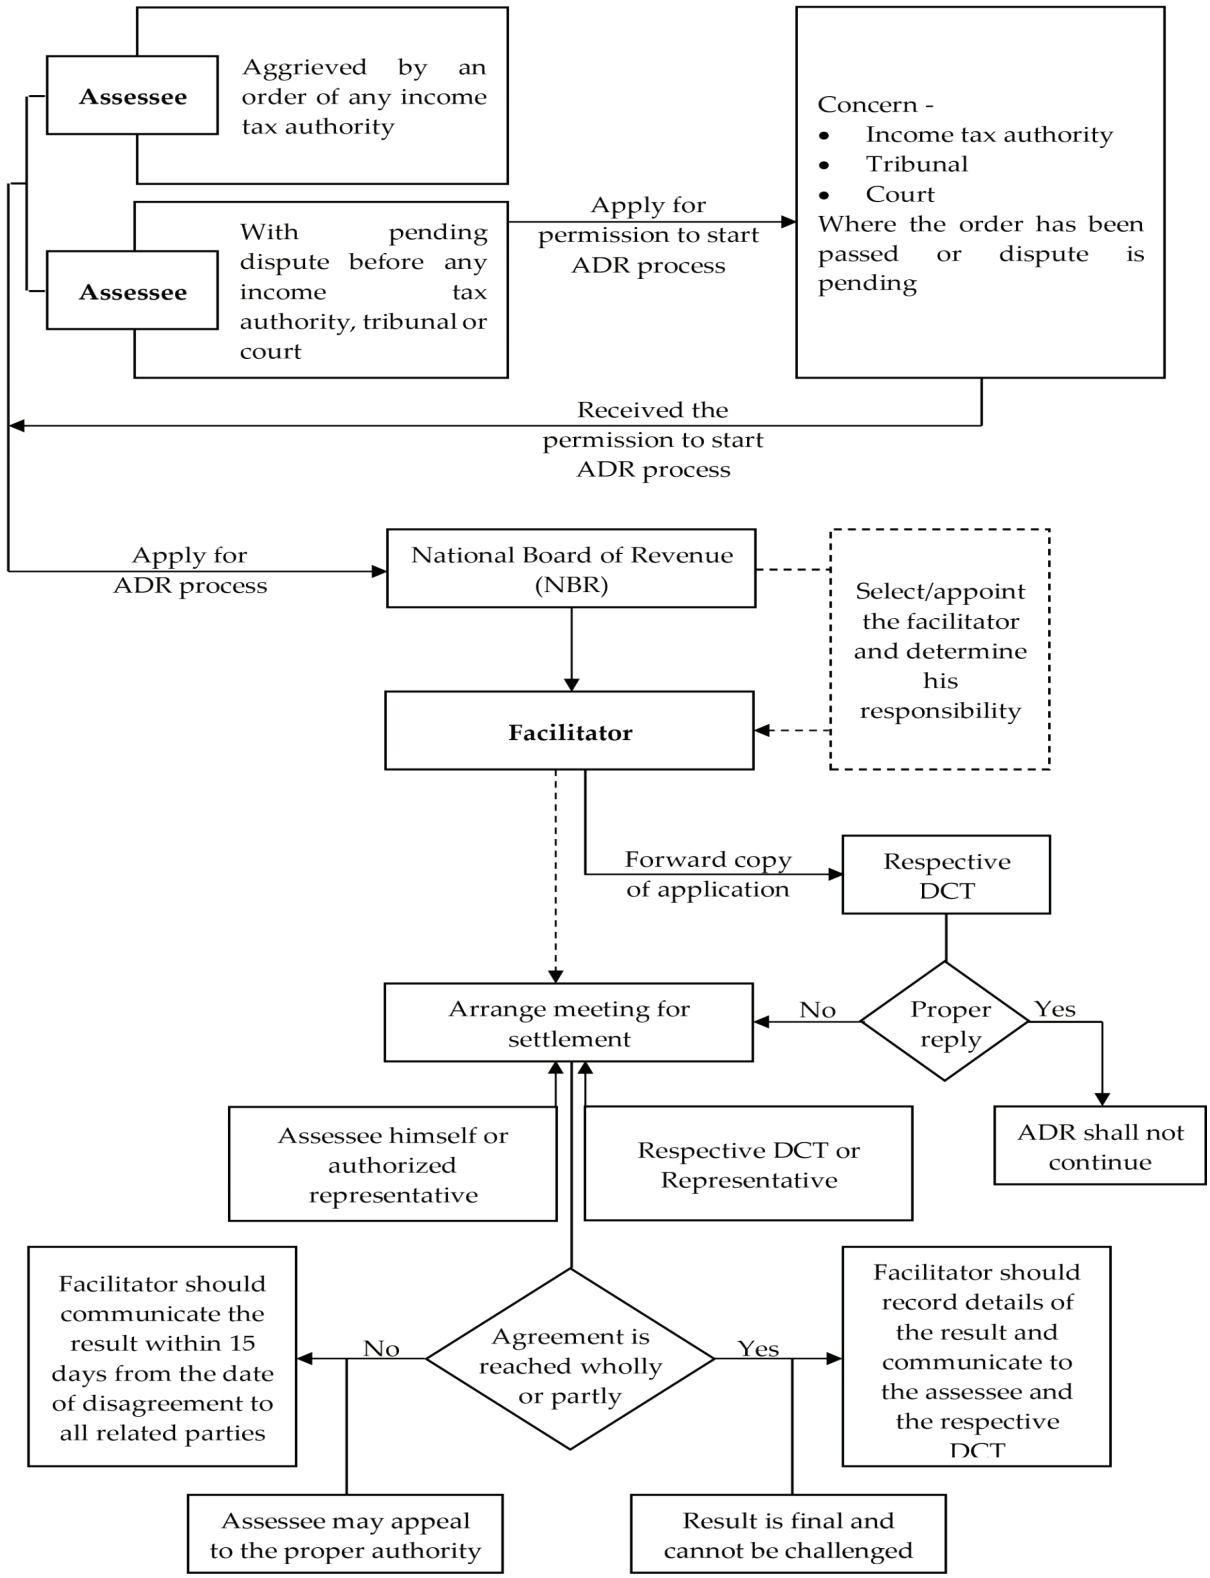

The powers and functions of the Taxes Appellate Tribunal are exercised through Benches constituted by the President of the Tribunal. Each Bench must consist of at least two members, one of whom must be either a current or former member of the National Board of Revenue or a Commissioner of Taxes.

Decision of Bench: Section 15

Decisions of a Bench of the Taxes Appellate Tribunal are made by the majority opinion of its members. Where the members of a Bench are equally divided, the President may refer the disputed point to one or more additional members for hearing. If the Bench consists of only two members and there is an equal division of opinion, the Government may appoint an additional member, and the matter will thereafter be decided by the majority opinion of all the members who hear the case.

2.7 Alternate Dispute Resolutions (ADR)

Alternate Dispute Resolution in ITA, 2023 to resolve any dispute of an assessee lying with any income tax authority, Taxes Appellate Tribunal, or Court. This is done to simplify and speed up dispute resolution process. The whole process is summarized in following figure:

Assessee
Aggrieved by an order of any income tax authority
Assessee
With pending dispute before any income tax authority, tribunal or court
Apply for permission to start ADR process
Concern -
Income tax authority
Tribunal
Court
Where the order has been passed or dispute is pending
Received the permission to start ADR process
Apply for ADR process
National Board of Revenue (NBR)
Select/appoint the facilitator and determine his responsibility
Facilitator
Forward copy of application
Respective DCT
Arrange meeting for settlement
No
Proper reply
Yes
ADR shall not continue
Assessee himself or authorized representative
Respective DCT or Representative
Facilitator should communicate the result within 15 days from the date of disagreement to all related parties
No
Agreement is reached wholly or partly
Yes
Facilitator should record details of the result and communicate to the assessee and the respective DCT
Assessee may appeal to the proper authority
Result is final and cannot be challenged

An assessee may apply for resolution of the dispute through the ADR process if aggrieved by an order of an income tax authority or if a dispute is pending before any income-tax authority, tribunal or court. In case of any pending dispute, the assessee is required to get permission from the authority where it is pending in writing before applying for ADR and if approval is received and assessee applies for ADR, the matter shall remain stayed during ADR negotiation process.

To resolve dispute in an alternative way, the Board may select or appoint Facilitator and determine his duties and responsibilities. The assessee shall be allowed to negotiate himself personally or along with an authorized representative, with the Commissioner's Representative for the concerned dispute under the facilitation and supervision of such Facilitator.

Upon receiving the application of ADR, the Facilitator shall forward a copy of the application to the respective Deputy Commissioner of Taxes and also call for his opinion on the grounds of the application. If the Deputy Commissioner of Taxes fails to give his opinion regarding fulfillment of the conditions, the Facilitator may notify in writing the applicant and the Commissioner of Taxes or the Commissioner's Representative to attend the meetings for settlement of disputes on a date mentioned in the notice. Where an agreement is reached, either wholly or in part, between the assessee and the Commissioner's Representative, the Facilitator shall record, in writing, the details of the agreement sign and shall communicate the same to the assessee and the concerned Deputy Commissioner of Taxes.

However, where no agreement is reached or the dispute resolution is ended in disagreement between the assessee and the concerned Commissioner's Representative for noncooperation of either of the parties, the Facilitator shall communicate it within fifteen days from the date of disagreement, to the applicant and the Board, the concerned court, Tribunal, appellate authority and income tax authority, as the case may be, about such unsuccessful dispute resolution.

Where an agreement is reached, it shall be binding on both the parties and it cannot be challenged in any authority, Tribunal or court either by the assessee or any other income tax authority. Where an agreement is not reached, the assessee may prefer an appeal in following manner:

Dispute arises out of an order of	Appeal to
Deputy Commissioner of Taxes	Appellate Joint Commissioner of Taxes, or Appellate Additional Commissioner of Taxes, or Commissioner of Taxes (Appeals)
Appellate Joint Commissioner of Taxes, or Appellate Additional Commissioner of Taxes, or Commissioner of Taxes (Appeals)	Taxes Appellate Tribunal

The assessee-applicant may also appeal to the respective appellate authority or court from where he has got permission to apply for ADR.

Self-assessment questions

1. Who are the income tax authorities?
2. Discuss the powers and functions of the Commissioner of Taxes.
3. Discuss briefly the powers and functions of the Deputy Commissioner of Taxes.
4. How Taxes Appellate Tribunal works?
5. What are the qualifications required for appointment as a Member of the Taxes Appellate Tribunal?
6. How ADR can be used to resolve the disputes?

Chapter 3

Charge of Income Tax

Introduction

Learning objectives

Examination context

Topic list

3.1 Charge of income tax

3.2 Surcharge

3.3 Charge of additional tax

3.4 Charge of advance tax, final tax and turnover tax

3.5 Minimum tax for individual

3.6 Tax on stock dividend

3.7 Charge of 10% tax on retained earnings

3.8 Scope of the total income

3.9 Income deemed to accrue or arise in Bangladesh

3.10 Same income shall not include twice in total income

Self-assessment questions

Introduction

Learning objectives

- Identify the ways of charging income tax;
- Illustrate the charge of surcharge, additional tax and minimum tax;
- Recognize the scope of total income;
- Recognize the different types of deemed income.

Practical significance

Income tax shall be charged levied, paid and collected at different rates in respect of the total income in accordance with the provisions of the Act. It may be deducted at source, or paid or collected in advance. The rates of tax can vary on the basis of income and types of assessee. The assessee may be required to pay surcharge, additional tax or minimum tax depending on the situation. Reduced tax rate is also applicable in certain cases.

The scope of total income of a resident and non-resident includes the sources and forms of income of these persons of any income year.

Stop and think

Think about different ways of charging income tax and identify the similarity and differentiation of the scope of income of a resident and a non-resident. Do you realize that the different types of unexplained investment will be deemed as income under different heads? Do you acknowledge about the special tax treatment in respect of some investment?

Working context

Before determining individual and corporate tax, the rate of tax and the scope of total income need to be identified. Based on residential status the scope of total income varies. Unexplained investments are also taxable under respective heads.

An accountant will be expected to understand the scope of total income, deemed income, applicable tax rate, and special tax treatment and to give advice on how the total income of individual and company can be determined. This can also suggest their clients to take the facility of special tax treatment by investing in those specific areas.

Syllabus links

You will be familiar with the charge of income tax and to prepare for the application level and also for the case study.

Detailed knowledge on this issue helps you to understand the progression level and stage of your study.

You will be using this knowledge again when you tackle the taxation paper later on in the Professional Stage and it will also underpin the technical aspects at the Advanced Stage.

Examination context

Exam requirements

In the examination, candidates may be required to:

- Clarify how income tax shall be charged;
- Define the surcharge, withholding tax, additional tax and minimum tax;
- Determine scope of total income depending on the residential status;
- Identify the income deemed to accrue or arise in Bangladesh;
- Recognize different unexplained investment etc., deemed to be taxable income;
- Demonstrate the different category of investment for which special tax treatment are allowed.

Question practice

For question practice on these topics, go to the suggested question and answer.

Examiner's comments on how students tackle questions

Students need to take care of the sources of total income including different classes of unexplained investment, as these are required for calculation of total income of an assessee.

CHARGE OF TAX

Section overview

- Tax shall be charged at the rate or rates according to the Finance Act;
- The rates of tax can be varied on the basis of income and types of assessee;
- The assessee may be required to pay surcharge, simple interest, minimum tax etc.;
- Tax may be deducted at source, or paid or collected in advance;
- Unexplained investments can be considered under the scope of total income;
- The scope of total income of a resident and non-resident are different.

Any income has to be brought under respective heads of income under section 30 and can be charged to tax only if it is so chargeable under the computing section corresponding to that head of income. The liability to tax arises by virtue of this charging section which does not depend on assessment; assessment order only quantifies the liability which is finally created by the charging section. Following basic principles can be deduced from the analysis of the charging section:

(i) Income tax is to be charged at the rate or rates fixed for the year by the Finance Act. The liability to tax does not arise until the annual Finance Act is passed [*Kamakhya Narayan Singh V CIT (1946) ITR 683]*. Section 339 provides that if on the first day of July in any year provision has not been made by any Act for the charging of income tax for that year, the provision in force in the immediately preceding year or the provision proposed in the Finance Bill then before Parliament, whichever is more favorable to the assessee, shall apply until the new Finance Act is passed.

(ii) Income should be calculated with reference to the income year but tax rate/rates should be the rate/rates applicable to respective assessment year. The use of the expression

charged both in the Finance Act and Income Tax Act does not mean that the income is charged to income tax under both the Act and Act. They are used in different senses. The tax will be charged in accordance with and subject to the provisions of the Income Tax Act and the said charge shall be in accordance with the rates prescribed in the Finance Act [*Kesoram Industries and Cotton Mills LTD V C. W. T* Calcutta (1466) ITR, 767].

(iii) The income to be taxed is the income of the income year and not of the assessment year. Since tax is levied on the actual income of the income year, the sources must be taken as they existed during the income year it is immaterial whether the source of income actually exists in the assessment year [*Muthappa Chettian V CIT (1945) ITR, 311*]. However, there are exceptions for a discontinued business, for persons leaving Bangladesh etc. when income year is the assessment year

(iv) The charge is on every person as stated in section 2 (69) e.g. an individual, a firm, an association of persons, a Hindu undivided family, a local authority, a trust, a fund, a company and any other artificial juridical person. Estoppel is a rule of evidence, not a cause of action and it cannot be the basis of liability under the Income Tax Act. So, an assessment cannot be made on a stranger to the income, merely he agrees or desires to be assessed on it *[Asit Kumer Ghose V CIT, ITR, 576*].

(v) The tax is levied on the total income of the assessee computed in the manner laid down in specified sections and subject to the provisions of this Act. It will be for the assessee to produce materials to hold that a receipt is of a casual or capital nature not chargeable to tax and for the Revenue to consider the materials and arrive at a reasonable conclusion.

(vi) Tax is imposed in three stages. There is the declaration of a liability that is the part of the statute which determines who is liable in respect of what. Next, there is the assessment liability that does not depend on the assessment. That ex-hypothesis has already been fixed. But assessment particularizes the exact sum which a person is liable to pay. Lastly, the recovery comes if the person taxed does not pay voluntarily.

3.1 Charge of income tax: Section 18

Income tax is levied, imposed, paid, and collected on a taxpayer's total income at the rates prescribed by the Income Tax Act enacted by Parliament. In certain cases, however, tax may be levied, paid, or collected on income earned during a period other than the income year, as provided under the Act. The Act also prescribes the collection of tax through various mechanisms, including tax deducted or collected at source, advance tax, tax payable on the basis of a return, and other applicable taxes. In addition, surcharge and any other statutory charges are imposed in accordance with the relevant laws enacted by Parliament. Certain categories of income, such as capital gains, dividends, and winnings from lotteries, word puzzles, card games, online games, and similar activities, are subject to tax at the special rates prescribed under the Act.

3.2 Surcharge on individual taxpayers

Surcharge shall be payable in addition to the tax on income for the individual taxpayer based on disclosed net wealth in the tax return over Tk. 4 crore. Wealth surcharge is to be paid on gross tax payable at the following rate:

Total net worth	Rate
Up to Tk. 40m	0%
More than Tk. 40m but less than Tk. 100m, or Assessee has more than one motor vehicle in his own name, or has house property over 8,000 sq. ft.	10%
More than Tk. 100m but less than Tk. 200m	20%
More than Tk. 200m but less than Tk. 500m	30%
More than Tk. 500m	35%

Illustration – 1

Gross Tax	Tk. 45,000
Net wealth as per last assessment year	Tk. 2,078,000
Accretion in net wealth during current year	Tk. 823,000
Net wealth up to this assessment year	Tk. 2,901,000
Owner of motor car/house property	No motor car/house property
Wealth Surcharge	Nil (net wealth is less than Tk. 4 crore and no motor car/house property)
Total tax liability (no surcharge)	Tk. 45,000

Illustration – 2

Gross Tax	Tk. 160,000
Net wealth as per last assessment year	Tk. 28,623,000
Accretion in net wealth during current year	Tk. 14,408,000
Net wealth up to this assessment year	Tk. 43,031,000
Wealth Surcharge	Tk. 16,000 (10% of Tk. 160,000)
Total tax liability (including surcharge)	Tk. 176,000 (Tk. 160,000 + Tk. 16,000)

Illustration – 3

Gross Tax	Tk. 800,000
Net wealth as per last assessment year	Tk. 88,123,000
Accretion in net wealth during current year	Tk. 2,408,000
Net wealth up to this assessment year	Tk. 90,531,000
Wealth Surcharge	Tk. 80,000 (10% of Tk. 800,000)
Total tax liability (including surcharge)	Tk. 880,000 (Tk. 800,000 + Tk. 80,000)

3.3 Charge of additional tax: Section 19

Notwithstanding anything contained in any other provision of Income Tax Act, 2023, where any person employs or allows, any foreigner to work at his business or profession, without prior approval of competent authority of the Govt. such person shall be charged additional tax at 50% of tax payable or Tk. 500,000 whichever is higher. Where such tax is not paid, the DCT shall, by giving notice under this section and providing an opportunity of hearing, determine the tax.

Illustration-1

Company B, a private limited company, employs one foreign employee to work at its factory who has no valid work permit. Company B will be liable to pay additional tax in the following way:

	Tk.	Tk.
Income	20,000,000	
Income tax @ 27.5%:		5,500,000
Additional tax @ 50% of tax or Tk. 500,000 whichever is higher		2,750,000
Total tax to be paid		8,250,000

3.4 Charge of advance tax, final tax and turnover tax: Section 163

(1) If the amount of tax deducted, collected or paid under Part VII exceeds the tax computed for the taxpayer shall be refundable.

(2) The taxpayer may apply for a refund or carry it forward for adjustment against any outstanding tax liabilities of previous or subsequent years.

(3) Tax deducted or collected under Sections 138 and Section 139 shall be treated as final tax liability on income of those sources.

(4) Advance income tax deducted or collected at source under all sections in Part VII for a person exempt from submission of return under Section 166(2) shall also be the final tax liability.

(5) Where income from a source is subject to final tax liability under sub-section (3), tax shall be computed on such income at the applicable rate, and if the tax so computed is higher than the final tax, the higher amount shall be payable.

(6) Without prejudice to the provisions of (3) above, where the tax on income from business or profession is less than the turnover tax specified in the following table, then irrespective of profit or loss, the person shall pay turnover tax on the gross receipts:

Serial No.	Classes of taxpayers	Turnover tax
1.	Manufacturer of cigarette, bidi, chewing tobacco, smokeless tobacco, gul or any other tobacco products	3% of the gross receipts
2.	Manufacturer of carbonated beverage, sweetened beverage	2.5% of the gross receipts
3.	Mobile phone operator, NTTN	1.5% of the gross receipts
4.	Other cases	1% of gross receipts

Provided that turnover tax shall not apply to a person deriving income from the following businesses or professions:

(a) import, distribution or open-market sale of fertiliser, seeds or essential consumable goods by any government body or state-owned organisation or corporation.

(b) commission business.

(c) delivery order (DO) business.

(d) money-exchange business, and

(e) the business of buying and selling gold, silver, gold jewellery, silver jewellery, gems, diamonds or platinum.

Provided further that, rate of turnover tax shall be 0.20% for an industrial undertaking engaged in manufacturing and belongs to serial 4 in the above table for the first 3 years since commencement of production.

Provided further that where the amount of turnover tax paid exceeds the tax payable for that year, the excess amount shall be carried forward and set off against the tax payable in subsequent year.

Provided further that where an assessee has income from any source that is exempt from tax or is subject to tax at a reduced rate, the turnover tax under sub-section (6) shall be computed proportionately, having regard to the extent of such exemption or reduced rate of tax, as the case may be.

(7) Where any surcharge, additional tax, interest, additional amount or any other sum is payable under the provisions of this Act, such amount shall be payable in addition to any turnover tax or final tax.

Here "gross receipts" means the total amount received from the sale of goods or services, excluding value added tax and supplementary duty, and also includes any commission, discount, fee, charge or other consideration, received in consideration of providing any service or benefit.

Illustration – 1

In the assessment year 2026-27, company X reports loss of Tk. 1,000,000 with annual turnover of Tk. 10,000,000. The company is required to pay Tk. 100,000 (1% of Tk. 10,000,000) as turnover tax. Remember, the company has made a loss, still it requires to pay turnover tax.

Illustration – 2

In the assessment year 2026-27, company X, a publicly traded company, reports taxable profit of Tk. 100,000 with annual turnover of Tk. 10,000,000. The company is required to pay Tk. 100,000 (1% of Tk. 10,000,000) as turnover tax. Because tax on regular income at regular rate amounts to Tk. 22,500 @ 22.5% that is lower than Tk. 100,000.

Illustration – 3

In the assessment year 2026-27, company X, a publicly traded company, reports taxable profit of Tk. 1,000,000 with annual turnover of Tk. 10,000,000. Tax liability of the company will be Tk. 225,000 (22.5% of Tk. 1,000,000) applying regular tax rate which is higher than turnover tax of Tk. 100,000 (1% of Tk. 10,000,000).

Illustration – 4

In the assessment year 2026-27, company A, a publicly traded company, reports business income Tk. 80,000, house property income Tk. 200,000 and income from financial asset Tk. 120,000. Annual business turnover is Tk. 1,000,000.Tax liability on regular income at regular tax rate is Tk. 67,500 (22.5% of Tk. 300,000). However, business turnover tax is Tk. 10,000 (1% of Tk. 1,000,000) or regular tax on business income Tk. 80,000 x 22.5%=18,000. As regular tax on business income is higher than business turnover tax, so tax liability of the company will be Tk. 67,500.

3.5 Minimum tax for individual: section 18(3) and section 163

Every individual taxpayer having taxable income shall pay minimum tax of Tk. 5,000. However, in case of new taxpayer the minimum tax shall be Tk. 1,000.

3.6 Tax on stock dividend at 10%: Section 23

Where a listed company, other than a bank, insurance company, leasing company, or financial institution, declares or distributes a stock dividend that exceeds the amount of cash dividend, or declares only a stock dividend without any cash dividend, it is liable to pay tax at the rate of 10% on the total value of the stock dividend declared or distributed during the income year. If the company fails to pay the tax, the Deputy Commissioner of Taxes (DCT) may determine the amount of tax payable after issuing demand notice to the company and providing it with an opportunity of being heard.

3.7 Charge of 10% tax on retained earnings, reserves, surplus etc.: Section 22

Where a listed company, other than a bank, insurance company, leasing company, or financial institution, distributes less than 30% of its after-tax net profit as dividend during an income year, it is liable to pay an additional tax at the rate of 10% on the amount of the shortfall, being the difference between 30% of the after-tax net profit and the actual dividend distributed. If the company fails to pay the additional tax, the Deputy Commissioner of Taxes (DCT) may determine the tax payable after issuing demand notice and providing the company with an opportunity of being heard.

3.8 Scope of the total income: Section 26

In case of resident taxpayers, all income accrues, or arise, or deemed to accrue or arise, received or deemed to be received by him or on behalf of him in Bangladesh and outside of Bangladesh shall be included in the total income.

However, for non-resident only income accrues, or arise, or deemed to accrue or arise or received, deemed to be received by him or on behalf of him in Bangladesh shall be the total income.

3.9 Income deemed to accrue or arise in Bangladesh: Section 27

The following income shall be deemed to accrue or arise in Bangladesh, namely:

Income from employment earned in Bangladesh, or received by a Bangladeshi national from the government or a local authority for any services, irrespective of the place of payment.

(1) any income accruing or arising, whether directly or indirectly, through or from-

a. any permanent establishment in Bangladesh;

b. any property, asset, right or other source of income including intangible property in Bangladesh; or

c. transfer of any assets situated in Bangladesh:

d. the sale of any goods or services by any electronic means to purchasers in Bangladesh or

e. any intangible property used in Bangladesh.

Explanation. - For the purpose of above clause: -

(a) Shares of a resident company shall be deemed to be property in Bangladesh.

(b) Intangible property registered in Bangladesh, or owned by a non-resident but has a permanent establishment in Bangladesh to which the intangible property is attributed shall be deemed to be property in Bangladesh.

(c) Transfer of shares of a non-resident company shall be deemed to be the transfer of an asset situated in Bangladesh to the extent that the value of the share transferred is directly or indirectly attributable to the value of any assets in Bangladesh.

(d) where an offer to buy or sell goods or services is made or accepted through an online or digital platform or communication network, and the supply of such goods or services along with its consideration is paid either online or offline, the transaction shall be treated as a sale of goods or services by electronic means.

(2) any divided paid outside Bangladesh by a Bangladeshi company;

(3) any income by way of interest payable by the government, or by any resident except interest on debt or money borrowed from outside Bangladesh and used in a business or in a source of income situated outside Bangladesh; or by any non-resident on the money borrowed for the business or for any source of income in Bangladesh;

(4) any income by way of fees for technical services payable by the government, or by any resident except service rendered for the business outside Bangladesh, or by any non-resident for the service provided for business in Bangladesh;

(5) any income by way of royalty payable by the government, or by any resident except right, assets or information or service received for the business outside Bangladesh, or by any non-resident for the right, assets or information or service utilised in the business in Bangladesh;

(6) Insurance or reinsurance premium accrued or payable by a resident or non-resident against any risk within Bangladesh.

3.10 Same income shall not include twice in total income: Section 28

Where any amount consisting of either the whole or a part of any income of a person has been included in his total income or the basis that it has accrued or arisen, to him in any year, it shall not be included again in his total income on the ground that it is received or deemed to be received by him in Bangladesh in another year.

Self-assessment questions

(a) What source of income which are subject to deduct a source fall under the final tax provisions under the Income Tax Act, 2023?
(b) What is the consequences if tax deducted or collected at source (excluding scopes where source tax stands as final tax) becomes higher than the tax for regular incomer?
(c) Discuss the treatment of turnover tax where it exceeds the tax under regular tax?

Chapter 4

Income from Employment

Introduction

Learning objectives

Examination context

Topic list

4.1 Scope of income from employment

4.2 Valuation of perquisite, allowances and benefit

4.3 Determination of income derived from employee share scheme

4.4 Provident fund

4.5 Non-assessable income under the head "income from employment

4.6 Tax rebate on certain investment

4.7 Items included in investment allowance related to salary income

4.8 Salient points in assessment of income from salaries

Worked examples & solutions

Self-assessment questions

Introduction

Learning objectives

- Identify the different heads of income;
- Computation of income from 'employment';
- Definition of perquisites, allowances and benefits under employment income;
- Identify the allowable deduction under head 'income from employment';
- Concept of provident fund and other funds related to salary;
- Understanding investment allowance and computing tax rebate on that;
- Computing tax liability of salaried person.

Practical significance

Income from employment is very important for many reasons. This is a common head of income for most of the individual taxpayers. It can even be said that individual taxation depends on this head of income. Government collects a significant portion of tax under this head. Thus, tax law covering income from employment is very significant and scope of learning is also wide. This chapter carries significance for corporate practitioners also in the sense that this expense in certain conditions cannot be shown as expense. The application of perquisites and its impact on computing company tax is also very important. Income from employment is the first head of income out of 7 heads of income. Out of the 7 heads, this is a very common head of income. Again, this head encompasses different technical and conceptual issues like perquisites, provident fund and other funds where clear understanding is very important as a tax practitioner and tax professional.

Computing taxable income under the head income from employment, computing investment allowance and testing the amount for maximum limit, computing tax rebate on investment allowance, understanding the tax credit on tax deducted at sources and finally computing net tax liability of an individuals are some note able points that is covered in this chapter and thus this chapter become very significant for the CA students. This chapter lays the foundation of the following chapters also.

You will find the details of the above issues in this chapter with some practical examples.

Stop and think

Do you realize that the computation of taxable income under the head 'income from employment' is one of the basic requirements for determining tax liability? Can you calculate the taxable income from salary? Do you understand the application of investment allowance in computing final tax liability?

Working context

In practice, as the accountants are sometimes required to prepare their clients' tax returns, they need to advice the clients on how to calculate the taxable income for any income year. Before advising the clients, accountants should have the clear concept relating to the admissible and inadmissible expenses so that they can deduct or add the expenses in determining the taxable income.

As individual assessee is abundant and most of the individual assessee has income under the head, understanding this chapter is very useful in practical life.

Syllabus links

The topics covered in this chapter are very important for computing taxable income which is required for solving practical problems at this level.

Examination context

Exam requirements

In the examination, candidates may be required to:

- Identify the different heads of income;
- Define the concept of salaries;
- Recognize the perquisites, allowances and benefits under salary income;
- Recognize the income assessable under the head;
- Illustrate the exemptions allowed in determining taxable income under the head;
- Understand investment allowance and tax rebate on that;
- Compute final tax liability on salary income.

Question practice

For question practice on these topics go to the suggested answers covering this chapter and also this workbook.

Examiner's comments on how students tackle questions

Candidates have to be prepared well for this area as this chapter consists of core concept on computation of income which is vital for calculating tax liability. Clear concept and understanding of each content of this chapter will help candidates to resolve any problems relating to computation of taxable income.

INCOME FROM EMPLOYMENT

Section overview

- There are seven heads of income;
- Total income and taxable income may not be the same;
- Tax free ceiling of allowances;
- Computation of total income from employment;
- The perquisites and allowances need to be considered in determining salary income;
- Treatment of provident fund and other funds;
- Scope of investment allowance and tax rebate on that.
- Computing tax liability.

Heads of income: section 30

All incomes shall, for the purpose of charge of income tax and computation of total income, be classified and computed under the following heads of income, namely:

(a) Income from employment;
(b) Income from rent;
(c) Income from agriculture;
(d) Income from business or profession;
(e) Capital gains;
(f) Income from financial assets;
(g) Income from other sources.

Consolidation of income: section 31

Income of a person shall include the share of profit or loss of a firm or association of persons in which he is a partner or a member, as well as the income of a dependent spouse or minor child over whom he has reasonable control and intends to include the income. However, inclusion of income shall not be applied if the spouse or child is assessed separately.

4.1 Scope of income from employment: section 32

According to section 32, the following income of an assessee is classified and computed under the head "income from employment", and thereby chargeable to tax, namely-

(a) any salary and benefits received or receivable from employment;
(b) income earned from employee share scheme;
(c) any untaxed arrear salary;
(d) any amount or benefit received from any past or future employer.

However, income from employment shall not include the following receipt, namely: -

(a) any amount received for the operation related to heart, kidney, eye, liver and brain, replacement of artificial body parts and cancer treatment of any such employee who is not a shareholder director;

(b) traveling allowances and daily allowances received and expended wholly and solely for the performance of the duties of the job.

(c) group insurance premium paid by a company for its employees and medical expenses reimbursed under the group insurance policy by the insurance company.

Explanation:

i) Salary:

There is no exhaustive definition of "salary" in the Act. An inclusive definition has, however, been given in section 32(2) of the Income Tax Act, 2023 as follows: 'salary' means any amount of any nature received by employee from employment and shall include followings, namely –

(a) any salary, wages or remuneration;

(b) any allowance, holiday allowance, leave encashment, bonus, fee, commission, overtime;

(c) advance salary;

(d) gratuity, annuities, pensions or its supplements;

(e) perquisites;

(f) receipt in lieu of salary or wages or receipt in addition to salary or wages.

ii) 'Receipt in lieu of salary or wages' or 'receipt in addition to salary or wages' includes:

(a) any compensation received on account of termination of employment called by whatever name;

(b) remaining portion of provident fund or any other fund exceeding employee's contribution;

(c) received amount or fair market value of benefits received as a result of changes in the terms of employment contract;

(d) received amount or fair market value of received benefit on joining the job or under any condition of the employment.

iii) Perquisite:

'Perquisite' means any payment or benefit, including incentive bonuses, given by the employer to the employee, but shall not include the following payment, namely –

(a) Basic salary, arrears salary, advance salary, festival bonus, leave encashment and overtime;

(d) Contribution to recognized provident fund, approved pension fund, approved gratuity fund, approved superannuation fund and insurance premium paid by a company on its employees' behalf.

iv) Basis Salary:

'Basic Salary' means monthly or otherwise payable salary on the basis of which other allowances and benefits are determined, however, shall not include following allowances or benefits, namely: -

(a) All types of allowance, perquisite, annuity, bonus & benefits; and

(b) Contributions made by the employer to various funds of the employee.

4.2 Valuation of perquisite, allowances and benefit: section 33

Perquisite, allowance and benefit which are not paid in monetary value, monetary value of such perquisite, allowance and benefit will be determined as below:

Perquisite, allowance, benefits etc.	Monetary value
Accommodation	– Where rent is fully paid by employer or accommodation is provided by employer, annual value shall be included to income from employment. – Where accommodation is provided at a concessional rate, the difference between the rent actually paid by employee and annual value shall be added to the income from employment.
Car benefit	– In case of motor car up to 1500cc, monthly Tk. 15,000 shall be added to the income from employment. – In case of motor car exceeding 1500cc but no exceeding 2000cc, monthly Tk. 20,000 shall be added to the income from employment. – In case of motor car exceeding 2000cc but no exceeding 2500cc, monthly Tk. 30,000 shall be added to the income from employment. – In case of motor car exceeding 2500cc, monthly Tk. 50,000 shall be added to the income from employment.
Any other perquisite, allowance or benefit	Monetary value of fair market value of perquisite, allowance or benefit.

Illustration – 1

Mr. X is paid a monthly basic salary of Tk. 40,000 and a dearness allowance of Tk. 3,000 per month. He has also been provided with a rent-free accommodation. The employer has similar flat in the same building which is rented outside at Tk. 20,000 per month. However, monthly reasonable rent of the flat is Tk. 25,000. Further, Mr. X is availing pick and drop services by a car with 2000cc. How much amount will be added to his income from employment?

Annual rent of similar flat (Tk. 20,000 ×12 months):	Tk. 240,000
Annual reasonable rent of similar flat (Tk. 25,000 ×12 months):	Tk. 300,000

Amount to be added to income from employment (higher one) is Tk. 300,000. Please note, pick-and-drop services through a company car does not qualify as car allowances, therefore no amount is added with his income from employment.

Illustration – 2

Mr. X has been paid a monthly basic salary of Tk. 40,000. Besides this, he has been provided with accommodation at a concessional monthly rate of Tk. 10,000. The employer has similar flat in the same building which is rented outside Tk. 20,000 per month. However, monthly reasonable rent of the flat is Tk. 25,000. How much will be added with taxable income due to availing this opportunity from the employer?

Annual rent of similar flat (Tk. 20,000 ×12 months)	Tk. 240,000
Annual reasonable rent of similar flat (Tk. 25,000 ×12 months)	Tk. 300,000
Annual value of accommodation (higher one)	Tk. 300,000
Less: amount paid by employee (10,000 X 12)	Tk. 120,000
Amount to be added to income from employment	Tk. 180,000

4.3 Determination of income derived from employee share scheme: section 34

1. Employee share scheme means any agreement or arrangement under which a company:

   (a) may issue share or right to acquire share to employee of the company or its affiliated company;
   (b) shares or right to acquire share can be issued to the trustee of a trust and subsequently the trustee can issue the share or right to acquire share to any employee in clause (a) or distribute gain out of transferring of shares to other persons to the employees in cluse (a).

2. If shares are received under an employee share scheme, in the year in which the share are received, income shall be added to the 'Income from Employment' according to A – B, where –

   A = Fair market value of shares on the date of receipt
   B = Cost of acquiring the shares

3. Cost of acquiring the shares referred to above shall mean the sum of following cost:

   (a) If employee paid any amount to acquire the shares;
   (b) If employee paid any amount to acquire the right or opportunity of share.

4. If the right or opportunity to acquire shares under the employee share scheme is sold or transferred by the employee, income shall be added to the 'Income from Employment' according to A – B, where –

   A = Sale or transfer value of right or opportunity to acquire share;
   B = Amount paid to for right or opportunity to acquire share.

Illustration

On 1 January 2023 ABC Limited granted option over 10,000 of its shares to Mr. X, one of its senior employees. One condition of the share option was that Mr. X must work for the ABC Limited for upcoming 3 years. Mr. X continued to be employed by ABC Limited during 2023, 2024 and 2025.

Since the condition was met, ABC limited granted 10,000 shares to Mr. X on 31 December 2025. The fair value of share on 31 December 2023, 2024 and 2025 was Tk. 100, 120, and 110 respectively.

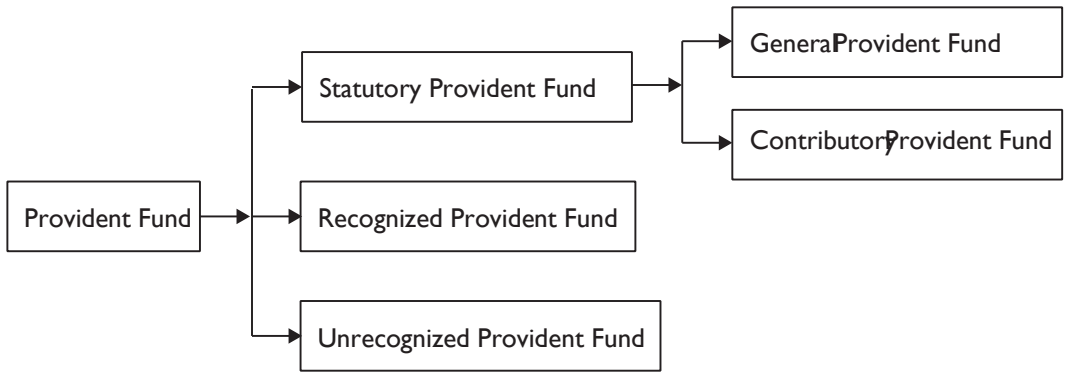

It should be noted that Mr. X paid Tk. 60,000 as share transfer fee as per condition of the above scheme.

How much amount will be added to the income from employment of Mr. X.

Fair market value of share at the grant date (10,000 X 110)	Tk. 1,100,000
Less: Cost of acquiring the share	Tk. 60,000
Amount to be added to income from employment	Tk. 1,040,000

4.4 Provident fund

A provident fund is a retirement benefit scheme established to provide financial security to employees after the end of their service. Under the scheme, contributions are made by the employee, the employer, or both, and the accumulated funds are invested in secure instruments to generate stable returns. Upon retirement, resignation, or termination of employment, the employee is entitled to receive the amount standing to the credit of his or her provident fund account. In the event of the employee's death, the accumulated balance is paid to the nominated beneficiary. As a social security measure, a provident fund helps employees build long-term savings and ensures financial support during their post-employment years. Provident funds are generally classified into three categories as:

General Provident Fund [GPF]

General provident fund is controlled and maintained by the government for the government employees. Such fund is constituted and run by the government under Provident Fund Act 1925, General Provident Fund Rules 1979 and Contributory Provident Fund Rules 1979. Government employees who are permanently transferred to the pensionable jobs, they contribute to general provident fund where government as an employer contributes nothing. On the other hand, government employees who have no benefits from pension, they contribute to contributory provident fund where both government bodies and the employee contribute. Generally, most of the government employees of our country are pensionable.

Points to remember at the time of tax computation:

a. Since employer does not contribute to general provident fund there is no question of its inclusion with salary. But where government bodies contribute to contributory provident fund, government's contribution will be included with salary.

b. Employee's contribution to statutory/general (government) provident fund will be considered as investment allowance.

c. Accumulated balance of GPF at the credit of employees when received will not be included in his total income. It is excluded from total income under Para 7, Part I of Sixth Schedule of the Income Tax Act, 2023.

Recognized Provident Fund [RPF]

Recognized Provident fund is constituted under the conditions mentioned in Part III of Second schedule in the Income Tax Act, 2023 and approved by the Commissioner of Taxes. These funds are available in non-government organizations where both employees and employer contribute the same amount. In order that a provident fund may receive and retain recognition, it shall satisfy the conditions set out below and any other conditions which the NBR may prescribe:

(a) All the employees shall be employed in Bangladesh or shall be employed by an employer whose principal place of business or head office is in Bangladesh. In case of exceptional situation, the recognition criteria will depend on the Commissioner's judgment.

(b) Employer must deduct a certain percentage from the salary of employee and deposit the same to the fund.

(c) Employer will also contribute the same amount as deducted from the employee.

(d) The fund will constitute taking the contribution of both the employer and employee.

(e) The fund will be managed by trustee of two or more persons.

(f) Employer will not be entitled to take any amount from the fund.

(g) Employee will receive the amount deposited to his account including principal and interest at the time of leaving the job.

Points to remember at the time of salary income computation:

a. Only, employer's contribution to RPF shall be included in the total salary income of the employee as per law.

b. Both employers and employee's contribution to RPF are considered to be a part of investment allowance.

c. Accumulated balance at the credit of employee in the RPF, when received shall be excluded from total employment income.

Unrecognized Provident Fund

Unrecognized provident fund is not the recognized or statutory fund. This fund is not constituted under Part III, Second Schedule in the Income Tax Act, 2023 or under any other applicable acts or laws and is not approved by the Commissioner of Taxes. In this fund, both the employees and employer contribute and generally it is found in nongovernment organization. At the time of the employee's retirement, the accumulated balance of the fund except employees' own contribution is included in the total income.

Points to remember at the time of tax computation:

a. Employer contribution will be added in computing taxable salary income.
b. At the time of employee's retirement, the accumulated balance of this fund minus the contribution is taxable and will be added with salary.

Approved Superannuation Fund

This type of fund is created for granting pension and other benefit to the employees on their retirement, or after a specified age or his death. This fund is run by the individual name of the employees. This fund is approved and run under the provisions of Part I, Second Schedule of the Income Tax Act, 2023. Both employee and employer contribute to the fund. The contribution of the employer is added to the income of the employee.

Approved Gratuity Fund

If the employer agrees to constitute a gratuity fund for the benefit of the employees on the job contract, then the employer contributes to the gratuity fund for the benefit of the employees in the event of retirement. The approved gratuity fund is approved by the NBR and run under the conditions mentioned in at Second Schedule, Part II. Employee contributes nothing in this fund. The contribution by the employer is considered as income of employee. But the amount received up to Tk. 2.5 crore from approved gratuity fund is tax free.

Worker's Profit Participation Fund [WPPF]

It is established under the Bangladesh Labour Act, 2006 (Act. XXXXII of 2006). Any payment received by any worker/employee from this fund is taxable and tax is deductible at 10% at the time of payment from the fund to the worker/employee.

4.5 Non-assessable income under the head "income from employment":

In Part I of Sixth Schedule of the Income Tax Act, 2023, some income relating to salary have been mentioned as non-assessable:

i) In case of private service holder other than Govt. service holder, 1/3rd of income from employment or Tk. 500,000 (whichever is lower) shall be deducted from 'Income from Employment' (Sixth Schedule, Part I, Para 27);

ii) Reimbursement of expenses of an employee wholly and necessarily incurred in performance of duties and it was convenient for the employer to make expenses through the employee (6th Schedule, Part I, para 14);

iii) The income of any employee of inter-governmental organization or any international organization tax of which is exempted by under any Act passed by the parliament or under any agreement signed by the Government. (Sixth Schedule, Part I, Para 1);

iv) Remuneration received form the concern Government by virtue of their employment by Ambassador, High Commissioner, Envoy, Minister, Charge the Affairs, Commissioner, Councilor, Consul the Career, Secretary, Advisor or Attaché of Embassy, High Commission, Legation or commission of a foreign State. (Sixth Schedule, Part I, Para 2);

v) Any income received by a trade commissioner or other official representative in Bangladesh of a foreign State (not holding office as such in an honorary capacity) as his official salary, if the official salary of the corresponding officials, if any, of the Government, resident for similar purposes in the country concerned, enjoy a similar exemption in that country. (Sixth Schedule, Part I, Para 2);

vi) Any income by a member of the staff of any of the officials referred to above (i.e. iv and v), as his official salary, when such member is not a citizen of Bangladesh and is either a subject to the country represented or a subject of some other foreign State and is not engaged in any business or profession or employment in Bangladesh otherwise than as a member of such staff, and the country represented has made corresponding provision for similar exemptions in the case of member of the staff of the corresponding officials of the Government of the People's Republic of Bangladesh in that country. (Sixth Schedule, Part I, Para 2);

vii) Any pension due or received from the Government. (Sixth Schedule, Part I, Para 4);

viii) Any gratuity up to Tk. two crore fifty lakh. (Sixth Schedule, Part I, Para 5);

ix) From recognized provident fund, approved superannuation fund, pension fund, approved gratuity fund-

a) Any contribution received by the employee and employer; and

b) Income distributed to the beneficiary thereof from which the fund is liable to tax Provided that the amount received by the taxpayer as gratuity from by approved gratuity fund does not exceed the limit two crore fifty lakh. (Sixth Schedule, Part I, Para 6);

x) Any income from a provident fund established under the Provident Fund Act, 1925. (Sixth Schedule, Part I, Para 7);

xi) any amount received by any employee of a government body, local authority or autonomous or semi-autonomous body and their controlled units or institutions on voluntary retirement under any scheme approved by the Government for this purpose. (Sixth Schedule, Part I, Para 8).

xii) money or benefit received by an employee from a group insurance policy, by whatever name called (Sixth Schedule, Part I, Para 37).

In addition to above, Board or Government exempted some employment income through issuing SROs, namely -

a) According to SRO 182-law/99, dated 1 July 1999, if salary tax is paid by employer, tax shall not be applicable on such paid tax.

b) According to SRO 298/2015 dated 8 October 2015, foreign expatriate having technical knowledge employed by any company, operating for production of goods or rendering service in any Economic Zone (as declared and established under section 5 and 4 respectively, of Bangladesh Economic Zone Act 2010), 50% of tax payable by him/her will be exempted from income tax for 3 years from appointment by said company.

4.6 Tax rebate on certain investment

According to section 78 of Income Tax Act, 2023, resident individual and non-resident Bangladeshi shall be entitled to tax rebate as under:

Lower of:

(i) 3% of A; or
(ii) 10% of B; or
(iii) Tk. 7.5 lakh.

Where:
A = Total income, excluding income that is tax-exempt, subject to a reduced tax rate, derived as a share from a partnership firm or association of persons, or income to which the provisions of final settlement of tax apply.

B = Total investment of the taxpayer as per Part III of Sixth Schedule.

4.7 Items included in investment allowance related to salary income:

From basic salary, the employer can deduct a certain amount of money under various heads according to the contract between employer and employee. Of those some of the deductions are included in the items of investment allowance for which tax rebate is admissible: As per the regulations of Part III of Sixth Schedule of the Income Tax Act, 2023, the following salary items are considered as a part of the investment allowance:

i) Any sum deducted from salary to a deferred annuity or for making provisions for his wife or children, provided that the sum so deducted shall not exceed one-fifth of the salary. (Para 3)

ii) Employee's contribution to a General Provident Fund [GPF]. (Para 4)

iii) Employee's and Employer's contribution to Recognized Provident Fund (Para 5)

iv) Ordinary annual contribution to approved superannuation fund. (Para 6)

v) Employee's contribution to a benevolent fund or group insurance scheme. (Para 12).

Computation of taxable income from salary at a glance:

Description	Amount that will be added with salary
1. Basic salary	Full
2. Dearness allowance	Full
3. Bonus	Full
4. Commission and fees	Full
5. Advance salary	Full
6. Arrear salary	Full, provided that, it was not taxed in earlier years
7. Leave encashment	Full
8. Approved Pension	Nothing, since fully tax free
9. Approved Gratuity	Amount exceeding Tk.2.5 crore
10. Annuity	Full
11. Profit in lieu of salary	Full
12. Profit in addition to salary	Full
13. Education allowance for children	Full
14. Employer's contribution to RPF	Full
15. Employer's contribution to employee's personal life insurance policy	Full
16. Entertainment allowance	Full
17. Medical allowance	Full except the amount for operation related to heart, kidney, eye, liver and brain, replacement of artificial body parts and cancer treatment.
18. Traveling allowance	Unspent amount.
19. Special allowance	Nothing, if given and spent for official purpose.

20. House rent allowance	Full
21. Rent free accommodation	Annual value of the accommodation
22. Accommodation at concessional rate	Difference between annual value and amount received from employee
23. Conveyance allowance	Full
24. Transport / conveyance facility	Tk. 15,000 per month for a car with an engine capacity of up to 1500cc, Tk. 20,000 per month for a car with an engine capacity over 1500cc but not exceeding 2000cc, Tk. 30,000 per month for a car with an engine capacity over 2000cc but not exceeding 2500cc, and Tk. 50,000 per month for a car with an engine capacity exceeding 2500cc.
25. Free tea, coffee or light beverage in office premises	Nothing
26. Free dress, telephone, power, gas, water in office etc.	Full
27. Servant allowance	Full
28. Compensation	Full
29. Allowance received as head of the department / Charge allowance.	Fully tax free if it spent for office purpose.
30. Overtime	Full
31. Residence telephone bills / utility bills / club bills reimbursed	Full
32. Group insurance premium paid by a company for its employees.	Nothing
33. Benefits from group insurance	Nothing

4.8 Salient points in assessment of income from salaries

(i) Tax is payable by an assessee under the head "Income from Employment" in respect of any salary or wages, any annuity, pension or gratuity and any fees, commission, perquisites or profits in lieu of, or in addition to, any salary or wages, and any advance salary;

(ii) Tax is levied on salaries which are due, whether paid or not, as well as on salaries which are paid, whether due or not;

(iii) Relationship of employer and employee must exist between the payer and the recipient of salaries. The employer may be Government, a local authority, a company or any other public body or association or any private employer;

(iv) Death-cum-retirement benefits or gratuities and certain payments from funds are completely exempt from tax;

(v) Income chargeable under the head "Income from Employment" is to be computed after making certain deductions;

(vi) The provisions regarding different types of provident funds and payment of life insurance premium are very important and are to be carefully studied to find out the correct income tax on income chargeable under the head "Income from Employment";

(vii) Salaries are subject to deduction of tax at source. Hence, income tax is to be paid on Salaries for a particular assessment year at the rates applicable thereto.

Worked Examples and Solutions

Worked example – 1

From the following data compute total income and tax payable by Mr. Amit Bhowmik for the income year ended 30 June 2026:

Elements of salary

Basic salary: Tk. 20,000 per month, total Tk. 240,000
Bonus: 2 month's basic pay
Free furnished accommodation of which annual value was Tk. 200,000:
Performance bonus: Tk. 450,000.
Employer's contribution to RPF: @ 10% of basic salary
Car (2000cc): partly used for office and partly for personal purpose
Life insurance premium paid by Mr. Amit Bhowmik Tk. 6,000

Solution 1:

Mr. Amit Bhowmik
Computation of total income and tax liability
For the assessment year 2026-27
Income from "employment" u/s 32:

Basic salary @ Tk. 20,000 p.m. for 12 months	240,000
Free furnished accommodation – rental value	200,000
Car benefit (monthly Tk. 20,000 as 2000cc)	240,000
Employer's contribution to RPF – 10% of Basic	24,000
Bonus - 2 month's basic	40,000
Performance bonus	450,000
Total income from employment before exemption	**1,194,000**
Less: Exemption (lower of 1/3 of total employment income or Tk. 500,000)	**398,000**
Total income from employment	**796,000**

Calculation of tax liability:

On first Tk. 400,000 @ 0%	0
On next Tk. 300,000 @ 10%	30,000
On next Tk. 96,000 @ 15%	14,400
Gross tax liability	44,400
Less: Tax rebate (note-1)	(-)5,400
A. Tax liability after investment tax rebate	**39,000**
B. [Minimum tax]	**5,000**
Tax liability (Higher of A and B)	**39,000**

Note – 1: Actual investments made:

Contribution to RPF by both employee and employer	Tk.	48,000
Life insurance premium	Tk.	6,000
Total investment	Tk.	54,000

Investment tax credit:
Lower of i) Tk. 23,880 (0.03 X 796,000) or ii) Tk. 5,400 (0.10 X 54,000) and iii) Tk. 7.5 lakh.

Worked example – 2

Mr. Milky, CEO of a Multinational company in Bangladesh, has got the following income for the income year ended 30 June 2026. You are required to calculate the total income and tax payable of Mr. Milky.

(a) Basic pay of Tk. 150,000 per month sent directly to his bank account.

(b) Rent free accommodation provided by the company annual value of which is Tk. 600,000.

(c) Full time company car (3000cc) for his own use and for his family.

(d) Company pays Tk. 100,000 p.m. for his three school going children which is paid to the school authority directly.

(e) He received two festival bonus equivalents to basic pay during the festival time which he spent partly for his family and partly for the poor people in his village.

(f) Driver's salary was Tk. 10,000 p.m. paid to his driver's bank account.

(g) Company paid Tk. 300,000 to him during the year being the reimbursement of various utility bills of his house.

(h) He was paid Tk. 1,000,000 for his overseas travels for the official trip out of which he saved 25% during the year.

(i) Bill paid for international club Tk. 295,000.

(j) He received interest on securities Tk. 175,000 on his investments.

(k) He has got one house of his own at Baridhara and he received total Tk. 1,200,000 as rent from letting it out to a foreigner.

(l) He paid Tk. 150,000 as LIP for himself.

(m) He invested Tk. 500,000 on Govt. bond and Tk. 1,000,000 primary shares of listed companies.

(n) Received cash dividend (net of TDS) Tk. 202,500 during the year.

(o) TDS from salary Tk. 700,000.

Solution 2:

Mr. Milky
Computation of total income and tax liability
For the assessment year 2026-27

Income from employment:		**Tk.**	**Tk.**
Basic salary @ Tk. 150,000 p.m.	Tk. 150,000 × 12	1,800,000	
Free accommodation – Annual value		600,000	
Car benefit (3,000cc)	Tk. 50,000 × 12	600,000	
Fee to school going children	Tk. 100,000 × 12	1,200,000	
Festival bonus	Tk. 150,000 × 2	300,000	
Reimbursement of utility bills		300,000	
Savings from official oversees travel	Tk. 1,000,000 × 25%	250,000	
Club bills paid by the company		295,000	

Total income from employment			5,345,000
Less: Exemption (lower of 1/3 of total employment income or Tk. 500,000)			500,000
Taxable income from employment			4,845,000
Income from financial asset			
Interest on securities			175,000
Cash dividend	Tk.202,500 ×100/90		225,000
Income from rent			
Annual value		1,200,000	
Less: Repair and maintenance @ 25%		300,000	900,000
Total income			**6,145,000**

Income tax liability:	Tk.
On first Tk. 400,000 @ 0%	-
On next Tk. 300,000 @ 10%	30,000
On next Tk. 400,000 @ 15%	60,000
On next Tk. 500,000 @ 20%	100,000
On next Tk. 2,000,000 @ 25%	500,000
On balance Tk. 2,325,000 other than cash dividend @ 30%	697,500
On cash dividend 225,000 @ 15% [fixed 15% tax rate as per 7th Schedule]	33,750
Gross tax on liability	**1,421,250**
Less: Investment tax rebate (note 1)	(-)165,000
Tax liability after investment tax rebate	**1,256,250**
Less: Tax deducted at sources	
On cash dividend @10%	(-)22,500
TDS by company employer	(-)700,000
Net tax payable	**533,750**

Note 1:

Actual investments made:	
Investment in Government Bonds Tk. 500,000 + Primary Shares Tk. 1,000,000	Tk. 1,500,000
Life insurance premium	Tk. 150,000
Total investment	**Tk. 1,650,000**
Tax rebate:	Tk. 184,350
i) 0.03 X 6,145,000	Tk. 165,000
ii) 0.10 X 1,650,000	Tk. 750,000
iii) Tk. 750,000	
Lower one –	**Tk. 165,000**

Worked example – 3

Mr. Mallik is a service holder. Following are the particulars of his income from salary for the year ended on 30th June 2026:

(a) Basic salary Tk. 25,000 per month.

(b) Dearness allowance - 10% of Basic salary.
(c) Two festival bonus - each equal to one month's basic salary.
(d) He has been provided with a rent-free quarter, the annual value of which is Tk. 180,000.
(e) He has been provided with a car (2000cc) for both office and private use.
(f) Medical allowance - Tk. 250 per month.
(g) During the year he received Tk. 6,000 as traveling allowance.
(h) He is given a servant allowance of Tk. 200 per month.
(i) He contributes 1% of his basic salary to the Group Insurance Scheme.
(j) He deposited Tk. 500 per month on a Deposit Pension Scheme.

Compute total income from salary and investment tax credit.

Solution 3:

Assessee: Mr. Mallik
Computation of total income
For the assessment year 2026-27

Heads of income	Tk.	Tk.
Income from employment (section - 32):		
i) Basic salary (25,000x12)	300,000	
ii) Dearness allowance (300,000x10%)	30,000	
iii) Festival bonus (25,000x2)	50,000	
iv) Rent free accommodation (Annual value)	180,000	
v) Conveyance facility (Monthly 20,000)	240,000	
vi) Medical allowance (250x12)	3,000	
vii) Traveling allowance	6,000	
viii) Servant allowance (200x12)	2,400	
Total employment income before exemption		**811,400**
Exemption (lower of 1/3rd of gross salary or 500,000)		(-)270,467
Total income from employment		**540,933**

Investment tax credit:

Particulars	Amount (Tk.)
Employee's contribution to Group Insurance Scheme 1% of B.S. (300,000x1%)	3,000
Contribution to DPS (500x12)	6,000
Total	**9,000**
Investment allowances:	
Lower of:	
a. 3% of income	16,228
b. 10% of investment, and	900
c. Tk. 750,000	750,000
	900

Worked example – 4

On July 2025, Mr. Syful Hoque's basic salary falls on Tk. 10,000 in the scale of 10,000-200x12-12,000. His date of yearly increment is on 1st April. He received dearness allowance @ 10% of

basic salary and medical allowance Tk. 300 per month. During the year his actual amount of medical expense was Tk. 3,000. He received two bonus equivalents to one month's basic salary-one received before the date of increment and another after increment.

He contributes 10% of his basic salary to a recognized provident fund from which he has also received an interest of Tk. 1,500 @ 14% on which the fund was taxable. His employer also contributes the same amount to the RPF. He has been provided with a rent-free quarter of which annual value is Tk. 300,000 and a car (2500cc) for both official and personal purpose. During the year he has also received an entertainment allowance of Tk. 5,000 of which Tk. 4,500 has actually been spent. His investments during the year were as follows:

a) Purchase of shares of a listed company Tk. 2,000.
b) Purchase of gold Tk. 10,000.
c) Payment of his life insurance premium Tk. 4,000 (Policy value Tk. 35,000)
d) Purchase of books and magazine Tk. 3,000.
e) Contribution to a Deposit Pension Scheme Tk. 500 on a monthly basis.

Compute total income and tax liability of Mr. Syful Hoque for the assessment year 2026-27.

Solution 4:

Mr. Syful Hoque
Computation of total income and tax liability
For the assessment year 2026-27

Heads-of income	Tk.	Tk.	Tk.
Income from employment:			
i) Basic salary [(10,000x9) + (l0,200x3))		120,600	
ii) Dearness allowance (120,600xl0%)		12,060	
iii) Medical allowance (300x12)		3,600	
iv) Bonus [10,000+10,200)		20,200	
v) Employer's contribution to RPF [120,600x10%]		12,060	
vi) Interest on RPF@14%	1,500		
Less: Exempted as per 6th schedule Part I para 6	1,500	-	
vii) Rent free accommodation (Annual value)		300,000	
viii) Car facility (2500cc) (30,000x12)		360,000	
ix) Entertainment allowance		5,000	
Total income before exemption			**833,520**
Less: (lower of 1/3rd of total employment income or 500,000			(-)277,840
Total income from employment			**555,680**

Computation of investment allowance:

Particulars	Amount (Tk.)
1. Purchase of shares of listed company	2,000
2. Employee's and employer's contribution to RPF (12,060x2)	24,120
3. Payment of life insurance premium 4,000; maximum (10% of the policy value i.e., 10% of 35,000 = 3,500)	3,500
4. Contribution to Deposit Pension Scheme (500x12)	6,000
Total	**35,620**

Computation of tax liability:

Amount	Tax rate	Tax
First Tk. 400,000	0%	Nil
Next Tk. 155,680	10%	15,568
Gross tax liability		**15,568**
Less: Investment tax rebate		(-)3,562
Tax Liability		**12,006**

Computation of investment rebate:
Lower of i) Tk. 16,670 (0.03 X 555,680) or ii) Tk. 3,562 (0.10 X 35,620) and iii) Tk. 7.5 lakh.

Worked example – 5

Mr. Zaman Hoque was the HR Manager of Axiata Bangladesh Ltd. On July 2025, his basic salary was Tk. 52,000 in the scale of Tk. 40,000-4,000x8-72,000. His date of yearly increment is on 26th March. He was terminated from Axiata Bangladesh ltd. on 30th April, 2026 and Joined Grameen phone Ltd. on 1st June of the same year. During the income year his income from Axiata Bangladesh Ltd and Grameen phone Ltd. are as follows:

From Axiata Bangladesh Ltd.:

He received dearness allowance @ 10% of basic salary and medical allowance Tk. 2,000 per month. He received two festival bonus each equivalent to one month's basic salary in the month of September and April respectively. He contributes 10% of his basic salary to a recognized provident fund. He has been provided with a rent-free quarter of which reasonable rental value was Tk. 450,000 (per year) and a full-time car (2000cc) by the employer. During the year he has also received an entertainment allowance of Tk. 1,000 per month. He has received compensation for the termination of Tk. 200,000 and unapproved gratuity of Tk. 100,000. Moreover, he got final payment settlement of Tk. 180,000.

From Grameen Phone:
His basic salary is Tk. 60,000 per month with 40% house rent allowance and Tk. 5,000 medical allowance per month. He is also entitled to receive Tk. 2,500 conveyance allowance per month. He contributes 10% of his basic salary to a recognized provident fund. His employer also contributed the same.

His taxable income from other sources was Tk. 213,119 during the year. During the year total TDS from various sources of his income was Tk. 20,000. Moreover, his refund claims of Tk. 10,000 for excess payment of tax in the last assessment year was to be adjusted with current year's tax liability. His investments during the year were as follows:

a. Purchase of savings certificate Tk. 100,000.
b. Payment of his life insurance premium Tk. 20,000 (Policy value Tk. 500,000)
c. Contribution to DPS Tk. 3,000 per month.

Compute total income and tax liability of Mr. Zaman Hoque for the assessment year 2026-27.

Solution 5:

Mr. Zaman Hoque
Computation of total income and tax liability
For the assessment year 2026-27

Heads of income	Tk.	Tk.
Income from employment:		
(a) Basic salary (Note 1)	584,774	
(b) Dearness allowance (Axiata) (524,774x10%)	52,477	
(c) Medical allowance (Total)[(2,000x10) + 5,000]	25,000	
(d) Bonus [52,000+56,000]	108,000	
(e) Employer's contribution to RPF (Total) [584,774x 10%]	58,477	
(f) Rent free accommodation (Axiata): (450,000x (10/12))	375,000	
(g) Car facility (Axiata) (20,000 X 10)	200,000	
(h) Entertainment allowance (Axiata) (l,000x10)	10,000	
(i) Compensation (Axiata)	200,000	
(j) Unapproved Gratuity (Axiata)	100,000	
(k) Final payment settlement (Axiata)	180,000	
(l) House rent allowance (Grameen phone) [60,000x40%]	24,000	
(m) Conveyance allowance	30,000	
Total		1,947,728
Less: (lower of 1/3rd of total employment income or 500,000)		(-) 500,000
Income from employment		**1,447,728**
Income from other sources		**213,119**
Total income		**1,660,847**

Computation of Investment allowance

Particulars	Amount (Tk.)
1. Purchase of savings certificate	100,000
2. Payment of life insurance premium 20,000; maximum (10% of the policy value i.e., 10% of 500,000 = 50,000)	20,000
3. Contribution to DPS (3,000 x12)	36,000
4. Employee's and employer's contribution to RPF (58,477x2)	116,954
Total	**272,954**

Investment rebate: Lower of i) Tk. 49,825 (0.03 X 1,660,847) or ii) Tk. 27,295 (0.10 X 272,954) and iii) Tk. 7.5 lakh.

Tax liability:

	Income	Rate	Tax
On the first	400,000	0%	-
On the next	300,000	10%	30,000
On the next	400,000	15%	60,000
On the next	500,000	20%	100,000
On balance	60,847	25%	15,212
Total			**205,212**
Less: Investment tax rebate			(-)27,295

Less: TDS	(-)20,000
Less: Previous Refund adjustment	(-)10,000
Net tax liability	**147,917**

Note:

1. **Total basic salary:**

From Axiata:

Basic salary from July 2025 to February 2026= [Tk. 52,000 x 8	= Tk. 416,000
Basic salary for the month March 2026 = [(52,000*25/31) + (56,000*6/31)]	= Tk. 52,774
Basic salary for the month April 2026	= Tk. 56,000
	= Tk. 524,774

From Grameen phone:

Basic salary for the month June 2026	= Tk. 60,000

Total basic salary for the income year 2025-26 **= Tk. 584,774**

Self-assessment question

1. (a) What is meant by "perquisite" under the Income Tax Act,2023?
   (b) Does it include employer's contribution to a recognized provident fund?
   (c) Discuss the allowable perquisites limit under the Act.

2. A question may arise why employer's contribution to RPF is once added to income and again rank for investment allowance of an assessee. This device is meant to raise total income so that the assessee is put into higher slab of income tax rate.

Income from Rent

Introduction

Learning objectives

Examination context

Topic list

5.1 Definition

5.2 Income from rent

5.3 Allowable deductions in computing 'Income from rent'

5.4 Special income from rent

5.5 Formalities to be followed by the landlord receiving monthly rent more than Tk. 25,000

5.6 Tax to be deducted at source from rent

Worked examples & solutions

Self-assessment questions

Introduction

Learning objectives

- Identify the income under the head 'Income from rent';
- Compute the taxable income under this head;
- Knowing annual value and its computation;
- Identify the allowable deductions under the head;
- Identify non-assessable income under the head;
- Deemed income from rent;
- TDS from house rent in case of commercial use;
- Computation of net tax liability from rent income.

Practical significance

Income from rent is the second head of income and very significant for income tax professionals. It includes some conceptual issues and technicalities that require clear understanding about the topic.

Annual value is the value representing the gross rent from house property. It is the higher value of annual rent and reasonable rent determined by the tax authority. Annual rent is again adjusted for different expenses and TDS. These computations require some rationality on part of the tenants and landlords.

Scope of allowable deductions is another difficulty. Capitalized expenses cannot be deducted and in case of partly let out properties, expenses are deducted proportionately. Repairs and maintenance are considered separately depending on the status of the property as either commercial or residential due to its significance. Advance receipts from the tenants are considered as income and at the time of refund it has got separate treatment. All of these adjustments are very technical and sometimes require professional judgment and this is the reason why the chapter is practically significant.

You will find the details of the above issues in this chapter with some practical examples.

Stop and think

Do you realize that the computation of taxable income under the head 'Income from rent' is one of the basic requirements for determining tax liability? Can you determine the taxable income under the head? Do you understand application of tax deducted at sources by the tenants?

Working context

In practice, as the accountants are sometimes required to prepare their clients' tax returns, they need to advise the clients on how to calculate the taxable income for any income year under different heads. Before advising the clients, accountants should have the clear concept relating to the admissible and inadmissible expenses in different heads of income so that they can deduct or add the expenses in determining the taxable income.

Syllabus links

The topics covered in this chapter are very important for computing taxable income which is required for solving sample practical problems at this level.

Examination context

Exam requirements
In the examination, candidates may be required to:

- Have clear concept of rent income;
- Define annual value;
- Recognize the allowable deductions and allowances;
- Know self-occupancy and its impact in computing taxable income under the head;
- Identify tenant's expenses borne by the landlord and landlord's expenses borne by the tenants;
- Know TDS rate and its application in computing net tax liability;
- Determine interest on borrowed capital and installments for loan taken during construction period;
- Adjustment of advance received from tenants;
- Know impact of capitalized expenses in computing house property income;
- Know the application of vacancy allowance and allowances for un-collectible rents;
- Computing repairs and maintenance expenses in different cases;
- Know the treatment of unspent number of repairs and maintenance;
- Know the residential and commercial use of house property and its impact on computing taxable income;
- Understand different status of a house property; fully let out, partly let out and self-occupied;
- Know penal measures if the landlord does not follow rules/instructions by the NBR;
- Compute net tax liability.

Question practice
For question practice on these topics go to the suggested answers covering this chapter and also this workbook.

Examiner's comments on how students tackle questions
Candidates have to be prepared well for this area as this chapter consists of core concept on computation of income under the head 'income from rent' which is vital for calculating total tax liability. Clear concept and understanding of the contents presented in this chapter will help candidates to resolve any problems relating to computation of income from the head.

INCOME FROM RENT

Section overview

- Income from rent is the second head of income;
- property may be fully let out, partly let out or self-occupied;
- There are some allowable and some inadmissible deductions under the head;
- Computation of income under the head;
- House property may be let out for residential purpose or commercial purpose;
- Actual rent will be adjusted for expenses and TDS;
- Tenants are sometimes allowed to deduct taxes before giving rent to the landlords;
- Landlords can claim allowances for vacancy and uncollected rents;
- Security deposits received from tenants that are not adjustable with rents are not considered as income.

5.1 Definition:

Section 35 provides the definitions in relation to income from rent as:

"House property" means a house, building, or apartment, including furniture, fixtures, and fittings integral thereto, along with the land on which the house is built, and buildings used as warehouses. However, house property shall not include factory buildings rented as an integral part of renting plant and machinery.

"Rent out" means granting the right to use a property without transferring ownership or control, but does not include renting out a property by a scheduled bank, investment bank, finance company, mudaraba or leasing company.

"Property" includes house property, land, furniture, fixtures, factory buildings, business premises, machinery, personal vehicles, and other capital assets that can be rented out.

"Salami or premium" means any non-refundable and non-adjustable lump sum amount, loan, advance, or other benefit paid by a tenant in connection with the lease or rent of a property. However, it does not include the annual value, service charges, or repair and maintenance charges paid by the tenant, regardless of their description.

Section 2(62) defines the "annual value" as the value in relation to any property let out shall be reasonable yearly rental value or the amount of annual rent, whichever is higher.

5.2 Income from rent:

Income from rent shall be the amount of rental value of a property reduced by allowable expenses. However, this provision shall not be applicable in case any portion of the property used for business purposes of business of the owner.

Income from rent of assets shall be computed under this Section irrespective of the nature of trade, commerce, or business except for hostel, hotel, motel or resort.

Computation of total rental value:

Total rental value of any *house property*, including own house property, shall be computed in accordance with the following formula.

A=(B+C) - D, where:

A = Total rental value.
B = Annual value.
C = Any service charge, repair and maintenance charge paid by the tenant, by whatever name called.
D = Vacancy allowance, which shall be admissible only upon production of electricity bills.

In any income year, income from rent of *any property* owned by any person shall be computed in accordance with the following formula.
A = (B+C), where:

A = Income from rent,
B = Total rental value,
C = Special rental income.

5.3 Allowable deductions in computing 'Income from rent'

Following expenses shall be deductible in computing rental income of own house property, namely –

(a) Insurance premium paid;

(b) Interest on loans from banks or finance companies for acquisition, construction, renovation, or reconstruction of property. However, interest on loans before rental income starts can be split into three equal instalments in the next three income years [*no deduction is allowed after the said 3 years*].

(c) Taxes, fees, charges not in the nature of capital expenses;

(d) The amount mentioned in the below table for expenses related to repair, collection of rent, water and sewerage, electricity, maintenance and other basic services:

Nature of property	Deductible as % of total rental value
House property used for commercial purpose	30%
House property used for residential purpose	25%

Further, expenses shall be allowed proportionately if the property is partially rented out or rented out for a portion of the income year.

Deduction admissible from the rental income of other property [except house property]:

(a) Deductions mentioned in Section 49 to 55 of this Act shall be admissible.
(b) Expenses shall only be admissible if payment is made through bank transfer except for allowances under 3rd Schedule.

5.4 Special income from rent:

Section 39 of the Act, following shall be considered as special income from rent:

(1) Any amount received as reimbursement for repair, rent collection, water and sewerage, electricity, maintenance, or other basic services that remains unspent during the income year.

(2) Any expenditure disallowed under the provisions relating to rental income, other than disallowances arising solely from accounting adjustments.

(3) In the case of any refundable or adjustable security, security deposit, or advance received against the lease or rent of property, 10% of the outstanding balance at the end of the financial year shall be treated as special rental income for that income year.

(4) The entire amount of any non-refundable or non-adjustable payment, such as salami, premium, or any similar amount received in connection with the lease or rent of property, shall be treated as special rental income. However, the taxpayer may elect to recognize such income over the lease period or five years, whichever is shorter. If any portion of the amount is refunded in a subsequent income year, the refunded amount shall be allowed as a deduction in computing rental income for that year.

(5) Any expenditure incurred in earning rental income from property other than house property, where tax was required to be deducted at source but was not deducted in accordance with the Income Tax Act, shall be treated as special rental income.

(6) No depreciation, amortization, or any other allowance under the Third Schedule is admissible against special rental income. Such income is taxable at the applicable regular rate.

Illustration – 1

Mr. B. Rahman owns a 5 storied residential house with 3 flats in each floor. He occupied all the flats in 2nd floor for his own residence. Other flats are let out for residential purpose and monthly rent of each flat is Tk. 8,000. Yearly reasonable rent of the whole house is Tk. 1,600,000. Compute annual value.

Annual value:

Actual rent [Tk. 8,000 ×3 ×4 ×12]	Tk. 1,152,000
Reasonable rent [Tk. 1,600,000 × 12/15]	Tk. 1,280,000
Annual value will be actual rent or reasonable rent whichever is higher:	Tk. 1,280,000

Illustration – 2

Mr. B Rahman owns a 5 storied residential house with 3 flats in each floor. He occupied all the flats in second floor for his own residence purpose. Other flats are let out for residential purpose and monthly rent of each flat is Tk. 8,000 including Tk. 1,000 for water, gas and electricity bill of the tenant. Yearly reasonable rent of the whole house is Tk. 1,600,000. Compute annual value.

Annual value:	**Tk.**
Actual rent [Tk. 8,000 ×3 ×4 ×12]	1,152,000
Yearly reasonable rent for 4 floors [(Tk. 1,600,000/5)*4]	1,280,000
Annual value is the higher one	1,280,000

Illustration – 3

Mr. B. Rahman owns a 5 storied residential house with 3 flats in each floor. He occupied all the flats in second floor for residence purpose. Other flats are let out for residential purpose and monthly rent of each flat is Tk. 8,000. In addition to monthly rent, tenants also bear common service charge @ Tk. 1,000 per month per tenant. Yearly reasonable rent of the whole house is Tk. 1,600,000. Compute income from rent.

Annual value:	**Tk.**
Actual rent [Tk. 8,000 ×3 ×4 ×12]	1,152,000
Reasonable rent cum Annual value [(Tk. 1,600,000/5) x 4], higher one-	1,280,000
Add: Landlord's exp. borne by the tenant [Tk. 1,000 x 12 ×3 ×4]	144,000
Total rental value	**1,424,000**
Less: Repair & Maintenance (25% of total rental value) (assume it is actual) Income from rent	**356,000**
	1,068,000

5.5 Formalities to be followed by the landlord receiving monthly rent more than Tk. 25,000

In case of let out property if the gross monthly rent exceeds Tk. 25,000 the owner shall have to:

(a) Maintain bank account and deposit entire monthly rent directly to the account (Irrespective of part or full of rent is received in cash);

(b) Maintain a register about tenants, house rent received from the tenants.

According to section 267 of the Income Tax Act, 2023, if he fails to do so then penalty may be imposed by the income tax authority @ 50% of tax on house property income or Tk. 5,000 whichever is higher.

5.6 Tax to be deducted at source from rent

As per section 109, the tenant or lessee of a house property, hotel, guest house, vacant premises, plant, machinery, or private reservoir shall deduct tax @ 10% from the rent.

If, after assessment, it is found that no tax or a lesser amount of tax is payable by the owner, the full or excess amount shall be refunded. However, no deduction or a deduction at a lower rate shall be applied upon the production of a certificate from the Deputy Commissioner of Taxes.

In this context, 'rent' includes any payment with respect to a lease, tenancy, or any contract or agreement for the use of furniture, fixtures, buildings, including land.

Worked examples and solutions

Worked example – 1:

Mr. Mushtaque Ahmed's house is let out at Tk. 10,000 per month. Income year ended on 30 June. Tenant quitted the house on 31 March in the same financial year and owed Tk. 20,000 for rent being unpaid which was recovered later. House remained vacant for 3 months during the alterations. The owner claimed the following deductions:

	Tk.
Actual cost of repairs	15,000
Alterations expenses	30,000
Interest on mortgage	12,000
Fire insurance premium	5,000
Municipal tax	10,000

Required: Compute his income from rent.

Solution 1:

Mr. Mushtaque Ahmed
Computation of income from rent

		Tk.
Actual rent	10,000 x 12	120,000
Reasonable rent not given		-
		120,000
		(-)30,000
Annual value, higher one-		**90,000**
Less: Vacancy allowance (assume proof is available)		
Rental value:		
Less: Allowable expenses		
Repair & maintenance	(25%x90,000)	22,500
Interest		12,000
Fire Insurance premium		5,000
Municipal tax		10,000
		49,500
Income from rent		40,500
Special rental income (unspent repair) [section 39(1)]	22,500-15,000	7,500
Total income		**48,000**

Note, alternation expense is capital expenditure.

Worked example – 2:

Mr. Faruq owns a residential house at Santinagar, Dhaka, which was constructed 10 years back with a loan of Tk. 2,000,000 from House Building Finance Corporation. The house has been let out for commercial purpose @ Tk. 150,000 per month. The reasonable rent of the house is Tk. 1,500,000.

The following expenses were incurred in the income year for that house:

1. Repair expense Tk. 44,000;
2. City Corporation Tax Tk. 35,000;
3. Rent collection expenses Tk. 12,000;
4. Fire insurance premium Tk. 8,000 per quarter;
5. Bank interest Tk. 300,000

Compute rental income from house property.

Solution 2:

Mr. Faruq
Computation of income from rent

		Tk.
Actual rent	12x150,000	1,800,000
Reasonable rent		1,500,000
Annual value, higher one		**1,800,000**
Less: allowable expenses		
Repair & maintenance	30% of 1,800,000	540,000
City Corporation tax		35,000
Insurance premium	8,000 x 4	32,000
Interest on loan		300,000
		907,000
Income from rent		893,000
Special rental income [section 39(1)]	540,000-44,000-12,000	484,000
Total income		**1,377,000**

Note

Since the house is let out for commercial purpose, repair and maintenance expense is considered as 30% of the rental value. Here actual spending for repair expenses and collection expenses is less than 30%. So, the unspent amount [Tk. 540,000-44,000-12,000=484,000] will be treated as special rental income as per section39(1).

Worked example – 3:

Mr. Marwari has a house at Mohakhali C/A with an area of 4,800 square feet. He let out this house to a computer firm at a monthly rent of Tk. 600,000. The reasonable rent per square feet at Mohakhali commercial area is Tk. 120 per month. The following expenses were incurred in the income year for that house:

1. Repair expense Tk. 1,590,000;
2. City Corporation Tax Tk. 15,000;
3. Fire insurance premium Tk. 90,000;
4. Night guard's salary Tk. 96,000;
5. Installation of electricity line Tk. 325,000;

During the year Mr. Marwari paid installment of house loan to HSBC Tk. 1,670,500 (out of which principal amount is Tk. 640,000). Compute income from rent from the house property.

Solution 3:

Mr. Marwari
Computation of income from rent

		Tk.
Actual rent	600,000 x 12	7,200,000
Reasonable rent	4,800 x120 x 12	6,912,000
Annual value, higher one		**7,200,000**
Less: Allowable expenses		
Repair & maintenance	30% x 7,200,000	2,160,000
City Corporation tax		15,000
Insurance premium		90,000
Interest on loan	1,670,500-640,000	1,030,500
		3,295,500
Income from rent		3,904,500
Special rental income [section 39(1)]	2,160,000-1,590,000-96,000	474,000
Total income		**4,378,500**

Note: installation of electricity line is capital expenditure, so this is not deductible.

Worked example 4

Mr. Jamilur Rahman is the owner of a five-storied building at Lalmatia. He resides with his family in the 2nd floor and all other floors (in each floor there are two units) are let out for residential purpose at a monthly rent of Tk. 10,000 per flat including Tk. 1,000 as WASA and DESA bill. The reasonable rent of the house is Tk. 1,000,000.

Mr. Rahman claims the following deductions for the entire building:

1. Repair expenses Tk. 130,000;
2. Land tax Tk. 2,000;
3. Insurance premium Tk. 16,000;
4. Caretaker and Night guard salary Tk. 24,000;
5. Municipal tax Tk. 22,000;
6. Alteration cost for ground floor Tk. 30,000.

Mr. Rahman has taken a building renovation loan of Tk. 1,500,000 at a flat interest rate of 18% from City Bank Limited at the beginning of the income year. Compute income from rent for the income year.

Solution 4

Mr. Jamilur Rahman
Computation of income from rent

		Tk.
Actual rent	10,000 x 4 x 2 x 12	960,000
Reasonable rent	(1,000,000/5) x 4	800,000
Annual value, higher one		**960,000**

Less: Expenses		
Repair & maintenance	[25% of Tk. 960,000]	240,000
Municipal tax	[(22,000/5)x4]	17,600
Insurance premium	[(16,000/5)x4]	12,800
Interest on loan	[(18% of 1,500,000/5)x4]	216,000
Land tax	[(2,000/5)x4]	1,600
		488,000
Income from rent		**472,000**

Note:

1. Expenses are allowed proportionately;
2. Alteration cost is a capital expenditure hence not allowable.

Self-Assessment Questions

(a) Define "Annual Value" of a property under the Income Tax Act, 2023.

(b) Is the 'Annual value' of a property to be determined when it is occupied by its owner for residential purposes?

(d) What are the allowable deductions from rental value in determining the 'Income from rent of a house property' under the Act?

(e) If any owner of the house received house rent more than Tk. 25,000 per month then what formalities to be maintained by him? What may happen if he does not follow the rules?

Chapter 6

Income from Agriculture

Introduction

Learning objectives

Examination context

Topic list

6.1 Scope of income from agriculture

6.2 Characteristics of income from agriculture

6.3 Special agricultural income

6.4 Non-agricultural income

6.5 Income from agricultural property

6.6 General allowable deductions in computing income from agriculture

6.7 Calculation of special deductions in case of non-maintenance of books of accounts

6.8 Depreciation allowance

6.9 Non-assessable agricultural income

Worked Examples & solutions

Self-assessment questions

Introduction

Learning objectives

- Identify income from agriculture.
- Compute the taxable income under the head 'income from agriculture'.
- Identify different types of agricultural income.
- Identify the allowable deductions under the head.
- Illustrate the non-assessable income under the head.
- Identify the area of reduced tax rate.
- Identify partly agricultural income and partly business income.
- Compute net tax liability in different situations.

Practical significance

The head 'Income from agriculture' has good potential for increasing the revenue to the Government in Bangladesh due to its significance. Bangladesh is an agricultural country and its agriculture sector has significant contribution to GDP every year. But collection of tax from this head is insignificant. Here, professional accountants can play an important role by devising the way of collecting tax under the head through simplification and modernization of tax laws and process.

This chapter presents different form of agricultural income, allowable deductions, and non-assessable income under the head, non-agricultural income, and other related topics. A clear understanding on each topic presented in the chapter will make the students expert to give opinions to their clients in tax related issues.

You will find the details of the above issues in this chapter with some practical examples.

Stop and think

Do you realize that the computation of taxable income under the head 'income from agriculture' is one of the basic requirements for determining tax liability? Can you determine the taxable income under the head? Can you compute net tax liability of an assessee having income under the head?

Working context

In practice, as the accountants are sometime required to support to prepare their clients' tax returns, they need to advise the clients on how to calculate the total taxable income for any income year. Before advising the clients, accountants should have the clear concept relating to the admissible and inadmissible expenses so that they can deduct or add the expenses in determining the taxable income.

Syllabus links

The topics covered in this chapter are very important for computing taxable income which is required for solving sample practical problems at this level.

You will be also using this knowledge when you tackle the taxation paper later on in the Professional Stage and it will also underpin the technical aspects at the Advanced Stage.

Examination context

Exam requirements

In the examination, candidates may be required to:

- Define income from agriculture;
- Identify different types of agricultural income;
- Compute the taxable income under the head 'Income from agriculture';
- Differentiate fully, partly and other agricultural income;
- Identify the allowable deductions under this head;
- Illustrate the non-assessable income under this head;
- Know the application of reduced tax rate and areas where this tax rate is applicable;
- Define non-agricultural income and its impact on computing total income and tax liability;
- Compute net tax liability in different situations.

Question practice

For question practice on these topics go to the suggested answers covering this chapter and also this workbook.

Examiner's comments on how students tackle questions

Candidates have to be prepared well for this area as this chapter consists of core concept on computation of income which is vital for calculating tax liability. Clear concept and understanding of each content of this chapter will help candidates to resolve any problems relating to computation of agricultural income.

INCOME FROM AGRICULTURE

Section overview

- Income from agriculture is one of the important heads of income;
- The total income may not be taxable income;
- There are some allowable, inadmissible and not permissible deductions under the head;
- Some income under the head is not assessable;
- On some specific classes of income under the head is taxed at a reduced rate;
- Depreciation allowance on agricultural property is different;
- A part of the gain on sale of agricultural asset will be reported as income from agriculture;
- It is very important to know non-agricultural income and partly agricultural income;
- Advance tax need not be payable on agricultural income up to Tk 8 lakh.

6.1 Scope of income from agriculture

According to section 40 of the Income Tax Act, 2023 –

Income from agriculture includes income derived from a wide range of agricultural activities, such as horticulture, animal husbandry, poultry farming, fish farming, reptile farming, nursery operations, cultivation on land or in water, the production of eggs, milk, fruits, flowers, honey, seeds, wood, grass, and shrubs, as well as income arising from the natural use of land.

In the case of tea and rubber, 60% of the income from their production and processing is treated as agricultural income, while the remaining 40% is regarded as income from business or profession.

6.2 Characteristics of agricultural income

a) Income should be derived from land. A person may transfer his agricultural land to another in consideration of a life annuity as was in the case of *Gopal Saran Narain Singh V CIT 1935, ITR 237 (P.C)* or of other thing which is charged upon the land. The annual receipt would not be agricultural income.

b) The land on which agricultural income is assessed must be situated in Bangladesh.

c) The land must be used for agricultural purpose. Unless there is some measure of cultivation of the land, some expenditure of skill and labor upon it, it cannot be said to be used for agricultural purposes. Income from the sale of forest trees, bushes, bamboos, fruits and flowers growing on land naturally without any human skill and labour is not agricultural income. Income derived from the sale of wild grass or trees of spontaneous growth is not agricultural income. But land leased for grazing or pasturing animals required for agricultural purpose is used for agricultural purposes and income from lease is agricultural income irrespective of whether the grass on the land is cultivated or grown naturally.

6.3 Special agricultural income

According to section 41 of the Income Tax Act, 2023:

1. Without prejudice to the section 40 of ITA, 2023, the provision of section 41 shall be applied to compute special agricultural income.
2. As per section 41(2), if an asset is sold in any income year after being used by the assessee for agricultural purpose under section 40, it shall be computed as follows, namely –

If sale proceeds is more than the acquisition value	Income from capital gain = A-B Income from agriculture = B-C
If sale proceeds is not more that acquisition value but exceeds written down value (WDV)	Income from agriculture = A-C

3. As per section 41(3), if in any income year the amount received as insurance, salvage or compensation due to the abandonment, destruction of any asset being used by the assesses in his agricultural work, exceeds the WDV, the said amount shall be included under the head 'Income from agriculture' as below, namely –

If insurance, salvage or compensation value is more than the acquisition value	Income from capital gain = A- B Income from agriculture = B-C

If insurance, salvage or compensation value is not more that acquisition value but exceeds written down value (WDV)	Income from agriculture = A-C

4. For the purpose of section 41, –

   A = Sale proceeds of the asset or insurance, salvage or compensation value of the asset
   B = Acquisition value of the asset
   C = Written down value (WDV) of the asset after allowing depreciation under third schedule

5. If difference between sale proceeds or salvage/compensation value and WDV of the asset being used in agricultural purpose is negative i.e., loss, the loss shall be treated as allowable expense for the purpose of computation of 'Income from agricultural'.

6. If the tax deducted under Part VII is less than the amount required to be deducted, the amount of tax short-deducted or unpaid, together with an additional 50% of that amount, shall be payable. However, where the tax paid as a result of action taken under Section 143 is less than the tax required to be deducted under Part VII, the shortfall, together with an additional 50% of that amount, shall be payable. Further, any expenditure disallowed under Section 55 shall be treated as special agricultural income.

6.4 Non-agricultural income

Certain types of income, although related to land, agricultural products, or rural activities, do not qualify as agricultural income and are taxable under other heads of income, depending on their nature. These include income from the sale of naturally grown forest trees, wild grass, flowers, fruits, bamboo, or reeds that grow without human cultivation; interest on arrears of rent for agricultural land; rent from vacant land not used for agricultural purposes; royalties or ground rent from mining, quarries, potteries, or similar activities; the sale of soil for brick fields; income from the sale of water for irrigation; the sale of stones from quarries; salary earned as an agricultural supervisor or manager; profits from the resale of crops purchased from others; income from dairy, poultry, or fishery enterprises operated as commercial businesses; income from fish hunting or similar activities; interest received on loans advanced in the form of agricultural produce; and dividends distributed by a company out of its agricultural income. These receipts are not regarded as agricultural income for tax purposes.

6.5 Income from agricultural property

When the property is occupied by the cultivator or the recipient where any process as may be described agricultural, is carried therein by the recipient of agricultural income, or in the immediate vicinity of agricultural land, and is used as a dwelling house by the cultivator or the recipient of agricultural income, in connection with the land, any income from such house property is regarded as agricultural income. But non-agricultural income does not become agricultural by reason of only in direct connection with agricultural land [Premier Construction Co. V.C.LT. 1948 I.T.R. 380, 384].

6.6 General allowable deductions in computing income from agriculture

As per section 42 of ITA, 2023, in computing 'Income from agriculture' in any income year, the amount wholly and exclusively expended (not capital or personal expenditure) for the purpose

of agriculture, shall be treated as allowable deduction. And following deduction shall be treated as general allowable deduction, namely –

(a) Any tax, land development tax or khajna paid on land or ground used for agricultural purpose;

(b) Rent payable for land or ground used for agricultural purpose, development and maintenance expense and cultivation expense;

(c) Interest or profit payable on loan taken for agricultural purpose;

(d) Repair and maintenance of machinery and equipment used for agricultural purpose, rearing of livestock for cultivation, processing or transport related expenditure;

(e) Insurance premium;

(f) Expenditure for protecting agriculture from natural calamities or other damages;

(g) Depreciation and amortization expense as per third schedule of this Act;

(h) Where animal which was used for agricultural purpose has died or become permanently disabled, the difference between purchase price and sale proceeds of animal or its meat;

(i) Any expenditure (not in capital nature) incurred in connection with a visit abroad as a member of any Government sponsored agricultural delegation;

(j) Any expenditure incurred on training to Bangladeshi citizens related to such scheme as approved by the Board;

(k) Expenditure incurred in conducting scientific research related to agriculture or expenditure incurred in conducting such scientific research whereby the research is conducted wholly and exclusively of the purpose of agricultural development of the taxpayer in Bangladesh.

Note that only so much of expenditure related to income from agriculture shall be treated as allowable expenditure.

6.7 Calculation of special deductions in case of non-maintenance of books of accounts

According to section 43 of the Income Tax Act, 2023, where a taxpayer does not maintain proper books of account or the accounts cannot be verified, 60% of the market value of the agricultural produce shall be deemed to be allowable expenses for the purpose of computing agricultural income. However, this provision does not apply to income derived under adhi, barga, bhag, or other crop-sharing arrangements.

Section 44 of ITA, 2023 states that if withholding tax is not applied (where applicable) on any expenditure, such expenditure shall not be treated as allowable expenditure. Additionally, the provision of section 55 of ITA, 2023 as if the provision was related to 'income from agricultural'.

6.8 Depreciation allowance

According to Part I of Third Schedule of ITA, 2023, depreciation allowance in respect of any capital asset, works or physical infrastructure owned by a taxpayers used for agricultural purpose, depreciation shall be allowed as per below table:

Assets	Rate
1. A building or structure constructed by brick, concrete, steel or similar material	5%
2. House constructed by tin, bamboo or similar materials	10%
3. Permanent fence	10%
4. Tube – well	10%
5. Tanks	10%
6. Irrigation works, channels, pipes	10%
7. Agricultural instruments made by wood or bamboo	20%
8. Weight machine	10%
9. Tractors, oil engines and light machinery	10%
10. Truck, delivery van, other motor vehicle	10%
11. Piper pumping equipment	20%
12. Non-mechanical van	15%
13. Steam engine	10%
14. Factory machinery	15%
15. Any such common instrument, tools, plant and other property	10%

6.9 Non-assessable agricultural income

According to Sixth Schedule, Part I, Para 20 of ITA, 2023, income up to Tk. 500,000 of any individual assessee under the head 'Income from agricultural' shall be exempted from tax if the said individual does not have any income from other sources except income from financial assets.

Illustration – 1

Mr. Rajib reports Tk. 1,200,000 as income from agriculture during the income year ended on June 30. He has no income from other sources. In this case, Mr. Rajib will pay tax on Tk. 300,000 only. His non-assessable income is Tk. 900,000 [Tk. 400,000 income subject to 0% tax + Tk. 500,000 (exempted income)]. It is assumed that Mr. Rajib doesn't fall in elderly citizen or disable category.

Worked examples and solutions

Worked example 1

Relevant information regarding the agricultural income of Mr. Jamal Ahmed for the year ended on June 30, 20X1 is given below:

Sale of paddy	150 maunds @ Tk. 600 per maund
Sale of jute	100 maunds @ Tk. 800 per maund
Sale of rabi crops	Tk. 65,000
Income from barga	Tk. 20,000
Lease rental of agricultural land	Tk. 30,000

Expenses relating to this income are as follows:

Cost of seeds and fertilizer	Tk. 40,000
Cultivation cost	65,000
Transportation cost	15,000
Ordinary processing cost	25,000
Land revenue paid	7,000
Crop insurance premium	5,600
Allowable depreciation	3,000
Interest on borrowed fund	2,800

Compute total income of Mr. Jamal Ahmed assuming that:

(a) He did not maintain proper books of accounts
(b) He maintained necessary books of accounts

Solution 1:

Mr. Jamal Ahmed
Computation of agricultural income

(a) When books of accounts are not maintained:

Income from agricultural:	**Tk.**
Sale of paddy (150xTk. 600)	90,000
Sale of jute (100xTk. 800)	80,000
Sale of rabi crops	65,000
Income from barga	20,000
Lease rental of agricultural land	30,000
	285,000
Less: Admissible expenses:	
1. Production cost (285,000 x 60%)	171,000
2. Union parisad tax	4,400
3. Crop insurance premium	5,600
4. Allowable depreciation	3,000
5. Interest on borrowed fund	2,800
	186,800
Total income from agriculture	**98,200**

(b) When proper books of accounts are maintained:

Income from agricultural:	**Tk.**
Income from sale of paddy (150 x 600)	90,000
Income from sale of jute (100 x 800)	80,000
Income from sale of rabi crops	65,000
Income from Borga	20,000
Lease of agricultural land	30,000
	285,000
Less: Admissible expenses:	
1. Production cost-	
Cost of seeds and fertilizer	40,000
Cultivation costs	65,000
Transportation cost	15,000
Ordinary processing cost	25,000
	145,000
2. Land revenue paid	7,000
3. Crop insurance premium	5,600
4. Allowable depreciation	3,000
5. Interest on borrowed fund	2,800
	163,400
Total income from agriculture	**121,600**

Worked example 2

Mr. Sanjib Majumder is a farmer who owns agricultural land which is used three times a year to produce agricultural goods. Such cultivation is mainly done for commercial purpose; however, a very insignificant part is consumed by him. He is an elderly citizen (age more than 65 years) and has reported income from no other sources. During the income year ended on June 30, 2026, he has reported following information relating to income from agriculture:

Agricultural produce	Volume of production	Self-consumption	Market price
Paddy	215 maunds	15 maunds	Tk. 700 per maund
Potato	112 maunds	12 maunds	Tk. 180 per maund
Cereals	835 kgs	35 kgs	Tk. 115 per kg

In addition to above income, he also produced seasonal vegetables (beans) during winter on the surroundings of his agricultural land. Total production was 256 kgs and sold at the rate of Tk. 16. Out of the total production, 16 kgs are used for self-consumption and reported Tk. 1,200 as cost of bean production.

He also has reported Tk. 95,000 income from poultry firm and fulfills all conditions to be non-assessable. He has also reported Tk. 180,000 income from fisheries.

Expenses relating to agricultural produce like paddy, potato and cereals are as follows:

Cost of seeds and fertilizer	Tk. 36,500
Labour charge	40,000
Maintenance costs of agricultural equipment	4,000

Union parishad tax	5,800
Crop insurance premium	8,200
Depreciation on tractor @ 20%	14,000

Mr. Majumder has borrowed Tk. 50,000 from Rajshahi Krisi Unnayon Bank at an interest rate of 12% per annum on 15th October 2021. Allowable depreciation for tractor as per the Third Schedule of the ITA, 2023 is 10%. Cost of seeds and fertilizer includes Tk. 1,500 spent against Borga. He maintains books of accounts properly.

Solution 2:

Mr. Sanjib Majumder
Computation of agricultural income

Agricultural income :	**Tk.**	**Tk.**	**Tk.**
Market price of paddy production (215 x 700) [note-1]		150,500	
Market price of potato (112 x 180)		20,160	
Market price of cereals (835 x115)		96,025	
Market price of seasonal vegetables (256 x16)		4,096	270,781
Income from poultry farm	95,000		
Income from fisheries Tk.	180,000		
Less: exempted up to Tk. 500,000 [6th schedule part-1 para-20ka]	(275,000)	-	
Less: Admissible expenses:			
1. Production cost-			
Cost of seeds and fertilizer	36,500		
Labour charge	40,000		
Maintenance of agricultural equipment	4,000		
		80,500	
2. Union parisad tax		5,800	
3. Crop insurance premium		8,200	
4. Allowable depreciation (note 2)		7,000	
5. Interest on borrowed fund (note-3)		4,250	
6. Cost of bean production		1,200	
			106,950
Total			163,831
Less: Exemption as per 6thschedule, part-1, Para 20 [Maximum Tk. 500,000 is exempted]			163,831
Total income			**Nil**

Notes:

1. Market price of the produce is to be taken as sales proceeds. So self-consumption has not been taken into consideration, rather whole produce has been multiplied by market price to arrive sale proceeds.
2. Allowable depreciation = (14,000/.20) x .10 =7,000
3. Interest on borrowed fund = (50,000 x 12%) x 8.5/12 = 4,250

4. As agriculture is the only source of income for Mr. Sanjib Majumder, he is allowed to get maximum Tk. 500,000 exemption as per 6th Schedule, Part I, Para 20 in assessing his total income.
5. As total income of Mr. Sanjib Majumder doesn't exceed the non-assessable limit of Tk. 400,000; he will have no tax liability.

Worked example 3

From the following particulars of income, compute the total income Mr. Jibon Karmaker for the income year 2026-27.

1. Sale of paddy: (250 maunds @ Tk. 500)	Tk.	125,000
2. Sale of jute: (100 maunds @ Tk. 400)		40,000
3. Sale of rabi crops:		50,000
4. Annual rental from leasing agricultural land		20,000
5. Sale of forest timber and bamboo		6,000
6. Income from tea garden		30,000
7. Income from rubber garden		40,000
8. Income from tobacco industry		30,000
9. Income from sugar industry		50,000
10. Income from poultry farm		35,000
11. Income from cattle rearing		3,000
12. Income from sale of palm and date Juice		6,000
13. Income from sale of honey		5,000

Expenses for cultivation are as follows:

	Rice and rabi crops	Jute
Cost of seeds and fertilizer	25,000	7,000
Labor charge	5,000	2,000
Cost of hiring pump machine	3,000	1,000
Repair expense of equipment	500	-
Transportation cost	2,000	500

Mr. Karmaker maintains proper books of accounts for rice and rabi crops, however, he maintains no books for jute.

Other expenses as incurred were as follows:

Union parisad tax	2,000
Land revenue	1,000
Crop insurance premium	2,500
Allowable depreciation	9,000
Maintenance cost of irrigation plant	4,000
Insurance premium – Tractor	7,000

He had a pump machine which was purchased at Tk. 25,000. It has become obsolete and has been discarded at Tk. 12,000. As on the date of discard, the written down value after charging depreciation on the basis of prescribed rate at the ITA, 2023 amounted to Tk. 10,000.

He has taken agricultural loan of Tk. 50,000 @ 8% interest from Bangladesh Krishi Bank.

Mr. Karmaker has a tractor which was purchased for Tk. 250,000 on which he has an active insurance policy. During the income year, the tractor becomes out of order and he filed a claim with insurance company. After proper scrutiny, he receives Tk. 82,000 from insurance company as coverage. However, depreciation charged so far on the tractor as per IT Act is Tk. 150,000.

Solution 3:

Mr. Jibon Karmaker
Computation of total income
For the assessment year 2026-27

Income from agricultural:		**Tk.**	**Tk.**	**Tk.**
Sale of rice (250 x 600)		125,000		
Sale of jute (100 x 400)		40,000		
Sale of rabi crops		50,000		
Annual lease rental		20,000		
Income from tea garden (30,000 x 60%)		18,000		
Income from rubber garden (40,000 x 60%		24,000		
Income from poultry farm	35,000			
(-) Exemption (up to Tk. 500,000)	35,000	-		
Income from cattle rearing		3,000		
Income from sale of palm and date juice		6,000		
Income from sale of honey		5,000		
Gain from sale of obsolete equipment (Sales - WDV = 12,000 - 10,000)		2,000		
				293,000
Less: admissible expenses				
1. Production expenses:				
Cost of seeds & fertilizer		25,000		
Labor charge		5,000		
Cost of pump machine hire		3,000		
Repair of agricultural equipment		500		
Transportation cost		2,000		
Production costs for rice & rabi crops		35,500		
Jute production cost (40,000x60%)		24,000	95,000	
2. Union parisad tax		2,000		
3. Land revenue		1,000		
4. Crop insurance premium		2,500		
5. Allowable depreciation		9,000		
6. Maintenance cost of irrigating plant		4,000		
7. Insurance premium – Tractor		7,000		
8. Loss from tractor (Tk. 100,000 – Tk. 82,000)	18,000			
9. Interest from borrowed fund (50,000 x 8%)	4,000	47,500		
				142,500

Income from business:				150,500
Income from tea garden (30,000 x 40%)		12,000		
Income from rubber garden (40,000x40%)	16,000			
Income from tobacco (direct 45% tax will be imposed)	30,000			
Income from sugar industry (Fully business income as tax law does not segregate this income)		50,000		108,000
Income from other sources				
Sale of forest timber and bamboo				6,000
Total income				**264,500**

Self-Assessment Questions

1. Define 'agricultural income' under the Income Tax Act, 2023.
2. Discuss the allowable deductions as per section 42 and 43 of the Act in computing the taxable income under the head 'income from agriculture'.
3. How will you compute the income in respect of tea and rubber industries?
4. What are the different types of agricultural income?
5. Is there any exempted income in computing agricultural income?

Chapter 7

Income from Business or Profession

Introduction

Learning objectives

Examination context

Topic list

7.1 Meaning of business

7.2 Scope of income under the head 'income from business or profession''

7.3 Special area of business income

7.4 Some specific guidelines

7.5 General allowable deduction in computing income from business or profession

7.6 Special allowable deduction in computing income from business or profession

7.7 Allowable bad debt expense

7.8 Computation of special deduction of interest or profit

7.9 Special provision relating to allowances of interest

7.10 General conditions for allowable deduction

7.11 Deduction not admissible in certain cases

7.12 Consequence of failure to deduct, collect or pay tax at source

7.13 Capital and revenue expenditure

7.14 Illustrations of some important concepts

Worked examples & solutions

Self-assessment question

Introduction

Learning objectives

- Identify income from business;
- Compute the taxable income under the head 'income from business';
- Identify the allowable deductions under the head;
- Identify the expenses that are inadmissible;
- Identify the complexity of computing income from business and profession;
- Identify the expenses admissible up to a certain limit;
- Compute net tax liability in different situations.

Practical significance

The head 'Income from business' is very important to tax authority. A significant part of tax revenue government collects from this head. This head also includes lot of complex issues on which clear understanding is required to practice tax. This chapter lays the basic foundation of corporate tax assessment.

This chapter presents an idea of how conventional profit and loss account can be adjusted with applicable tax laws. It presents the scope of income under the head, admissible expenses, inadmissible expenses and other related issues.

Some expenses are admissible up to a certain limit. These are explained with some examples. Other complex issues like perquisites, balancing charge etc. are simplified with examples.

You will find the details of the above issues in this chapter with some practical examples.

Stop and think

Do you realize that the computation of taxable income under the head 'income from business' is one of the basic requirements for determining tax liability? Can you determine the taxable income under the head? Can you compute net tax liability of an assessee having income under the head?

Working context

In practice, as the accountants are sometime required to support to prepare their clients' tax returns, they need to advise the clients on how to calculate the taxable income for any income year. Before advising the clients, accountants should have the clear concept relating to the admissible and inadmissible expenses so that they can deduct or add the expenses in determining the taxable income.

Syllabus links

The topics covered in this chapter are very important for computing taxable income which is required for solving sample practical problems at this level.

Examination context

Exam requirements

In the examination, candidates may be required to:

- Define income from business.
- Identify different scope of income under the head.
- Compute the taxable income under the head 'income from business.
- Illustrate the income cannot be reported under the head.
- Identify the allowable deductions under the head.
- Illustrate the expenses admissible up to a certain limit.
- Compute net tax liability under the head.

Question practice

For question practice on these topics go to the suggested answers covering this chapter and also this workbook.

Examiner's comments on how students tackle questions

Candidates have to be prepared well for this area as this chapter consists of core concept on computation of income which is vital for calculating tax liability. Clear concept and understanding of each content of this chapter will help candidates to resolve any problems relating to computation of income from business and profession.

INCOME FROM BUSINESS OR PROFESSION

Section overview

- Scope of income from business;
- The gross income may not be taxable income;
- There are some allowable, inadmissible and not permissible deductions under the head;
- Computation of income under the head is very significance;
- Any amount of perquisites, entertainment allowance, and free sample are admissible but up to a certain ceiling;
- Depreciation allowance is very important factor for determining profit;
- Revenue expenditure and capital expenditure is considered differently.

7.1 Meaning of business

"Business" defined in section – 2(70) as including –

- Any trade, commerce or manufacturing of goods;
- Undertake any risk or endeavor in any trade, commerce or production of goods;
- The exchange of goods or services of any for profit or not for profit entity;
- Any profession

According to Oxford Advanced Learner's Dictionary, business means the activity of making, buying, selling or supplying goods or services for money.

7.2 Scope of income under the head 'income from business or profession'

Scope of income under the head 'income from business' encompasses the following areas as per different sections of Income Tax Act, 2023:

(a) Any profit and gain from a business carried on or deemed to be carried on by the assessee during the income year;

(b) Income derived from any service provided by the business, trade or similar association;

(c) The fair market value of any benefit arising out of or in continuation of any person's past, present or potential future business relationship whether convertible into cash or not;

(d) Any management fee incurred by any management company including Mudaraba management company;

(e) Any amount due to the lessor bank, insurance or financial institution against the lease of any asset owned by itself or other;

(f) Realized gain from currency exchange as per Third Schedule of this Act;

(g) Any income received during the income year from any discontinued business or profession.

7.3 Special area of business income

In addition to the ordinary profits and gains of a business or profession, the following amounts are also treated as income from business or profession:

1. Where a depreciable asset used in a business or profession is sold, and the sale proceeds exceed its original cost, the excess over the original cost is taxable as capital gain, while the excess of the original cost over the written-down value (WDV) is taxable as business income (balancing charge). Where the sale proceeds do not exceed the original cost but exceed the WDV, the excess of the sale proceeds over the WDV is taxable as business income. Conversely, where the sale proceeds are lower than the WDV, the deficiency is allowed as a deductible business expense.

2. Where an asset used in a business or profession is discarded, demolished, or destroyed and compensation, insurance proceeds, or salvage value is received in excess of the original cost is treated as capital gain, while the excess of the original cost over the WDV is taxable as business income. If the receipt exceeds the WDV but not the original cost, the excess is taxable as business income, whereas any deficiency below the WDV is deductible.

3. Any proportionate value received from the transfer of export quotas is treated as income from business or profession.

4. Where interest or profit payable has been claimed as a deduction in computing business income but remains unpaid for more than three years after the end of the relevant income year, the unpaid amount is deemed to be business income. If the amount is subsequently paid, it is allowed as a deduction in the year of payment.
5. Any benefit arising from the remission or cessation of a trading liability, including liabilities remaining unpaid for more than three years, is treated as business income. If the liability is subsequently discharged, the amount paid is allowed as a deduction in the year of payment.
6. Any amount recovered in respect of losses, bad debts, or business expenses that were allowed as deductions in earlier income years is treated as business income in the year of recovery.
7. Where a taxpayer has filed a return under the self-assessment scheme and reduces the initial capital within five years, the amount of such reduction is deemed to be business income in the relevant income year.
8. In the case of a finance company, interest or profit credited to the accounts or realized, whichever occurs earlier, against bad and doubtful loans is treated as business income.
9. Where a taxpayer, other than a bank, finance company, or leasing company, charges interest on a loan granted to an associated enterprise at a rate lower than 12% per annum, the shortfall in interest is deemed to be income from business or profession for the relevant income year.

For the purposes of this provision, any property that has been used in a business or profession before its disposal is deemed to have been used in the course of carrying on that business during the relevant income year. Where such property is exported or otherwise transferred after being used in the business, the date of export or transfer is treated as the date of sale, and the export value or transfer value is deemed to be the sale consideration.

7.4 Some specific guidelines

In line with section 47 of ITA, 2023, some typical companies should compute taxable income as per the guidelines given in different schedules as mentioned below:

Fourth Schedule: The profits and gains from insurance business and the tax payable thereon
Fifth Schedule, Part I & II: The profits and gains from the exploration and production of natural gas, petroleum and other minerals and the tax payable thereon.

Further, as per section 48 of ITA, 2023, any speculation business carried on by any person shall be treated as separate and distinct business from the other business of that parson.

7.5 General allowable deduction in computing income from business

According to section 49 of ITA, 2023, subject to the provision the Act, in computing the income from business in any income year, following expenses shall be included in the general deduction, namely –

(a) Expenditure on purchase of raw materials, inventory, goods for the purpose of business and use in business and any depreciated inventory expense;
(b) Duty-taxes, municipal taxes, local taxes, land development taxes or rents and Government fees for the purpose of business not paid under ITA, 2023 or the Gift Tax Act 1990.

(c) Rent, development and maintenance expense payable for land or grounds used for business purpose;

(d) All such expenses, welfare expenses or remuneration which are treated under the head 'income from employment';

(e) Repair and maintenance expenses;

(f) Insurance premium for the business and employees;

(g) Cost of electricity and other services including fuel;

(h) Goods transportation, clearing and forwarding charges;

(i) Sales related commission, brokerage, discount or warranty charge related to expenses;

(j) Advertising and camping expenses;

(k) Expenditure for employee training;

(l) Conference, hotel and accommodation expense of sales representatives;

(m) Conveyance and travel expense;

(n) Internet service, postal and telecommunications expense;

(o) Legal, audit and other professional services expenditure;

(p) Entertainment and hospitality related expenses;

(q) Realized foreign exchange loss as per Third Schedule;

(r) Subscription to any club or trade association, including entry fees for use facilities;

(s) Any expenses incurred in connection with travel abroad as a member of a trade delegation sponsored by the Government;

(t) Royalty, technical fees, head office expenses;

(u) Payable to Workers Profit Participation Fund (not exceeding 5% of disclosed net business profit).

(v) Other expenses incurred wholly and exclusively for the business purpose.

7.6 Special allowable deduction in computing income from business or profession

According to section 50 of ITA, 2023,

1. Following expenses shall be deductible subject to the permissible limits and conditions set out in the Third Schedule, namely –
   (a) General depreciation allowance;
   (b) Initial depreciation allowance;
   (c) Accelerated depreciation allowance;
   (d) Amortization allowance; and
   (e) Research and development expense.
2. If an asset mentioned in the Third Schedule is sold in any income year and the sale proceeds is less than the WDV, the difference between WDV and sale proceeds shall be allowable deduction in computing 'income from business or profession';
3. Allowable bad debt expenditure under section 51 of ITA, 2023 shall be deducted from income from business;

4. Allowable interest expense under section 52 and 53 of ITA, 2023 shall be deducted from income from business.

7.7 Allowable bad debt expense

According to section 51 of ITA, 2023, bad debt is allowable as a deduction only where the debt, or a part thereof, is established to be irrecoverable, has been written off in the books of account, and the taxpayer has taken reasonable steps to recover the amount before writing it off. Furthermore, the debt must have been recognized as income in a previous income year. In the case of banks and financial institutions, a deduction for bad debts is allowed subject to the same conditions, provided that the determination and write-off of such debts are made in accordance with the applicable laws, rules, regulations, and the relevant International Accounting Standards (IAS) and International Financial Reporting Standards (IFRS).

7.8 Computation of special deduction of interest or profit

According to section 52 of ITA, 2023, interest or profit paid on capital borrowed wholly and exclusively for the purposes of a business or profession is allowable as a deductible business expense. Where any part of the borrowed funds is used for non-business purposes, or where assets acquired with such funds are transferred outside the business, only the proportionate amount of interest or profit attributable to the funds used for business purposes is allowable as a deduction. Furthermore, subject to the provisions relating to loans advanced to associated enterprises, where borrowed funds obtained for business purposes are subsequently lent to an associated enterprise, the interest expense attributable to those funds shall continue to be allowable as a business deduction.

7.9 Special provision relating to allowance of interest

According to section 53 of ITA, 2023, where a resident person, other than a bank, finance company, or leasing company, pays interest or profit on a loan obtained from an associated enterprise during an income year, such interest or profit shall be allowable as a deductible business expense, subject to compliance with the provisions of the Income Tax Act.

7.10 General conditions for allowable deduction

According to section 54 of ITA, 2023,

1. If in any income year any such expenditure is allowed as deduction which represents in whole or in part an asset, no further deduction shall be allowable in respect of that asset in the same income year;
2. In approving any expenditure under section 49 of ITA, 2023, the commercial reasonableness of the expenditure shall be considered and following matters shall be taken into account in considering the commercial reasonableness, namely –
   (a) If the expenditure is incurred for the purpose of earning income from business;
   (b) If the expenditure incurred is revenue in nature; and
   (c) If the expenditure is reasonable in the circumstances.

7.11 Deduction not admissible in certain cases

According to section 55 of ITA, 2023, notwithstanding compliance with the provisions of Sections 49, 50, 51, 52, 53, and 54, the following deductions shall be inadmissible in computing income from business or profession, namely –

(a) Interest, salary, commission or gratuity paid by any firm or association to any partner of the firm or any member of the association;

(b) Payment of any commission or discount by a company to a sponsor shareholder, shareholder director or placement shareholders;

(c) Any amount in excess of Tk. 2,500,000 paid to an employee in respect of perquisites as defined in section 32.

(d) Royalty, technical service or technical know-how or technical assistance fees or other fees related to intangible assets, in aggregate, exceeding 6% of business turnover or 15% of net profit from business, whichever is lower;

(e) Head office or intra-group expenditure, by whatever name called, incurred by any such company not registered in Bangladesh exceeding 10% of net business profit disclosed in the financial statements;

(f) Amount exceeding 0.5% of business turnover disclosed in the financial statements in respect of expense related to foreign travel. Provided that this shall not apply if the assessee travels abroad for rendering any service to the Government. Provided further that the limit provided above shall not apply if evidence is produced in support of the additional amount is commercial reasonable;

(g) Entertainment expenses in excess of 4% of business income computed before deducting entertainment expenses and the actual amount, whichever is lower;

(h) Distribution of free sample in excess of, for the pharmaceutical industry, 2% of turnover if turnover does not exceed BDT. 100 million, 1.5% for turnover if exceed BDT. 100 million but does not exceed BDT. 200 million and 1% for turnover if exceed BDT. 200m, or actual expenses, whichever is lower. For the food, cosmetic and toiletries industries, the rate shall be 1% for turnover up to BDT. 50 million, 0.5% for turnover from 50 to 100 million, and 0.25% for turnover exceeding BDT. 100 million and for other businesses, the rate shall be 0.5%, 0.25%, and 0.1%, respectively;

(i) Amount exceeding 1% of business turnover in respect of promotional expenditure.

(j) Any such amount treated as 'Income from employment' of the employee is paid through other than banking channel;

(k) If any amount which is treated as 'Income from rent' is paid through other than banking channel;

(l) If more than 50% of the total payments – excluding payments for salaries, for rent, and for raw materials – are made other than through a banking channel, then 25% of the amount paid without using a banking channel shall be disallowed;

(m) Any amount paid to any such person who is required to submit proof of submission return under clauses 24, 26, 27, 33, 36 and 37 of sub-section 3 of section 264 fails to collect proof of submission return;

(n) Any expenditure in capital or personal nature;

(o) Any deductions or deduction created against any liabilities not specifically determined;

(p) All expenditure not related to business activities;

(q) Any depreciation and interest for Right of Use as per IFRS. Provided that in case of rent development and maintenance expense paid for the assets used for business purpose shall be allowable expense;

(r) Impairment less;

(s) Any amount paid to unapproved fund which was required to be approved under this Act;

(t) All unsubstantiated expenses if the accounts were not maintained in prescribed manner;

For the purpose of above –

(i) 'Net business profit' means the business profit directly carried on by an entity, does not include profit derived from any subsidiary, associate or joint venture;

(ii) 'Promotional expense' means business expenses claimed against the providing of goods, money or the benefits to any person for the purpose of business, but shall not include advertising expense.

7.12 Consequence of failure to deduct, collect or pay tax at source

According to section 56 of ITA, 2023, where a person fails to deduct or collect tax at source, or deducts tax at an amount lower than that required under Part VII of the Income Tax Act, the amount of tax short-deducted, uncollected, or unpaid, together with an additional amount equal to 50% of such tax, shall be payable, subject to the relevant provisions of the Act.

Similarly, where the tax paid pursuant to proceedings initiated by the tax authority under section 147 is less than the amount so determined, the resulting shortfall, together with an additional 50% of the shortfall, shall also be payable.

7.13 Capital and revenue expenditure

Capital expenditure

All expenditure incurred in acquisition of an asset of a permanent nature which is held for the purpose of carrying on business, such as land, building, plant, furniture etc. is called capital expenditure. Such expenditure retains a permanent value of the business except for the wear and tear which the assets undergo on account of their use. If an amount is expended on an existing asset, its value is increased. It will be regarded as capital expenditure. Expenditure incurred in obtaining a license to secure an agency will be a capital one though the agency might not have become secured. Any expenditure incurred for the following purposes will be capital expenditure:

(1) For acquiring fixed assets, e.g., land, building, machinery, furniture etc. held for use in the business. The cost of a fixed assets will include all expenses incurred up to the time the assets become ready for use, e.g., legal charges, broker's charges, freight, import duty, clearing, carriage, cartage and erection charges;

(2) For retaining capital assets;

(3) For improvement and extension of fixed assets, cost of making additions to building, machinery, plant and furniture etc. and other improvements of assets;

(4) For increasing in any way, the profit earning capacity of a business, e.g., the cost of shifting the business to better and more suitable premises;

(5) For raising money for capital purposes, e.g., brokerage and commission paid for procuring loans;

(6) Cost of constructing a factory or installing machinery;

(7) Cost of equipment and apparatus;

(8) Cost of machinery, plant and furniture;

(9) Expenses incurred in connection with the erection of buildings and plants;

(10) Amount spent on the construction of reservoir;

(11) Expenditure incurred on improvements to property, as distinguished from mere repairs;

(12) Expenditure incurred in respect of reconstruction of business premises or converting the same from one type to another;

(13) Price paid for the purchases of copyright or patent right.

Revenue expenditure

All expenditure incurred in buying goods for resale or converting raw materials to manufactured articles or incidental to the conduct and financing of the business, is treated as revenue expenditure. Cost of goods purchased for the business in which a person deals, sums paid as rent, salaries and wages, repairs etc. are instances of revenue expenditure. Expenditure incurred for any of the following purposes will be regarded as revenue expenditure:

(1) For purchasing assets with a view to re-selling them at profit or manufacturing them in a saleable condition, e.g., goods, raw materials and stores;

(2) For maintaining capital assets in good working order, e.g., repairs and renewals of buildings;

(3) For meeting day-to-day expenses of carrying on a business, e.g., salaries, wages, rents etc.

Tests for determining an expenditure as either capital or revenue nature

If the money comes from circulating capital, it will be revenue expenditure; if it emanates from fixed capital, it will be capital expenditure.

If the answer to any of the following questions is in the affirmative, it is a capital expenditure, otherwise it is revenue expenditure:

(a) Does the expenditure result in the acquisition or retention of a capital asset?

(b) Is there an addition or improvement to fixed assets?

(c) Has it in any way improved income-generating capacity of the business?

(d) Has it been incurred to raise any capital sum for business?

The following expenses which, prima facie, are of a revenue nature, become capital under certain circumstances as under:

(1) Raw materials and stores when utilized in making a fixed asset;

(2) Wages and salaries when paid in connection with the installation or construction of a fixed asset. Thus, when a company manufactures a machine for its own use, the wages and salaries of persons employed on the work will be capital expenditure;

(3) Carriage and freight expenses incurred in connection with the acquisition of fixed assets;

(4) Cost of repairs incurred in putting a second-hand fixed asset into a proper operational state;

(5) Legal charges incurred in connection with the acquisition of fixed assets, e.g., building, machinery, plant etc. and expenses incurred in clearing encumbrances thereon.

A particular item of expenditure may be of both capital and revenue nature, e.g., the combined cost of repairs, renewals etc. The amount should be apportioned after deciding how much of the total expenditure represents cost of improvements or additions etc. and how much of it is in the nature of pure repairs.

The following types of expenditure have been held to be capital expenditure:

(1) Preliminary expenses incurred for floating or acquiring a business;

(2) Expenses incurred for raising of capital;

(3) Cost of shifting business from one place to another with a view to increasing its revenue-earning capacity;

(4) Lump sum payments made to retiring directors of a company in order to restrain them from entering into competition with the business of the company.

7.14 Illustrations of some important concepts

Balancing charge

Balancing charge is the revenue gain earned by a business at the time of disposal of any building, machinery and plant used for the purpose of business or profession. Total gain on disposal is the difference between sale proceeds and written down value (WDV) of the asset. If the sale proceed is higher than the original cost, it results capital gain. And balancing charge results once capital gain is deducted from total gain. At different amount of sale proceeds applied on same asset, different concept is exemplified below:

XYZ Company owns an asset originally purchased for Tk. 100,000. The company recently disposes the asset when written down value of the asset amounts to Tk. 56,000. Assuming different sale proceeds, the concepts are presented below:

Sale proceeds	Total gain (Sale proceeds - WDV)	Capital gains (Sale proceeds - cost)	Revenue gain (Total gain – Capital gains)	Revenue loss (WDV – Sale proceeds)
(a) 120,000	64,000	20,000	44,000	-
(b) 90,000	34,000	-	34,000	-
(c) 50,000	-	-	-	6,000

Compensation received from insurance company

When any building, machineries or plant used for the purpose of business or profession is demolished, destroyed or discarded and insurance compensation is received, amount equal to balancing charges is reported as income from business or profession. The application is similar to balancing charge, the only difference is that the asset is not disposed rather destroyed and thus the amount is received from insurance company as compensation money.

Let's assume the same asset. The asset is now destroyed and there is an active policy covering the risk of the asset. And the company lodged claim with different amount of compensation money received as shown below:

Compensation received	Total gain (Compensation received - WDV)	Capital gain (Compensation received - cost)	Revenue gain (Total gain – Capital gains)	Revenue loss (WDV – Compensation received)
(a) 130,000	74,000	30,000	44,000	-
(b) 100,000	44,000	-	44,000	-
(c) 40,000	-	-	-	16,000

Fractional income in certain cases (tea, rubber)

In certain cases, income from business is assessed as a certain percentage of total income. These are:

1. 40% of the income derived from the sale of tea grown and manufactured by the seller in Bangladesh (section 40);
2. 40% of the income derived from the sale of rubber grown and manufactured by the seller in Bangladesh (section 40);

Let's assume that XYZ Company has income from the following sources as mentioned below:

1) Income derived from the sale of tea grown and manufactured by the company, Tk. 500,000.
2) Income derived from the sale of rubber grown and manufactured by the company, Tk. 300,000.

Sources	Computation	Income from business
From sale of tea	40% of Tk. 500,000	200,000
From sale of rubber	40% of Tk. 300,000	120,000
Total income from business		320,000

Entertainment expenses

Any amount representing entertainment expense is not allowed for deductions. For allowable deductions under the head, the following bases and percentages.

Income, profits and gains of the business and profession (Before charging such allowance)	Allowable rate
On assessed profit	4%

Free sample distribution

Expenditure on distribution of free sample is admissible up to the percentage as given below:

Turnover	Rates	Turnover	Rates	
	Pharmaceuticals		Food, cosmetic and toiletries	Other
Up to 10 crores	2%	Up to 5 crores	1%	0.5%
10 to 20 crores	1.5%	5 to 10 crores	0.5%	0.25%
Over 20 crores	1%	Over 10 crores	0.25%	0.1%

Perquisites

Perquisite to any employee for any year is allowed up to Tk. 2,500,000. If actual perquisite given to an employee exceeds Tk. 2,500,000; such amount exceeding Tk. 2,500,000 will be disallowed. For example, let's assume that Mr. X enjoys the following benefits during the income year ended on 30th June, 200Y from his employer:

Items	Tk.
1. Basic salary	3,000,000
2. House rent allowance	1,800,000
3. Festival bonus –equal the two months basic salary	84,000
4. Leave encashment	42,000
5. Conveyance allowance	155,000
6. Contribution to Recognized Provident Fund @ 10%	50,400

7. Servant's wages	20,000
8. Children educational allowance	50,000
9. Performance bonus	600,000
10. Bungalow utilities	25,000

Compute the amount of perquisites to be disallowed.

Actual perquisites received:

1. House rent allowance	1,800,000
2. Conveyance allowance	155,000
3. Servants wages	20,000
4. Children educational allowance	50,000
5. Performance bonus	600,000
6. Bungalow utilities	25,000
Total	**2,650,000**
Allowable perquisites	2,500,000
Excess perquisites to be disallowed	**150,000**

Expenses allowed up to a certain percentage:

It is important to remember that some expenses, where there is a scope of reporting higher amount, are permitted but up to certain limit. Amount exceeding that limit is not allowed and thus taxable. These expenses are enumerated below:

Expenses	Allowable limit
Head Office or intra-group expenses by a company not incorporated in Bangladesh	10% of disclosed net business profit
Royalty, technical services fee, technical knowhow fee or technical assistance fee (aggregate)	6% of business turnover or 15% of net business profit, whichever is lower.
Overseas travelling expense	0.50% of turnover (not applicable if expenses incurred for providing services to the government, and in case proof and justifications are provided).

Worked example – 1:

State with reasons whether the following expenses are fully or partly admissible as deduction while computing income from business or profession:

1. Stock-in-trade was lost in fire, amounting to Tk. 12,000 and was debited to Profit and Loss Account.
2. Amount spent on a successful suit filed against a person for infringing trade mark of the assessee - Tk. 10,000.
3. Interest paid to bank Tk. 15,000 in connection with overdraft obtained for paying dividend.
4. Overseas traveling expense Tk. 60,000; The amount of disclosed turnover and disclosed net profit is Tk. 4,000,000 and Tk. 2,000,000 respectively.
5. Incentive bonus Tk. 300,000; The amount of disclosed turnover and disclosed net profit is Tk. 4,000,000 and Tk. 2,000,000 respectively.
6. Salary paid to two employees @ Tk. 20,000 per month; one is paid in cash and another through bank transfer.
7. Royalty paid Tk. 200,000; The amount of disclosed turnover and disclosed net profit is Tk. 4,000,000 and Tk. 2,000,000 respectively.
8. Salary expense of a firm Tk. 100,000 of which Tk. 40,000 is paid to a partner as salary.
9. Installation cost of an IPS, Tk. 50,000.
10. Penalty paid for violating income tax law Tk. 25,000.
11. Repair expense of the hired premises paid Tk. 50,000. The building is used both for office and residence at an equal proportion.
12. Insurance premium paid Tk. 25,000, of which Tk. 5,000 is the life insurance premium of the owner.

Solution 1:

1. Loss of stock-in-trade is an admissible business loss as per section 49 (a) of ITA, 2023.
2. Litigation / legal expense is an admissible expense as it is spent for protecting business interest.
3. Interest expense on overdraft taken for business purpose is admissible expense.
4. Overseas traveling expense is admissible up to 0.50% of the disclosed turnover, so here admissible expense is Tk. 20,000 (0.50% of Tk. 4,000,000) and rest of Tk. 40,000 will be inadmissible.
5. Incentive bonus is admissible expense.
6. Out of total salary expense Tk. 480,000, Tk. 240,000 is admissible as it has been paid through bank transfer and the remaining Tk. 240,000 is not admissible as it has been paid in cash violating section 55(k).
7. Royalty is admissible up to 6% of turnover or 15% of disclosed net profit, lower one, so here admissible amount is Tk. 200,000 (6% of Tk. 4,000,000. or 15% of Tk. 2,000,000, lower one).
8. Out of total salary expense Tk.100,000, Tk. 60,000 is admissible as it has been paid to employees and rest of Tk. 40,000 is inadmissible as it has been paid to a partner of the partnership firm violating section 55(b).

9. Installation cost of an IPS is not admissible, as it is a capital expenditure.
10. Not admissible as the penalty is imposed for violation of law.
11. Out of total repair expense of Tk. 50,000, Tk. 25,000 is admissible which is for the portion of office use and the rest Tk. 25,000 is inadmissible as half portion of the house has been used for residence.
12. Out of total insurance premium of Tk. 25,000, Tk. 20,000 is admissible which is for the protection of business interest and the rest of Tk. 5,000 is inadmissible as it is given for personal interest of the owner.

Worked example – 2:

The Profit and Loss Account of Janani Traders owned by Mr. Rajon Majumder for the year ended on June 30, 20X1 is given below:

Janani Traders
Profit and Loss Account
For the year ended on June 30, 20X1

Debit	Tk.	Credit	Tk.
Salary	380,000	Gross profit	1,950,000
Commission	70,000	Interest on securities	180,000
Rent of premises	132,000	Interest on bank deposit	32,000
Fund embezzlement	30,000	Recovery of bad debt	18,000
Donations	150,000	Gain on sale of furniture	27,000
Bad debt	80,000		
Life Insurance premium	50,000		
Depreciation on furniture	40,000		
Provision for income tax	38,000		
Repair expense	26,000		
License renewal fee	4,000		
Penalty and fine	37,000		
Bonus	80,000		
Royalty	70,000		
Interest on Bank Loan	45,000		
Household expenses	22,000		
Net profit	953,000		
	2,207,000		**2,207,000**

Other information:

1. Salary includes Tk. 87,000 paid to the owner.
2. Fund embezzlement occurred after office hour.
3. Donations include Tk. 70,000 paid to a charitable hospital that is not approved by the Board
4. Life insurance premium is the payment against the insurance policy in the owner's name.
5. Tax depreciation amounts to Tk. 30,000.

6. Furniture sold for Tk. 78,000 that was originally purchased for Tk. 70,000. Written down value of the furniture on the date of sale was Tk. 51,000.

Compute income from business of **Janani Traders** for the year ended on June 30, 20X1.

Solution 2:

Janani Traders
Computation of income from business or profession
for the assessment year 20X1-20X2

Particulars	Tk.	Tk.
Profit as per P/L Account		**953,000**
Add: Inadmissible expenses		
1. Salary [Note-1]	87,000	
2. Fund embezzlement [Note-2]	30,000	
3. Donations [Note-3]	70,000	
4. Life insurance premium [Note-4]	50,000	
5. Depreciation (to be considered later on)	40,000	
6. Provision for income tax	38,000	
7. Penalty and fine	37,000	
8. Household expense	22,000	374,000
Less: Tax depreciation		(30,000)
Less: Non-business income		
1. Interest on securities	180,000	
2. Interest on bank deposit	32,000	
3. Capital gain on sale of furniture [Note-7]	8,000	220,000)
Income from business		**1,077,000**

Notes:

1. Salary paid to the owner is not admissible expense.
2. Fund embezzlement occurred after office hour is not allowable expenditure as per case law.
3. Donation Tk. 70,000 to un-approved organization not allowable.
4. Life insurance premium is inadmissible as this is personal expense.
5. Royalty is admissible up to an amount equal to 6% of revenue or 15% of the disclosed net profit, whichever is lower, i.e., 15% of Tk. 953,000 i.e., Tk. 142,950. Thus, actual royalty payment Tk.70,000 is admissible because it is within the admissible limit. In absence of revenue amount, royalty is calculated based on net profit.
6. Capital gain on sale of furniture was Tk. 8,000 (Tk. 78,000 – Tk. 70,000). This amount should be considered as income under the head 'Capital Gains'. Actual revenue gain is Tk. 19,000 but shown Tk. 27,000, so Tk. 8,000 is to be deducted to arrive real income from business.

Worked example – 3:

The Trading and Profit & Loss Account of **Jahur and Brothers** for the year ended on June 30, 20X1 is given below:

Jahur and Brothers
Trading & Profit and Loss Account
For the year ended on June 30, 20X1

Debit	Tk.	Credit	Tk.
Opening stock	80,000	Sales	1,450,000
Purchases	700,000	Closing stock	160,000
Wages	60,000		
Depreciation on machinery	15,000		
Power and fuel	10,000		
Gross profit c/f	745,000		
	1,610,000		**1,610,000**
		Gross profit b./f.	745,000
Salaries	120,000	Compensation received	80,000
Rent, rates and taxes	18,000	Bad debt recovered	27,000
Annual membership fee	40,000	Interest and discount received	25,000
Legal expenses	15,000	Interest on commercial securities	80,000
Underwriting commission	30,000	Dividend on listed company's share	60,000
Purchase of trademarks	80,000	Commission	28,000
Bad debts	30,000		
Accounting fees	40,000		
Depreciation - office building	35,000		
Penalties	18,000		
Donation to flood relief fund	50,000		
Gratuity to employees	136,000		
Advance income tax	35,000		
Loss on sale of office furniture	18,000		
Dowry paid to the daughter	70,000		
Miscellaneous expense	30,000		
Net profit	280,000		
	1,045,000		**1,045,000**

Other information:

1. Salaries include Tk. 20,000 as salaries paid to the owner.
2. Recovered amount of bad debt was previously allowed as bad debt expense.
3. Legal expense is incurred for filing and continuing a case against competitors for protecting the interest of the business.
4. Penalties were due to avoidance of tax payment at an earlier period.
5. Annual membership fee is the fee paid to trade union for the interest of the business.
6. Compensation money is received from insurance company against a claim lodged due to destroy of machinery originally purchased for Tk. 70,000 with a written down value of Tk. 50,000.

7. Tax depreciation was calculated as follows:
   a. Depreciation on machinery Tk. 25,000
   b. Depreciation on office building Tk. 50,000

Compute the income from business and also total income of Jahur and Brothers for the year ended on June 30, 20X1.

Solution 3:

Jahur and Brothers
Computation of income from business or profession

Particulars	Tk.		Tk.
Income from business:			
Net profit as per Profit and Loss Account			280,000
Add: Inadmissible expenses			
(1) Salaries paid to owner		20,000	
(2) Underwriting commission		30,000	
(3) Purchase of trademarks		80,000	
(4) Penalties		18,000	
(5) Advance income tax		35,000	
(6) Dowry paid to the daughter		70,000	
(7) Accounting Depreciation (to be considered later on)			
On machinery	15,000		
On office building	35,000	50,000	303,000
			583,000
Less: Tax Depreciation allowance (As per tax law)			
On machinery	25,000		
On office building	50,000		75,000
			508,000
Less: Non-business Income			
(1) Interest on commercial securities		80,000	
(2) Capital gains (Tk. 80,000 – Tk. 70,000)		10,000	
(3) Dividend on X Ltd.'s share		60,000	150,000
Taxable income from business			**358,000**
Capital gain			10,000
Income from financial asset			
Interest on securities		80,000	
Cash dividend		60,000	140,000
Total income			**508,000**

Worked example – 4:

For the income year ended on June 30, 20X1, Gaco Pharmaceutical Company reports net profit of Tk. 17,983,000. A close scrutiny of its books of accounts reveals the following items:

1. Salary and allowances include perquisites of five directors as mentioned below:

Director 1	Director 2	Director 3	Director 4	Director 5
Tk. 405,000	Tk. 475,000	Tk. 580,000	Tk. 625,000	Tk. 455,000

2. Amount paid to a contractor of Tk. 100,000 without deducting tax at source where TDS rate was 5%.
3. Profit includes Tk. 85,000 as gain on sale of asset. The original cost of the asset was Tk. 70,000 and on the date of sale, the written down value of the asset was Tk. 50,000.
4. The company lodged a claim against the demolishing of an asset and recovered Tk. 70,000. The cost was Tk. 80,000, however, the written down value of the asset was Tk. 50,000.
5. The company has income of Tk. 420,000 from tea grown and manufactured in Bangladesh which was not considered at the time of computing profit.
6. The company has transferred export quota of garments to another company equivalent to Tk. 800,000. No income is reported in profit and loss account.
7. Entertainment expense charged was Tk. 450,000.
8. Finance director received foreign travel allowance of Tk. 500,000 which is charged against the profit. He has also received similar allowance in last year and it was allowed at that time.
9. Expense for free sample distribution is shown as Tk. 340,000. Reported turnover for the year is Tk. 87,953,000.
10. Royalty expense charged Tk. 112,000.
11. Depreciation charged Tk. 253,000 whereas tax depreciation is Tk. 180,000.

Compute income from business or profession and tax thereof, considering the information given above considering the corporate tax rate at 25%.

Solution 4:

Gaco Pharmaceutical Company
Computation of income from business or profession

Particulars	Tk.	Tk.
Net profit as per Profit and Loss Account		**17,983,000**
Add: Inadmissible expenses		
Capital gain to consider separately (Tk. 85,000 – Tk. 70,000)	15,000	
Entertainment	450,000	
Accounting depreciation	253,000	718,000
		18,701,000
Less: Tax depreciation		180,000
Income before charging entertainment expenses		**18,521,000**
Less: Entertainment (Note-1)		450,000
		18,071,000
Add: Income from tea garden (40% of Tk. 420,000)	168,000	
Income from transferring export quota	800,000	968,000
Taxable Income from business		**19,039,000**
Income tax computation:		
Tax on business income (19,039,000 x 25%)		4,759,750

Tax on expenses without TDS (100,000@5% x 1.5 times as per sec. 56)		7,500
Total tax payable		**4,767,250**

Notes:

1. Allowable entertainment expense is – 18,521,000 @ 4% = Tk. 740,840, or the actual expenses, whichever is lower. Hence Tk. 450,000 is allowable.
2. Royalty expense is within the limit. Thus, the whole amount is admissible.
3. Free sample expenses also within the limit which is 2% of the turnover.

Self-assessment question

1. The Income statement with selective notes thereon of Zian Ltd for the year ended on June 30, 20X1 is as under:

Zian Ltd
Income statement
For the year ended on June 30, 20X1

Particulars	Tk.
Net sales	15,000,000
Less: Cost of goods sold	8,800,000
Gross profit	6,200,000
Add: Gain on sale of building (Note 1)	2,200,000
	4,000,000
Less: Administrative and selling & distribution expenses (Note 2)	2,400,000
Net profit	**1,600,000**

Other information:

1. The Cost of the Building was Tk. 8,000,000 and the amount of accumulated depreciation up to the date of sale was Tk. 2,700,000 and sold for Tk. 7,500,000.

2. Administrative and selling & distribution expenses:

Salaries and wages	Tk.	1,562,000
Fines and penalties		125,000
Rents, rates & taxes		80,000
Provision for bad and doubtful debts		60,000
Legal charges		37,000
Underwriting commission		120,000
Incentive bonus		40,000
Cost of issuing shares		100,000
Audit fees		60,000
Overseas traveling expense		100,000
Depreciation		116,000
Total		**2,400,000**

3. Salary and wages include Tk. 180,000 as payment to the owners and Tk. 520,000 as payment classified as perquisites.
4. The fines and penalties are charged by a local court for involvement in illegal business transactions.
5. Legal charges have been incurred for defending a suit for breach of a trading contract.
6. Tax depreciation amounts to be Tk. 80,000.

Compute income from business or profession of Zian Ltd for the year ended on June 30, 20X1.

Chapter 8
Capital Gain

Introduction

Learning objectives

Examination context

Topic list

8.1 Basic principles of capital gain

8.2 Capital assets and transfer of capital assets

8.3 Computation of capital gain

8.4 Other matters in determining capital gain

8.5 Tax exempted capital gains

8.6 Tax rate in respect of capital gain

8.7 Tax rates on capital gain from sale of shares of listed companies

8.8 Apportionment of sale proceeds between original cost and subsequent improvements

Worked examples

Self-assessment questions

Introduction

Learning objectives

- Identify capital gain.
- Compute the taxable income under the head 'capital gain'.
- Identify the allowable deductions under the head.
- Identify tax exempted capital gains.
- Identify the complexity of computing income from capital gains.
- Identify special reduced tax rate on capital gain earned by individuals.
- Compute tax liability on capital gains in different situations.

Practical significance

The head 'capital gain' is very significant in terms of understanding and applications. Transfer of capital assets is very common in business. Thus, in what situations, transfer of capital assets will result capital gain, what may happen if the gain is reinvested within a certain time period, what are the powers of DCT regarding the value of declared sale proceeds are some important points covered in the chapter.

Capital gains tax rate is different than the regular tax rates applicable to individuals and other assesses. Thus, the assessment and computation of tax liability is to a greater extent different in case of capital gain. These points are also addressed with due importance.

The chapter, as usual, also presents the scope of income under the head, admissible expenses, inadmissible expenses and other related issues.

You will find the details of the above issues in this chapter with some practical examples.

Stop and think

Do you realize that the computation of taxable income under the head 'capital gain' is one of the basic requirements for determining tax liability? Can you determine the taxable income under the head? Can you compute net tax liability of an assessee having income under the head?

Working context

In practice, as the accountants are sometime required to support to prepare their clients' tax returns, they need to advise the clients on how to calculate the total taxable income for any income year. Before advising the clients, accountants should have the clear concept relating to the admissible and inadmissible expenses so that they can deduct or add the expenses in determining real capital gain.

Syllabus links

The topics covered in this chapter are very important for computing taxable income which is required for solving sample practical problems at this level.

Examination context

Exam requirements

In the examination, candidates may be required to:

- Define capital gain.
- Identify different scope of income under the head.
- Compute taxable capital gain.
- Illustrate non-taxable capital gains.
- Identify the allowable deductions under the head.
- Illustrate the power of the DCT if he believes that the declared value at which the capital asset is transferred is lower than fair market value.
- Compute net tax liability under the head.

Question practice

For question practice on these topics go to the suggested answers covering this chapter and also this workbook.

Examiner's comments on how students should tackle questions

Candidates have to be prepared well for this area as this chapter consists of core concept on computation of income which is vital for calculating tax liability. Clear concept and understanding of each content of this chapter will help candidates to resolve any problems relating to computation of income from capital gain.

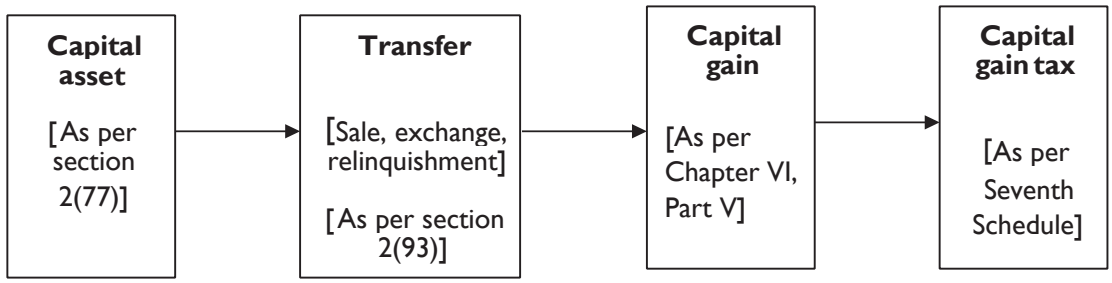

CAPITAL GAIN

Section overview

- There is no capital gain tax on transfer of personal effects rather it would be taxed under the head income from other sources.
- Gain on sale of shares of listed companies for individual taxpayers is tax free up to Tk. 50 lac.
- There is no capital gain tax on the transfer of land and buildings to a new company formed to set up an industry.
- In determining the transfer value, income tax authority may consider the fair market value if he beliefs that transfer value is lower than fair market value.
- Capital loss can only be set off against any other capital gain during the year.
- Gain tax rate is 15 % in the case of company.

8.1 Basic principles of capital gain

Chapter six provides that tax shall be payable by an assessee under the head "capital gain" in respect of any gain arising from the transfer (i.e. sale, exchange or relinquishment, etc.) of any capital asset. Such gain shall be deemed to be the income of the income year in which the sale, exchange, relinquishment, etc. took place.
Any gain arising from transfer of a capital asset (both movable and immovable) as defined in section 2(77) of the Income Tax Act, 2023 is chargeable to income tax in accordance with Seventh Schedule of the Act which prescribe rates of income tax on capital gain.

8.2 Capital assets and transfer of capital assets

Capital asset

A capital gain arises only due to the transfer of capital asset. Capital asset is defined in section 2(77) of ITA, 2023. Capital asset means – any property of any kind held by a taxpayer, including a business or undertaking as a whole or as a unit, securities, and non-business goods such as personal gold, silver, jewellery, gems and diamonds, metallic coins, precious metals, paintings, antiques, and club memberships.

However, capital asset excludes stock-in-trade, consumable goods, or raw materials held for business purposes, as well as personal-use items such as clothing, furniture, fixtures, artefacts, equipment, and vehicles used solely for personal purposes by the taxpayer or their dependent family members and not for business use.

Transfer

According to section 2(93) of ITA, 2023, 'Transfer', in relation to a capital asset, includes the sale, exchange or relinquishment of the asset, or the extinguishment of any right therein, but does not include:

a) Any transfer of the capital asset under a gift, bequest, will or an irrevocable trust.
b) Any distribution of the assets of a company to its shareholders on its liquidation, and
c) Any distribution of capital assets on the dissolution of a firm or other association of persons or on the partition of a Hindu undivided family [section 2(66)].

8.3 Computation of capital gain

Capital gain shall be computed as the excess of the higher of the sale consideration or the fair market value (FMV) of a capital asset over its cost of acquisition.

For this purpose, the cost of acquisition includes:

- the purchase price of the asset;
- expenditure incurred wholly and exclusively in connection with its transfer; and

– the cost of any improvement or development of the asset, excluding expenditures already allowed as deductions under sections 38, 42, 49, 50, or 64.

Where a capital asset is acquired by way of gift, bequest, will, succession, inheritance, devolution, trust, distribution of assets upon the liquidation of a company, dissolution of a firm or association, or partition of a Hindu undivided family, the cost of acquisition shall be deemed to be the fair market value of the asset on the date ownership is transferred to the transferee.

Where the owner of land, or land together with a building or structure, transfers the property to a developer or real estate developer under a development agreement or similar arrangement and receives cash, flats, or any other consideration, such consideration shall be treated as a capital receipt. The capital gains tax shall be calculated at 15% of the net capital gain, being the difference between:

(a) the aggregate value of all consideration received (including cash, flats, and any other benefits); and
(b) the cost of acquisition of the land and any building or structure transferred to the developer.

The resulting capital gain may, at the option permitted by the law, be taxed in two equal installments, one in the relevant assessment year and the other in the immediately succeeding assessment year. Any profit arising from the transfer of personal gold, silver, jewellery, gems, diamonds, metallic coins, precious metals, paintings, antiques, or club memberships shall also be treated as capital gains.

8.4 Other matters in determining capital gain

(1) Where the fair market value (FMV) of a capital asset exceeds the declared consideration by 15% or more, the Deputy Commissioner of Taxes (DCT), with the prior approval of the Inspecting Joint Commissioner, may determine the FMV of the asset for the purpose of computing capital gains.

(2) Where the FMV exceeds the declared consideration by more than 25%, the DCT may, in accordance with the procedure prescribed by the Board, offer to purchase the asset at its determined fair market value.

(3) Capital gains arising from the transfer of all assets of a partnership firm to a newly incorporated company under the Companies Act, 1994 shall be exempt from tax, provided that the entire consideration received from the transfer is invested in the equity shares of the newly incorporated company.

(4) Notwithstanding anything contained in Section 58, capital gains arising from the transfer of capital assets or intangible assets by a partnership firm to a company in the course of business re-organization shall be exempt from tax, subject to the following conditions:

- All assets and liabilities of the partnership firm are transferred to the successor company before the transfer takes effect.
- All partners of the firm become shareholders of the company, and their shareholding remains in the same proportion as their capital interests in the firm.
- The partners receive no consideration, directly or indirectly, other than shares of the successor company.
- The former partners collectively hold at least 50% of the voting rights in the company and continue to hold such voting power for a minimum period of five years from the date of transfer.

(5) If any of the conditions specified in sub-section (4) is subsequently violated, the capital gains that were previously exempt shall become taxable in the hands of the successor

company as capital gains. Where the successor company fails to disclose such gains, the DCT may issue a notice, provide the company with an opportunity of being heard, and determine the taxable capital gains accordingly.

(6) Where a partnership firm is converted into a company as part of a qualifying business re-organization and all the conditions specified in sub-section (4) are satisfied, the accumulated business losses and unabsorbed depreciation of the firm shall be deemed to be the losses and depreciation allowance of the successor company for the relevant income year.

8.5 Tax exempted capital gains

When capital gains arise from the transfer of capital asset of a firm to a new company registered under the Companies Act, 1994 and the whole amount of capital gain is invested in the equity of the said company by the partners of the firm, then the capital gain shall not be charged to tax in the year of transfer.

Further, as per six schedule, capital gain from the transfer of listed securities by an individual other than shareholder director or placement shareholder shall be exempted up to Tk. 50 lakh.

8.6 Tax rate in respect of capital gain

Capital gain tax is different than regular tax and is prescribed in Seventh Schedule of Income Tax Act, 2023. Accordingly following would be the rate of capital gains:

(a) For a company, Association of Person, or trust – at the rate of 15%;

(b) For a taxpayer other than a company, Association of Person, or trust – at the rate of 15% on capital gain arising from the transfer of listed securities;

(c) For a taxpayer other than a company, Association of Person, or trust, on capital gains other than from listed securities –

- If the capital asset is disposed of within 5 years from the date of acquisition, tax shall be payable on the total income including the capital gain at the regular rate;
- In other cases, tax shall be payable at the rate of 15% on the capital gain.

(d) If any person receives an amount in excess of the deed value upon transferring any land or building, such excess amount shall be treated as capital gain, and tax shall be payable accordingly. Provided that the excess amount shall be substantiated by bank statements and other documentary evidence.

(e) 5% on capital gains derived from the sale of personal gold, silver, gold ornaments, silver ornaments, gems and diamond, metal coins and precious metal, which are not commercial goods.

8.7 Tax rates on capital gain from sale of shares of listed companies

According to para 36 of 6th Schedule, Part I, capital gain up to Tk. 50 lakh shall be exempted from tax for the individual from transfer of shares of listed companies, shares of funds or units approved by BSEC. However, this exemption shall not apply in case of transfer of sponsor's or director's or placement shares and units.

8.8 Apportionment of sale proceeds between original cost and subsequent improvements

Since capital gain tax differs in rates in case of assessee other than a company depending on the length of period the property is held by the assessee, it is essential to assign capital gain on them separately.

Illustration

Mr. Jarin bought a building within the jurisdiction of Dhaka Municipality 8 years back for Tk. 65,000,000 on which he also incurred another Tk. 35,000,000 as improvements 4 years ago. He sold the property in mid-June, 2025 for Tk. 180,000,000.

Now, sale proceeds of Tk. 180,000,000 should be apportioned between original cost and improvements due to different capital gain tax rate applicable for transfer made within 5 years and after five years. Such apportionment is made below proportionately:

On original cost: Tk. 180,000,000× 65/100 = Tk. 117,000,000
On improvement: Tk. 180,000,000 × 35/100= Tk. 63,000,000

Now capital gains and tax on capital gain will be computed as below:

	Original cost	Improvements
Cost	65,000,000	35,000,000
Sale proceeds	117,000,000	63,000,000
Capital gain assessed	52,000,000	28,000,000
Capital gain tax rate	15%	Regular tax rate

Improvement part has been disposed of within 5 years of acquisition and thus Tk. 28,000,000 would be included with the total income of the assessee. Original cost part has been held for 8 years and the tax on it, would be taxed at15% on capital gain.

Worked examples and solutions

Worked example – 1:

Mr. Ershad has recorded the following transactions for the year ended on June 30, 2026. You are required to comment on implication of capital gain and capital gain tax on each of the following transactions independently.

(a) Sold a 3-storied building for Tk. 3,000,000 in December 2024, which was purchased on March 2014 for Tk. 1,800,000. In January 2018, the building was extended at a total cost of Tk. 500,000. The fair value of the building in December 2024 was Tk. 3,200,000.

(b) Sold an agricultural land situated outside the jurisdiction of Cumilla Cantonment Board at a total price of Tk. 2,000,000 which was purchased 5 years back at a total price of Tk. 1,000,000.

(c) Sold a machine, purchased at a price of Tk. 80,000 for the purpose of his business, at a price of Tk. 150,000 at fair market value. Another Tk. 30,000 was spent to improve the machine. At the time of sale, the machine had accumulated depreciation amounting to Tk. 60,000.

Solution 1:

(a) Calculation of capital gains from the sale of building:

Sale proceeds or fair market value whichever is higher	3,200,000
Less:	
Cost of acquisition	(-)1,800,000
Cost of extension	(-)500,000
Capital gain	**900,000**

Here, capital gain will be taxed at 15% as transfer is made after 5 years (both original cost and extension work).

(b) Gain on sale of agricultural land is equally taxable. As it was sold after 5 years it would be taxed @ 15%.

(c) Calculation of capital gain from the sale of machine:

Sale proceeds or fair market value whichever is higher	150,000
Less:	
Cost of acquisition	80,000
Cost of improvement	30,000
Capital gain	**40,000**

Worked example – 2:

Mr. Ashiqur Rahman purchased an apartment in November 2020 for Tk. 1,600,000. He has paid 1% brokerage fee and subsequently spent another Tk. 500,000 for the renovation of the house. On 1st July, 2025 he entered into an agreement to sell the property to Mr. Anowar for a consideration of Tk. 5,000,000 and received earnest money (advance money) of Tk. 100,000.

As per the terms of the agreement, the balance payment should be made within 90 days of the agreement otherwise the earnest money will be forfeited. As Mr. Anowar could not make the payment within the stipulated time, the amount of Tk. 100,000 was forfeited by Mr. Rahman. Subsequently on 10th June, 2026, Mr. Rahman sold the apartment to Mr. Abdur

Rahman for Tk. 5,500,000. He also paid 2% brokerage fee on sale of the apartment. The fair market value of the house on the date of sale was Tk. 5,200,000. Calculate taxable capital gains for the assessment year 2026-27.

Solution 2:

Computation of taxable capital gain:

Particulars	Tk.	Tk.
Income under "capital gain":		
Full value of consideration received against capital asset:		
(Including the forfeited amount of Tk. 100,000)	5,600,000	
Fair Market Value at the time of transfer,	5,200,000	
Disposal vale of the capital asset (whichever is higher)		5,600,000
Less - Allowable deductions		
Brokerage fee for sale (5,500,000 x 2%)	110,000	
Cost of acquisition [1,600,000 + (1,600,000 xl %)]	1,616,000	
Cost of improvements of the asset	500,000	2,226,000
Capital gain		3,374,000

Self-assessment questions

1. Explain the terms "capital asset", "cost of acquisition" and "fair market value" under the Income Tax Act, 2023.
2. State the capital gain exempted from payment of tax under the ITA, 2023.
3. Mr. Hasan has purchased a machine at a total cost of Tk. 500,000 on 23'" April 2017 for the purpose of his profession. In addition, he has paid Tk. 10,000 as legal fees. He has spent an additional sum of Tk. 50,000 for improvement of the machine.

   On 30th December 2025, he sold the machine at Tk. 600,000 when the accumulated depreciation was Tk. 126,000 in his books of accounts. But in the opinion of DCT the fair market value on that date amounts to Tk. 650,000. He incurred advertisement cost of Tk. 20,000 and 1.5% as brokerage commission on the sale value. He has taxable income of Tk. 230,000 from all other sources.

   Compute capital gain, total income, and specify tax rate thereon.

Chapter 9

Income from Financial Asset

Introduction

Learning objectives
Examination context

Topic list

9.1 Scope of income from financial assets
9.2 Definition of securities
9.3 Interest grossing up

Worked examples & solutions

Self-assessment questions

Introduction

Learning objectives

- Understanding the head 'Income from financial asset';
- Compute the taxable income under the head 'Income from financial asset';
- Knowing different type of securities available in Bangladesh;
- Identify the allowable deductions under the head 'Income from financial asset';
- Illustrate the allowable, inadmissible and not permissible deductions in determining the income from 'Income from financial asset';
- Define cum-interest, ex-interest and bond washing transactions.

Practical significance

Income from financial asset is the sixth head of income. It is very important to know interest bearing financial asset available in market and how this income is brought under the purview of taxation. Though the revenue from this source is not so significant to the Government, still this chapter comprises some technicalities over which professional accountants should have sufficient expertise.

Application of cum and ex interest and bond washing transaction in computing taxable interest income is very important and necessitates professional judgment and competence. These topics are explained in this chapter.

This chapter has practical significance in a sense that the students will interact with the capital market directly. Approved commercial securities are traded in the market and thus the professional accountants can play a significant role in computing tax liability of individuals and corporate as well.

You will find the details of the above issues in this chapter with some practical examples.

Stop and think

Do you realize that the computation of taxable income under the head 'Income from financial asset' is one of the seven heads of income and includes some complexity? Do you feel that you are in a position to compute tax liability under this head independently? Can you visualize the scope of tax avoidance and remedies in this regard?

Working context

In practice, as the accountants are sometime required to prepare their clients' tax returns, they need to advise the clients on how to calculate the taxable income from different heads for a particular year. Before advising the clients, accountants should have the clear concept relating to the admissible and inadmissible expenses and exemptions so that they can deduct or add the expenses in determining the taxable income.

Syllabus links

The topics covered in this chapter are very important for computing taxable income which is required for solving sample practical problems at this level.

You will also be able, using this knowledge, to plan tax in such a way that tax can be minimized.

Examination context

Exam requirements

In the examination, candidates may be required to:

- Identify income under the head 'Income from financial asset;
- Define the concepts of interest-bearing financial asset or securities;
- Recognize the allowable expenses and inadmissible expenses under the head;
- Define different types of securities;
- Calculate taxable income under the head 'Income from financial asset;
- Understand the application of ex and cum interest;
- Handle situations like bond washing transactions.

Question practice

For question practice on these topics go to the suggested answers covering this chapter and also this workbook.

Examiner's comments on how students tackle questions

Candidates have to be prepared well for this area as this chapter consists of one concept on computation of income which is vital for calculating tax liability. Clear concept and understanding of each content of this chapter will help candidates to resolve any problems relating to computation of income.

INCOME FROM FIANCIAL ASSETS

Section overview

- There are seven heads of income. Income from financial asset is one of them;
- There are some allowable, inadmissible and not permissible deductions under different heads of income;
- Computation of taxable income from financial asset is very important;
- Grossing up of interest on financial asset;
- Tax shall be payable when an assessee actually received interest on financial asset;
- The two main methods of accounting are cash system and mercantile system;
- An assessee may be allowed to set off of losses but carry forward not allowed.

9.1 Scope of 'Income from financial asset'

As per section 62 of the Income Tax Act, 2023, Income classifiable under the head "Income from financial asset" includes:

(i) Interest, profit or discount of the Government or Government approved securities;
(ii) Interest, profit or discount of debentures or other securities issued by or on behalf of a local authority or a company;
(iii) Interest or profit receivable from deposit into any bank or financial institute called whatever name, and financial product or schemes;
(iv) Dividend.

9.2 Definition of 'Securities'

Section 2 (87) specifies that 'Securities' shall include –

(a) Treasury bills, bonds, savings certificate, debenture, sukuk or shariah-based securities or similar instruments issued by the Government.
(b) Share or stock issued by any company or legal entity or issuer, deed issued by way of mortgage or charge or hypothecation, bonds, debenture, derivatives, units of any joint investment scheme including mutual funds or alternative investment fund, sukuk or similar shariah based deed, and purchase right or warrant to accept the aforesaid deed.

Provided that it shall not include any currency or note, draft, cheque, bill of exchange, bank acceptance, trade receivable or trade payable.

Exclusion from scope of 'Income from financial asset'

Capital gain arising from transfer of financial asset shall not be treated as 'Income from financial asset'. Such capital gain shall be treated as 'Income from capital gain' under section 57 of Income Tax Act, 2023.

Timing of tax on 'Income from financial asset'

According to section 63 of the Income Tax Act, 2023, in the income year in which a person receives income from financial asset or in the income year in which such income credited to the account, whichever occurs first, it shall be included in that income year.

Allowable deductions from 'Income from financial asset'

Deductions permissible in the determination of income from financial asset as per section 64 are:

(i) Any amount deducted (other than income tax) against interest or profit by bank or financial institute;
(ii) Interest paid on borrowed money solely for the purpose of earning from 'Income from financial asset';
(iii) Any other expenditure (in addition to above) incurred solely for the purpose of earning the income from financial asset.

Non-allowable deductions

According to section 65 of the Income Tax Act, 2023, following expenditure shall not be treated as allowable expenditure for the purpose of computing 'Income from financial asset':

(i) Any interest payable outside Bangladesh from which withholding income tax has not been deducted or paid in accordance with the provision of this Act;
(ii) Interest or commission paid on income from exempted financial assets;
(iii) Any expenditure of a capital or personal nature.

9.3 Interest grossing up

As tax is deductible from interest on securities at the time of maturity, so net interest needed to be grossed-up to get before tax income.

Worked example

Mr. Jamal Kaiser has the following income from financial asset during the income year 2025-26:

1. Tk. 900,000 net of tax from interest on bank deposit. Bank deducted tax @ 10%.
2. Tk. 900,000 net of tax from interest on savings certificate(sanchoy patra). Bank deducted tax @ 10%.
3. Tk. 900,000 net of tax from cash dividend. Dividend paying company deducted tax @ 10%.
4. Tk. 900,000 net of tax from interest on treasury bond. Bangladesh Bank deducted tax @ 10%.

Compute income from financial asset and tax payable by Mr. Jamal Kaiser for the assessment year 2026-27.

Solution:

Mr. Jamal Kaiser
Computation of total income
For the assessment year 2026-27

	Tk.	Tk.
Income from financial assets (section: 62):		
(1) Interest from interest on bank deposit [900,000 x 100/90]	1,000,000	
(2) Interest on savings certificate [900,000 x 100/90]	1,000,000	
(3) Interest on cash dividend [900,000 x 100/90]	1,000,000	
(4) Interest on treasury bond [900,000 x 100/90]	1,000,000	
Taxable income from financial asset		**4,000,000**

Income tax liability:	Tk.
On first Tk. 400,000 @ 0%	-
On next Tk. 300,000 @ 10%	30,000
On next Tk. 400,000 @ 15%	60,000
On next Tk. 500,000 @ 20%	100,000
On next Tk. 1,400,000 other than cash dividend @ 25%	350,000
On cash dividend 1,000,000 @ 15% [fixed 15% tax rate as per 7th Schedule]	150,000
Gross tax liability	**690,000**
Less: TDS from all sources [100,000 +100,000 + 100,000 + 100,000]	400,000
Net tax payable	**290,000**

Self-assessment questions

1. What incomes are included in "Income from financial asset" under the Income Tax Act, 2023?
2. Is interest on private loan is an income from financial assets?
3. What deductions are allowable from such income under the Act?
4. What are the tax-free securities?

Chapter 10

Income from Other Sources

Introduction

Learning objectives

Examination context

Topic list

10.1 Income from other sources

10.2 Special area of income from other sources

10.3 Royalty

10.4 Fees for technical services

10.5 Income from the transfer of any assets which is natural or created by taxpayer

10.6 Allowable deductions

10.7 Inadmissible expenses

Worked examples

Self-assessment question

Introduction

Introduction

Learning objectives

- Identify income from other sources.
- Compute the taxable income under the head 'income from other sources.
- Identify the allowable deductions under the head.
- Identify tax exempted income under the head.
- Introduce the complexity of computing income from other sources.
- Explain the application of TDS and Grossing Up of income in certain cases.
- Compute tax liability on income from other sources in different situations.

Practical significance

The head 'income from other sources' is very significant due to its importance as a residual head of income. Income that doesn't fall under any other head comes under the scope of this head. Thus, it is important to know different categories of income coming under the head.

Royalty income, fees for technical services, income from letting factory building along with machineries are some incomes coming under this head.

Tax usually deducted at sources as per law in some categories of income under this head. These incomes are required to be grossed up before reporting them in return of income.

The chapter, as usual, also presents the scope of income under the head, admissible expenses, inadmissible expenses and other related issues.

You will find the details of the above issues in this chapter with some practical examples.

Stop and think

Do you realize that the computation of taxable income under the head 'income from other sources' is one of the basic requirements for determining tax liability? Can you determine the taxable income under the head? Can you compute net tax liability of an assessee having income under the head?

Working context

In practice, as the accountants are sometime required to support to prepare their clients' tax returns, they need to advise the clients on how to calculate the total taxable income for any income year. Before advising the clients, accountants should have the clear concept relating to the admissible and inadmissible expenses so that they can deduct or add the expenses in determining the taxable income.

Syllabus links

The topics covered in this chapter are very important for computing taxable income which is required for solving sample practical problems at this level.

Examination context

Exam requirements

In the examination, candidates may be required to:

- Define income from other sources.
- Identify different scope of income under the head.
- Compute the taxable income under the head.
- Identify the allowable deductions under the head.
- Introduce grossing up of income in certain cases and illustrate its impact on computing taxable income.
- Compute net tax liability under the head.

Question practice

For question practice on these topics go to the suggested answers covering this chapter and also this workbook.

Examiner's comments on how students should tackle questions

Candidates have to be prepared well for this area as this chapter consists of core concept on computation of income which is vital for calculating tax liability. Clear concept and understanding of each content of this chapter will help candidates to resolve any problems relating to computation of income from other sources.

INCOME FROM OTHER SOURCES

Section overview

- Income from other sources is the last and residual head of income.
- The total income may not be taxable income.
- There are some admissible and not admissible deductions under the head.
- Royalty and fees for technical services are significant sources of income under the head.
- On some income under the head, tax is deducted at sources at specified rates.
- Grossing up of income is important to report taxable income.
- There are some admissible and inadmissible deductions under the head.

10.1 Income from other sources

According to section 66 of ITA, 2023, following income shall be considering as 'Income from other sources:

(a) Royalty, license fee, technical know-how fee, income from granting right to use of intangible asset. Provided that if these incomes are regularly earned in the ordinary course of business, then it shall be treated as income from business or profession.

(b) Cash incentive paid by the Government.

(c) Income from the transfer of any assets which is natural or created by himself except mineral deposits and hydrocarbons, and goodwill.

(d) Any donation, grant or gift whatever name it may be called.

(e) The after-tax profit distributed among partners by a joint venture.

(f) Income from any source not classified in Clause (a) to (f) of Section 30.

10.2 Special area of income from other sources

According to section 67 of ITA, 2023,

1. Without prejudice to the section 66, in special cases, the provision of section 67 shall apply in computing 'income from other sources' in accordance with the provision of chapter eight;

2. Where any sum is found credited in the books of an assessee maintained for any income year and the assessee offers no explanation about the nature and source thereof, or the explanation offered is not, in the opinion of the Deputy Commissioner of Taxes, satisfactory, the sum so credited shall be deemed to be his income for that income year classifiable under the head "Income from other sources";

3. Where any assessee owns any asset or incurs any debt or incurs any expenditure any such transaction which affect the asset of the assessee, in such case if (A+B+C) is greater than (D+E+F) an amount equal to (A+B+C) – (D+E+F) shall be included as income of the assessee under the head 'Income from other sources'. Where –

   A = Increase in net asset
   B = Actual cost incurred
   C = Other expenditure from fund other than A and B above
   D = Gross assessed income
   E = Assessed tax exempted income
   F = Other acceptable receipts of fund other than D and E.

4. Where any assets, not being stock-in-trade or financial asset, are purchased by an assessee from any person and the Deputy Commissioner of Taxes has reason to believe that the price paid by the assessee is less than the fair market value thereof, the difference between the price so paid and the fair market value thereof, the difference between the price so paid and the fair market value shall be deemed to be income of the assessee classifiable under the head "Income from other sources";

5. Where any amount is received by an assessee during any income year by way of goodwill money or receipt in the nature of compensation or damages for cancellation or termination of contracts and licenses by the Government or any person, such amount shall be deemed to be the income of such assessee for that income year classifiable under the head "Income from other sources";

6. Where any benefit or advantage, whether convertible into money or not, is derived by an assessee during any income year on account of cancellation of indebtedness, the money value of such advantage or benefit shall be deemed to be his income for that income year classifiable under the head "Income from other sources'.

Provided that above provision shall not apply in the following cases:

(a) Waiver of loan or interest to natural persons granted by any financial institution registered under the Scheduled Bank or Financial Institution Act, 1993;

(b) Benefit not exceeding Tk. 1,000,000 on account of any margin loan or waiver of interest arising thereon by a registered merchant banker and portfolio manager or stock broker in light of the Bangladesh Securities and Exchange Commission Act, 1993 or the rules made thereunder against an individual assessee investment in any securities traded on the stock exchange;

(c) Where loans obtained from a spouse, sibling, parent, or child are subsequently waived or converted into a gift and duly reflected in the tax returns of both parties.

7. Where any benefit or advantage, whether convertible into money or not, is derived by an assessee during any income year on account of cancellation of indebtedness, the money value of such advantage or benefit shall be deemed to be his income for that income year classifiable under the head "Income from other sources".

8. Where a company, not listed with any stock exchange, receives paid up capital from any shareholder during any income year in any other mode excepting by crossed cheque or bank transfer, the amount so received as paid-up capital shall be deemed to be the income of such company for that income year and be classifiable under the head "Income from other sources".

Provided that this provision shall not apply if any asset or service other than cash are received as paid-up capital in accordance with the Companies Act, 1994.

9. Any advance, loan or deposit received by a taxpayer other than a natural person without using a banking channel shall be treated as income. However, the amount shall be deductible when it is repaid.

10. Where an assessee, being a company (other than the company engaged in car rental business), purchases directly or on hire one or more motor car or jeep and value of any motor car or jeep exceeds ten percent of its paid-up capital together with reserve and accumulated profit], then fifty percent of the amount that exceeds such ten percent of the paid-up capital together with reserve and accumulated profit] shall be deemed to be the income of such assessee for that income year classifiable under the head "Income from other sources".

11. Where any individual assessee receives any advance, loan, donation or any other form of deposit exceeding Tk. 500,000 from any other person other than crossed check or bank transfer, the amount so received shall be treated as income from other source.

Provided that above provision shall not apply in following cases –

(a) If such amount is received from spouse, full siblings, parent or child and the same is shown in the return of both the recipient and payer;

(b) Any deposit received by bank, financial institution and any organizations registered with the NGO Affairs Bureau or Microcredit Regulatory Authority.

Provided that where any natural person receives any advance, loan, or other deposit exceeding BDT 0.5 million in aggregate by crossed cheque or bank transfer and fails to repay the same within 6 years, such unpaid amount shall be treated as income from other sources in

the subsequent year. However, amount shall be deducted from the income in the year in which it is paid.

12. Where an assessee, not being an assessee engaged in real estate business during any income year, purchases on credit any material for the purpose of construction of building or house property or its unit and fails to pay the sum or any part thereof representing the liability in respect of such purchase, the sum or any part thereof, which has not been paid within two years from the end of the income year in which the purchase was made, shall be deemed to be the income of the assessee for the income year immediately following the expiry of the said two years and be classifiable under the head "Income from other sources".

13. Where a taxpayer files a revised return and declares in such revised return any income that falls under tax exemption or a reduced tax rate, the amount equivalent to A − B shall be included in the income from other sources, where A represents the amount of income shown in the revised return as exempt or subject to reduced tax rate, and B represents the corresponding amount of income shown in the original return from the same source under tax exemption or reduced tax rate. Provided that this sub-section shall not apply to income excluded from total income under clauses (4), (5), (6), (7), (8), (17) and (35) of Part 1 of the Sixth Schedule, nor to tax exemption allowed in computing income from employment.

10.3 Royalty

As per section 2 (79) of ITA, 2023, royalty means consideration (including any lump sum consideration but excluding any consideration which is classifiable as income of the recipient under the head "capital gains") for –

(a) transfer of all or any rights, including the granting of a license in respect of a patent, invention, model, design, secret process or formula, or trade mark or similar property.

(b) the imparting of any information concerning the working of, or the use of, a patent, invention, model, design, secret process or formula, or trade mark or similar property.

(c) the use of any patent, invention, model, design, secret process or formula, or trade mark or similar property.

(d) the imparting of any information concerning technical, industrial, commercial, or scientific knowledge, experience or skill.

(e) the transfer of all or any rights, including granting of a license, in respect of any copyright, literary, artistic or scientific work, including films or video tapes for use in connection with television or tapes for use in connection with radio broadcasting, but not including consideration for sale, distribution or exhibition of cinematograph films.

(f) the rendering of any services in connection with any of the aforesaid activities

Tax deducted at sources on royalty income

As per section 91 of the ITA, 2023, tax at source at 10% on the base value shall be deducted from the payment for royalty, franchise or license, trademark, patents, copyright, industrial design, plant variety, geographical indication product or any other intellectual property or intangibles.

Illustration

Let's assume that Mr. Bhowmik has received a net amount of Tk. 90,000 as royalty income from the government during the income year 2025-26. He has taken a total of 18 months to complete the work. Thus, royalty income may be allocated between this year and the immediately preceding year after grossing up as follows:

Grossed up income: Tk. 90,000/1-0.1 = Tk. 100,000 This income will be allocated as follows:
Income year 2025-26: Tk. 50,000
Income year 2024-25: Tk. 50,000

10.4 Fees for technical services

According to section 2(30) of ITA, 2023, fees for technical services means any consideration (including any lump sum consideration) for rendering of any managerial, technical or consultancy services (including the provision of services of technical or other personnel) but does not include consideration for any construction, assembly, mining or like project undertaken by the recipient, or consideration which would be income of the recipient classifiable under the head salaries.

Tax deducted at sources on fees for technical services

If the fees for professional or technical service is paid by the specified persons as mentioned at section 90, tax at 7.5% or 15% to be deducted at source. However, the rate would be 50% higher if the recipient does not have any TIN. However, no deduction shall be applied or deduction at a reduced rate shall be applied upon producing a certificate issued by the Board for exemption in favour of a payee.

10.5 Income from the transfer of any assets which is natural or created by taxpayer

Under section 66 of the ITA, 2023, any income from the transfer of an asset which is natural or created by the taxpayer himself, except mineral deposits, hydrocarbons, and goodwill, is treated as "income from other sources" unless specifically classified elsewhere. This provision targets assets that are not acquired but personally developed or found. Example includes income from the sale of a self-created artwork or sculpture, transfer of naturally found rare stones, or disposal of a home-designed prototype or invention. These incomes are taxed under the head “income from other sources” to ensure proper taxation of gains that do not fall within conventional capital gains or business income categories.

10.6 Allowable deductions

As per section 68 of ITA, 2023, only reasonable expenses incurred wholly and exclusively for the purpose of earning income shall be admissible as deductions, excluding capital and personal expenses. Such expenses shall be allowable only in respect of income referred to under Sections 67(5) and 67(6).

10.7 Inadmissible deductions

As per section 69, of ITA, 2023, any expenditure that has already been allowed, whether wholly or partly, in respect of an asset shall not be claimed again. The provisions of Section 55 relating to the limitation of deductible expenditure shall also apply to this Chapter.

Worked example – 1

Mr. Abdur Rahman has reported the following income for the income year ended on June 30, 2026. Compute total income of Mr. Rahman.

(1)	Dividend from a Private Limited Company	9,000
(2)	Interest on Fixed Deposit	5,400
(3)	Interest on Savings Certificate	18,000
(4)	Interest on Post Office Savings Bank account	1,800
(5)	Remuneration for exam script evaluation and invigilation	1,000
(6)	Prize bond lottery	25,000
(7)	Income from sale of fish of pond	1,000
(8)	Sale of forest tree and bamboo	1,500
(9)	Income from copyright	4,000
(10)	Honorarium as director	10,000
(11)	Gift from marriage anniversary	5,000
(12)	Income from license	2,000

During the year he has purchased jewellery of Tk. 125,000 the source of which has not been explained to the DCT. During the year he has paid Tk. 200 as license renewal fee and Tk. 800 as interest on loan taken to purchase the shares of private limited company.

Solution 1:

Mr. Abdur Rahman
Computation of total income
For the assessment year 2026-27

Income from financial asset:		
1. Dividend (9,000/1-0.1) [tax will be applicable @ 15% as per 7th sch.]	10,000	
2. Interest on fixed deposits (5,400/1-0.1)	6,000	
3. Interest on savings certificate (18,000/1-0.1)	20,000	
4. Interest on Post Office Savings Bank (1,800/1-0.1)	2,000	38,000
Less: Interest on loan for purchase of share to be deducted from dividend income		800
		37,200
Income from other sources:		
Remuneration for exam script evaluation	1,000	
Prize bond lottery	25,000	
Income from sale of fish of pond [it would be agricultural income and again it is tax free up to Tk. 500,000]	1,000	
Sale of forest tree and bamboo	1,500	
Income from copyright	4,000	
Honorarium as director	10,000	
Income from license	2,000	
Unexplained investment at jewellery and marriage gift [125,000+5,000]	130,000	174,500
		211,700
Less: Allowable deductions (license renewal fee)		200
		211,500

Notes:

1. Assuming copyright has been received from an individual, where no TDS is applicable.
2. Income from marriage anniversary is considered as other source of income.

Worked example – 2

Mr. Joarder Hossain has reported the following income for the income year 2025-26. Compute taxable income of Mr. Hossain.

1.	Dividend from ICB Mutual Fund (gross amount)	30,000
2.	Profit on Islami Bank Mudaraba Savings Scheme	2,700
3.	Interest on savings certificate (gross)	30,000
4.	Income from royalty of a book (time of completion–10 months)	2,000
5.	Prize of winning crosswords (no tax was deducted)	2,000
6.	Income from letting out household machineries	1,000
7.	Sale of forest timber	1,500
8.	Income from a newspaper for column writing	5,000
9.	Income from unused leased land	2,000
10.	Honorarium for attending a symposium	30,000
11.	Income from private tuition in a Coaching Center	10,000
12.	Royalty income from a publisher	1,800

During the year he spent Tk. 200,000 on a party in Hotel Radisson, the source of expenditure remained unexplained to the DCT. He has also visited Singapore incurring a total cost of Tk. 100,000 and purchased a Diamond set of Tk. 200,000 for his wife for which the source of the money was not satisfactory to the DCT. During the year he has paid Tk. 2,000 as commission for collecting the dividend and Tk. 8,000 as interest on loan taken to purchase ICB mutual fund.

Solution 2:

Mr. Joarder Hossain
Computation of total income
For the assessment year 2026-27

Income from financial asset:	**Tk.**	**Tk.**
1. Dividend from ICB Mutual Fund	30,000	
2. Profit on Islami Bank Scheme (2,700/1-0.1)	3,000	
3. Interest on savings certificate	30,000	63,000
Less: Allowable deductions:		
- Commission for collecting dividend	2,000	
- Interest on loan	8,000	10,000
		53,000
Income from other sources:		
4. Income from royalty of a book	2,000	
5. Prize of winning crosswords	2,000	
6. Income from letting out household machineries	1,000	
7. Sale of forest timber	1,500	
8. Income from newspaper column writing	5,000	
9. Income from unused leased land	2,000	

10. Honorarium for attending a symposium	30,000	
11. Income from private tuition in a coaching center	10,000	
12. Royalty income from publisher (1,800/1-0.1)	2,000	
13. Unexplained investments:		
- Party in hotel	200,000	
- Travel to Singapore	100,000	
- Purchase of diamond jewellery	200,000	555,500
		608,500

Self-assessment question

1. What are the items assessable as "income from other sources" under the Act?
2. Mr. Joynal Akand has earned the following income during the income year 2025-26.

Dividend from preference shares of a Public Limited Company	45,000
Dividend from ICB Mutual Fund	18,000
Income from underwriting shares of a Company	30,000
Income from mooring terminal	40,000
Interest on Savings Bank Deposit	27,000
Honorarium received as a director to be a member of the Board	10,000
Prize of winning Red Crescent lottery	36,000
Income from betting/housie	48,000
Interest on loan given to a friend	15,000
Income from consultancy work not related to his profession	40,000
Income from participating in a training program	20,000
Income from birthday party	50,000
Income from royalty of a book [which took two years to write the book]	90,000

During the year he spent Tk. 200,000 to purchase a piece of land, Tk. 90,000 to purchase a motorcycle and the explanation given regarding the source of expenditure was unsatisfactory to the DCT. Through investigation, the DCT has also identified an FDR of Tk. 500,000 in a local bank, source of which has also remained explained.

He has also visited India incurring a total cost of Tk. 100,000 and purchased a Diamond set for Tk. 100,000 for his wife for which the source of the money was also unexplained. During the year he has paid Tk. 1,500 as commission for collecting the dividend. His other expenditures during the year are as follows:

Purchase of books and magazine	15,000
Donation to President's Relief Fund	30,000
Contribution to a deposit pension scheme	80,000
Purchase of a cow for Eid Ul Azha	15,000
Purchase of a Laptop	130,000
Purchase of shares from secondary market	200,000

Compute total income and tax liability of Mr. Joynal Akand for the assessment year 2026-27.

Chapter 11

Depreciation and Amortization

Introduction

Learning objectives

Examination context

Topic list

11.1 Basics of depreciation allowances

11.2 Depreciation allowance for different heads of income

11.3 Depreciation allowance on assets used for agricultural purpose

11.4 Depreciation allowance on assets used in business or profession

11.5 Determination of purchase price of an asset

11.6 Types of depreciation allowance

11.7 Normal depreciation allowance

11.8 Initial depreciation allowance

11.9 Accelerated depreciation allowance

11.10 Arrangements relating to profit or loss and sale or transfer of asset

11.11 Amortization

11.12 Carry-forward of depreciation allowance

Worked examples & solutions

Self-assessment questions

Introduction

Learning objectives

- Explain depreciation allowance.
- Compute depreciation allowance.
- Define balancing charge and capital gain.
- Identify different types of depreciation allowances.
- Differentiate accounting depreciation and tax depreciation.
- Identify different rates of accelerated depreciation for different assets.
- Define written down value and its application at acquisition and disposal of assets.
- Explain gain and losses of assets in disposal.

Practical significance

Depreciation allowance is very important in computing income from business and profession. It is an allowable deduction in computing income from agriculture and income from business and profession. Thus, computing depreciation and understanding its implication is very significant.

Accounting depreciation and tax depreciation may not be the same. If it is not same then it generates deferred taxation. And it is very important for professional accountants to practice deferred taxation. This chapter presents different types of depreciation allowances, investment allowance and other related topics.

It also presents a definition of written down value with the application of gain and loss on disposal of assets. It also presents different exceptions to the common rule.

You will find the details of the above issues in this chapter with some practical examples.

Stop and think

Do you realize that the computation of depreciation allowance is one of the important issues for determining tax liability? Can you determine the taxable income under the heads 'income from agriculture' and 'income from business and profession' after allowing tax depreciation allowance?

Working context

In practice, as the accountants are sometime required to support to prepare their clients' tax returns, they need to advise the clients on how to calculate the total taxable income for any income year. Before advising the clients, accountants should have the clear concept relating to the admissible and inadmissible expenses so that they can deduct or add the expenses in determining the taxable income.

Syllabus links

The topics covered in this chapter are very important for computing taxable income which is required for solving sample practical problems at this level.

Examination context

Exam requirements

In the examination, candidates may be required to:

- Define depreciation allowance.
- Compare depreciation allowance and investment allowance.
- Define written down value, balancing charge, industrial undertaking and capital gain.
- Presents different rates of depreciation for different types of assets.
- Explain rates of depreciation for plant, machinery, ships and other exceptional assets.
- Understanding the difference between accounting depreciation and tax depreciation.
- Define written down value and its application at acquisition and disposal of assets.
- Explain gain and loss of assets in disposal.

Question practice

For question practice on these topics go to the suggested answers covering this chapter and also this workbook.

Examiner's comments on how students should tackle questions

Candidates have to be prepared well for this area as this chapter consists of core concept on computation of income which is vital for calculating tax liability. Clear concept and understanding of each content of this chapter will help candidates to resolve any problems relating to computation of income under the heads 'income from agriculture' and 'income from business or profession'.

DEPRECIATIONS ALLOWANCE

Section overview

- Depreciation is allowed on cost but investment allowance is over and above cost and depreciation allowance.
- Any Government subsidy or any grant from any authority received for the purchase is to be deducted from cost.
- Sale value of motor car costing more than Tk. 60 lakhs is to be scaled down in proportion to Tk. 60 lakhs limit and the same with assets used partly for business or profession and partly for private purpose of the assessee.
- Full depreciation is allowed in the year of purchase and none is allowed in the year of disposal of asset.
- Sale value exceeding original cost is capital gain and should be taxed accordingly.
- Depreciation is calculated on reducing balance method (WDV) on all assets other than accelerated depreciation or on ships and vessel where cost is used.
- Balancing charge is the revenue gain and should be taxed separately.
- Accounting depreciation and tax depreciation are different and it creates deferred taxes.

11.1 Basics of depreciation allowances

Besides various expenditure allowed under section 50 in arriving at the profit or loss on business or profession in an income year, allowances are also given for depreciation of capital assets within prescribed rules and at prescribed rates.

Normally accountants charge depreciation on fixed assets other than lands in calculating profit or loss of business or profession periodically. This is a normal wear and tear of fixed asset caused by use, defluxion of time or obsolescence. The rates and method of depreciation depend on the particular accounting policy followed by the assessee.

In calculating accounting depreciation, accountants should not consider what tax authorities allow and tax authorities also do not consider accounting depreciation in computing depreciation allowed under tax laws. It may be that accountant has not charged any depreciation on fixed assets or charged whole of a particular fixed asset in a year, but to the tax man, it is immaterial since he would add back accounting depreciation and deduct tax depreciation in his assessment process.

Some basic rules or concepts used in the calculation and granting of depreciation allowances are stated below:

(i) It is allowed on fixed assets other than land i.e., buildings, plant and machinery, furniture and fittings, equipment etc.

(ii) Assets must be used in the relevant income year in business or profession. It may be used for the whole year or for just one day in the year. The allowance is given for the whole year without time apportionment. However, it would be on proportionate basis when assets or some of these are used for private purpose and business purpose.

(iii) Ownership of the assets must be with the concerned assessee in the income year. This condition overrides prima facie that of use when in the case of operating lease, or any other arrangement of hire purchase purpose, the lessor retains the ownership. He is thus allowed full tax depreciation though the assets have been used by the assessee.

(iv) It is obligatory on the part of the assessee to furnish the prescribed particulars in respect of depreciation claim. If the prescribed particulars are not furnished, the DCT may even refuse to grant any allowance for depreciation. However, where the particulars furnished are incomplete or inaccurate, he cannot decline to grant allowance where he should call for further information to complete his own depreciation allowance.

(v) Aggregate depreciation allowed shall not exceed cost and the law deals with the subject of cost elsewhere.

(vi) No depreciation is allowed in the year the asset is sold, discarded or demolished even when it was used for major or most part of the year. However, balancing allowances is allowed in that year when WDV of the asset is greater than the proceeds.

(vii) Third Schedule prescribes different rates of depreciation allowances for different classes of assets. On ocean going ships and vessels the rate of depreciation is based on actual cost and accelerated depreciation on plant and machinery is also based on cost not WDV, in all other cases, it is based on written down value (WDV) of the asset.

(viii) Cost of motor vehicle used in the business or profession is restricted up to Tk. 60 lakhs for the purpose of depreciation allowance calculation.

(ix) No depreciation is allowed on assets before the commencement of business i.e., commercial production.

(x) While acquiring the asset, the assessee receives any capital grant or Government subsidy or any assistance from any other authority or person such amount shall be excluded from the acquisition cost for the calculation of depreciation allowance.

(xi) Fluctuation in the foreign exchange rate is given effect to determine the cost base of any asset acquired with money borrowed and payable in foreign currency.

(xii) Depreciation is not treated as an expense unlike the matching of cost with revenue by the accountants. However, it is given as a specific case for the diminution in capital assets used in business or profession. Since, it is not treated as a cost by the tax people, tax profit or loss is calculated first without having regard to depreciation allowance.

If there is any profit, depreciation is set off against that. If not or if insufficient to absorb the whole, the balance is and can be carried forward indefinitely as unabsorbed depreciation. But in case of loss, it can be carried forward only for six years and when cannot be set off within that, is regarded a capital loss. This facility of carry forward of unabsorbed depreciation is extended to all tax holiday or exempted enterprises when however, they cannot carry forward their business losses beyond the holiday or exempt period.

11.2 Depreciation allowance for different heads of income

Income Tax Act, 2023 prescribes depreciation allowances for fixed assets used in different heads of income as follows:

a) Agricultural income
b) Income from business

11.3 Depreciation allowance on assets used for agricultural purpose

Depreciation allowances on fixed assets used for agricultural purposes are allowed at prescribed rates as given in Third Schedule. The schedule is produced below:

Third Schedule
[Para 1]

Sl. No.	Capital asset	Rate of depreciation (%)
1)	A building or structure constructed by brick, concrete, steel or similar material	5
2)	House constructed by tin, bamboo or similar materials	10
3)	Permanent fence	10
4)	Tube – well	10
5)	Tank	10
6)	Irrigation works, channels, pipes	10
7)	Agricultural instruments made by wood or bamboo	20
8)	Weight machine	10
9)	Tractors, oil engines and light machinery	10
10)	Truck, delivery van, other motor vehicle	10
11)	Piper pumping equipment	20
12)	Non-mechanical van	15
13)	Steam engine	10
14)	Factory machinery	15
15)	Any such common instrument, tools, plant and other property	10

11.4 Depreciation allowance on assets used in business or profession

According to para 2 of Third Schedule, Part I, ordinary and initial depreciation shall be allowable in respect of an asset owned and used for the purposes of business or profession during the relevant income year. Where the asset is used partly for business or profession, only a reasonable proportion of the depreciation shall be allowed. The aggregate amount of depreciation allowed in respect of an asset shall not exceed its cost. Depreciation on leased assets shall be allowable against lease rental income of a leasing company, bank, or financial institution, except in the case of machinery, plant, motor vehicles, or furniture provided under a finance lease. No depreciation allowance shall be admissible where the taxpayer fails to furnish the prescribed particulars with the return of income or where the asset is not used for the purposes of business or profession during the relevant income year.

11.5 Determination of purchase price of an asset

According to Para 3 of Part I of Third Schedule, for the purpose of depreciation, the cost of a sedan car shall be deemed not to exceed BDT. 6 million, except in the case of a bus or minibus used for the transportation of students, teachers of an educational institution, or employees of the business entity. In determining the cost of an asset, any allowance, rebate, commission, or financial assistance received by the taxpayer, other than a loan, shall be deducted from the cost. Where a used asset is acquired, its fair market value shall be treated as its cost for depreciation purposes. Where the acquisition of an asset is financed through a foreign currency loan or involves a foreign currency transaction, any exchange loss arising from exchange rate fluctuations or hedging shall be added to, and any exchange gain shall be deducted from, the cost of the asset.

11.6 Types of depreciation allowance

As per Third Schedule of ITA, 2023, depreciation allowances may be classified as under:

Reference	Types of allowances
Para 4, Third Schedule	Normal depreciation allowance
Para 5, Third Schedule	Initial depreciation allowance
Para 6, Third Schedule	Accelerated depreciation allowance on plant and machinery

11.7 Normal depreciation allowance

As per para 4 of Part I, Third Schedule, normal depreciation allowance is allowed at the following rates:

SL. No.	Classification of assets	Rate (% of the written down value)
1	Building	5
2	Factory building	10
3	Furniture and fittings	10
4	Office equipment	10
5	Machinery, plant and equipment (unless otherwise specified in this schedule)	10
6	Ocean-going ships	

	a. New	5
	b. Old at the time of purchase whose age is –	
	(i) Not more than 10 years	10
	(ii) More than 10 years	20
7	X-ray, electrotherapeutic and other medical equipment including its spare parts	20
8	Battery operated appliances and rechargeable batteries	30
9	Equipment used for production and display of audio-visual products	20
10	All types of motor vehicle not plying for hire	10
11	All types of motor vehicle plying for hire	20
12	Computer hardware including printers, monitor and ancillary item	25
13	Professional and reference books	25
14	Aircraft, aero-engines and aerial photographic equipment	30
15	Molds used in manufacture of glass or plastic goods or concrete pipe	30
16	Mineral oil concerns -	
	(a) Below ground installation	100
	(b) Above ground installations, that is to say, portable boilers, drilling tools, well-head tanks and rigs	25
17	Bridge	2
18	Road	2
19	Flyover	2
20	Pavement runway, taxiway	2.5
21	Apron, tarmac	2.5
22	Boarding bridge	10
23	Communication, navigation aid and other equipment	5
24	Any such physical asset not mentioned in this schedule	10

11.8 Initial depreciation allowance

According to para 5 of Part I of Third Schedule, an initial depreciation allowance shall be admissible in respect of a newly constructed building and any new machinery or plant used in Bangladesh for the first time. The allowance shall be granted in the income year in which the asset is first used for the purposes of business or profession or in which commercial production commences, whichever is later.

The initial depreciation allowance shall be –

(a) In the case of building	10%
(b) In the case of machinery or plant other than ships or motor vehicles not plying for hire	25%

Provided that no initial depreciation allowance shall be admissible in respect of-

- a motor vehicle not used for hire; or
- any machinery or plant that has previously been used in Bangladesh.

11.9 Accelerated depreciation allowance

According to para 6 of Part I of Third Schedule, accelerated depreciation allowance shall be admissible in respect of any new plant or installation used in a manufacturing industry, tourism industry, or sports industry located outside the areas of the Dhaka City Corporation and Chattogram City Corporation. The allowance shall be available for two consecutive income years, commencing from the income year in which commercial production or commercial activity begins.

The accelerated depreciation allowance shall be computed on the cost of the asset at the following rates:

SL no	Year of commencement of commercial operation	Rate of depreciation
1	First income year	60%
2	Second income year	40%

The allowance shall be admissible only where the plant or installation has not previously been used in Bangladesh. The industrial undertaking shall–

- be a body corporate having its head office in Bangladesh or a company incorporated in Bangladesh under the Companies Act, 1994;
- have a paid-up capital of not less than BDT 2 million at the commencement of commercial production;
- possess a valid Taxpayer Identification Number (TIN);
- maintain proper books of account; and
- furnish returns of income in accordance with this Act.

An application for accelerated depreciation shall be submitted within twelve months from the end of the month in which commercial production or commercial activity commences, together with a declaration that the undertaking is not, and shall not become, entitled to a tax holiday. No other depreciation allowance shall be admissible in respect of any asset for which accelerated depreciation is allowed.

11.10 Arrangements relating to profit or loss and sale or transfer of asset

According to para 7 of Part I of Third Schedule, where any asset is sold or transferred by an assessee in any income year, no depreciation allowance shall be allowed under this Third Schedule against such asset in that income year.

11.11 Amortization

1. **Computation of Amortization:** According to para 1 of Part 2 of Third Schedule, the amortization allowance shall be computed on straight line basis.
2. **Amortization of license fee:** where a resident company pays any amount as license fee for the purpose of obtaining permission from an authority approved by the Government to carry on business for two or more years, it shall be deducted from the income of the

business of the company at the proportionate rate up to the last year of the last year of license period.

3. **Amortization of pre-commencement expense:** Rate of amortization of pre-commencement expense shall be 20%.
4. **Amortization of research and development expenditure:** Amortization rate of research and development expenditure shall be 10%.
5. **Amortization of computer software and applications:** The rate of amortization of computer software and application shall be as follows:
   a. 20% in respect of any software and applications developed in Bangladesh;
   b. 10% in respect of any software and applications developed outside Bangladesh.
6. **Amortization of disallowed expenditure:** If any expenditure claimed by the assessee is disallowed treating as capital expenditure, 10% amortization on such disallowed expenditure shall be allowable in subsequent assessment years.

11.12 Carry-forward of depreciation allowance

According to section 71 of ITA, 2023,

1. If any depreciation allowed under this Act, is not fully charged as expenditure against the gross income of an assessment year, it shall be added to the depreciation of the next assessment year.
2. No depreciation allowance shall be carry-forward in case of failure to comply with any provision of this Act.
3. Carry forwarded loss shall be adjusted before charging carry-forwarded deprecation.
4. Allowable depreciation can be carry-forward till fully adjusted.

Worked examples and solutions

Worked example – 1

Company X, whose accounting year is ended on June 30 each year, has purchased a machine for Tk. 20 lakhs on 29 June, 2023 and sold the same on 1st April 2026 for Tk. 25 lakhs. Compute balancing charge and capital gain.

Solution 1

Assessment year	Rate of depreciation	Depreciation	Written down value
			2,000,000
2023-24	10%	200,000	1,800,000
2024-25	10%	180,000	1,620,000
2025-26	10%	162,000	1,458,000

Total gain: Sale proceeds – Written down value = Tk. 2,500,000 – Tk. 1,458,000 = Tk. 1,042,000

Capital gain = Sale proceeds – Original cost = Tk. 2,500,000 – Tk. 2,000,000 = Tk. 500,000

Balancing charge = Total gain – Capital gains = Tk. 1,042,000 - Tk. 500,000 = Tk. 542,000

Notes:

1. Difference between sales price and original cost is capital gain to be assessed in 2026-27 assessment year.
2. Balancing charge equals to depreciation allowances so far enjoyed i.e. Tk. 542,000 (200,000+ 180,000 + 162,000).
3. The company received the depreciation allowance in 2023-24 assessment year, for just buying the machine one day before its year end. Had it been 1st July, 2023, the allowance would have started from the assessment year 2024-25. No depreciation is applicable in the year of disposal and that is why depreciation was not calculated during the assessment year 2026-27.

Worked example – 2

Company X bought a machine for Tk. 5,000,000 on 10th July, 2023 to be used in its expansion unit in Savar, Dhaka. The investment is qualified for accelerated depreciation under Third Schedule. The company sold the machine on 15 January, 2026 for Tk. 2,000,000, The Company's year ends on 30th June. Calculate depreciation for the relevant assessment years.

Solution 2

Assessment year 2024-25

	Cost	Allowance
Machine	5,000,000	
Accelerated depreciation allowance (3rd Schedule) (50% of cost)	2,500,000	2,500,000
		2,500,000

Assessment year 2025-26

Accelerated depreciation allowance (30% of cost)		1,500,000
Written down value		1,000,000

Assessment year 2026-27

Sale proceeds		2,000,000
No tax depreciation allowable in the year of disposal		Nil
Less: WDV		1,000,000
Revenue gain from sale of machine		1,000,000

Notes:

Difference between accounting profit and tax profits arises mainly because of timing what accountants charge in the accounts as depreciation and what tax law allows. Since, both the way calculates on the cost as the upper limit, there would be no difference in the long run. However, after tax results of companies differ significantly from year to year or across the industry because of the taxation anomaly.

To remove this problem and to show an even after-tax results year after year companies can maintain deferred taxation account in accordance with IAS 12 (Accounting for income tax).

Self-Assessment Questions

1) Enumerate different types of depreciation allowance?

2) What is the basic difference between depreciation and amortization?

   An asset was bought some years back for Tk. 1,000,000, the WDV of which was Tk. 600,000. Find out the tax implication,

   a) If it was sold for Tk. 1,150,000.

   b) If it was sold for Tk. 850,000.

   c) If it was sold for Tk. 450,000.

Chapter 12

Set off and Carry Forward of Losses

Introduction

Learning objectives
Examination context

Topic list

12.1 Introduction to set off and carry forward of losses

12.2 Set off and carry forward losses

12.3 Carry-forward of unabsorbed depreciation allowance

Examples

Self-assessment questions

Introduction

Learning objectives

- Define set off and carry forward of losses.
- Identify possible areas of set off of losses.
- Identify the heads of loss permissible for carry forward.
- Identify the situations when carry forward is not permissible.
- Explain maximum years when carry forward is possible.
- Differentiate carry forward of losses by individuals, firms and partners.
- Explain the carry forward of losses by undertakings enjoying tax holiday facilities.
- Illustrate the concept of set off and carry forward of losses in different situations.

Practical significance

Set off and carry forward of losses is very important and practically significant to compute total income of any year. These are the benefits enjoyed by assesses to cover up their losses before paying taxes to the government.

Set off means the coverage of loss under one head against another head in a specific year. Carry forward is the transferring of loss of a year to the succeeding year or years for coverage if set off was not possible or insufficient. Such set off and carry forward facility can be availed provided that certain conditions are fulfilled. This chapter presents such guidelines.
After carry forward, losses from any head cannot be set off against income from any other heads. And losses cannot be carried forward for unlimited period. Thus, professional accountants need clear understanding on each topic of this chapter.

Subject to some conditions, an assessee is allowed to set off and carry forward of losses. The carry forward of losses under different heads of income are varied.

You will find the details of the above issues in this chapter with some practical examples.

Stop and think

Do you realize that the understanding of set off and carry forward of loses is important for computation of total income? Can you determine the total income from different heads of income after set off and carry forward of losses?

Working context

In practice, as the accountants are sometimes required to support to prepare their clients' tax returns, they need to advise the clients on how to calculate the total income for any income year. Before advising the clients, accountants should have the clear concept relating to set off and carry forward of losses in determining the total income.

Syllabus links

The topics covered in this chapter are very important for computing total income which is required for solving sample practical problems at this level.

Examination context

Exam requirements

In the examination, students may be required to:

- Understanding provisions regarding set off and carry forward of losses.
- Identify possible areas of set off of losses.
- Identify carry forward of losses from income from agriculture.
- Identify carry forward of losses from income from business and profession.
- Identify carry forward of losses from income from speculation business.
- Identify carry forward of losses from capital gains.
- Identify carry forward of losses from income from house property.
- Identify carry forward of losses from income of a partnership firm.
- Identify the situations when carry forward is not permissible.
- Explain maximum years when carry forward is possible.
- Explain the application of unabsorbed depreciation and its impact on income from business and profession.
- Differentiate carry forward of losses by individuals, firms and partners.
- Explain the carry forward by undertakings enjoying tax holiday facilities.
- Illustrate the concept of set off and carry forward of losses in different situations.

Question practice

For question practice on these topics go to the suggested answers covering this chapter and also this workbook.

Examiner's comments on how students should tackle questions

Candidates have to be prepared well for this area as this chapter consists of core concept on computation of income which is vital for calculating tax liability. Clear concept and understanding of each content of this chapter will help candidates to resolve any problems relating to set off and carry forward of losses.

SET OFF AND CARRY FORWARD OF LOSSES

Section overview

- Loss arising in one head of income can be set off against profit arising under any other head except from capital gain or loss on business, speculative business and tobacco business.
- Balance of loss, if remains, can be carried forward to be set off against profit under same head for six years.
- Unabsorbed depreciation brought forward together with current year's depreciation allowance forms total depreciation charge for the year.
- Unabsorbed depreciation can be carried forward indefinitely i.e., without time limit of six years.

12.1 Introduction to set off and carry forward of losses

Tax is imposed on income and thus, if loss is generated from any heads; government offers sufficient options to make the assessee well off enough so that tax may be collected. Two such options are:

a) Set off
b) Carry forward and then set off

Logically, set off considers only one year whereas carry forward includes subsequent year or years. As assessee have multiple sources of income, it is very common that loss will not generate from each head. Thus, losses from one head may be adjusted with income from other heads so that net figure results income and tax can be imposed on it. However, if the total income from all head's results losses, set off cannot be done practically. In such a situation, loss of one year can be carried forward to subsequent year or years for set off. This chapter presents these two issues in detail.

12.2 Set off and carry-forward of losses: section 70

According to section 70 of ITA, 2023, the assessed loss of any head in an assessment year can be set off against any other head. However, no loss mentioned in the below table can be adjusted against income of head or source other than from that head or source, namely –

Sl. No.	Source or head of loss	Can be adjusted
1.	Capital loss	Only with capital gain
2.	Business loss	Only with income from business
3.	Loss from speculation business	Only with income from speculation business
4.	Loss from tobacco business	Only with income from tobacco business

No loss under any source or head of income shall be set off or carried forward where the corresponding income is exempt from tax, subject to a reduced rate of tax, or liable to tax on a final basis under section 163(3). Any loss incurred by a partnership firm or an Association of Persons (AOP) shall be set off only against the income of that firm or AOP and shall not be available to its partners or members.

Where a loss cannot be wholly set off in an income year, the unabsorbed loss may be carried forward and set off in the succeeding income years, but not beyond six consecutive assessment years.

Where a business or profession is reorganized under Part I of the Eighth Schedule, or where any person succeeds to a business or profession otherwise than by inheritance, the successor shall not be entitled to set off or carry forward any loss incurred by the predecessor against the successor's income.

12.3 Carry-forward of unabsorbed depreciation allowance

According to section 71 of ITA, 2023, where the depreciation allowance for an income year cannot be wholly set off against the income of that year, the unabsorbed depreciation shall be carried forward to the succeeding income year and deemed to form part of the depreciation allowance of that year, and shall continue to be so carried forward until fully set off.

No depreciation allowance shall be carried forward where it has been disallowed due to non-compliance with the provisions of this Act. In computing the taxable income of any succeeding income year, brought-forward business losses shall be set off before any brought-forward depreciation allowance.

Example:

A, B, and C were partners in a firm sharing profits in the ratio of 3:2:1. During income year 20X2--X3, B retired and partner A and C continued in the ratio of 3:1. Up to that year brought forward loss of the firm amounted to Tk. 300,000. Net profit for the current year amounted to Tk. 500,000.

Here is a case of change in the constitution of the firm. The firm cannot set off retiring partner's share of loss against its profit for the current assessment year 20X3-X4, which is (2/6 × Tk. 300,000) = Tk. 100,000 nor C can individually set off or carry forward his share of the loss.

Assessment year 20X3-X4

	Tk.
Net profit	500,000
Brought forward of previous year's loss	200,000
Adjusted profit	300,000

Above set-off loss arising from partnership firm is not allowed under section 70(4) of ITA, 2023 against the income of a partner.

Worked example

Mr. Jamshed Sowdagor reports the following income for the income year ended on June 30, 2026.

Income from business or profession	Tk. 500,000
Income from rent	Tk. 100,000
Capital gain	Tk. 50,000
Income from speculative business	Tk. 80,000

However, he has some losses carried forward from earlier years (income years) with the following details:

Heads	Amount of losses	Year of origin
Loss from business	Tk. 80,000	2019-20
Capital loss	Tk. 50,000	2014-15
Loss from speculative business	Tk. 40,000	2020-21
Unabsorbed depreciation loss	Tk. 50,000	2012-13

Solution:

Mr. Jamshed Sowdagor
Income year: 2025-26
Assessment year: 2026-27

Sources of income	Tk.	Tk.	Tk.
Income from business		500,000	
Set off: Loss carried forward from AY 2019-20	80,000		
Unabsorbed depreciation loss	50,000	(-)130,000	
Taxable income from business			370,000
Income from rent			100,000
Capital gain Tk. 50,000			
Set off: not allowed as it exceeds 6 years			50,000
Income from speculation business		80,000	
Set off: Loss carried forward from AY 2020-21		(-)40,000	40,000
Total income			**560,000**

Self-assessment questions

1) What is the difference between set off and carry forward of losses and condition associated with that?
2) What are the conditions for loss carry forward of a partnership firm? Can a partner claim loss adjustment of the firm against his personal income?
3) How many years a speculative business loss can be carried forwarded?

Chapter 13

Exemption and Allowances
(Tax holiday/other exemptions)

Introduction

Learning objectives
Examination context

Topic list

13.1 Exemption from tax: Section 76

13.2 Exclusion from total income: Section 77(1) and Sixth Schedule, Part I

13.3 Subtract from gross income: Sixth Schedule, Part II

13.4 General tax relief in respect of certain investment and expenditure: section 78 and Sixth Schedule, Part III

13.5 Tax Holiday

Self-assessment questions

Introduction

Learning objectives

- Identify the area of investment for tax holiday scheme.
- Recognize the conditions for enjoying tax holiday.
- Determine the tax holiday income

Practical significance

Income from some newly established industrial undertakings are exempted from tax liability on the basis of fulfilling some conditions. To get the facility of tax holiday, the undertakings need to comply with some conditions and if any conditions are not fulfilled in the course of making assessment of an exempted assessee, the exemption will be withdrawn and the DCT shall determine the tax payable on such income.

The tax holiday and special tax exemptions or tax concessions are provided to different types of business and industrial undertaking to encourage those businesses and industries for overall development of the country. Significant exemption on income from export sales also a good initiative of government to promote the export oriented Bangladeshi companies.

Stop and think

When you want to start a new business, you can consider the opportunity of tax holiday or special tax exemption given by the Government. You can be the part of the development of the country and at the same time you can get the tax holiday facility to enrich your business.

Working context

Accountants are sometimes required by the entrepreneur for giving advice on how the business can be newly started or expanded along with the tax holiday or special tax exemption facility. Chartered accountants can help their clients regarding new business or expansion of their business in such way that the clients can enjoy the tax holiday opportunity. Accountants should have the detailed knowledge on the area of tax exempted business and the updates of the rules and regulations for getting tax holiday and other special tax exemption facility so that they can rightly advise their clients enjoying that facility.

Syllabus links

The topics covered in this chapter imply the area of industry and investments from where you can get tax holiday benefit with the conditions to get that benefit.

Examination context

Exam requirements

In the examination, students may be required to:

- Recognize the different industrial undertakings for taking tax holiday facility.
- Illustrate the various conditions for getting tax holiday.
- State the way of computing tax holiday income.
- Mention the reasons for withdrawal and cancellation of tax holiday.
- Define the exemption of tax liability for Bangladeshi exporting industries.
- Mention the different types of business considered for special tax exemptions.

Question practice

For question practice on these topics, go to the suggested answers covering this chapter.

EXEMPTION AND TAX HOLIDAY

Section overview

- Assessee enjoying some non-assessable income.
- Assessee enjoying tax rebate on investment allowance.
- Some newly established industrial undertakings are enjoying tax holiday.
- There are some conditions to get the tax holiday facility.
- The purpose of tax holiday is to encourage industrial and other development of the country in many sectors like physical infrastructure, textile, hospital, exporting industries etc.
- Tax holiday income shall be computed like the computation of income from business or profession.
- Tax holiday may be cancelled or withdrawn if one or more conditions not fulfilled.

13.1 Exemption from tax: Section 76

According to section 76 of ITA, 2023,

1. The government, may by notification in the official gazette, grant exemption from tax to any person or class of person.
2. In case where exemption from tax has been granted to a person under the provision of this Act, if tax exemption is not granted by a notification under section 76(1) of ITA, 2023 such provision shall not be operative.
3. The government may cancel any tax exemption.
4. No tax exemption under this Act shall be granted retrospectively.
5. Exemptions shall not be applied in case of failure to submit return upon comply the provisions of section 166 and section 171 in an income year. Provided that, provision of this sub-section shall not be applicable for the exceptions allowed in para (4), (50, (6), (7), (8), (17) and (35) and exemptions in relation to computation of income from employment under Part I or Sixth Schedule.
6. A person obtained exemptions for any source of income for any period shall not be eligible for exemption in any way for same income in another period, and even exemptions shall not be allowed through reconstruction by merger, demerger or acquisition. Provide that, where exemption period is extended under this Act, the provision of this sub-section shall not be applied.
7. In computing income of a person or for a source of income, expenditure disallowed under section 55 shall be taxed as per section 56.

13.2 Exclusion from total income: Section 77 (1) and Sixth Schedule, Part I

Any income or class of income or the income of any person or class of persons specified in Part I of the Sixth Schedule shall be exempt from payment of tax as per section 77(1). Following items as specified in Part I of the Sixth Schedule of the ITA, 2023, are exempted from tax:

(1) Income of any intra-government or international organization and its employees exempted from tax by any act or treaty.

(2) Any income under-

  (a) remuneration of an ambassador, high commissioner, envoy, minister, charged affairs, commissioner, councilor, consul, the career, secretary, advisor, or attaché of a foreign state, high commission, legation, or commission of a foreign state.

  (b) salary of a trade commission or government representative stationed in Bangladesh if similar exempted is allowed in the concerned country.

  (c) salary of office staff of the person referred to in (a) and (b) where he is not a citizen of Bangladesh and not engaged in business or profession in Bangladesh, and similar exemption is applied to the officials of the Bangladesh government in his country.

(3) Grants, taxes, fees or duties received by a government or local authorities.

(4) Pension from the government pension fund.

(5) Income up to Tk. 2 crore 50 lakh from the approved gratuity fund.

(6) Employees' or employer's contribution to the recognized provident fund, approved superannuation fund, pension fund and gratuity fund, and after-tax income of the funds to its beneficiaries but maximum amount from gratuity fund shall be Tk. 2 crores 50 lakh.

(7) Income of a provident fund approved under the Provident Fund Act, 1923.

(8) Amount received from an approved scheme for voluntary retirement by the employee of government, local authority, autonomous or semi-autonomous bodies and their units or institutions.

(9) Interest of pensioners' savings certificate where accumulated investment does not exceed Tk. 5 lakh at the end of income year.

(10) Income of mutual fund, alternative investment fund, real estate investment fund and exchange treaded fund approve by Bangladesh Security and Exchange Commission.

(11) Income from house property of trust or other legal obligations (not applicable for private organization registered under the Bureau of NGO Affairs) formed for charitable or religious purpose if said income–

  (a) used in Bangladesh for charitable or religious purpose in the income year.

  (b) income accumulated and keep separated and informed DCT about the purpose and duration of reserve not exceeding 10 years and invested in government securities, deposited in a Post Office Savings Bank account or any bank where government owns 51% or more shares.

(12) Contribution of religious organization, or charitable organization approved by the NBR and expended for religious or charitable purpose, as well as contribution received by person approved by the NGO Affairs Bureau.

(13) Service charge (includes interest or share of profit) from microcredit of an organization registered with the Microcredit Regulatory Authority if the income is revolving only as microcredit, organization shall not engage in any activity other than microcredit (applicable from assessment year 2026-27).

(14) Reimbursement of expenses of an employee wholly and necessarily incurred in performance of duties and it was convenient for the employer to make expenses through the employee.

(15) After tax income of the trust or funds received by the beneficiary of trust or member of funds.

(16) Sum received by a member of a Hindu undivided family where tax has been paid by the family.

(17) Income earned abroad and brought through the official channel by a Bangladeshi citizen.

(18) Income from Wage earners development bond or US dollar premium and investment bond or Euro premium and investment bond, or Pound Starling premium and investment bond.

(19) Income of an individual being an indigenous Hillman derived from solely the economic activities (except for income from financial assets) in hill districts.

(20) Agricultural income up to Tk. 500,000 for an individual assessee whose only source of income is agriculture and received bank interest income.

(20A) Income up to Tk. 500,000 derived from poultry, shrimp and fisheries, production of palleted poultry feed, palleted shrimp and fish feed, dairy farming, frog farming, seed marketing, sericulture etc.

(21) Income of following business of a person being resident or non-resident Bangladeshi between July 2024 to June 2027 subject to all income shall be made through bank transfer–

  (a) AI based solution development

  (b) Blockchain based solution development

  (c) Robotic process outsourcing

  (d) Software as a service

(e) Cyber security service

(f) Digital data analytics and data science

(g) Mobile application development service

(h) Software development and customization

(i) Software test lab service

(j) Web listing, website development and service

(k) IT assistance and software maintenance service

(l) Geographical information service

(m) Digital animation development

(n) Digital graphic design

(o) Digital data entry and processing

(p) E-learning platform and e-publications

(q) Freelancing and content creation

(r) Call centre service

(s) Document conversion, imaging and digital archiving.

(22) Tax paid by the government on behalf of petroleum exploration company under Profit Sharing Contract.

(23) Income of Small and Medium Enterprise (SME) registered with SME Foundation and engaged in production of any goods having turnover up to Tk. 50 lakh (Tk. 70 lakh where SME is owned by women).

(24) Income from an approved zero-coupon bond including zero-coupon Islamic investment certificate (not applicable for the assessee being a bank, insurance and finance companies).

(25) Income, other than income from financial assets, of an MPO enlisted educational institute runs the government curriculum.

(26) One-third of income from employment or Tk. 500,000, whichever is lower applicable for private salaried person.

(27) Income, other than income from financial assets of a fund, government university, international educational institute which is not a private university, institute of CA, CMA and CS.

(28) Honorarium or allowance from Bangladesh freedom fighter welfare trust, or any welfare allowance received from the government.

(29) Any reward from the Bangladeshi or foreign government.

(30A) Award of Novel, Ramon Maxus, Booker, Pulitzer, Simon Bolivar, academic award, Grammy, Emi, Golder Globe, Cannes Film Festival Award received by a natural person.

(30) Income derived from the operation of elderly care home.

(31) Distributed taxed dividend to a company if the distributing company maintain separate account for the taxed dividend.

(32) Business income of a Bangladeshi flag carrier ocean-going ship until June 2030 if received in foreign currency and remitted upon complied with the rules.

(33) Income of a beneficiary from universal pension scheme of National Pension Authority.

(34A) Income of the National Pension Authority.

(34) Donation from spouses, full siblings, parents or children if shown in the return of donor

and recipient. However, condition to show in the return shall not be applicable if donation received from outside country through banking channel.

(35) Capital gain by a natural person excluding sponsor, director shareholder or placement holder, up to Tk. 5,000,000 from transferring listed shares of company or funds or units approved by BSEC.

(36) Money or benefit received by an employee from a group insurance policy, by whatever name called.

13.3 Subtract from gross income: Sixth Schedule, Part II

As per section 77(2) and Sixth Schedule, Part II, following income shall be deducted from the total income, namely –

1. Assessee in any income year by bank transfer –
   a. Any income donated to any fund established under or by the Prime Minister's Education Assistance Trust Act, 2012 subject to following maximum limit –
      i. 10% of the income of the company or Tk. 8 crores whichever is lower;
      ii. 10% of the come of the other than company or Tk. 1 crore whichever is lower.
   b. Income donated to any girl's school or college approved by the ministry of education;
   c. Income donated to any technical or vocational training institute approved by the ministry of education.
   d. Donation to central zakat management.
2. Income donated by the assessee in any income year through banking transfer to any national level organization involved in research and development for agriculture, science, technology and industrial development.

   It should be noted that above exclusion is subject to following condition as provided by section 77(2) of ITA, 2023,

   (a) The donation is reflected in the return or particulars or documents annexed to the return;

   (b) The total amount of the donation made under Part II of Sixth Schedule does not exceed 10% of the total income disclosed before considering donation;

   (c) Details of the source and amount of income shall be submitted with the return.

13.4 General tax relief in respect of certain investment and expenditure: section 78 and Sixth schedule, Part III

Subject to the provision of this Act and subject to the limits, conditions and qualifications set out in Part III of the Sixth Schedule, any investment made or by the resident individual and nonresident Bangladeshi shall be eligible for rebate from tax on total income as per below –

(a) 3% of A; or
(b) 10% of B; or
(c) Tk. 750,000.

Whichever is lower.

Where, A = Total income excluding tax exempted income, income subject to reduced tax rate, income derived as a share of profit from a partnership firm or association of persons, or income to which the provision of final settlement of tax applies.

B = Total investment and expenditure of the assessee as per Part III of Sixth Schedule in any income year.

The following items should be considered as investment allowance to enjoy tax rebate facility as per Sixth Schedule (Part-III):

(1) Sum paid for life insurance (up to the 10% of actual sum assured excluding bonus or other benefit) or deferred annuity in Bangladesh by an individual for himself and his spouse or minor children.

(2) Sum paid in Bangladesh by Hindu undivided family for life insurance of any male member or his spouse.

(3) Sum deducted as deferred annuity from salary payable by the government to an employee in accordance with the condition of service to secure him or his spouse or children up to one-fifth of the salary.

(4) Contribution to the provident fund under the Provident Fund Act, 1925.

(5) Employees' and employers' contribution to an approved provident fund subject to condition in Part III of the Second Schedule.

(6) Contribution to the approved superannuation fund.

(7) Sum invested in–

  (a) Government securities not exceeding Tk. 500,000.

  (b) New investment in Unit certificate or mutual fund, ETF or joint investment scheme unit certificate issued by any finance company or the Investment Corporation of Bangladesh (ICB).

  (c) Deposit Pension Scheme not exceeding Tk. 120,000.

  (d) Contribution to Universal Pension Scheme.

  For the purpose of claiming investment tax rebates under clauses (a) and (b), the investment must be held for its full prescribed term. If the investment is encashed or withdrawn before maturity, the tax rebate previously claimed shall be payable as additional tax.

(8) New investment in any securities listed on stock exchanges in Bangladesh made during the income year.

(9) Donation to an approved charitable hospital outside the City Corporation areas established within one year prior to the payment.

(10) Donation to an approved organization set up for welfare of retarded people established at least one year prior to the payment.

(11) Zakat or donation or contribution to the Zakat Fund or charitable fund established under the Zakat Fund Management Act, 2013.

(12) Sum paid to a benevolent fund or premium paid for group insurance for spouse, child or dependents approved by the Board.

(13) Donation to any approved philanthropic or educational institutions.

(14) Donation to a national level institution set up in memory of the liberation war.

13.5 Tax Holiday

13.5.1 Income of approved tax holiday entity

According to section 81 of ITA, 2023,

1. Subject to the provisions of this Act, income under the head 'Income from business' earned by an approved tax holiday entity shall be fully or partially exempted under Part IV of the Sixth Schedule and chapter 10 subject to limits, conditions and qualification for the prescribed period.
2. Any tax exempted income shall not be included in the total income of the assesse, however, shall be shown in the relevant part of the return.
3. An approved tax holiday entity shall be granted tax exemption under sub-section 1 of section 81 subject to following conditions, namely –
   (a) The entity is owned and operated by such person who – is a statutory body established by or under law having its head office in Bangladesh, and is a company as defined in the Companies Act, 1994 and having its registered office in Bangladesh and having paid-up capital not less than Tk. 2,000,000.
   (b) The entity is not formed by separating from any such business which is already existence or by reorganization;
   (c) Any factory, machinery, equipment or any other important immovable property if previously not used by any entity in Bangladesh;
   (d) Said entity – Obtained TIN, shall maintained books of accounts in accordance with the provisions of this Act, and maintained books of accounts separately.

Explanation – for the purpose of this section, 'approved tax holiday entity' means an entity in an income year from income is derived from business and which –

(a) Has been approved by the Board for partial or full tax exemption;

(b) Is allowed for such tax exemption or deduction in the relevant income year.

13.5.2 Approval of tax holiday entity by the board

According to section 82 of ITA, 2023,

1. A business entity shall submit an application in the manner prescribed by the Board within the six months of commencement of its commercial activities for availing tax holiday benefit.
2. Within 60 days from the date of receipt of the application, the Board shall, by order in written, give a decision on the application filed under section 82(1).
3. If the board fails to give a decision within the period mentioned above (i.e., 60 days from application receipt), the application for tax holiday shall be deemed to have been granted and the business entity shall be deemed to be a tax holiday entity until the Board gives a its decision on this.
4. The board shall not cancel the application without giving reasonable opportunity of being heard.
5. If any applicant is aggrieved by the decision of the Board, the said applicant may appeal to the Board within 4 months of the receipt of the decision and the Board may reconsider the previous order and issue an appropriate order.
6. Without prejudice to the provisions of 1 above, the Board may grant and review approvals under this section or make rules on any matter as it thinks fit for the purpose of ensuring tax compliance of tax holiday entities.

13.5.3 Transactions with associated entities

According to section 83 of ITA, 2023,

1. Where an approved tax holiday entity enters into a transaction with any of its associated entity and if the DCT is satisfied that –
    a. Transactions are not at open market price; and
    b. The income of any associated entity in any income year is less than the actual income as a result of such transaction.

In such case the income to which the associated entity is understated shall be treated as income of the tax holiday entity and shall be classified under 'income from other sources' for the said income year.

13.5.4 Computation of income of approved tax holiday entity

According to section 84 of ITA, 2023,

1. Income of an approved tax holiday entity shall be computed separately from any other business;
2. Income of the approved tax holiday entity shall be computed in the same manner under the heard 'income from business';
3. Only the normal depreciation as per Part I of the Third Schedule shall be allowed in computing the income from business of an approved tax holiday entity;
4. The computed loss of an approved tax holiday entity for any income year shall not be set off against the profit of any other entity or source/head of the assessee which is not an approved tax holiday entity;
5. Tax holiday benefit shall not be applicable to the income arising from said entity as a result of disallowance under section 55 and such income shall be taxed at the regular rate.

13.5.5 Cancellation of tax exemption

According to section 85 of ITA, 2023,

1. Where it appears from any proceedings taken under this Act that an approved tax holiday entity has failed to comply with any of the conditions set out in this chapter, the DCT shall not grant the exemption to the approved tax holiday entity and he can determine tax liability for the said entity in the regular manner and rate in the said income year.
2. The tax holiday entity may submit a written application to the Board against the cancellation order within one year from the order receipt date. The board may issue an appropriate order.
3. Notwithstanding anything contained in this chapter, the Board may, in the public interest, cancel wholly or suspend any exemption under this section by notification in the Official Gazette.

Self-assessment questions

1) What is the condition to be fulfilled to get permission for tax-holiday?
2) What is the limit for investment in mutual fund, unit fund and government securities for investment tax credit?

Chapter 14

Deduction/Collection of Tax at Source

Introduction

Learning objectives
Examination context

Topic list

14.1 Person responsible for tax deduction at source
14.2 Time limit for payment of tax deducted at source
14.3 Issuance of certificate for tax deducted at source
14.4 Rates of TDS at a glance
14.5 TDS as final tax u/s 163
14.6 Other issues relating to TDS

Self-assessment questions

Introduction

Learning objectives

- Recognize different classes of income from where tax is deducted or collected at source.
- Mention the time limit and manner of payment of tax deducted at source.
- Explain the consequence of non-deduction of tax at source where deduction is required by law.
- Define the computation, estimation and payment procedures of TDS.
- Mention the income heads that come under final settlement.

Practical significance

There are two methods of collecting taxes, one is direct method and another is tax deducted at source. The ordinary method of collection is direct collection of tax from the assessee. Deduction of tax at source is provided for in certain specified cases. If default is made in the deduction of taxes at source, the tax may be collected from the assessee directly, and further the person who is liable to deduct but has not deducted the tax under this section, may be held personally liable and treated as an assessee in default in respect of the tax.

This chapter presents areas of taxes deducted at source and related provisions as per income tax Act. Section 163 and its application are included in details here. For computing taxable income and tax liability this chapter is very important.

Stop and think

There are so many sources where tax is required to be deducted or collected at the time of payment

Working context

In corporate sectors, normally there are many payments made every day where deductions of tax at source are required by tax law. In some cases, the accountants are asking for advice on how and when the deductions need to be done. Accountants can provide the service to their clients on tax deduction at source so that the clients can avoid any penalty for non-compliance of tax law in this regard.

Detailed knowledge about the payment of tax before assessment in compliance with tax law can help accountants to support their clients significantly.

Examination context

Exam requirements

In the examination, candidates may be required to:

- Identify the classes of income from where tax is deducted or collected at source.
- Recognize the different amounts and rates of tax deducted at source.
- Identify the responsibility for deduction of tax at source.
- Define the time limit for payment of tax at source.
- Mention the manner of payment of tax deducted at source.
- Explain the result of deduction or non-deduction of tax at source where deduction is required by law.
- Identify the areas where tax deducted at source is considered as final payment of tax liability under section 163.

Question practice

For question practice on these topics, go to the suggested answers covering this chapter.

Examiner's comments on how students should tackle questions

Candidates need to remember the different amount and rates of tax deducted at source while preparing for exam. In practical problem at case study level, both tax deduction at source and calculation of advance tax may be asked.

PAYMENT OF TAX BEFORE ASSESSMENT

Section overview

- There are two methods of collecting taxes, direct tax and tax deducted at source (TDS).
- There are many classes of income from where tax is deducted or collected at source.
- TDS shall be paid to the credit of the Government normally within 2 weeks from the end of the month of deduction or collection except in the month of June and also in case of salary.
- Rate of TDS are varied.
- The deducted tax in some cases is treated as minimum tax.
- Tax deducting authority will be held liable for failing to deduct taxes and failing to deposit the same with government.
- Credit of TDS.

14.1 Person responsible for tax deduction at source: Section 140

Tax to be deducted or collected at source under Part VII of ITA, 2023 in respect of any income shall be deducted in accordance with the provisions of the Act by the person responsible for making payment which constitutes the income of the payee.

(a) "Person responsible for making payment" means –

(i) in the case of payments constituting income classifiable under head the 'income from employment' not being payment made by the Government, the employer himself or, if the employer is a local authority, company or institution, such authority, company or institution, including the principal officer thereof.

(ii) in the case of payment constituting income classifiable under head 'income from financial property' not being payment made by or on behalf of the Government, the authority, company or other institution issuing the security, and

(iii) in the case of payment of any other sum which constitutes an income of the payee chargeable to tax under the Act, the payer himself, or if the payer is a company or other institution, such company or institution including the principal officer thereof.

(b) "Specific person" means –

(i) Company, firm, association of person, trust or fund.

(ii) Public-private partnership.

(iii) Foreign contractor, foreign enterprise, or entity registered outside Bangladesh.

(iv) Hospital, clinic, or diagnostic center.

(v) E-commerce platform having over Tk. 1 crore annual turnover.

(vi) Hotel, resort, motel, restaurant, convention center, community center, transport agency having over Tk. 1 crore turnover.

(vii) Person other than farmer, engaged in tobacco leaf, cigarette, bidi, jorda, gul or other tobacco product production and distribution.

(viii) An individual having business turnover exceeding Tk. 10 crore.

14.2 Time limit for payment of tax deducted at source: Rule 9 of TDS Rules, 2026

Time of deduction or collection	Date of payment to the credit of the government
(a) In the month of July to May	Within 2 weeks from the end of the month
(b) On any day from 1 to 20 June	Within 7 days after deduction
(c) On any day of June	The next day of the deduction
(d) Last day of June	Same day

14.3 Issuance of certificate of tax deducted or collected at source: Rule 10 of TDS Rules, 2026

- Certificate for payment of Salary (excluding salary from the government) shall be provided as per Schedule 1.
- Certificate regarding deduction of tax under any other Section (except Section 86) shall be provided as per Schedule 2.
- Certificate for tax collection under Part VII shall be provided as per Schedule 3.
- A-Challan as proof of payment of tax shall be attached with the certificate.

- Certificate shall be issued within 2 weeks after the month of deduction or any suitable time to settle the tax liability of the person from whom tax has been deducted.
- Bill of entry, registration document, bank statement, payment receipt or information regarding tax deduction or collection shall be treated as certificate, but not applicable for deduction from salary.

  - Tuition fees as verified by AD bank under the foreign exchange transaction guidelines.
  - International marketing and product development expenses.
  - Any security deposits.
  - Arbitration fee.
  - Remittance for Hajj.
  - Payment for priority pass.

14.5 TDS as final tax: section 163

The following 3 heads of deduction shall be final tax u/s 163:

Serial	Source of Income	Section
1.	For persons who are exempt from filing a tax return under Section 166(2), all tax deducted or collected at source under Part 7 is treated as their final tax liability.	163
2.	Collection of Tax from Motor Vehicles Operated Commercially	138
3.	Collection of Tax from Inland Ships	139

If the tax computed under the normal procedure is higher than the final tax, then the differential tax is to be paid over and above the final tax.

14.6 Other issues relating to TDS

Consequence of failure to deduct, collect, etc. –section 143

A person who fails to deduct or collect tax at source or deducts at a lesser rate or amount, or fails to pay the deducted tax or pays less than the tax deducted to the government, or fails to comply with any other provision of this Part shall be treated as a taxpayer in default, and shall be liable to pay, with other consequences:

- Amount of tax that has not been deducted or collected.
- Amount requires to be deducted as reduced by the amount actually deducted, or
- Amount collected but not paid to the government, and
- A penalty amount not exceeding Tk. 1,000,000 for other non-compliances.

In addition to the above amount, person shall be liable to pay an additional amount at 2% per month on amount (except the penalty amount) calculated for the period from the date of deduction or collection to the date of payment; however, this period shall not exceed 24 months.

DCT shall take necessary action for realization of payment after giving reasonable opportunity of being heard;

Person responsible for making payment or approving the payment or granting approval, clearance, registration permits, as the case may be, shall be jointly or severally liable to pay taxes, penalty or additional amount.

No realization of amount shall be made if meanwhile amount has been paid by the person from whom deduction was due.

Certificate of tax deduction etc., section 145

Every person who deducts or collects tax as required by the provisions of Part VII of ITA, 2023 shall, at the time of making any payment in relation to which tax has been deducted or collected, furnish to the person to or from whom such payment or collection has been made, a certificate to the effect that the tax has been deducted or collected specifying therein-

(a) The name and TIN of the person from whom tax has been deducted or collected.

(b) the amount deducted or collected.

(c) section reference under which tax has been deducted.

(d) the particulars of the payment, and

(e) such other particulars as may be prescribed.

Payment to Government of tax deducted: section 146

All sums deducted or collected as tax under the provisions of Part VII shall be paid within the prescribed time by the person making the deduction or collection to the credit of the Government.

Save as provided in the Act, no person shall charge, withhold, deduct, or collect any sum, directly or indirectly as tax and where any sum is so charged withhold, deducted or collected, it shall be paid in the manner provided.

Credit of tax deducted or collected at source: section 150

Any deduction or collection of tax made and paid to the account of the Government in accordance with the provisions of this Part shall be treated as a payment of tax of the person from whose income the deduction or collection was made.

Credit shall be given in determining tax liability in an income year in which tax has been deducted and collected. Where tax is paid at source by a person on behalf of another person, the credit referred above shall be given in determining the tax liability of that other person.

Payment of tax where no deduction is made: section 151

The tax under the Act shall be payable by the assessee direct-

(a) in any case where tax has not been deducted or collected as required by, and in accordance with, the provisions of this Part;

(b) in any case where the amount deducted or collected is found, after regular assessment, to be less than the tax due from the assessee to the extent of deficiency; and

(c) in the case of income in respect to which no provision has been made for deduction or collection of tax under the provisions of this Part.

Self-Assessment Questions:

(a) Discuss the various types of income from which tax is required to be deducted or collected at source under the provisions of the Income Tax Act, 2023.

(b) State the provisions regarding information to be furnished to the Tax Authorities in connection with payment of salary, interest, dividend, collection of tax from property, payment to nonresident, and other sources under the provisions of the Income Tax Act, 2023.

(c) Mention the application for final payment of tax liability under section 163.

(d) What are the consequences of failure of deducting taxes in time at prescribed rates or failure of depositing deducted taxes within time?

Chapter 15

Advance Payment of Tax

Introduction

Learning objectives

Examination context

Topic list

15.1 Requirement to pay advance tax

15.2 Computation of advance tax

15.3 Payment of advance tax by new taxpayers

15.4 Failure to pay installments of advance tax

15.5 Credit of advance tax

15.6 Levy of interest for failure to pay advance tax

15.7 Interest payable by Government on excess payment of advance tax

15.8 Interest payable by the assessee on deficiency in payment of advance tax

Worked examples & solutions

Self-assessment questions

Introduction

Learning objectives

- Recognize different classes of assesses required to pay advance tax.
- Mention the time limit and manner of payment of advance tax.
- Explain the basis and methods of computing advance tax.
- Define the consequences of non-payment or insufficient payment of advance tax.
- Mention the situation when government will pay simple interest @ 10% to assessee.

Practical significance

Depending on assessed or provisionally assessed income, an assessee may require to pay advance tax. In some cases, the new assessee also requires to pay advance tax. The calculation of amount, rate, estimation and instalment of advance tax are guided by the Act. The assessee shall get the credit of advance tax. In case of excess or deficit payment of advance tax an assessee may receive or pay the interest from or to the Government. Tax paid in advance shall be adjusted at the time of tax payment on the basis of the return.

Payment of advance tax is important as failure of doing so will make the assessee being 'assessee in default'. Advance tax is a requirement and it reduces tax burden at the end of the year. Thus, it is helpful to the assessee as a method of tax planning. Professional accountants are required to help their clients in that regard.

Stop and think

Advance tax is required to pay on total income excluding income from agriculture and capital gain. Both old and new taxpayers are required to pay advance tax if they fulfil the threshold limit set by tax law. Do you think how advance payment of tax is made?

Working context

In corporate sectors, advance payment of taxes is very common as in many cases income exceeded the threshold limit of Tk. 600,000. In some cases, the accountants are asking for advice on how and when the advance taxes should be paid. The service for estimation and calculation of advance tax is required by some assessee. Chartered Accountants can provide the service to their clients relating to payment of advance tax so that the clients can avoid any penalty for non-compliance of tax law in this regard.

Detailed knowledge about the payment of advance tax in compliance with tax law can help accountants to support their clients significantly.

Syllabus links

You will also meet this area of taxation at advance stage.

Examination context

Exam requirements

In the examination, candidates may be required to:

- Define the requirement of advance payment of tax.
- Demonstrate how the computation, estimation and payment procedures of advance tax are made.
- Describe the consequences of payment or not payment of advance tax.
- Identify different classes of assesses required to pay advance tax.
- Mention the time and installments of payment of advance tax.
- Illustrate the application of 75% test to compute simple interest in case of deficit.

Question practice

For question practice on these topics, go to the suggested answers covering this chapter.

Examiner's comments on how students should tackle questions

Candidates need to remember the methods of computing advance tax, basis of advance tax, 75% test, computation of simple interest @ 10% on deficit amount of tax and other complexities. In practical problem at case study level calculation of advance tax may be asked for with different dates when instalment falls due.

ADVANCE PAYMENT OF TAX

Section overview

- An assessee, both old and new, may require to pay advance tax.
- Advance taxes are paid on income excluding capital gain and any one-time income.
- The assessee shall get the credit for advance tax.
- If the amount of advance tax paid along with TDS if less than 75% of due tax, assessee is required to pay simple interest @10% on such deficit.
- Government will also pay simple interest @10% if advance tax for any reason exceeds due tax.
- If the assessee fails to pay advance tax, he will be the assessee in default.

15.1 Requirement to pay advance payment of tax: Section 154

Advance tax shall be payable for each financial year where the total income of an assessee, as assessed in the latest income year, exceeds Tk. 1,000,000. For the purposes of determining liability under this section, capital gains and any one-time income shall be excluded from the computation of total income.

15.2 Computation of advance tax: Section 155

The amount of advance tax payable by an assessee in a financial year shall be the amount equal to the tax payable on his total income of the latest income year as assessed on regular basis or provisionally, as the case may be, as reduced by the amount of tax required to be deducted or collected at source in accordance with the preceding provisions of Part VII.
Advance tax shall be payable in four equal instalments (each for 25% of the payable amount) on the fifteenth day of September, December, March and June of the financial year for which the tax is payable.

In case, taxpayer failed to make full or part of any instalments, he shall pay next instalments upon adjusting the earlier unpaid amount. Where taxpayer estimate that the advance tax amount would be lower in an income year, then he shall submit estimates with DCT and make necessary adjustment of the advance tax payment based on estimates.

15.3 Payment of advance tax by new taxpayers: Section 156

If the income of an assessee who has not assessed previously, exceeds Tk. 1,000,000 in the income year immediately following the assessment year, he shall before the 15th of June of every financial year submit an estimated total income and advance tax payable to the DCT, and pay instalments as per manner prescribed in section 155(2).

15.4 Failure to pay installments of advance tax: Section 157

Where, an assessee who is required to pay advance tax fails to pay any instalment of such tax, as originally computed or, as the case may be, estimated, on the due date, he shall be deemed to be an assessee in default in respect of such instalment.

15.5 Credit of advance tax: Section 158

Any sum, other than a penalty or interest, paid by or recovered from an assessee as advance tax, shall be treated as a payment of tax in respect of the income of the period which would be the income year for an assessment for the year next following the year in which it was payable and shall be given credit for in the assessment of tax payable by the assessee.

15.6 Levy of interest for failure to pay advance tax: Section 160

Where, in respect of an assessee who is required to pay advance tax, it is found in the course of regular assessment that advance tax has not been paid in accordance with the provisions of this Part, there shall be added, without prejudice to the consequences of the assessee being in default under section 157, to the tax as determined on the basis of such assessment, simple interest thereon calculated at the rate and for the period specified in section 162.

15.7 Interest payable by Government on excess payment of advance tax: Section 161

The Government shall pay simple interest at 10% per annum on the amount by which the aggregate sum of advance tax paid during a financial year exceeds the amount of tax payable by him as determined on regular assessment.

The period for which interest shall be the first day of July of the year of assessment to the date of regular assessment in respect of the income of that year or a period of two years from the said first day of July, whichever is earlier.

15.8 Interest payable by the assessee on deficiency in payment of advance tax: Sec 162

Where, in any financial year, an assessee has paid advance tax on the basis of his own estimate and the advance tax so paid together with the tax deducted at source, if any, under this Part is less than 75%, of the amount of tax payable by him as determined on regular assessment, the assessee shall pay, in addition to the balance of tax payable by him, simple interest @ 10% per annum on the amount by which the tax so paid and deduction falls short of 75% of the assessed tax. Rate of interest shall be 50% higher if return is filed after expiry of the assessment year.

The period to compute interest shall be the period from the first day of July of the assessment year to the date of regular assessment or a period of two years from the said first day of July of the assessment year whichever is shorter.

Notwithstanding anything contained in sections 162(1) and (2) where-

(a) where tax is paid under section 173, or

(b) provisional assessment has been made under section 185 but regular assessment has not been made, the simple interest shall be calculated in accordance with the following provisions-

   i. up to the date on which tax under-section 173 or provisionally assessed, was paid;

   ii. thereafter, such simple interest shall be calculated on the amount by which the tax so paid falls short of the said assessed tax.

Where, as a result of appeal, revision or reference, the amount on which interest was payable under section 162(1) has been reduced, the amount of interest payable shall be reduced accordingly and the excess interest paid, if any, shall be refunded together with the amount of tax that is refundable.

Illustration 1

An assessee wants to pay advance tax for the assessment year 2026-27 on the basis of his own estimate that amounts to Tk. 1,000,000. Regular assessment for the assessment year 2025-26 was completed on February 28, 2026 resulting Tk. 1,500,000 profit including Tk. 80,000 from capital gain and Tk. 220,000 winning from prize bond lottery. Regular tax rate is 27.5%.

Calculate the amount of excess or shortfall in payment of advance tax and explain the consequences for the same.

Income eligible to apply advance tax as per regular assessment is Tk. 1,200,000 (Tk. 1,500,000 – Tk. 80,000 – Tk. 220,000), excluding capital gain and winning from prize bond lottery .

Advance tax to be paid on the basis of latest assessment (27.5% of Tk. 1,200,000) = Tk. 330,000

Shortfall Tk. 60,000 (Tk. 330,000 – 270,000)

75% test: The deficit or shortfall is required to be tested for charging simple interest.
75% of tax liability as per regular assessment (75% of Tk. 330,000) Tk. 247,500
Advance tax actually paid Tk. 270,000

Shortfall in case of 75% test - no shortfall.

Consequence: In this case, the assessee is required to pay the shortfall of Tk. 60,000 only. There is no question of charging simple interest as 75% is covered.

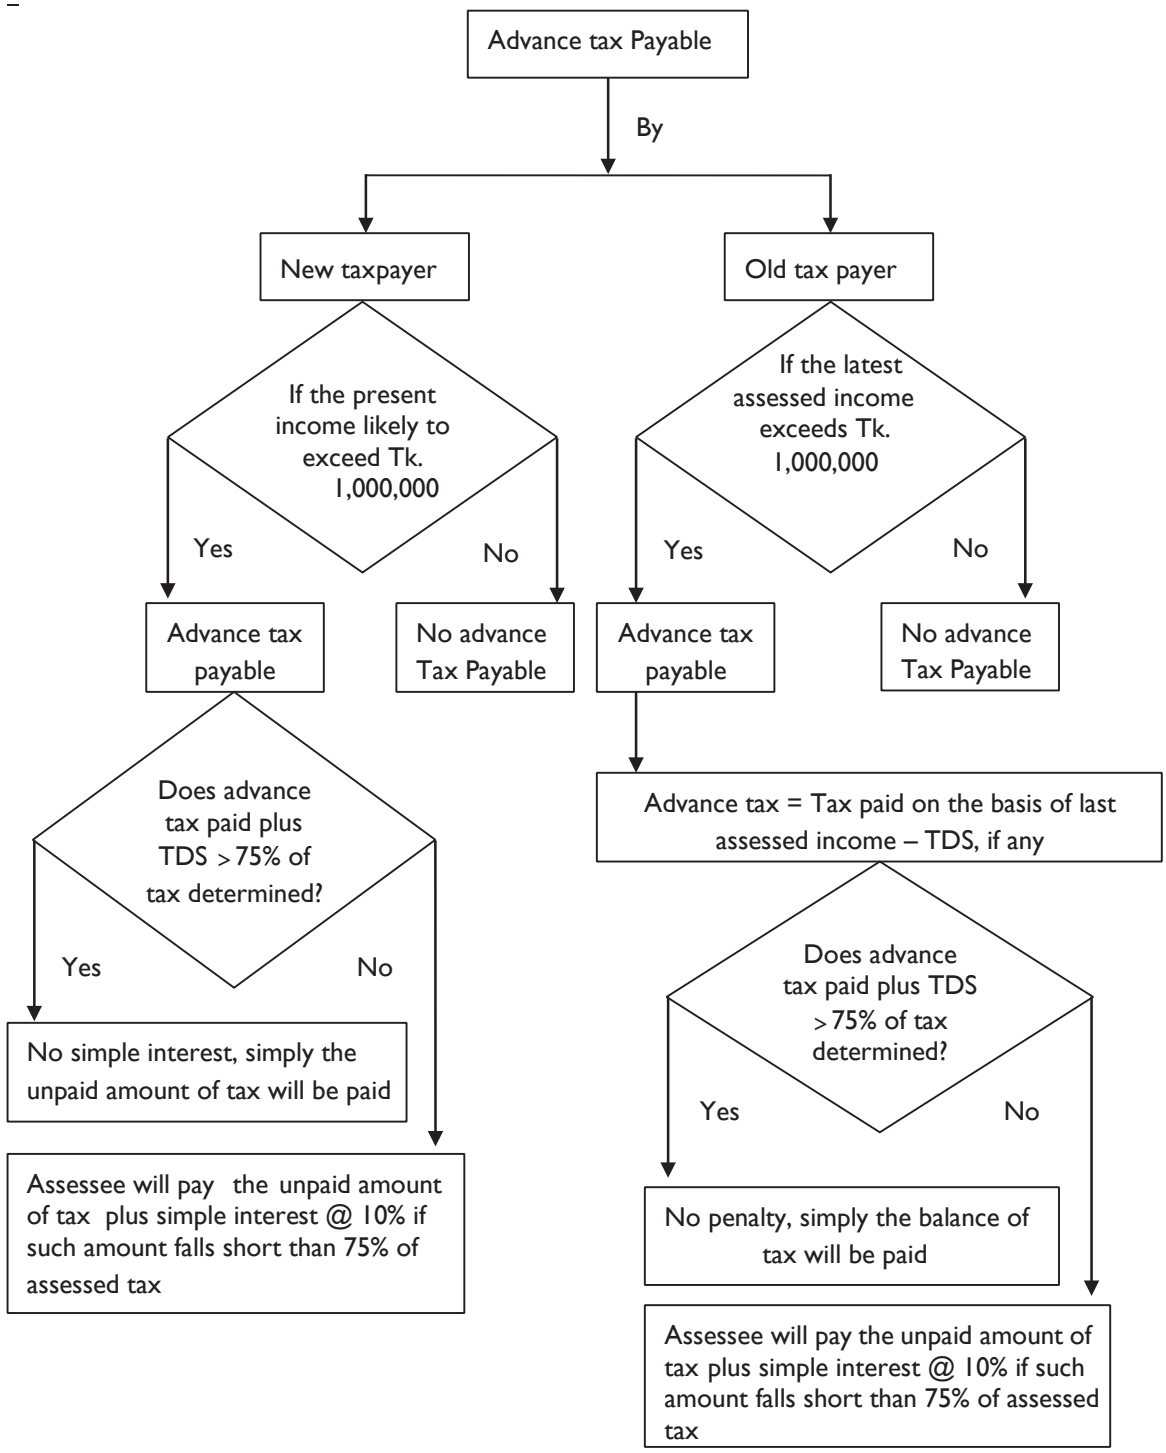

Illustration 2

ABC Ltd., a newly incorporated manufacturing company in Bangladesh, estimates its first taxable income for the fiscal year 2025-26 based on the following details:

- Sales Revenue from operations: Tk. 15,000,000
- Rental Income from property: Tk. 500,000
- Interest Income from bank deposits: Tk. 300,000
- Allowable expenses (including depreciation, salaries, utilities, etc.): Tk. 5,000,000

Calculation:

Taxable Income: Tk. 10,800,000
Annual Tax Liability @ 27.5%: Tk. 2,970,000 or 1% of 15,000,000=150,000 whichever is higher.
Quarterly Advance Tax: Tk. 742,500

Advance tax Payable
By
New taxpayer
Old tax payer
If the present income likely to exceed Tk. 1,000,000
If the latest assessed income exceeds Tk. 1,000,000
Yes
No
Yes
No
Advance tax payable
No advance Tax Payable
Advance tax payable
No advance Tax Payable
Does advance tax paid plus TDS >75% of tax determined?
Advance tax = Tax paid on the basis of last assessed income – TDS, if any
Yes
No
Does advance tax paid plus TDS >75% of tax determined?
No simple interest, simply the unpaid amount of tax will be paid
Assessee will pay the unpaid amount of tax plus simple interest @ 10% if such amount falls short than 75% of assessed tax
Yes
No
No penalty, simply the balance of tax will be paid
Assessee will pay the unpaid amount of tax plus simple interest @ 10% if such amount falls short than 75% of assessed tax

Worked examples and solutions

Worked example 1

DCT assessed tax for an individual taxpayer for the assessment year 2026-27 computing total income of Tk. 2,000,000. Assessee paid AIT Tk. 100,000. Last assessed income of the assessee for the assessment year 2025-26 was Tk. 1,200,000. Compute remaining tax to be paid by the assessee along with simple interest for short-payment of advance tax.

Solution 1:

Tax and simple interest calculation:

	Income slab	Rate	Tax
On first	400,000	0%	-
On next	300,000	10%	30,000
On next	400,000	15%	60,000
On next	500,000	20%	100,000
On next	400,000	25%	125,000
	2,000,000		315,000

Calculation of simple interest:

75% of Tk. 315,000 comes at	Tk. 236,250
Less: AIT paid	Tk. 100,000
Shortfall to qualify 75% =	Tk. 136,250
Simple interest @10% =	Tk. 13,625

Remaining tax to be paid Tk. (315,000 – 100,000) = 215,000 + Simple interest Tk. 13,625 =Total Tk. 228,625.

Worked example 2

Mr. Taif, a resident of Bangladesh, estimates his annual taxable income for the income year 2025-26 to be Tk. 1,800,000. Calculate the quarterly advance tax Mr. Taif needs to pay.

Solution:

Total annual tax liability:

	Income slab	Rate	Tax
On first	400,000	0%	-
On next	300,000	10%	30,000
On next	400,000	15%	60,000
On next	500,000	20%	100,000
On next	200,000	25%	50,000
	1,800,000		240,000

Quarterly advance tax = Tk. 240,000/4 = 60,000

Therefore, Mr. Taif needs to pay Tk. 60,000 as quarterly advance tax based on his estimated annual taxable income of Tk. 1,800,000.

Self-assessment question

1. Discuss briefly the provisions of the Income Tax Act, 2023 with regard to the following:

   (a) The assessee who are required to pay advance tax and the nature of incomes which are to be left out of consideration for this purpose;

   (b) The basis on which advance payments of tax should be calculated for old assessee and new assessee, and the due dates of payment thereof;

   (c) The interest payable by Government on excess payment and interest chargeable to assessee on shortfall, in respect of advance payment of tax.

2. In what situation, government will pay interest to assessee?

ABC & Co Ltd. calculated advance tax for the income year 2026-27 as per the latest assessed income of Tk. 1,000,000. Regular assessment for the assessment year 2025-26 was completed on January 30, 2026 and income assessed amounts to Tk. 700,000. Applicable tax rate is 27.5%. Calculate simple interest payable by the government (if any) on excess payment of advance tax.

Chapter 16

Return of Income

Introduction

Learning objectives

Examination context

Topic list

16.1 Requirement to file return of income

16.2 General provision for filing of return

16.3 Signature and verification of return

16.4 Time of filing return and payment of income tax

16.5 Time and manner of filing return

16.6 Payment of income tax and surcharge on or before the date of filing return

16.7 Delayed return etc.

16.8 Filing of assets and liabilities statement

16.9 Filing of life style statement

16.10 Return of withholding tax

16.11 Submission of Return in Special Circumstances

16.12 Provisions relating to revised return and filing thereof

16.13 Production of accounts and documents

16.14 Return Form

Self-assessment questions

Introduction

Learning objectives

- Explain the requirement to file return of income.
- State the procedure of filing the return.
- Identify the forms and documents to be submitted with the return of income.
- Mention the information required to be provided with return.
- Prescribe different return forms.

Practical significance

Every person shall file or caused to be filed a return of his income or the income of any other person in respect of which he is assessable to tax. There are some rules and guidelines for submission of return. The total procedure covering the time limitation for submitting the return, documents and information to be provided with the return of income and duly filled return need to have the declaration and authentication.

Production of accounts and documents, statements of assets and liabilities, income statement, statement of individual regarding particulars of life style are the essential elements in case of submission of return.

Learning of income tax is finally reflected in submitting the form of return where income from different heads is reported and net tax liability is computed. This is the reporting of assesses to the income tax authority disclosing relevant information.

Stop and think

Do you realize that submission of return is an obligatory responsibility for every assessee by any means? Do you know that the production of supporting accounts, forms and documents and timely submission of return with authenticated declaration about the true information are very significant?

Working context

In case of submission of return, the accountants can guide their clients how to prepare their return with all supporting documents. Accountants should have the clear understanding about the legal procedures for submission of return.

Detailed understanding about the rules and procedures for filing return give the opportunity to the accountants in practice to help their as tax advisers.

Syllabus links

The topics covered in this chapter are very important for students, accountants, tax advisers and even for the assessee at large for compliance with the tax rules and procedures regarding submission of return.

Examination context

Exam requirements

In the examination, students may be required to:

- Define the requirement to file return of income.
- Mention the due date of submission of return.
- Identify the forms, documents and information to be submitted with return.
- Define the term of IT 10B and IT 10BB in case of filing return.

Question practice

For question practice on these topics, go to the suggested answers covering this chapter.

Examiner's comments on how students should tackle questions

Students have historically prepared well for this area of the syllabus.

RETURN AND STATEMENT

Section overview

- An assessee shall file or cause to be filed a return of income in the prescribed form.
- The return of income shall be signed and verified.
- Return shall be submitted within the prescribed timeline.
- The DCT can serve notice u/s 172/212 for filing return if not submitted within the timeline.
- The return for individual assessee shall be accompanied by IT-10B and IT-10BB.
- Form of return for individual assessee and company is different. Moreover, different return form is applicable for different types of assessee. A separate form for spot assessment also available.
- Time of filing return is different for company and other than company.

16.1 Requirement to file return of income: Section 166

(1) Every person shall file a return with the DCT for the relevant income year, if-

(a) if his total income during the income year exceeded the maximum amount which is not chargeable to tax under the Act;

(b) if he was assessed to tax for any one of the three years immediately preceding that income year;

(c) if the person is a company, shareholder director or a shareholder employee of a company, a firm, a partner of a firm, an Association of Person (AOP), an employee holding the executive or management position in a business, an employee of the Govt., a non-resident having a permanent establishment in Bangladesh;

(d) if the person has an income during the relevant income year which is subject to tax exemption or lower tax rate under Chapter I of Part VI;

(e) any person registrable as a taxpayer under section 261;

(f) person required to furnish proof of submission of return u/s 264.

However, return submission is not mandatory in the following cases:

(a) Primary or pre-primary Bangla medium schools, government secondary or higher secondary schools, educational institutes under the MPO, and where no English version curriculum is offered.

(b) Public universities.

(c) Bangladesh Bank.

(d) Bangladesh Telecommunication Regulatory Authority.

(e) Bangladesh Securities and Exchange Commission.

(f) Local authorities, and Cantonment Board.

(g) Entities, authorities, commissions, institutes, boards, academic and similar bodies that are constituted under any Act or government order, do not engage in commercial activities, and receive government grants regularly to fully or partially cover their operating expenses.

(h) Orphanage, any entity established for the religious purpose.

(i) Non-resident natural persons having no permanent establishment in Bangladesh.

(j) Fund.

(k) Persons waived for submitting return by the official gazette from the Board.

16.2 General provision for filing of return: Section 169 (sub-section 1 to 4)

Return shall be submitted as per below provisions set out in section 169:

(1) The return shall be furnished in the prescribed form setting forth therein such particulars and information including the prescribed schedules, statements, accounts, appendices or documents.

(2) Taxpayer require to furnish audited financial statements as per section 73, shall attached following documents with the return:

(i) audited financial statements;

(ii) proof of complying standards as prescribed by the Board from time to time;

(iii) income computation sheet as mentioned in section 73; and

(iv) proof or acknowledgement of submission of withholding tax return under section 177.

(3) In the case of any such entity having international transactions in any income year, a statement relating to international transactions under section 238 shall be filed with the return.

(4) Any non-resident Bangladeshi may file his return of income along with proof of payment of tax on the basis of such return, to his nearest Bangladesh Mission and the Mission will issue a receipt of such return with official seal and send the return to the Board.

16.3 Signature and verification of return: Section 169 (sub-section 5)

The return of income shall be signed and verified-

(i) in the case of a natural individual taxpayer, by the individual himself; where the individual is absent from Bangladesh, by the individual concerned or by some person duly authorized by him in this behalf; and when the individual is mentally incapacitated from attending to his affairs, by his guardian or by any other person competent to act on his behalf;

(ii) in the case of Hindu undivided family, by the Karta, and, where the Karta is absent from Bangladesh or is mentally incapacitated from attending to his affairs by any other adult member of such family;

(iii) in the case of a company or local authority, by the principal officer thereof;

(iv) in the case of a firm, by any partner thereof, not being a minor;

(v) in the case of any other association, by any member of the association or the principal officer thereof; and

(vi) in the case of any other person, by that person or by some person competent to act on his behalf.

16.4 Time of filing return and payment of income tax: Section 171

The return shall be furnished in accordance with Sections 170 and 170A, and the tax payable thereon shall be paid in accordance with Sections 170 and 173. Where the return is furnished after the expiry of the time limit prescribed under Section 170, the tax shall be payable in accordance with Section 174.

16.5 Time and manner of filing return: Section 170 & 170A

(1) A natural person and HUF may submit the return for the assessment under Section 170A as per following manner:

(a)

Sl.	Time of submission	Incentive or additional tax
1.	1 July to 30 September	Incentive at 5% of tax payable under Section 173(2) or Tk. 25,000, whichever is less.
2.	1 October to 31 December	No incentive, no additional tax
3.	1 January to 31 March	Additional tax at 2% of tax payable under Section 173(2), or Tk. 3,000, whichever is higher.
4.	1 April to 30 June	Additional tax at 5% of tax payable under Section 173(2), or Tk. 5,000, whichever is higher.

(b) a natural person who has never submitted a return may, after paying income tax, submit the return on or before the 30 June following the end of the income year.

(c) a natural person who resides outside Bangladesh on leave for higher education or on deputation or lien for employment or holding a valid visa and permit for the purpose of earning income shall submit the income tax return within the 90th day from the date of his return to Bangladesh.

(2) For taxpayers other than individual and Hindu undivided family, the return shall be submitted on the 15th day of the 9th month following the end of the income year, or, where such 15th day falls before the 15th day of September, then the 15th day of September following the end of the income year, provided that taxpayer shall receive tax incentive or pay additional tax as below:

SL.	Time of submission	Incentive or additional tax
1.	At least two months before the expiry of the return filing deadline	An incentive equal to 5% of the tax payable under section 173(2) or Tk. 25,000, whichever is lower.
2.	Within the two months immediately preceding the expiry of the return filing deadline	No incentive and no additional tax
3.	After the return filing deadline but within the remaining period of the assessment year	An additional tax equal to 2% of the tax payable under section 173(2) or Tk. 25,000, whichever is higher.

(3) Where any day is a government holiday, then the next working shall apply.

In accordance with the section 170A, a natural person shall furnish the return under the self-assessment procedure in accordance with Section 180. Where a natural person derives income solely from employment, financial assets, and agriculture, and a tax refund arises from a return filed under the self-assessment procedure, the refund shall be granted automatically in accordance with Section 215.

A taxpayer other than a natural person may submit a return either under the self-assessment procedure in accordance with Section 180 or for assessment by the DCT under Section 183. In all other cases where a tax refund arises from a return submitted under the self-assessment procedure, the return shall be automatically selected for assessment by the DCT under Section 183.

16.6 Payment of income tax and surcharge on or before the date of filing return: Section 173

A person required to furnish a return under Sections 166, 172, 175, 182, 188, 189, 190, 191, 192, 193, or 212 shall, on or before the date of filing the return, pay the tax and surcharge payable on the basis of the return, or any turnover tax payable, after deducting the amount of advance tax already paid.

16.7 Delayed return etc.: Section 174

As per section 174, a return furnished after the statutory deadline specified in Section 170 shall be treated as a delayed return. A return furnished after the end of the tax year in response to a notice issued under Section 212(1) in accordance with Section 212(4)(a) shall also be treated as a delayed return.

A taxpayer who voluntarily furnishes a delayed return after the filing deadline shall, in addition to the tax payable under Section 173, pay an amount equal to 10% of the tax payable or Tk. 5,000, whichever is higher.

Where a delayed return is furnished after the end of the assessment year in response to a notice under Section 212(1) in accordance with Section 212(4)(a), the taxpayer shall, in addition to the tax payable under Section 173, pay an amount equal to 15% of the tax payable or Tk. 10,000, whichever is higher.

For the purpose of computing tax on a delayed return, all tax-exempt income shall be included in the computation as if no exemption had been available, except for exemptions under Clause (1), (4), (5), (6), (7), (8), (17), and (35), and the exemption relating to income from employment provided in Part I of the Sixth Schedule.

16.8 Filing of assets and liabilities statement: Section 167

Every natural person shall compulsorily file statement of assets and liabilities (IT 10B), if such person -

1. has total asset more than Tk. 5,000,000 as on the last date of the income year; or
2. own a motor vehicle at any time during the income year; or
3. has made an investment in a house property or an apartment in the city corporation area; or
4. owns any asset abroad at any time during the income year; or
5. Is a shareholder director of a company.

Provided that, all public servant shall furnish a statement of assets and liabilities. Every resident Bangladeshi citizen shall disclose all assets and liabilities situated in Bangladesh and abroad, while every non-resident Bangladeshi citizen and every foreigner shall disclose only the assets and liabilities situated in Bangladesh. Any individual may also furnish such a statement voluntarily. The statement shall include the assets and liabilities of the individual's spouse and minor children where they do not have a Taxpayer Identification Number (TIN).

The Deputy Commissioner of Taxes (DCT) may, by written notice, require any person to furnish a statement of assets and liabilities for any income year where a return has been submitted without such statement, where the statement is considered necessary for determining the taxpayer's tax liability, or where the statement furnished is defective or incomplete. Failure to furnish the statement in compliance with such notice shall render the return an incomplete return.

16.9 Filing of life style statement (IT 10BB): Section 168

Every natural individual taxpayer shall compulsorily file life style statement if such person-

(a) has income exceeding Tk. 500,000 in the relevant income year;
(b) owns a motor vehicle at any time during the relevant income year;
(c) derives any income from the business;
(d) becomes a shareholder director of a company; or
(e) invests in house property or apartment within the city corporation area in the relevant income year.

The DCT may, by written notice, require any natural person to submit a statement of living related expenditure for any income year where a return has been submitted without such statement, or where it appears necessary for determining the taxpayer's tax liability, or where submitted statement is defective or incomplete. If the person fails to submit the statement in response to such notice, the return submitted by such person shall be deemed to be an incomplete return.

16.10 Return of withholding tax: Section 177 and Section 186

A return of tax deducted or collected at source, in the prescribed form and duly signed, together with the prescribed statements, schedules, information, and supporting evidence, shall be furnished to the DCT by the following persons:

(a) a company other than a ministries, divisions, directorates, and departments of the government and an educational institution subject to a monthly payment order (MPO);
(b) firm;
(c) Association of Person;
(d) private hospitals;
(e) clinic;
(f) diagnostic center;
(g) public private partnership.
(h) e-commerce platform or online marketplace having annual turnover exceeding Tk. 1 crore.
(i) hotel, resort, motel, restaurant, convention centre, community centre, transport agency having annual turnover exceeding Tk. 1 crore.
(j) any person (not being a farmer) engaged in the production of tobacco leaf, cigarette, bidi, jarda, gul and other tobacco products.
(k) any natural person having annual business turnover exceeding Tk. 10 crore.

The return for the preceding three months shall be submitted as per following times:

Date	Applicable Months
25 October	July, August and September
25 January	October, November and December
25 April	January, February and March
25 July	April, May and June

Provided that return shall be submitted in the next working day if the due date is a government holiday.

16.11 Submission of Return in Special Circumstances: Section 172

A taxpayer shall, upon receipt of a notice from the DCT, furnish a return in any of the following circumstances:

- where the return previously furnished is incomplete;
- where a business has been discontinued, transferred, or is likely to be transferred, other than by a listed company;
- where a natural person has left or is likely to leave Bangladesh permanently;
- where the taxpayer has evaded tax or failed to furnish a return for any income year;

- where there is a change in the constitution of a partnership firm;
- where a new partnership firm is constituted as the successor to an existing partnership firm; or
- where a person succeeds to a business otherwise than by inheritance on the death of the previous owner.

16.12 Provisions relating to revised return and filing thereof: Section 175

A taxpayer may furnish a revised return in the following circumstances:

- to correct errors in a return submitted under the self-assessment procedure in accordance with Section 180(2);
- during an audit under Section 182(5);
- during assessment by the DCT under Section 183(4A);
- in response to a notice issued under Section 212(1) in respect of underreported income or unpaid tax and other dues; or
- pursuant to an order of the Tax Appeal Authority or the Appellate Tribunal setting aside an assessment.

Before furnishing a revised return, the taxpayer shall pay the tax payable in accordance with Section 173. A revised return shall not disclose a tax liability lower than that shown in the original return for the same assessment year. Further, any income, assets, liabilities, or expenditure disclosed in the original return shall not be altered in the revised return unless such alteration is supported by documentary evidence.

16.13 Production of accounts and documents: Section 179

The DCT may, by written notice, require an assessee who has furnished a return under Sections 166, 175, or 176, or to whom a notice to furnish a return has been issued, to produce such records, books of account, statements, documents, information, or electronic records as may be necessary for the purposes of audit proceedings or assessment of tax. The notice may require the production of records relating to any period not earlier than three years preceding the relevant income year. The DCT may also require the production of any such record, statement, account, document, information, or electronic record, or any part thereof, by electronic means. All records and information so required shall be furnished on or before the date specified in the notice.

16.14 Return Form

IT-11GA 2023 – For individual person
IT-11GHA 2023 – For company taxpayer

Self-assessment questions

Introduction

Learning objectives

- Illustrate the various types of assessment.
- Identify the conditions, rules and procedure for different classes of assessment.
- Define the limitation for assessment.

Practical significance

Assessments of income and tax liability are very significant for every assessee. There are different types of assessment such as provisional assessment, assessment on the basis of correct return, self-assessment, minimum tax on income of certain persons, spot assessment, best judgment assessment etc.

Even there are various specialized/emergency assessments such as assessment in case of discontinued business, person leaving Bangladesh, deceased person, income escaping assessment etc. So, there is no way to avoid tax assessment if there is taxable income.

For every classes of assessment there are either some conditions, rules and procedures specified for assessee and/or for tax authorities.

Stop and think

Did you realize how important is the assessment for any assessee either individual or company? Do you think nobody can avoid tax assessment in any way if he is required to be assessed under tax law?

Working context

Assessment of tax is very important for every assessee. An assessee must require to be assessed in any way. Accountants have a great role to provide the technical assistance to their client in case of assessment. As there are many conditions, rules and procedures for different types of assessments, accountants' support sometime very significant to complete the assessment of their clients.

Many clients are requiring the support for correct assessment from accountants in every year. Detailed knowledge of accountants on conditions, rules and procedures for different assessments has the importance in case of required support for clients' tax assessment in many ways.

Syllabus links

The topics covered in this chapter have the significance for professional study as you can utilize the knowledge throughout the application level and case study and also in your practical life.

Examination context

Exam requirements

In the examination, students may be required to:

- Identify the different types of assessment.
- Define the provisional assessment.
- Define the heads under which tax shall be deemed as finally discharge tax liabilities.
- Define the specialty of self-assessment.
- Recognize the rules and procedures for spot assessment.
- Illustrate the assessment on the basis of hearing and best judgment assessment.
- Define the assessment of partnership firms.
- Characterize the assessment in case of change in constitution of a firm and constitution of new successor firm.
- Characterize the assessment in case of succession to business otherwise than on death and assessment of discontinued business.
- Define the assessment in case of partition of Hindu undivided family.
- Characterize the assessment in case of persons leaving Bangladesh, deceased person and income escaping assessment.
- Identify the limitation for doing assessment.

Question practice

For question practice on these topics, go to the suggested answers covering this chapter.

ASSESSMENT

Section overview

- There are different classes of assessment of total income and tax payable.
- The conditions, rules and methods of various assessments are different.
- It is not easy for any person to escape assessment who is required to be assessed.
- There are certain limitations of assessment.

17.1 Introduction to assessment

Assessment to tax is an important stage in the whole cycle for tax collection. It is used to mean, sometimes, the computation of income, sometimes the determination of the amount of tax payable and sometimes the whole procedure laid down in the Act for imposing liability upon the tax payer [*C.I.T.V Khemchand Rahdas. 1938 I.T.R 441, 416(PC)]*. The meaning to be assigned to the word "assessment" has to be understood in each section with reference to the context in which it has been used *[A.N. Lakshman Shenoy V.I.T.O. 958 I.T.R 275, 941(SC)]*.

17.2 Provisional assessment: Section 185

The DCT may, at any time after 1 July following the end of a financial year, make a provisional assessment of a taxpayer on the basis of the return and supporting documents furnished or, where no return has been filed, on the basis of the income assessed for the latest income year. In making a provisional assessment, the DCT may correct any arithmetic error in the return and determine the set-off or carry forward of losses and depreciation allowances in accordance with Sections 70 and 71.

For the purposes of payment and recovery of tax, a provisional assessment shall be deemed to be a regular assessment. Credit shall be allowed for any tax deducted or collected at source and any advance tax paid, and any tax paid pursuant to a provisional assessment shall be credited against the tax payable on the regular assessment for the relevant year. A provisional assessment shall not prejudice or restrict the determination of any issue in the regular assessment, and no appeal shall lie against a provisional assessment.

17.3 Assessment by the Deputy Commissioner of Taxes: Section 183

The DCT shall assess the tax:

- where a return is furnished for assessment under Section 170A(4);
- where a return is deemed to have been furnished for assessment under Section 170A(5);
- where the return is a delayed return, or
- where a revised return is furnished under clauses (b), (c), (d), or (e) of Section 175(1).

Where the DCT considers the presence of the taxpayer or additional evidence necessary, the DCT shall, by written notice, require the taxpayer to appear in person or through an authorized representative on the date and time specified in the notice, or to furnish the documents or evidence specified therein.

Where a revised return is furnished before completion of the assessment, the DCT shall issue a fresh notice of hearing. The DCT may, at any stage of the assessment, require the taxpayer to furnish such further evidence as may be necessary, and the notice shall specify the consequences of non-compliance.

After considering the return, the evidence produced, and the submissions made at the hearing, the DCT shall complete the assessment by passing an assessment order and shall communicate the order to the taxpayer in writing within 30 days.

Where the taxpayer fails to comply with any notice issued under this section, the DCT may complete the assessment to the best of his judgment in accordance with Section 184.

17.4 Self-assessment: Section 180

A return furnished under Section 170A shall be processed under the self-assessment procedure and shall be deemed to have been assessed upon submission, provided that the return is

furnished in compliance with Section 169 and the tax and surcharge payable thereon have been paid in accordance with Section 173.

A taxpayer who submitted return subsequently discovers that the tax computation or any information furnished in the return is inaccurate due to previously undisclosed income, an incorrect claim of tax credit, or any other reason may furnish a revised return together with a written explanation. However, a revised return shall not be permitted in the following circumstances:

- after the expiry of 180 days from the date of furnishing the original return;
- after a revised return has already been furnished, or
- after the original return has been selected for audit under Section 182.

No question shall be raised regarding the source of the initial capital invested in a new business by an individual taxpayer where all of the following conditions are satisfied:

- the income disclosed is not exempted and exceeds the tax-free threshold;
- the disclosed income is not less than 20% of the initial capital invested in the business;
- the tax and any other amount payable have been paid on or before the date of furnishing the return;
- documentary evidence establishing the existence of the business is furnished;
- the return is furnished within the time prescribed under Section 170; and
- the taxpayer declares in writing that the return is not a delayed return.

17.5 Return process: Section 181

Where a return or revised return is furnished under the self-assessment procedure in accordance with Section 180, the DCT shall process the return by correcting any arithmetical error or incorrect claim arising from discrepancies in the information, statements, evidence, or other documents accompanying the return.

After making the necessary adjustments, the DCT shall determine the taxable income, compute the tax, surcharge, and other amounts payable or refundable, and allow credit for any advance tax paid and tax deducted or collected at source.

Where the processing of the return results in any variation in the income declared, tax liability, or any other amount payable, the DCT shall, by written notice, inform the taxpayer of such variation together with a computation sheet and invite the taxpayer to furnish a written explanation within the time specified in the notice.

The taxpayer may, after addressing the discrepancies identified, furnish a revised return and pay any additional tax payable. Where the DCT is satisfied with the revised return and the explanation furnished, the DCT shall acknowledge its receipt within 90 days.

If the discrepancies remain unresolved, the DCT shall, within six months from the date of service of the first notice, issue a notice of tax demand together with the revised computation of tax.

17.6 Consequences of filing of incomplete return: Section 176

A return or revised return that does not comply with the general provisions relating to the furnishing of returns under Section 169 or any directive issued by the Board shall be treated as an incomplete return.

Where a return is considered incomplete, the DCT shall, by written notice, require the taxpayer to furnish such information, explanations, statements, documents, or supporting evidence as may be necessary to rectify the deficiencies within the time specified in the notice.

Where the taxpayer fails to comply with the notice, the return or revised return shall be treated as void and invalid as if it had never been furnished. In such case, the DCT shall issue a further notice informing the taxpayer that the return has become void or invalid. The DCT shall also inform the Inspecting Additional Commissioner in writing in cases of non-compliance with Sections 167(7), 168(2), 169(2), or 169(5). In all other cases, the DCT may select the return for audit under Section 182, where considered appropriate.

Where the taxpayer complies with the notice and rectifies the deficiencies within the prescribed time, the return shall be treated as complete and shall thereafter be processed in accordance with the provisions of the Act.

Where the taxpayer fails to fully comply with the notice or the deficiencies remain unrectified, the DCT may declare the return void and require the taxpayer to furnish a fresh return under Section 172 or, where the relevant assessment year has already expired, pursuant to a notice issued under Section 212(1).

For the avoidance of doubt, the mere acknowledgement of receipt of a return by the tax authority shall not, by itself, constitute acceptance of the return as complete or valid.

17.7 Audit: Section 182

(1) The Board shall prepare audit instructions regarding tax audits for returns submitted under Section 180 or for revised returns inscribing reasons for audit risks, audit management and process of conducting audit;

(2) The Board or its subordinate authorities may select returns for audit in accordance with the audit instructions as per sub-section (1);

(3) Return selected by subordinate authorities shall require the approval of the Board;

(4) Upon selection of a return for audit under sub-section (1) or returns approved for audit under sub-section (2), the Deputy Commissioner of Taxes (DCT) shall notify the taxpayer, stating the reasons for the audit;

(5) At the conclusion of the audit process, if it is found that the return or revised return does not properly reflect information relating to income, expenses, or assets of a taxpayer, the DCT shall issue the audit report along with a notice requesting the submission of a revised return that incorporates the audit findings, supported by a written explanation and relevant documentary evidence;

(6) Upon receipt of the revised return based on audit, if the DCT is satisfied that it adequately reflects the audit observations and that appropriate tax has been paid, the DCT shall accept the return and issue a letter notifying the taxpayer of the closure of the audit;

(7) If the revised return, along with the explanation and supporting evidence, fails to satisfy the DCT, the DCT may assess the income under Section 183 or Section 184, as applicable;

(8) A return or revised return of an assessment year must be selected or approved for audit within two assessment years following the end of the relevant assessment year.

17.8 Advance tax, final tax and turnover tax: Section 163

(1) If the amount of tax deducted, collected or paid under Part VII exceeds the tax computed for the taxpayer shall be refundable.

(2) The taxpayer may apply for a refund or carry it forward for adjustment against any outstanding tax liabilities of previous or subsequent years.

(3) Tax deducted or collected under Sections 138 and Section 139 shall be treated as the final tax liability on income of those sources.

(4) Advance income tax deducted or collected at source under all sections in Part VII for a person exempt from submission of return under Section 166(2) shall be the final tax liability.

(5) Where income from a source is subject to final tax liability under sub-section (3), tax shall be computed on such income at the applicable rate, and if the tax so computed is higher than the final tax, the higher amount shall be payable.

(6) Without prejudice to the provisions of (3) above, where the tax on income from business or profession is less than the turnover tax specified in the following table, then irrespective of profit or loss, the person shall pay turnover tax on the gross receipts:

Sl.	Classes of taxpayers	Turnover tax
1.	Manufacturer of cigarette, bidi, chewing tobacco, smokeless tobacco, gul or any other tobacco products	3% of the gross receipts
2.	Manufacturer of carbonated beverage, sweetened beverage	2.5% of the gross receipts
3.	Mobile phone operator, NTTN	1.5% of the gross receipts
4.	Other cases	1% of gross receipts

Provided that turnover tax shall not apply to a person deriving income from the following businesses or professions:

(a) import, distribution or open-market sale of fertiliser, seeds or essential consumable goods by any government body or state-owned organisation or corporation.

(b) commission business.

(c) delivery order (DO) business.

(d) money-exchange business, and

(e) the business of buying and selling gold, silver, gold jewellery, silver jewellery, gems, diamonds or platinum.

Provided further that, rate of turnover tax shall be 0.20% for an industrial undertaking engaged in manufacturing and belongs to serial 4 in the above table for the first 3 years since commencement of production.

Provided further that where the amount of turnover tax paid exceeds the tax payable for that year, the excess amount shall be carried forward and set off against the tax payable in subsequent year.

Provided further that where an assessee has income from any source that is exempt from tax or is subject to tax at a reduced rate, the turnover tax under sub-section (6) shall be computed proportionately, having regard to the extent of such exemption or reduced rate of tax, as the case may be.

(7) Where any surcharge, additional tax, interest, additional amount or any other sum is payable under the provisions of this Act, such amount shall be payable in addition to any turnover tax or final tax.

Here "gross receipts" means the total amount received from the sale of goods or services, excluding value added tax and supplementary duty, and also includes any commission, discount, fee, charge or other consideration, received in consideration of providing any service or benefit.

17.9 Spot assessment: Section 195

The Commissioner of Taxes may delegate a Deputy Commissioner of Taxes (DCT) subordinate to him to assess the tax of a person, other than a company, whose tax has not been assessed previously and who:

- Has taxable income from business.
- Has an obligation to file return.
- Has obligation to comply with any provision of this Act.
- Fails to comply with any provision of this Act.

17.10 Best judgment assessment: Section 184

The DCT may make a best judgment assessment where a taxpayer fails to furnish a return in the special circumstances specified under Section 172, fails to furnish a revised return under clauses (b), (c), or (d) of Section 175(1), or fails to comply with a notice issued under Sections 183(3), 183(4A), 191, 193, or 212.

For the purposes of this section, "best judgment assessment" means an assessment made by the DCT in good faith and on a reasonable, objective, and evidence-based basis where the taxpayer fails to furnish a required return or revised return, or fails to comply with a notice or lawful direction issued under the Act. In making such an assessment, the DCT shall take into account all relevant facts, available information, records, evidence, comparable data, and any other material having a bearing on the determination of the taxpayer's income and tax liability.

The tax payable under a best judgment assessment shall be determined after due consideration of both the legal and factual aspects of the case. Upon completion of the assessment, the DCT shall pass a reasoned assessment order and communicate the order to the taxpayer in writing within 30 days from the date of the order.

17.11 Various specialized assessments

1. Assessment of firms: Section 187

In determining the taxation of any firm or AOP –

(a) first, the total income of the firm or AOP has to be determined and then the tax is to be assessed on the basis of total income; and

(b) thereafter the after-tax income is pro-rated among the partners or members

2. Assessment in case of change in constitution of a firm: Section 188

(1) Where, at the time of assessment of a firm, it is found that a change has occurred in the constitution of the firm, the assessment shall be made on the firm as constituted at the time of making the assessment.

(2) Under sub-section (1) for the purpose of inclusion in the total income of the partners for any assessment year, be apportioned between the partners who, in such income year, were entitled to receive the same and when the tax assessed upon a partner cannot be recovered from him, it shall be recovered from the firm as constituted at the time of making the assessment.

(3) For the purposes of this section, there is a change in the constitution of a firm-

(a) where all the partners continue with a change in their respective shares or in the shares of some of them, or

(b) where one or more persons who were partners continue to be so with a change by cessation of one or more partners or addition of one or more new partners.

(4) For the purpose of the assessment, DCT may issue notice and the taxpayer shall submit return under Section 172.

3. Assessment in case of new successor firm: Section 189

Where, at the time of assessment on a firm, it is found that a new firm has been constituted to succeed the firm to which the assessment relates and it cannot be covered by section 188, separate assessments shall be made on the predecessor firm and the successor firm in accordance with the provisions of section 190 relating to assessment in case of succession to business. For the purpose of the assessment, DCT may issue notice and the taxpayer shall submit return under Section 172.

4. Assessment in case of succession to business otherwise than on death: Section 190

Where a person succeeds to a business otherwise than by reason of the death of the previous owner, separate assessments shall be made in respect of the predecessor and the successor for the periods before and after the date of succession within the relevant income year. Where the predecessor cannot be found or is otherwise unavailable for assessment, the DCT may assess the successor in respect of the income arising from the business for the year of succession and any earlier income year, to the extent permitted under the Act.

Where any tax payable by the predecessor cannot be recovered from the predecessor, the DCT may recover such tax from the successor. Any amount so recovered from the successor shall constitute a debt due from the predecessor, and the successor shall be entitled to recover the same from the predecessor.

For the purposes of making an assessment under this section, the DCT may issue a notice requiring the taxpayer to furnish a return in accordance with Section 172.

5. Assessment in case of discontinued business: Section 191

Where a business is discontinued, other than in the circumstances referred to in Section 189, the income of the business shall be assessed for the period commencing from the beginning of the income year and ending on the date of discontinuance.

The person carrying on the business shall notify the DCT of the discontinuance within 15 days from the date of closure and shall, together with the notice, furnish a return for the period beginning from the commencement of the income year to the date of discontinuance.

For the purposes of assessment under this section, the income year shall be deemed to be the assessment year in respect of the income earned during that period. Failure to notify the DCT within the prescribed time may attract a penalty not exceeding the amount of tax determined for the immediately preceding income year.

For the purpose of making an assessment under this section, the DCT may, by written notice, require the person whose income is to be assessed, any person who was a partner of the firm on the date of discontinuance, or the principal officer of a company, as the case may be, to furnish a return, books of account, statements, records, documents, information, or other evidence within the period specified in the notice, which shall not be less than 7 days.

In response to the notice issued by the DCT, the taxpayer shall furnish a return in accordance with Section 172, and the assessment shall thereafter be made by applying the relevant provisions of the Income Tax Act, so far as they are applicable.

6. Assessment in case of partition of a Hindu Undivided Family (HUF): Section 192

A Hindu Undivided Family (HUF) shall, for the purposes of this Act, be deemed to continue as an undivided family until the DCT is notified of its partition. Where, during the course of any assessment, any member of the HUF claims that a partition has taken place, the DCT shall, after giving notice to all members of the family and providing them with an opportunity of being heard, conduct such inquiry as may be necessary and record a finding as to whether a partition has occurred and, if so, the date on which the partition took effect.

Where the DCT records a finding of partition after the end of the relevant income year, the income of the HUF for that income year shall be assessed as if no partition had taken place, and all persons who were members of the family immediately before the partition shall be jointly and severally liable for the tax so assessed.

Where a partition takes place during an income year, the income of the HUF shall be assessed only up to the date of partition, and all persons who were members of the family immediately before the partition shall be jointly and severally liable for the tax payable in respect of that period.

Where, after completion of an assessment, the DCT finds that a partition had taken place before the assessment was made, any tax remaining unpaid may be recovered from every person who was a member of the HUF immediately before the partition. The liability of each member shall be limited to the extent of the portion of the family property allotted to that member upon partition.

The provisions of this section shall apply equally to the assessment, charge, recovery, and collection of any penalty, interest, fine, or other amount payable under this Act in respect of the period ending on the date of partition.

7. Assessment in case of natural person leaving Bangladesh: Section 193

Where the DCT has reason to believe that a natural person authorized to work in Bangladesh intends to leave Bangladesh during or shortly after the end of a financial year without any intention of returning, the DCT may make an assessment of the person's tax liability before the date of departure.

The assessment shall be made for the period commencing from the end of the last income year up to the probable date of departure where the person has previously been assessed to tax. Where the person has not previously been assessed, the assessment shall cover the entire period of the person's stay in Bangladesh up to the probable date of departure.

The tax shall be computed by applying the rates of tax applicable to the respective assessment years, and, for the purposes of this assessment, the last income year shall be treated as the relevant assessment year.

For the purpose of making the assessment, the DCT may, by written notice, require the taxpayer to furnish, within a period of not less than 7 days, returns of income for each completed income year in accordance with Section 166, together with a return for the period commencing from the end of the latest income year and ending on the probable date of departure.

In response to the notice issued by the DCT, the taxpayer shall furnish a return in accordance with Section 172, and the assessment shall thereafter be completed by applying the relevant provisions of the Income Tax Act, to the extent applicable.

8. Assessment of income of a deceased person: Section 194

Where a taxpayer dies, the legal representative of the deceased shall be liable to discharge any tax, interest, penalty, or other sum payable by or on behalf of the deceased in accordance with the provisions of this Act. Before treating the legal representative as the assessee for the purposes of assessment or recovery, the DCT shall serve a notice upon the person proposed to be treated as the legal representative.

The liability of the legal representative shall be limited to the extent to which the estate of the deceased is capable of meeting such liability, and no legal representative shall be personally liable beyond the value of the estate that has come into his or her possession or control.

For the purposes of this section, "legal representative" includes an executor, an administrator, or any other person who administers, manages, controls, or is otherwise responsible for the estate of the deceased.

9. Escaped payment: Section 212

(1) Where the DCT, on the basis of information received from any source, has reason to believe that any sum payable by an assessee has escaped payment for any assessment year, the DCT may, in the form prescribed by the Board, issue a notice requiring the assessee to furnish a return, together with the prescribed statements, documents, and supporting evidence, by the date specified in the notice and to pay the amount that has escaped payment on or before the date of filing the return.

(2) Where the DCT is satisfied with the return furnished in response to the notice, the DCT shall issue an acknowledgement of receipt of the return. Where the DCT is not so satisfied, the DCT shall proceed to assess the tax under Section 183 or, where applicable, Section 184.

(2A) In the case of a self-motivated delayed return furnished under Section 174, where the taxpayer derives income only from employment and financial assets and has duly paid the tax payable, the DCT shall issue an acknowledgement of the return. Where these conditions are not fulfilled, the DCT shall proceed to assess the tax under Section 183 or, where applicable, Section 184.

(3) No notice under this section shall be issued in respect of a return furnished under Section 180 or where an assessment has already been made, unless the DCT obtains the prior written approval of the Inspecting Additional Commissioner.

(4) The DCT may issue a notice at any time where no return has been furnished and no assessment has been made for the relevant assessment year. In any other case, a notice may be issued in respect of any of the six assessment years immediately preceding the date of service of the notice. Where an assessment has been made afresh for any assessment year, the period of six assessment years shall be computed from the end of the assessment year in which such fresh assessment was made. Where any undisclosed income, expenditure, or asset relates to a period earlier than the six assessment years referred to above, such income, expenditure, or asset shall be deemed to have arisen or been incurred in the sixth assessment year immediately preceding the date of the notice.

(5) In computing the period of limitation under this section, any period during which the proceedings remain stayed by an order of a court, tribunal, or other competent authority shall be excluded.

(6) Where any assessment or order is set aside, annulled, cancelled, or modified by a competent authority, the income tax authority may recommence the proceedings from the stage at which such assessment or order ceased to have effect.

(7) Where a return has previously been assessed, the assessment under this section shall ordinarily be confined to the matters specified in the notice. However, where specific information indicating tax evasion becomes available, the DCT may determine tax in respect of such matters with the prior approval of the Inspecting Additional Commissioner.

(8) The DCT shall not be precluded from initiating proceedings under this section merely because proceedings under this section have been initiated for an earlier assessment year.

(9) For the purposes of this section, the expression "sum payable that has escaped payment" includes-

- income, or any part thereof, that has escaped assessment;
- understated income;
- excessive losses, deductions, allowances, or exemptions claimed;
- lower tax paid or assessed as a result of concealment of income or improper disclosure of assets, liabilities, or expenditure in the statements furnished under Sections 167 or 168;
- income assessed at a lower amount or taxed at a lower rate than applicable;
- taxable income incorrectly treated as exempt income;
- excessive relief, loss, or depreciation allowance allowed in computing the tax; or
- lower tax assessed or paid as a result of an understated tax base.

17.12 Limitation for assessment: section 197

The processing of a return or the completion of an assessment shall be made within the following time limits:

- where a return is processed under Section 181, within 12 months from the end of the relevant assessment year;
- where a return or revised return is selected or approved for audit under Section 182(1) or 182(2), within 12 months from the end of the assessment year in which the return is selected or approved for audit;
- where a return is furnished for assessment under Section 183(1)(a), within 12 months from the end of the relevant assessment year;
- where a return is deemed to have been furnished for assessment under Section 183(1)(b), within 12 months from the end of the relevant assessment year; and
- where the assessment involves the determination of the arm's length price under Section 235, within 5 years from the end of the relevant assessment year.

Where a notice is issued under Section 212(1) in respect of tax, interest, or any other sum that has escaped payment, the assessment shall be completed within 12 months from the end of the assessment year in which the notice is served.

Where an order is required to be revised pursuant to Section 213, 285, 289, 292, 294, 295, or a consensus reached under the Alternative Dispute Resolution (ADR) mechanism under Section 304, the DCT shall pass the revised order within 45 days from the date of receipt of the relevant order, observation, direction, or ADR consensus. The revised order shall be communicated to the taxpayer within 30 days from the date of passing the order.

Where an assessment order is set aside by any competent authority, the DCT shall complete the fresh assessment within 90 days from the date on which the DCT receives intimation of the order setting aside the assessment.

Where, pursuant to an order under Sections 213, 285, 289, 292, 294, or 295, or pursuant to a consensus reached under Section 304, any income is excluded from the total income of one taxpayer and included in the total income of another taxpayer, the assessment of the latter taxpayer shall, to the extent necessary, be deemed to have been revised accordingly.

Self-assessment question

1. In which cases tax deducted or collected at source shall be considered as final settlement of tax under the Act?
2. What are the timelines for assessment or processing of returns or revised returns submitted in different situations or under different section of the Act?

Chapter 18

Assessment of Individuals

Introduction

Learning objectives

Examination context

Topic list

18.1 Definition of individuals

18.2 Scope of income of individual assessee

18.3 Non-assessable income and tax rebate on investment allowance

18.4 Grossing up of income

18.5 Tax rate of individuals

18.6 Assessment procedure

18.7 Specimen form of computation of total income and tax liability

Worked examples & solutions

Self-assessment questions

Introduction

Learning objectives

- Illustrate the assessment of individuals.
- Identify different heads of income.
- Define grossing up of income.
- State the procedure of assessment
- Prescribe a specimen format of computing total income and net tax liability.
- Define the time limitation for assessment.

Practical significance

Assessment of income and tax liability is very significant for every assessee. Assessing the income of individual assessee and tax liability thereof is important for individual assesses. This chapter recapitulates the taxable income, non-assessable income, tax credit income, grossing up of income, applicable tax rates and related issues required for completing the assessment of individuals. Application of double taxation relief, set-off and carry forward of losses, minimum tax on the basis of TDS as per 163, rebate for income from a partnership firm are exemplified. Professional accountants are required to have sufficient expertise on all of these issues.

Stop and think

Did you realize how important is the assessment for individual? Can you do the assessment of individual assessee independently?

Working context

Assessment of tax is very important for every assessee. An assessee must require to be assessed in any way. Accountants have a great role to provide the technical assistance to their client in case of assessment. As there are many conditions, rules and procedures for different types of assessments, accountants' support sometime very significant to complete the assessment of their clients.

Many clients are requiring the support for correct assessment from accountants in every year. Detailed knowledge of accountants on the technicalities of computation of total taxable income and tax liability thereof for individual assessee is very important in case of providing support for clients' tax assessment.

Syllabus links

The topics covered in this chapter have the significance for professional study as you can utilize the knowledge throughout the application level and case study and also in your practical life.

Examination context

Exam requirements

In the examination, candidates may be required to:

- Do the assessment of individuals.
- Identify taxable income from different heads.
- Compute investment allowance, eligible amount and investment tax rebate.
- Identify non-assessable income and its application in computing taxable income.
- Apply TDS under section 163 showing its impact on total income.
- Identify the procedure of assessment
- Compute net tax liability after due credit of TDS, investment tax rebate and others.

Question practice

For question practice on these topics, go to the suggested answers covering this chapter.

ASSESSMENT OF INDIVIDUALS

Section overview

- Scope of income for individuals is different from firm or company.
- Applicable tax rates for individuals are different from company.
- Some income of individual assessee is non-assessable.
- On some investment/donation, the assessee enjoys investment tax rebate.
- For TDS, assessee will get full tax credit at the time of computing net tax liability.
- With certain terms and conditions, loss under one head can be set-off against income under another head
- If loss under one head cannot be set-off completely, it can be carried forward to succeeding 6 years to set-off against the income under the same head.

18.1 Definition of individual

The word 'individual' has special meaning in income tax law. To look at its reference in tax law, we should look at two definitions, i.e., assessee and person.

"Assessee", as per section 2(22) of the ITA, 2023, means any person earns taxable income and includes –

(a) a person liable to pay tax, surcharge, or any other sum under this Act;

(b) a person whose income, or whose own income together with the income of any other person, is liable to assessment under this Act, or in respect of whom any proceeding for the assessment of such income has been initiated;

(c) a person liable to pay minimum tax under this Act;

(d) a person required to furnish a return, statement, document, or any other information under this Act;

(e) a person who voluntarily seeks assessment by furnishing a return of income;

(f) a person deemed to be an assessee or an assessee in default under any provision of this Act; and

(g) a person against whom any proceeding has been initiated under this Act.

As per section 2(69) of the ITA, 2023, "**Person**" includes an individual, a firm, a company, a Hindu Undivided Family (HUF), an Association of Persons (AOP), whether formed for the purpose of earning income or profit or otherwise, and any Artificial Juridical Person (AJP) not falling within the preceding categories.

Thus, the word 'assessee' means a person that includes an individual who is liable to pay tax as per Income Tax Act, 2023. This chapter represents the assessment of income of individuals and computation of tax liability of an individual assessee.

18.2 Scope of income of individual assessee

As per section 30 of ITA, 2023, for the purpose of charging income tax and computation of total income, all incomes shall be classified and computed under the following heads of income, namely:

(a) Income from employment
(b) Income from rent
(c) Agricultural income
(d) Income from business or profession
(e) Capital gains
(f) Income from financial assets
(g) Income from other sources

18.3 Non-assessable income and tax rebate on investment allowance:

Across the 7 heads as mentioned at section 30, some categories of income are declared as non-assessable. Thus, at the time of assessment, it is important to know the items of non-assessable income so that it can be excluded at the time of computing taxable income. Whereas investment tax rebate facility can be availed by the taxpayer on investment at allowable sectors. The list of non-assessable income and investment allowance is given in the following schedules that are subject to change from time to time through Finance Act/Ordinance:

- Non-assessable Income: Sixth Schedule, Part I & Part II

- Investment allowance on which tax rebate is applicable: Sixth Schedule, Part III

To reduce the tax burden, some specific income from specific sources is declared non-assessable on which no tax is imposed. Again, to discourage consumption and motivate investment, some investments are allowed for claiming investment tax rebate.

18.4 Grossing up of income

Another important issue is the grossing up of income which is received by the assessee after TDS at specified rate. The equation used to gross up income is given below:

Gross income = Net income X 100/ (100 – Rate of tax deducted at source)

Thus, for grossing-up income, it is important to know the rate of TDS. Only income received after tax is required to gross-up. Grossed up income should be included in calculating taxable income, however, tax already deducted or paid will be claimed as credit at the time of computing net tax liability.

18.5 Tax rate of individuals

Individuals are taxed as per the 5-tier taxation system in Bangladesh. However, these rates are same for every individual including Bangladeshi non-residents, HUF and Partnership Firm. Current rates applicable to individuals on total taxable income for the assessment year 2026-27 are:

Income slab	Rates
On the first 400,000	Nil
On the next 300,000	10%
On the next 400,000	15%
On the next 500,000	20%
On the next 2,000,000	25%
Rest of the income	30%

Note:

a) The tax-free income limit will be as follows:

For women, and elderly male citizens being 65 years of age or more	Tk. 450,000
3rd gender assessee, handicapped or disabled persons	Tk. 500,000
For Gazetted war wounded freedom fighter and July 2024 fighter	Tk. 550,000
The threshold limit in case of parents or legal guardian of any person with disability will be increased by Tk. 50,000. If both father and mother of the disabled person is assessee then any one will avail this benefit.	

b) However, the rate of tax would be straight 30% (at maximum rate) if the individual assessee is classified as non-resident foreigner (NRF).

c) Minimum tax for Bangladeshi individuals (including non-resident Bangladeshi) and Hindu Undivided Family (HUF) is Tk. 5,000. However, for new taxpayers the minimum tax shall be Tk. 1,000.

d) Surcharge in addition to environmental surcharge on the gross tax liability shall be payable by an individual assessee based on the total net worth shown in his Assets-Liability Statement as below –

Total Net worth	Rates of Surcharge AY 2026-27
Up to Tk. 4 crore	0%
More than Tk. 4 crore but less than Tk. 10 crore, or Individual has more than one motor vehicle in his name, or has house property over 8,000 sq. ft. in city corporation area	10%
More than Tk. 10 crore to Tk. 20 crore	20%
More than Tk. 20 crore to Tk. 50 crore	30%
More than Tk. 50 crore	35%

Further, surcharge of 2.5% will be imposed on the business income of all type of manufacturers of cigarette, bidi, zarda, gul and other tobacco products. Moreover, educational institutions including school, college and university shall be liable to pay 2.5% surcharge if fails to make appropriate accessibility for person with disabilities.

18.6 Procedure of assessment

Step 1: Compute taxable income under different heads.

[Don't forget to exclude non-assessable income and grossing up of income at the time of computing taxable income in specified areas]

Step 2: Compute allowable investments made

[Don't forget to test actual investment so that it must not exceed the maximum limit. If it exceeds maximum limit, allowable investment would be the lower one]

Step 3: Compute net tax liability

[Don't forget to consider tax credit due to TDS, refund adjustment, rebate, foreign tax credit and rebate on income from partnership firm]

18.7 Specimen form of computation of total income and total tax liability

Sources of income and particulars	Tk.	Tk.	Tk.
1. Employment (Section 32 - 34):			
Basic Salary	***		
Dearness allowance	***		
Annuity	***		
Employees share scheme (Fair market value less acquisition cost)	***		
Festival bonus / performance bonus	***		
Leave encashment / Compensation	***		
Employer's contribution to recognized provident fund	***		
Entertainment allowance	***		
Medical allowance	***		
House-rent allowance	***		
Advance salary / outstanding salary	***		
Conveyance allowance	***		
Car facility	***		
Rent free accommodation: Annual rental value	***		
Accommodation at a concessional rate:			
The annual rental value less: rent paid by the employee	***		
Taxable portion of interest on recognized provident fund	***		

Retirement allowance / gratuity / pension	***		
Less: exempted pension/gratuity payment	***		
Other benefits (actual or fair value)	***		
Total income from employment		***	
Less: 1/3 of total income from employment or 500,000, whichever is lower		(***)	***

2. Income from rent (section 35 -39):			
Annual value:			
Rental value	***		
Add: TDS (If any)	***		
Add: Owner's expenses paid by the tenant	***		
Less: Tenant's expenses paid by the owner	***		
Actual rental value	***		
Higher of annual value and actual rental value	***		
Add: Adjustable advance rent	***		
Add: Any other receipts	***		
Less: Vacancy allowance	***		
Rental income		***	
Less: admissible expenses:			
1.Repair & maintenance expenses			
[Collection charge, sewerage bill, salary of guard, liftmen, caretaker etc.]		***	
[Admissible limit: Residential house: 25%, Commercial house: 30%]		***	
2.Land development tax		***	
3.Insurance Premium		***	
4.Interest payable on house building Loan		***	
5.Annual tax [Municipal or local authority tax]		***	***
Special rental income (unspent repairs and maintenance allowances)			***

3. Agricultural income (section 40-43):			
Sale of crops	***		
Income from any land or building used for agricultural purposes	***		
Income from granting a right ['Borga']	***		
Income from tea garden or rubber garden [60%]	***		
Revenue profit by sale of discarded or demolished agricultural machineries	***		
Other income relating to agriculture	***		
		***	
Less: Admissible expenses –			
1. Land development tax	***		
2. Any taxes [local taxes, etc.]	***		
3. Production costs			
Cost for cultivating the land or raising live-stock	***		
Ordinary processing costs to make crop marketable	***		

Transportation cost of crops or livestock to market	***		
Maintenance cost of agricultural equipment & up keeping of cattle for cultivation	***		
[If proper books of accounts are not maintained, an expenditure equivalent to 60% of sales proceeds may be allowed as an admissible expense.]	***		
4. Insurance premium	***		
5. Repair and maintenance of irrigation plant	***		
6. Depreciation			
7. Interest on mortgage loan	***		
8. Interest on borrowed capital	***		
9. loss due to discard/demolish of agricultural machineries	***		
10. Other revenue expenses	***	(***)	***
4. Income from business or profession (section 44-56):			
Net profit as per Profit and Loss Account		***	
Add: Inadmissible expenses as per section 54 and 55		***	
Add: Income under the head of business and profession that are not included earlier		***	
Less: Expenses that are allowed		***	
Total Income			***
5. Capital gain (section 57 - 61):	***		
Sale proceeds of capital assets, or	***		
Fair market value at the time of transfer, whichever is higher		***	
Less – Allowable deductions

Worked example

Example 1

Mr. Jamshed Hasan is an executive of a private firm. He furnished the following information for the income year 2025-26. Compute his total income and tax liability for the assessment year 2026-27.

Income from salaries:

i. Basic salary Tk. 33,000 per month.
ii. Festival bonus equivalent to two months basic salary.
iii. House rent allowance Tk. 15,000 per month.
iv. Entertainment allowance @ 5% of basic salary.
v. Medical allowance Tk. 2,000 per month (actual annual expense Tk. 18,000).
vi. Conveyance allowance Tk. 1,500 per month.
vii. Contribution to Recognized PF both by employee and employer @ 10% of basic salary.

Agricultural income:

i. Sale of crops Tk. 270,000.
ii. Income from sale of fish of pond Tk. 45,000 [not fish farming]

Income from business Tk. 32,000

Income from financial asset:

i. Interest from fixed deposit Tk. 27,000 [net of tax].
ii. Interest from savings deposit Tk. 18,000 [net of tax].
iii. Interest received on post office savings bank Tk. 9,000 [net of tax].

Income from other sources:
Income from royalty from book publication Tk. 35,000

Actual investment made by Mr. Jamshed Hasan during the year is given below.

i. Life Insurance Premium paid Tk. 20,000; Policy value Tk. 200,000
ii. Donation to local club Tk. 2,000;
iii. Gift to wife Tk. 20,000;
iv. Donation to a local mosque Tk. 5,000;
v. Investment in primary shares of listed companies Tk. 60,000;
vi. Purchase of Savings Certificate Tk. 100,000;

vii. Donation to a charitable Hospital Tk. 10,000;
viii. Purchase of furniture Tk. 15,000;
ix. Donation to Apollo Hospital Tk. 30,000;
x. Donation to Govt. Zakat Fund Tk. 5,000.

Mr. Jamshed Hasan has Tk. 8,500 refund from last year and a carry forward of loss from agriculture of Tk. 60,000 for last three years.

Solution 1:

Mr. Jamshed Hasan
Computation of total income
[assessment year 2026-27]

Sources of income	Amount	Amount	Amount
1. Income from employment (section: 32):			
Basic salary (33,000 X 12)	396,000		
Festival bonus (33,000 X 2)	66,000		
House rent allowance (15,000 X 12)	180,000		
Entertainment allowance @ 5%	19,800		
Medical allowance (2,000 X 12)	24,000		
Conveyance allowance (1,500 X 12)	18,000		
Employer's contribution to RPF	39,600		
		743,400	
Less: Exempted - 1/3 of gross salary or Tk. 500,000, whichever is lower		(-)247,800	495,600
2. Agricultural income (section: 40):			
Sale of crops		270,000	
Less: Admissible expenses –			
Cost of production (270,000 X 60%) assuming no books of accounts maintained		(-)162,000	
		108,000	
Less: carry forward of previous loss		(-)60,000	48,000
3. Income from business (section:44)			
Business Income			32,000
4. Income from financial assets (section: 62):			
Interest from fixed deposit (27,000 X 100/90)		30,000	
Interest from savings bank account (18,000 X 100/90)		20,000	
Interest on post office savings bank (9,000 X 100/90)		10,000	60,000
5. Income from other sources (section: 66):			
Income from sale of fish of pond		45,000	
Income from royalty from book publication		41,000	
			86,000
Total income			**721,600**

Calculation of allowable investment	Amount
Life insurance premium (maximum up to 10% of policy value)	20,000
Investment in primary share of listed companies	60,000
Contribution to RPF (Tk. 39,600 × 2)	79,200
Purchase of savings certificate	100,000
Donation to:	
Charitable hospital (assuming govt. approved)	10,000
Govt. Zakat fund	5,000
Actual investment and donation	274,200
Maximum limit:	
10% of actual investment and donation (274,200 x 10%);	27,420
3% of total income (721,600 x 3%);	21,648
or Tk. 750,000	750,000
The lower amount will be the investment tax rebate	21,648

Calculation of tax liability:

	Income	Rates	Tk.
On first	Tk. 400,000	0%	-
On next	Tk. 300,000	10%	30,000
On balance	Tk. 21,600	15%	3,240
Total	**Tk. 721,600**		**33,240**
Less: Investment tax rebate			(21,648)
Less: Tax deducted at source from bank interest			(6,000)
Less: Previous year's refund adjustment Tk. 4,512			(4,512)
Net Tax liability			**1,080**

Example 2

Mrs. Jarin Huq is the general manager of a private company. Her sources of income for the year ended 30th June, 2026 were as follows:

Salaries:

Basic salary per month	Tk. 45,000
Medical allowance per month (actual exp. Tk. 19,000)	2,000
House rent allowance per month	30,000
Conveyance allowance per month	3,000
Share scheme received (Fair value less cost of acquisition)	50,000
Employer's Contribution to RPF	10% of Basic

Income from financial asset:

Dividend from listed company Tk. 25,000 [gross]
Interest received from government securities Tk. 40,000 [gross]

Income from rent:

Annual rent received Tk. 280,000
Reasonable rent Tk. 300,000

Expenses related to the house for the year:

Repair and Maintenance Tk. 100,000
Municipal tax Tk. 3,000

Agricultural income: Sale of crops Tk. 300,000

During the year, Mrs. Huq incurred the following investment and expenses:

Life insurance premium	48,000
Donation to local mosque	40,000
Purchase of share from IPO of listed companies	44,000

As per the list of assets and liabilities as at 30/6/2026, Mrs. Huq's net asset value Tk. 6 crore. From the above particulars of Mrs. Huq compute total income and tax liability for the assessment year 2026-27.

Solution 2:

Mrs. Jarin Huq
Assessment year: 2026-27
Computation of total income

Sources of income	Amount	Amount	Amount
1. Income from employment (section: 32):			
Basic salary (45,000 X 12)	540,000		
Medical allowance (2,000 X 12)	24,000		
House rent allowance: 30,000 X 12	360,000		
Conveyance allowance (3,000 X 12)	36,000		
Income from share scheme	50,000		
Employer's contribution to RPF	54,000		
		1,064,000	
Less: Exempted - 1/3 of gross salary or Tk. 500,000, whichever is lower		354,667	709,333
2. Income from rent (section: 35):			
Actual rental value	280,000		
Municipal value/reasonable rent	300,000	300,000	
Annual value (whichever is higher)			
Less: Admissible expenses –			
Repair and maintenance (300,000 × 25%)	75,000		
Municipal tax	3,000	78,000	222,000
3. Agricultural income (section: 40):			
Sale of crops		300,000	
Less:			
Cost of production (300,000 × 60%) being no books of accounts are maintained		180,000	120,000
4. Interest on financial assets (section: 62):			
Dividend income		25,000	
Interest from government securities		40,000	65,000
Total income			**1,116,333**

Calculation of allowable investment	
	Amount
Life insurance premium	48,000
Contribution to RPF [both]	108,000
Share purchase from listed companies	44,000
Actual investment	**200,000**
Maximum limit:	
10% of actual investment	20,000
3% of total income (1,116,333 x 3%)	33,490
Or 750,000	750,000
Whichever is lower is the allowable investment allowance	**20,000**

Calculation of tax liability:			
		Rates	**Amount**
On first	450,000	0%	-
On next	300,000	10%	Tk. 30,000
On next (including tax on dividend @15%)	366,333	15%	54,950
Total	**1,116,333**		**84,950**
Less: Investment tax rebate			20,000
			64,950
Add: Wealth Surcharge on gross tax (84,950 X 10%)			8,495
Tax liability			**73,445**

Notes:

1. Assumed that the house property has been let out for residential purpose and so the repair and maintenance expense is considered as 25% of rental value.
2. Production cost is considered as 60% of the selling price of the crops in absence of any books of accounts.

Worked example 3

Mr. Anu Ahmed has the following income for the income year ended on 30th June, 2026:

Income from salaries

Mr. Anu Ahmed received basic salary of Tk. 18,500 from the month of April, 2025 following the scale of his salary Tk. 17,000 – 1,500 – 20,000. Before that his basic salary per month was Tk. 17,000 as the date of annual increment is 1st April every year. Besides basic salary he received dearness allowance @ 15% of his basic salary; Entertainment allowance and medical allowance @ 20% and @10% of basic salary respectively; Annual bonus Tk. 36,000; house rent allowance Tk. 11,000 per month; conveyance allowance Tk. 1,250 per month. He contributes 10% of basic salary to a recognized provident fund (RPF) and his employer also contributes the same in the fund. During the year he received Tk. 15,000 as interest on provident fund and the rate of interest was 12.5%.

Income from financial assets

Mr. Ahmed received interest on Govt. Securities Tk. 100,000.

Income from business

Due to the economic problem and huge competition, his business results a loss of Tk. 80,000 this year which he likes to set-off against income from the sources mentioned above.

Capital gain

He has sold a machine at Tk. 150,000 before the expiry of 5 years which was purchased at a price of Tk. 80,000 for the purpose of his business. Another Tk. 30,000 was spent to improve the machine. At the time of sale, the machine had accumulated depreciation amounting to Tk. 60,000.

Mr. Ahmed made the following investments and expenses during the year:

1. Life insurance premium Tk. 6,000; policy value Tk. 70,000.
2. Purchase of books Tk. 6,000 and purchase of scientific instruments Tk. 10,000.
3. Purchase of primary shares of Listed Company Tk. 20,000.
4. Donation to religious institutions Tk. 8,000; donation to Govt. Zakat Fund Tk. 7,500; donation to president's relief fund Tk. 28,000; donation to a local club Tk. 9,000; donation to a blind school Tk. 15,000;
5. Purchase of a piece of land worth Tk. 70,000 in the name of his wife and a sum of Tk. 5,000 was spent for its registration.
6. Spent a sum of Tk. 15,000 as educational expenses of his children.
7. Purchase of ICB unit certificate Tk. 20,000.
8. Purchase of gold Tk. 20,000.
9. Contribution to group insurance scheme Tk. 2,000.

Ascertain his total income and tax to be paid for the assessment year of 2026-27.

Solution 3:

Mr. Anu Ahmed
[Assessment year: 2026-27]
Computation of total income

Heads of income	Amount	Amount	Amount
1. Income from salaries (section: 21):			
Basic salary (Note – 1)	208,500		
Dearness allowance @ 15%	31,275		
Entertainment allowance @ 20%	41,700		
Medical allowance @ 10%	20,850		
Annual bonus and fees	36,000		
House rent allowance: (11,000 X 12)	132,000		
Conveyance allowance (1,250 X 12)	15,000		
Employer's contribution to RPF	20,850	506,175	
Interest from RPF	15,000		

Less: exempted –up to:			
33% of total salary from employment (506,175 x 33%) (Para 5, Part III of 2nd Schedule)	15,000	-	
Less: Exempted - 1/3 of gross salary or 500,000, whichever is lower		168,725	337,450
2. Income from business (section: 44)			
Loss from business		(80,000)	
Revenue gain from sale of machine as per sec. 46 (Cost Tk. 110,000- WDV Tk. 50,000)		60,000	
[Carry forward business loss 20,000]			
3. Capital gain (section: 57)			
Sale proceeds		150,000	
Less: Cost of acquisition	80,000		
Cost of improvement	30,000	110,000	40,000
Capital gain			
4. Income from financial assets (section: 62):			100,000
Total income			**477,450**

	Amount	Amount
1. Life Insurance premium	6,000	
Maximum: 10% of Tk. 70,000	7,000	6,000
2. Purchase of primary shares of listed Company		20,000
3. Donation to Govt. Zakat fund		7,500
4. Purchase of ICB unit certificate		20,000
5. Contribution to group insurance		2,000
6. Contribution to RPF (20,850 X 2)		41,700
Total allowable investment		97,200
Maximum limit of investment tax credit:		
(a) 10 % of actual investment	9,720	
(b) 3% of total income = (477,450 x 3%)	14,324	
(c) 750,000	750,000	
Whichever is lower		9,720
Thus, allowable investment for tax rebate		9,720

Calculation of tax liability:

		Rates	Amount
On first Tk.	400,000	0%	-
On next Tk.	77,450	10%	7,745

	477,450		7,745
Less: Investment tax rebate			(9,720)
			(1,975)
Net Tax liability [minimum tax]			**5,000**

Notes:

1. After increment on April 1, 2026 Mr. Ahmed receives basic salary of Tk. 18,500 whereas before increment, he received basic salary of Tk. 17,000. So, his basic salary for the income year is (Tk. 17,000 X 9 + 18,500 X 3) = Tk. 208,500.
2. Assuming he already enjoyed tax credit in the year of investment at securities at upfront system.
3. As the capital asset is sold within 5 years of acquisition, regular tax rate has been applied as per 7th Schedule.
4. It is assumed that the revenue gain on sale of machinery is not included in income from business and profession. Thus, the business loss of Tk. 80,000 is set off against income under the same head first and the balance is carry-forward as per section 70 of ITA, 2023.

Question No. 4:

The following are the particulars of income of Mr. Fazal for the year ended 30th June, 2026**.**

a) Salary Tk. 12,000 per month (basic)
b) Dearness Allowance 40% of basic pay but maximum of Tk. 4,000 per month
c) Entertainment Allowance Tk. 400 per month.
d) Bonus-equivalent to basic salary of two months.
e) Income from Commercial Securities Tk. 6,098.
f) Honorarium as part time advisor Tk. 20,000.
g) Share of profit from Partnership Business Tk. 50,000.
h) Income from Agricultural Land (sale of crops) Tk. 10,000.
i) Royalty from books Tk. 100,000.
j) Received birth day presentation Tk. 5,000.

Mr. Fazal was provided with a free-furnished quarter annual rental value Tk. 36,000. He also owns a house which is let out at Tk. 10,000 per month. The reasonable rent of the house is Tk. 100,000. He spent Tk. 7,500 for repair and Tk. 30,000 for alternation. He also paid Tk. 4,000 for Municipal Tax, Tk. 2,000 for fire insurance premium, Tk. 3,000 for collection charges. He claimed 2 months vacancy allowance.

Other Particulars of Mr. Fazal are as follows:

a) He contributed 10% of his basic salary to a recognized provident fund to which his employer contributed equal amount.
b) He insured his own life for Tk. 75,000 and for the life of his wife for Tk. 50,000. He paid insurance premiums on the above policies Tk. 6,000 and Tk. 4,000 respectively.
c) Purchased Sanchay Patra for Tk. 20,000.
d) He spent Tk. 8,000 on education for two college going children.

Required to calculate:

i) Total taxable income
ii) Investment tax rebate
iii) Tax to be paid.

Answer to question no.4:

Computation of Total income of Mr. Fazal
Assessment Year: 2026-27

Particulars	Tk.	Tk.	Tk.	Tk.
1. **Income from employment: Sec 32**				
a) Basic Salary: Tk. 12,000 Monthly	12,000x12	144,000		
b) Dearness allowance: 40% of Basic pay Maximum: 4,000 pm x12		48,000		
c) Entertainment Allowance: 400 x 12		4,800		
d) Bonus (2 month's Basic Salary)	12,000 x 2	24,000		
e) Free Furnished Quarter: Annual rental value		36,000		
f) Employer's contribution to RPF: 10% of basic		14,400	271,200	
Less: Exempted - 1/3 of gross salary or Tk. 500,000, whichever is lower			90,400	180,800
2. **Income from rent: Sec.35**				
Wholly let out house:				
Annual Rental Value: 10,000x12	120,000			
Or, reasonable rent (Higher one)	100,000	120,000		
Less: admissible deductions:				
i) Repair 25% of rental value (including collection charge)	30,000			
ii) Municipal tax	4,000			
iii) Insurance Premium	2,000	36,000	84,000	84,000
3. **Income from Agriculture: Sec. 40**				-
Sale of crops	10,000			
Less Cost of production @ 60%	6,000			4,000
4. **Income from Business: Sec.44**				
Share of profit from Partnership Business (taxed income)				50,000
5. **Income from financial assets (section 62**)				
Income from Commercial Securities				6,098
6. **Income from Other Sources: Sec. 66**				
a) Honorarium as advisor		20,000		
b) Royalty from books		100,000		120,000
c) Birth Day Gift				5,000
Total Income				**449,898**

Investment Tax Rebate: Sec. 78

Particulars	Tk.	Tk.
a) Actual Investment:		
i) Employee's and employer's contribution to RPF: 14,400 x 2	28,800	
ii) Savings certificate purchase	20,000	
iii) Life Insurance Premium		
Self: 6,000 or, 10% of Policy amount 7,500 (i.e., 10% of Tk. 75,000) (Lower one)	6,000	
Wife: 4,000 or, 10% of Policy amount 5,000 (i.e., 10% of Tk. 50,000) (Lower one)	4,000	
Total investment	**58,800**	
b) Investment tax rebate:		
(a) 3% of T.I.=(449,898-50,000 income from partnership firm)x 3%	11,997	
(b) Tk. 750,000	750,000	
(c) Actual investment Tk. 58,800 X 10%	5,880	
Lower amount is the eligible for investment tax rebate		5,880

Tax calculation:

Total Income	Tk. 449,898
Tax on 1st Tk. 400,000=	Nil
Tax on next Tk. 49,898 x 10%	4,989
Less: Investment tax rebate	(5,880)
Minimum tax will be	5,000
Less: Rebate on share of profit from partnership firm at average rate (50,000x5,000/449,898)	(556)
Net tax payable	**4,444**

Note:

1) Income from Commercial Securities needs not to be grossed-up but as the TDS information is not given in the question, I assume that tax was not deducted therefrom.
2) Assume that vacancy allowance claim was not supported by electricity bill. That's why it is not considered as allowable deduction.
3) Rebate would be calculated at the average rate of tax out of the "Income from Partnership Business" (taxed) to arrive at the Net tax calculation as per section 80 of ITA, 2023.
4) Royalty income from books is taxable under the head income from other sources.
5) Education expense for Children is not an item of investment allowance.
6) Interest on pensioner savings certificate is tax free up to investment of Tk. 5 lakh. As the interest income figure is only Tk. 10,000, so I assume that investment was within that non-taxable ceiling.

Question No.5

Mr. A. Quader works as Manager Finance in a reputed financing company. The following are the details of income of Mr. A. Quader for the year ended June 30, 2026.

(a) Salary Income:

Basic Salary - Tk. 35,000 p.m., Bonus – 2 months basic salary, House rent allowance – 40% of basic salary, Medical allowance – Tk. 2,500 p.m., Conveyance allowance – Tk. 3,000 p.m., Subscription to RPF – 10% (Employer's contribution is also the same), Interest accrued Tk. 85,000 on RPF balance calculated @ 16%.

(b) Income from Rent:

(1) Mr. Quader has one residential house-one half of which is let out at a monthly rent of Tk. 12,000 and the other half is self-occupied. Following expenditures were incurred by Mr. Quader: Municipal tax Tk. 22,000; Repairs and maintenance Tk. 55,000; Insurance premium Tk. 16,000; Salary of caretaker Tk. 36,000

(2) Income from shop rent Tk. 2,500 per month

(c) Income from Land:

(1) Sale of paddy from agricultural land given on Barga system – Tk. 112,000.
(2) Sale proceeds from trees of spontaneous growth in Mr. Quader's land Tk. 12,000

(d) Income from Business:

(1) Share of profit (firm's income below taxable) from a partnership firm Tk. 67,000
(2) Business Income Tk. 70,000 (after allowing current year's depreciation Tk. 20,000)

The following sums have been brought forward from the preceding year:

- Unabsorbed depreciation Tk. 80,000
- Business loss Tk. 50,000

(e) Capital Gains:

(1) Profit on sale of shares of MNC Ltd (A Private Ltd. Co.) Tk. 4,050,000
(2) Sale of Shop (Deed Value Tk. 182,500), Original cost Tk. 30,750 and tax deducted at source at the time of registration Tk. 5,650 to be assessed u/s. 163.
(3) Profit on sale of shares of ERZ Ltd. Tk. 2,330,500 (A Publicly Listed Co.)

(f) Interest income (Net @ 10% tax deduction at source):

(1) From Leasing Company Tk. 833,500
(2) On Bank Fixed Deposit Tk. 125,250
(3) On Bank Savings Account Tk. 66,815

During the year Mr. Quader made the following investments –

(1) Life insurance premium Tk. 65,000 (Policy Value Tk. 500,000)
(2) Investment in shares of a listed company Tk. 120,000
(3) Donation to charitable institutions as approved by NBR Tk. 33,000.

Requirement: Compute Mr. Quader's total income & tax liability for the assessment year 2026-27.

Answer to question No. 5:

Mr. A. Quader
Computation Total Income
Assessment year: 2026-27

	Tk.	Tk.	Tk.
Income from employment: (u/s 32)			
Basic salary (35,000 Tk. Per month)		420,000	
Bonus (2 months basic)		70,000	
House rent allowance (40% of basic salary)		168,000	
Medical allowance		30,000	
Conveyance allowance		36,000	
Employer's contribution to RPF (10% of basic)		42,000	
		766,000	
Interest accrued on PF @16% p.a.	85,000		
Less: Exempted (766,000 x 33%) (Para 5, Part III of 2nd Schedule)	252,780	-	
		766,000	
Less: Exempted - 1/3 of gross salary or 500,000, whichever is lower		255,333	
Taxable income from employment			510,667
Income from rent: (u/s 35)			
Rental value (as it seems reasonable)	144,000		
Less: Admissible deductions			
Repair and maintenance (25% of annual value)	36,000		
Municipal tax (1/2 of Tk. 22,000)	11,000		
Insurance premium (1/2 of Tk. 16,000)	8,000	89,000	
Shop rent (as it seems reasonable)	30,000		
Less: Repair and maintenance (30% of annual value)	9,000		
		21,000	
Income from Rent			110,000
Income from special rent (9000-0)			9,000
Income from agriculture: (u/s 40)			
Sale of paddy on Adhi system	112,000		112,000
(To be added direct as he did not cultivate. 60% cost of production would not be applicable for him)			

Income from business: (u/s 44)			
Share of profit of partnership firm		67,000	
Business income	70,000		
Less: Carry forward of previous business loss (assuming loss was originated from same business)	50,000	20,000	
		87,000	
Less: Carry forward of previous unabsorbed depreciation loss from Tk. 80,000		20,000	
Total income from business			67,000
Capital gains: (u/s 57)			
Gain on sale of shares of MNC Ltd (A Private Ltd. Co.)		4,050,000	
Gain on sale of shares of ERZ Ltd (Publicly listed Co.)	2,330,500		
Less: Exempted up to Tk. 5,000,000	2,330,500	-	
Capital Gain on sale of shop [182,500 - 30,750]		151,750	4,201,750
Capital Gains			
Income from financial assets (u/s 62)

Tax payable				**737,207**

Question No.6

Mr. Samual Gomez works in Bangladesh as an officer in a Multinational Company, headquartered in the USA. His sources of income for the year ended on 30th June, 2026 were as follows:

a. Income from employment:

(1) Basic Salary Tk. 15,000 per month.
(2) Dearness allowance 10% of the basic salary
(3) Two bonuses equivalent to two months basic salary

(4) Medical allowance Tk. 20,000 per year (actual expense for the year Tk. 10,000)

(5) Entertainment allowance Tk. 200 per month

(6) He has been provided car allowances for Tk. 10,000 per month

(7) He has also been provided with a rent-free quarter, municipal value of which is Tk. 80,000 p.a.

(8) Travel allowance as a part of his contract Tk. 100,000 p.a. from where he saved Tk. 10,000.

(9) He contributes 10% of his basic salary to RPF. His employer also contributed the same.

(10) During the year, he received interest of Tk. 1,800 @ 12% on RPF.

(11) He has taken one month's basic salary as advance in the month of June to meet up some of his financial difficulties.

b. Income from financial assets:

(1) Interest on savings certificate Tk. 3,000 (gross)

(2) Interest on government securities Tk. 2,700 (net of tax @ 10%)

(3) Interest on approved debentures Tk. 27,300. He has borrowed Tk. 20,000 @ 10% interest to purchase it. Bank also charged Tk. 400 to collect the interest.

(4) Interest income from FDR Tk. 4,500 (net of TDS @ 10%)

(5) Profit from Islami bank Tk. 900 (net of TDS @ 10%)

(6) Cash Dividend from ICB Mutual Fund Tk. 31,500 (net of TDS @ 10%)

(7) Cash Dividend from a listed company shares Tk. 1,800 (net of TDS @ 10%)

c. Income from House Properties:

He owns a two-storied house in Dhanmondi. He stays in one floor with his family and another floor is let out for residential purpose at a rate of Tk. 9,000 per month. The municipal value of the house is Tk. 200,000 per annum. During the year he spent the following expenses for the whole house:

Repair expense Tk. 2,000, Insurance expense Tk. 4,000, Land development tax Tk. 1,500 Sewerage and utilities expense Tk. 1,000, Payment of DBH Loan Installment Tk. 5,000 (including interest of Tk. 500).

During the year, the house has remained vacant for two months.

d. Agricultural income: Sale of crops Tk. 5,000 and Income from barga Tk. 2,000

e. Income of spouse and minor child Tk. 40,000

f. He won Prize Bond lottery of Tk. 300,000 [tax deducted at source @ 20% from it]

g. Foreign Income

During the year Mr. Gomez visited South Korea as a consultant and earned Tk. 500,000 and he paid income tax @ 25% in South Korea. He brought Tk. 250,000 to Bangladesh through bank. From another visit to Uganda, he earned Tk. 300,000 and paid income tax there @ 20%. Bangladesh has DTAA (Double Taxation Avoidance Agreement) with South Korea, but not with Uganda.

h. Income from business: Profit from sole-proprietorship business Tk. 4,000; last year's loss carried forwarded Tk. 1,000.

i. Income from other sources:

(1) Sale of forest timber Tk. 2,000

Investment claimed by Mr. Gomez:

(1) Payment of life insurance premium Tk. 8,000 (Policy value Tk. 100,000)
(2) Purchase of a listed company's primary share Tk. 5,000
(3) Purchase of books and magazines Tk. 1,000
(4) Purchase of a share of co-operative society Tk. 2,000
(5) Contribution to Government Zakat Fund Tk. 2,500
(6) Purchase of Furniture Tk. 15,000

Requirement: Based on the above information, calculate Mr. Samual Gomez's total income and tax liability for the assessment year 2026-27

Answer to question No. 6:

Mr. Samual Gomez
Assessment Year: 2026–27
Computation of Total Income

Heads of Income	Amount	Amount	Amount
1. Income from Salary (Section: 32):			
Basic salary (15,000 X 12)		180,000	
Dearness allowance (180,000 × 10%)		18,000	
Bonus (15,000 × 2)		30,000	
Medical allowance		20,000	
Entertainment allowance (200 X 12)		2,400	
Car allowance (10,000 X 12)		120,000	
Rent Free Accommodation: Rental value		80,000	
Travel allowance	100,000		
Less: Exempted – up to actual expense	90,000	10,000	
Advance salary		15,000	
Employer's contribution to RPF (10% of Tk. 180,000)		18,000	
		493,400	
Interest from RPF	1,800		
Less: exempted – up to: 33% of total salary from employment	162,822	-	
		493,400	
Less: Exempted - 1/3 of gross salary or 500,000, whichever is lower		164,467	**328,933**
2. Income from rent (Section: 35):			
Actual rental value (9,000 × 12)	108,000		
Municipal value (200,000 / 2)	100,000		
Annual value (whichever is higher)	108,000		
Less: Vacancy allowance (9,000 × 2)	18,000	90,000	
Less: Allowable deductions			
Repair and maintenance (25% × 90,000)	22,500		

Insurance (4,000 / 2)	2,000		
Land development tax (1,500 / 2)	750		
Interest on loan (500 / 2) 250 **Special income from rent (22,500 – 2,000)**	250	30,000	60,000 20,500
	-		
3. Agricultural Income (Section: 40):			
Sale of crops	5,000		
Less: Allowable deductions: Production cost 60%	3,000	2,000	
Income from barga		2,000	
			4,000
4. Income from Business (Sec:44):			
Profit from sole-proprietorship business		4,000	
Less: Carry forward of previous year's loss		1,000	
			3,000
5. Income from financial assets (Sec.62):			
Interest on savings certificate		3,000	
Int. on less-tax Govt. securities (2,700 × 100/90)		3,000	
Interest on approved debentures	27,300		
Less: Allowable expenses:			
Bank Charge	400		
Interest on loan	2,000	26,900	
	-	-	
Interest on FDR (4,500 × 100/90)		5,000	
Profit from Islami Bank (900 × 100/90)		1,000	
Dividend from ICB Mutual Fund (31,500 × 100/90)		35,000	
Dividend of listed Public Ltd. Co. (1,800 × 100/90)		2,000	
			75,900
6. Income of spouse or minor child			40,000
7. Income from other sources (Section: 66):			
Sale of forest timber		2,000	
Prize Bond Lottery [Income u/s 163]		300,000	
			302,000
8. Foreign Income:			
Income from South Korea	500,000		
Less: Brought to Bangladesh through official channel			
(Exempted as per 6th schedule (Part-I) para-17 of ITA, 2023). On remaining Tk.			

250,000 foreign tax credit will be applicable as per sec.244			
	250,000	250,000	
Income from Uganda:(As there is no DTAA between Bangladesh and Uganda, so no foreign tax credit will be allowed as per section 246)		300,000	
		-	550,000
Total Income			**1,384,333**

Calculation of Allowable investment allowance	
Particulars	**Amount**
Life insurance premium	8,000
Share purchase	5,000
Contribution to Govt. Zakat Fund	2,500
Contribution to RPF (18,000 × 2)	36,000
Actual investment	**51,500**
Maximum limit of allowable investment:	
3% of Tk. 1,384333	41,530
10% of actual investment	5,153
or 750,000	750,000
Thus, allowable investment allowance for tax rebate would be	5,153

Calculation of Tax liability:			
Particulars	**Rate**	**Amount**	
On first Tk. 400,000	0%	0	
On next Tk. 300,000	10%	30,000	
On next Tk. 384,333 including tax on dividend on 37,000 @ 15%	15%	57,650	
Total Tk. 1,084,333		87,650	
+ Prize bond lottery @ 25% on Tk.300,000		75,000	
		162,650	
Less: Investment tax rebate		5,153	
		157,497	
Less: Double taxation relief (foreign tax credit as per sec 244 Average tax rate in Bangladesh is (157,497/1,384,333) i.e. 11.38%			
Tax relief on income from South Korea (as per DTAA) 30% of 250,000 = Tk. 75,000 but maximum relief is at an average rate of the country (250,000 X 11.38%) = Tk. 28,443		28,443	

		129,054	
Less: TDS [300+300+500+100+3,500+200+60,000]		64,900	
Net tax payable		**64,154**	

Question No.7

Mr. Rafiq is a Finance Manager of a multi-national company. His income for the Assessment Year 2026-27 were as under:

[1] Basic Salary- Tk. 60,000 per month.

[2] House Rent Allowance- 60% of the Basic Salary.

[3] Medical Allowance- 10% of the Basic Pay.

[4] Entertainment Allowance- 10% of the Basic Salary.

[5] Employer's Contribution to Recognized Provident Fund- 10% of the Basic Salary.

[6] Bonus- equivalent to 2 month's Basic Salary.

[7] Mr. Rafiq was provided with a servant at monthly salary of Tk. 8,000 each.

[8] He is entitled to two months' Basic Salary as a Gratuity at the time of retirement.

[9] He is also entitled to a full-time 2000cc car. Car related expenses are borne by the company.

His other incomes were as follows:

[1] Dividend from a company listed in the Dhaka Stock Exchange Tk. 150,000.

[2] Dividend from Private limited company Tk. 60,000.

[3] Interest from 5 years' Bangladesh Sanchaya Patra Tk. 75,000.

[4] Interest from Savings Bank A/c. Tk. 40,000 (Gross) from which 10% tax was deducted.

He has a house from which he earns monthly rental income of Tk. 60,000. He paid Municipal Tax of Tk. 4,000 per quarter. Interest paid on the Bank Loan was Tk. 180,000 per annum. Actual Repair & maintains expense Tk. 180,000

Mr. Rafiq contributed Tk. 72,000 to Provident Fund. Interest accrued on the P.F. Balance was Tk. 40,000. He paid Life Insurance Premium of Tk. 56,000. He purchased 5 years' Bangladesh Sanchaya Patra Tk. 190,000.

Compute Total Income and Tax Liability thereon of Mr. Rafiq for the Assessment Year 2026-27

Answer to question No. 7:

Mr. Rafiq
Computation of Total Income
Assessment year 2026-27

(i) Income from employment	**Amount**	**Amount**
Basic Salary - Tk. 60,000 per month (60,000 x 12)	720,000	
Bonus - 2 months' Basic (60,000 x 2)	120,000	
House Rent - 60% of Basic (60% x 60,000 x 12)	432,000	
Entertainment - 10% of Basic (10% x 720,000)	72,000	
Medical Allowance - 10% of Basic	72,000	

Employer's Contribution to P.F - (10% x 720,000)	72,000	
Full Time Car Entitlement (20,000 x 12)	240,000	
Salary of servant - 8,000 x 12)	96,000	
	1,704,000	
Less: Exempted - 1/3 of income from gross salary or 500,000, whichever is lower	(500,000)	**1,324,000**
(ii) Income from Rent		
Rental Value - 60,000 per month (60,000 x 12)	720,000	
Less: (1) Repairs & Maintenance is 25% of rental value	(180,000)	
(2) Municipal Tax 4,000 per quarter= 4,000 x 4	(16,000)	
(3) Interest on Bank Loan	(180,000)	**344,000**
(iii) Income from financial asset		
Interest from 5 years' Bangladesh Sanchaya Patra	75,000	
Dividend from Listed Company	150,000	
Dividend from Private Ltd. Company	60,000	
Int. on Savings Bank Account	40,000	**325,000**
Total Income		**1,993,000**

Tax calculation:

Total Income	Tax Rate	%	Income Tax
On income	400,000	0%	0
On the next Tk.	300,000	10%	30,000
On the next Tk.	610,000 including tax on dividend Tk. 2,10,000 @ 15%	15%	91,500
On the next Tk.	500,000	20%	100,000
On the next Tk	183,000	25%	45,750
	1,993,000		267,250
Less: Tax rebate on Investment (Note)			39,000
			228,750
Less: [1] 10% TDS on Saving Bank Account			4,000
[2] 10% tax deducted on Sanchaya Patra			7,500
[3] 10% tax deducted on cash dividend			15,000
Net tax payable			**201,750**

1. The salary of servant will be included to his income from employment as perquisite.
2. Investment tax allowance, lower of:
   (a) 3% of total income excluding any exempted or reduced rated income, share of partnership profit and income where source tax is the final settlement. = 1,993,000 x 3% = 59,790

(b) 10% of actual investment (PF 1,44,000 + Insurance 56,000 + Sanchaypatra 190,000) = 39,000

(c) Tk. 750,000

Therefore Tk. 39,000 is the allowable investment tax credit.

3. Gratuity will be considered when it is received. Any amount up to Tk. two crore fifty lac received by an assessee as gratuity is exempt from payment of tax.
4. Interest accruing to or derived by a recognized provident fund is tax free up to a certain limit. I assume that it is within the limit. So, it is exempted.

Question No.8

Mr. Abedin's salary during the financial year 2025-26 is as follows:

Particular	Amount in Tk.
Basic salary	1,500,000
Bonus	300,000
House rent	750,000
Medical allowance	150,000
Conveyance allowance	100,000

Mr. Abedin is also the owner of a 3 storied residential building in Dhaka. During the financial year 2025-26, he received total rent Tk. 1,080,000 and paid city corporation tax Tk. 50,000 land tax TK. 500 and for repair and maintenance Tk. 270,000.

Mr. Abedin also received FDR interest Tk. 200,000, Tk. 250,000 as interest from savings certificate and Tk. 100,000 as dividend from listed companies.

Mr. Abedin purchased savings certificate of Tk. 500,000 during the year.

Tax of Tk. 180,000 has been deducted from Mr. Abedin's salary during the year and other deduction of tax at sources has been made properly.

Mr. Abedin's net asset as on 30/06/2026 is Tk. 50,000,000. He paid advance tax Tk. 350,000 u/s 154 for the assessment year 2026-27.

Compute Total Income and Tax Liability for the Assessment Year 2026-27

Solution to the Q. No. 8

Salary Income

Pay and Allowance	**Amount (Tk.)**	**Exempted portion**	**Taxable salary**
Basic salary	1,500,000	1/3 of 2,800,000 or 500,000 whichever is lower	**2,300,000**
Bonus	300,000		
House Rent Allowance	750,000		
Medical Allowance	150,000		
Conveyance Allowance	100,000		
Taxable Income from Salary	**2,800,000**	**500,000**	**2,300,000**

House Property Income

Rental Value Less: Repair & Maintenance	1,080,000

(1/4th of rental value)	270,000
City corporation tax	50,000
Land tax	500
	320,500
Net rental income	**759,500**

Income from financial asset

FDR interest	200,000
Cash dividend	100,000
Interest on savings certificate	250,000
	550,000

Total Income of Mr. Abedin

Source of Income	**Amount (Tk.)**
Income from employment	2,300,000
Income from financial assets	550,000
Rental Income	759,500
Total Income	**3,609,500**

Tax Calculation

Income	**Tax Rate**	**Amount of Tax**
On the first Tk. 400,000	0%	0
Next Tk. 300,000	10%	30,000
Next Tk. 500,000 including tax on dividend income of Tk. 100,000 @ 15% as per 7th schedule	15%	75,000
Next Tk. 500,000	20%	100,000
Next Tk. 1,909,500	25%	477,375
Total		**682,375**

Calculation of Investment Tax Credit:

Investment	**Amount (Tk.)**
Purchase of savings certificate	500,000
Total Investment	**500,000**
Investment Allowed for tax credit (Actual Investment Tk. 500,000 x 10% = 50,000 or 3% of TK. 3,609,500 i.e., 108,285 or Tk. 750,000 (whichever is lower)	50,000
Investment Tax credit	50,000

Tax Calculation	**Tk.**	**Tk.**
Tax chargeable on Total Income:	682,375	
Less: Investment tax credit	50,000	
Tax payable		632,375
Add: wealth surcharge @ 10% on gross tax as net wealth is more than taka 4 crore		(+)68,238
Less: Tax credit (TDS & AIT):		

(1) Advance Income Tax paid	350,000	
(2) TDS on salaries	180,000	
(3) TDS on FDR interest	20,000	
(4) TDS on dividend	10,000	
(5) TDS on Interest on S/C	25,000	(-) 585,000
Net tax payable		**115,613**

Question No.9:

Mr. Faizan is the Head of Taxation of RX Limited. During the financial year 2025-26 he earned following income:

Income from Employment:

[1] Mr. Faizan received Tk. 1,200,000 as cash salary out of which basic pay was 60%, medical allowance was 20%, transport allowance was 15% and education allowance for children was 5%.
[2] The company provided him with a 2500 CC full time car for official and his family use.
[3] He was also provided with a residential house against which the company incurred rental expense of Tk. 310,000.
[4] Though the company has a Recognized Provident Fund, Mr. Faizan did not apply for becoming the member of that Fund. As per the Provident Fund Rules, the contribution to the Fund by the employer is 8% of basic pay.

Income from Rent:

He leased out a house with an annual rent of Tk. 120,000. He spent Tk. 30,000 as repair and maintenance, Tk. 5,000 as municipal tax and Tk. 2,500 as fire insurance premium.

Income from Agriculture:

Mr. Faizan owned 25 bigha agricultural land in his village. By cultivating paddy in 10 bigha land, he generated income of Tk. 120,000. The rest of the land he rented out for a cash consideration of Tk. 160,000. He owned a power tiller to cultivate the land, the tax depreciation of which was Tk. 12,000 and maintenance cost was Tk. 6,000. He paid land development tax Tk. 25,000 and interest Tk. 200,000 against the bank loan taken for the purpose of buying land.

Income from Financial Assets:

He received interest from Coupon Bond and FDR Tk. 10,000 (Gross) and Tk. 98,100 (net) respectively. He also received dividend Tk. 22,500 (net) by purchasing share from secondary market at a value of Tk. 100,000 on 1 January 2025.

In addition, he made the following transactions relating to financial year 2025-2026:

[1] Donation made to the Zakat Fund Tk. 10,000,
[2] Purchased share of a private limited company Tk. 20,000
[3] Life Insurance Premium paid Tk. 15,000.

The company also deducted Tk. 128,000 from his salary in the last 12 months as withholding tax against salary income.

Please compute total income and tax liability of Mr. Faizan for the assessment year 2026-27 considering the above information.

Solution to the question no.9:

Computation of total income and tax liability of Mr. Faizan for the assessment year 2026-27:

Mr. Faizan
Computation of total income and tax liability
For the assessment year 2026-27

[A]	**Computation of total income**	**Tk.**	**Tk.**	**Tk.**
	[A] **Income from employment:**			
	[1] Basic pay- (Tk. 1,200,000 x 60%)		720,000	
	[2] Medical allowance (Tk. 1,200,000 x 20%)		240,000	
	[3] Transport allowance cash- (Tk. 1,200,000 x 15%)		180,000	
	[4] Education allowance- (Tk. 1,200,000 X 5%)		60,000	
	[5] Rent free house facility: Annual Rental value		310,000	
	[6] Deemed income against full time car facility [30,000 x 12]		360,000	
			1,870,000	
	Less: Exempted - 1/3 of gross salary or 500,000, whichever is lower		500,000	
				1,370,000
	[B] Income from house property:			
	Annual value of the house:			
	Rental value or reasonable rent – higher one (In absence of information about reasonable rent, it is assumed that rental value is reasonable)		120,000	
	Less: Admissible expenses			
	Repair and maintenance – 25% of rental value	(30,000)		
	Municipal tax	(5,000)		
	Fire Insurance premium	(2,500)		
	Total allowable expenses		(37,500)	**82,500**
	[C] Income from Agriculture:			
	Sale proceeds of crops	120,000		
	Cash consideration against granting right to use land	160,000		
			280,000	
	Less: Admissible expenses			

	Production cost – 60% of income from cultivation	(72,000)		
	Depreciation of power tiller	(12,000)		
	Land development tax	(25,000)		
	Interest on borrowed capital	(200,000)		
	Total allowable expenses		(309,000)	
	Taxable income under the head of agricultural income (This loss is eligible to be set off as per sec. 70)			(29,000)
	[D] Income from financial assets			
	i) Interest on Zero Coupon Bond [Fully tax-free as per 6th Schedule (Part-I) para 25]			
	ii) Interest on FDR (Tk. 98,100/90 X 100)		109,000	
	ii) Dividend from listed company (Tk. 22,500/90 X 100)		25,000	
	Taxable income from financial assets			**134,000**
	Total income (a+b+c+d)			**1,557,500**
B]	**Eligible investment allowance for tax credit:**			
	Investment in shares of listed company			100,000
	Life Insurance premium			15,000
	Donation to Zakat Fund assuming Govt. Zakat Fund			10,000
	Actual investment			**125,000**
	10% of actual investment			**12,500**
	3% of total income [1,557,500] x 3%			**46,725**
	Eligible investment allowance is lower of 10% of actual investment, 3% of total income and Tk. 0.75 million.			**750,000**
	Therefore, allowable investment allowance			**12,500**
C]	**Tax liability**			
	Tax on total income:			
	On first Tk. 400,000 @ 0%			nil
	On next Tk. 300,000 @ 10%			30,000
	On next Tk. 425,000 @ 15% including tax on dividend			63,750
	On next Tk. 432,500 @ 20%			86,500
	Gross tax liability			**180,250**
	Less: Investment tax credit (125,000 X 10%)			(12,500)
	Tax liability			**167,750**
	Less: Tax deducted at sources:			
	[1] From salary		128,000	
	[2] From FDR interest		10,900	
	[3] From cash dividend		2,500	141,400
	Balance tax payable			**26,350**

Note:

[1] Since, Mr Faizan was not the member of the RPF, his employer did not contribute anything for this purpose. So employer's contribution to RPF is not added with salary income. Similarly, investment tax credit is also not given because there is no contribution.

[2] Investment in shares in private limited companies is not eligible for investment tax rebate as per 6th Schedule (Part-III) of ITA, 2023. So, it is not considered in calculating investment tax rebate.

[3] In computing agricultural income maintenance cost of Tk. 6,000 is not deducted because it is already considered within 60% cost of production.

Self-assessment question

1. Mr. Clark born on 22 February 1980 and a UK national working for O2 Solutions UK Limited, a leading brand that developed a unique method to purify contaminated water at a low cost. The company's invention involves a series of alternative tests conducted in different regions worldwide, resulting in the successful production of powder-type mixtures. These mixtures are sprayed into contaminated water for purification. The innovation is cost-effective, with one kilogram of the powder costing USD 10 and capable of purifying 1,000,000 litters of water. O2 Solutions is currently running a project in North Africa and South Asia, including Bangladesh, aiming to scale up purification efforts for small and medium-sized lakes at a reduced cost.

   As the project director, Mr. Clark is overseeing the project, with 30% of his time dedicated to activities in Bangladesh. He is allowed to work virtually. Mr. Clark, along with his spouse, recently relocated to Bangladesh under a dependent diplomatic visa of Mrs. Clark, who is associated with the British High Commission in Dhaka as a diplomat. They have been residing in Bangladesh since November 10, 2024.

   During the income year 2025-26, Mr. Clark earned a total income of USD 120,000 from employment, while Mrs. Clark received a salary of USD 9,000,000 for her services to the British High Commission. It is important to note that Mr. Clark has already paid USD 11,500 tax in UK for his income during the income year.

   Requirements:

   Discuss the tax treatment and compute tax liability for Mr. and Mrs. Clark for the assessment year 2026-27 in Bangladesh. Use Tk. 125 for each USD as conversion rate.

2. Ms. Tabassum Khan, currently serving as the Chief Marketing Officer at Americano Lubricant Limited, receives a monthly package that includes a salary of Tk. 350,000, car allowances of Tk. 25,000, medical allowances Tk. 30,000, and house rent allowances of Tk. 25,000. Additionally, the company shoulders her tax liabilities.

   She has recently been presented with an employment offer from Unicorn Bangladesh PLC, a listed company in Bangladesh Stock Exchanges and a prominent subsidiary of Unicorn Holland PLC. If she opts to become a Director overseeing marketing activity in Bangladesh, the new offer comprises a monthly salary of Tk. 400,000, a fully-equipped car with 3500cc, medical allowances of Tk. 70,000, and a subsidize accommodation facilities for which she has to pay rent for Tk. 20,000 per month but estimated annual value of the accommodation facilities would be Tk. 480,000. Further offer also include a share option under an Employee Share Scheme for 20,000 shares in Unicorn Bangladesh PLC, market value of the share is Tk. 80 per share, and coverage for her upcoming eye surgery in Singapore, which is projected to cost Tk. 1,000,000.

   Mrs. Khan has invested Tk. 500,000 in shares on the Bangladesh Stock Exchanges and maintains a Deposit Pension Scheme with a scheduled commercial bank by depositing Tk. 30,000 monthly.
   As she contemplates this new opportunity, Mrs. Khan want to weigh the overall financial implications, including tax considerations, benefits, and the broader impact on her share options in evaluating the offer of Unicorn Bangladesh PLC.

   Requirements:
   Advice Ms. Tabassum Khan on the offers of employment in Unicorn Bangladesh PLC.

Chapter 19

Assessment of Partnership Firms

Introduction

Learning objectives
Examination context

Topic list

19.1 Assessment of partnership firm
19.2 Special provisions regarding assessment of firms
19.3 Procedure of assessment of firms
19.4 Rate of tax applicable to firm
19.5 Set-off and carry forward of firm's losses
19.6 Computation of partners' share in the firm's profit or loss
19.7 Liability of a firm for unrecoverable tax due from partners

Worked examples
Self-assessment questions

Introduction

- Illustrate the assessment of partnership firm.
- Identify the scope of income of a firm.
- Specify major provisions regarding the assessment of firm.
- Identify rates for taxing income of a firm.
- State the procedure of assessment of income of firm and its partner.

Practical significance

Assessment of firm and tax liability computation is very significant for every assessee firm. Assessing the income of firm and tax liability thereof is important for persons owning partnership firm and managing it. This chapter recapitulates the scope of total income, non-assessable income, tax credit income, grossing up of income, applicable tax rates and related issues required for completing the assessment of firms. Application of tax rebate by partners on income from partnership firm is exemplified. Professional accountants are required to have sufficient expertise on all of these issues.

Stop and think

Did you realize how important is the assessment for firms? Can you do the assessment of firms independently?

Working context

Assessment of tax is very important for every assessee firm. An assessee must require to be assessed in any way. Accountants have a great role to provide the technical assistance to their client in case of assessment. As there are many conditions, rules and procedures for different types of assessments, accountants' support sometime very significant to complete the assessment of their clients.

Many clients are requiring the support for correct assessment from accountants in every year. Detailed knowledge of accountants on the technicalities of computation of taxable income and tax liability thereof for individual assessee is very important in case of required support for clients' tax assessment.

Syllabus links

The topics covered in this chapter have the significance for professional study as you can utilize the knowledge throughout the application level and case study and also in your practical life.

Examination context

Exam requirements

In the examination, candidates may be required to:

- Do the assessment of firms and partners as well.
- Identify total income of a firm after deducting allowable expenses.
- Compute investment allowance and tax credit.
- Identify non-assessable income and its application in computing total income.
- Identify the procedure of assessment
- Compute net tax liability after tax rebate due to investment allowance,
- Tax rebate at average rate on income from firm at the time of computing total income of partners.

Question practice

For question practice on these topics, go to the suggested answers covering this chapter.

ASSESSMENT OF PARTNERSHIP FIRMS

Section overview

- Scope of income of firm is different from other assessee.
- Applicable tax rate of firm is different from companies.
- On some investments, the firm enjoys investment tax rebate.
- For TDS, the firm will get full credit at the time of computing net tax liability.
- With certain terms and conditions, loss under one head can be set off against income under another head/heads
- If loss under one head cannot be set off completely, it can be carried forward to succeeding 6 years to set off against the income under the same head.

19.1 Assessment of partnership firms

The word firm includes a partnership firm. Like individuals, firm's income is also assessed to compute tax payable by the firm. One point is very important to remember that assessment of partnership firm and partners are done separately. In tax law, partnership firm and partners are totally different, have different income though the tax rates are same with some exceptions.

19.2 Special provisions regarding assessment of firms

A firm can be assessed –

- Under section 183: Determination of tax by DCT on the basis of return
- Under section 184: Best judgment assessment
- Under section 187: Taxation of firms and Association of Persons

A firm can also be assessed in special cases –

- Under section 188: Assessment in case of change in the constitution of a firm
- Under section 189: Assessment in case of constitution of new successor firm
- Under section 190: Assessment in case of succession of business otherwise death
- Under section 191: Assessment in case of discontinued business

19.3 Procedure of assessment of firms

As the assessment of firm and its partners are sometimes non-detachable, it is important to remember to assess their income separately. Otherwise, there is a strong possibility of integrating partners' income with that of the partnership firm to whom they are the partners. It is advised to follow the procedures as mentioned below to avoid possible mistakes.

For the firm

(1) Start with the accounting profit as computed in partnership Profit and Loss Account.

(2) Adjust the profit in line with –

Section 45: Income from business or profession

Section 49: Deductions from income from business or profession

Section 55: Deduction not admissible in certain circumstances

(3) The profit so computed will be taxable profit of the firm and taxable in the hand of the firm. However, such profit (before tax) will be distributed among the partners as per their respective profit and loss sharing ratio.

(4) The profit as calculated above is taxable at a rate of 27.5% (Assessment year 2026-27)

For partners

(5) Partners' taxable income will be share of profit or loss as computed in step 3. The total income will be taxed as per the individual tax rates. Income from firm is to be considered as taxed income because tax on this part is already paid by the firm, and partners will get rebate at average rate on their partnership income from tax so computed as per section 80 of ITA, 2023. They may also claim rebate for qualifying amount of investment allowance, if any, in normal way.

19.4 Rate of tax applicable to firm for the assessment year 2026-27

Unlike last years, income of a firm shall be taxable at a rate of 27.5%.

19.5 Set-off and carry forward of firm's losses

(1) In case of losses sustained by a firm under any head of income shall be set off only against the income of the firm under any other head and not against the income of any of the partners of the firm [U/s - 70(4))].

(2) Any loss from business can be carried forward for setting of against such income, if any, for 6 consecutive years (U/s - 70).

(3) If there is any loss from any speculation business, it should be set off in the same year against income from other speculative businesses, it can be carried forward for 6 consecutive years to set off only against the income from such speculative business (U/s - 70).

(4) If there is any loss under the head 'capital gain' can be carried forward for 6 consecutive years (U/s - 70).

(5) If there is any loss under the head 'agricultural income' can also be carried forward for setting off against income from this head for 6 consecutive years (U/s - 70).

19.6 Computation of partners' share in the firm's profit or loss [section 31(2)]

To compute partner's share in the firm's profit or loss, we need to adjust any interest, salary, commission or remuneration. Then the balance will be distributed among the partners as per the respective profit and loss sharing ratio. So, the share of a partner in a firm will be taken to be any salary, interest, commission or other remuneration payable to him by the firm in the income year increased or decreased respectively by his share in the balance of the profit or loss of the firm.

If the partners have their individual income with the shared income from the firm, such shared income should be added with other individual income to compute the partners' total taxable income. If the firm has already been taxed, partners will not pay tax on such shared income (Section 80 of ITA, 2023). But, this addition of shared income to the partners' other income may enhance the rate of tax for such other income or may bring the partners within the ambit of taxation where such partners' individual income was below the taxable limit. Following formula shall be applied in computing tax:

T=A*(B/C)

Where

T is the tax at the average rate;

A is the tax on total income, including tax computed on share of income from the firm or Association of Person (AOP) before considering any rebate on total income;

B is the income received from the firm or AOP; and

C is the total income, including the share of income from the firm or AOP

19.7 Liability of a firm for unrecoverable tax due from partners (section 255):

Where any tax payable by partner of a firm in respect of his share of the income from the firm cannot be recovered from him, the Deputy Commissioner of Taxes shall notify such amount of the tax to the firm. Upon notification, the firm so notified shall be liable to pay the said tax and, for the purposes of recovery thereof, shall be deemed to be an assessee in respect of such tax.

Worked example

Example 1: Ronob, Sanob and Manob are the three equal partners of Ronob & Brothers. The profit and loss account for the year ended on June 30, 2026 was given below:

Ronob & Brothers
Profit and Loss Account
For the year ended on June 30, 2026

Particulars	Amount (Tk.)	Particulars	Amount (Tk.)
Office Rent	72,000	Gross profit	800,000
Utilities	48,000		
Commission [including commission paid to Partner Manob Tk. 25,000]	88,000		
Advertisements	22,000		
Income Tax	20,000		
Interest on capital:			
Ronob – 30,000			
Sanob – 20,000			
Manob – 30,000	80,000		
Salaries:			
Ronob – 26,000			
Manob – 24,000	50,000		
Net Profit	420,000		
	800,000		800,000

Other information:

1. Tax @10% was deducted at source from office rent.
2. Tk. 25,000 of commission is given to Mr. Manob for his special assignment.
3. Partners have income from different sources as follows:

Sources	Mr. Ranob	Mr. Sanob	Mr. Manob
Income from house property	160,000	-	140,000
Income from interest on securities	50,000	180,000	-
Agricultural income	-	-	50,000
Income from other sources	325,000	325,000	325,000

Required:

1. Compute total income of the firm
2. Compute tax liability of the firm.
3. Distribute firm's income among the partners.
4. Compute total income of the partners.
5. Compute net tax liability of the partners.

Solution 1:

Requirement 1: Total income of the firm

Particulars	Amount (Tk.)	Amount (Tk.)
Net profit as per Profit and Loss A/C		420,000
Add: Inadmissible exp. section 55:		
Distribution to the partners –		
Interest on capital:		
Ronob – 30,000		
Sanob – 20,000		
Manob – 30,000	80,000	
Salaries:		
Ronob – 26,000		
Manob – 24,000	50,000	
Commission:		
Manob – 25,000	25,000	
Income tax (as it is not an expense rather appropriation of profit and not allowed as expense)		155,000 20,000
Total income of the firm		**595,000**

Requirement 2: Tax liability of the firm

Income	Tax rate	Amount (Tk.)
Tk. 595,000	27.5%	163,625

Requirement 3: Distribution of firm's income among the Partners

Particulars	Partners			Total	Amount left to be distributed
	Ronob	Sanob	Manob		
Amounts to be distributed –					595,000
Interest on capital	30,000	20,000	30,000	80,000	515,000
Salaries	26,000	24,000	-	50,000	465,000
Commission	-	-	25,000	25,000	440,000
Profit (1:1:1 ratio)	146,666	146,666	146,667	440,000	
Total amount allocated	**202,666**	**190,666**	**201,667**	**595,000**	

Requirement 4: Total income of the partners

Heads of Income	Ronob	Sanob	Manob
Income from interest on securities	50,000	180,000	-
Income from house property (less actual repairs @ 25%) assuming it was let out for residential purpose.	120,000		105,000
Agricultural income (less: cost of production @ 60%)			20,000
Income from partnership firm	202,666	190,666	201,667
Income from other sources	325,000	325,000	325,000
Total income	**697,666**	**695,666**	**651,667**

Requirement 5: Net tax liability of the partners

Income slab	Rate	Amount of tax		
		Ronob	Sanob	Manob
On first Tk. 400,000	0%	Nil	Nil	Nil
On next Tk. 297,666	10%	29,767		
Tk. 295,666	10%		29,567	
Tk. 251,667	10%			25,167
		29,767	29,567	25,167
Less: Tax rebate on firm's income at average rate		8,647		
Ronob (202,666/697,666 x 29,767)			8,104	
Sanob (190,666/695,666 x 29,567)				9,036
Manob (201,667/651,667 x 25,167)				
Net tax liability		21,120	21,463	16,131

Worked example 2

Asha, Pasha, and Rasha are three equal partners of a firm, **Asha, Pasha & Rasha Associates**. For the income year ended June 30, 2026, the firm produces the following information for the purpose of computing total income and tax liability of the firm as well as its partners.

(a) The firm owns a commercial building partly (one half) occupied by the firm to operate its own business and partly (another half) let out at a monthly rent of Tk. 35,000. Reasonable rent of the building is Tk. 800,000. During the year, the firm has also earned Tk. 40,000 as advance and Tk. 10,000 as first year's rent from a company by letting its top floor to hoard a commercial advertisement.

(b) The firm is engaged with trading of garments supplies which resulted following gross margin amount for the year:

Particulars	Amount (TK)	Amount (TK)
Sales		5,000,000
Cost of goods sold Beginning inventory	800,000	
+ Purchase	4,200,000	
Cost of Goods available for sale	5,000,000	
- Ending inventory	1,000,000	
Cost of goods sold		4,000,000
Gross margin		1,000,000

(c) Other relevant information is given below:
Stocks are always valued at 2% above cost. Analysis also reveals that purchase amount is overstated by Tk. 200,000 for the year. Total operating expenses charged during the period amounted to Tk. 450,000 which included following items among other things:

(i) Maintenance to building:

	Amount (TK)	Amount (TK)
Let –out portion	30,000	
Portion used for business		50,000

(ii) Municipal Taxes: Total amount of municipal taxes paid for the year was Tk. 40,000 out of which the tenant bears Tk. 10,000. And for repair and maintenance Tk. 150,000 paid.

(iii) Annual contribution to Cotton Dealers Association, a trade association is Tk. 10,000.

(iv) Donation to approved charitable institute Tk. 500,000.

(v) All the partners were active and took part in running business. Salaries paid to the partners were Tk. 40,000 to Asha, Tk. 50,000 to Pasha and Tk. 30,000 to Rasha.

(vi) Legal charges amount to a total of Tk. 50,000 including a fine of Tk. 10,000 charged due to its attachment with illegal form of business.

(vii) The firm charged Tk. 15,000 against profit to write-off uncollectible amount of receivable which is not allowed by the DCT.

(viii) The firm incurred a loss of Tk. 50,000 from speculative business.

(ix) Accounting depreciation charged was Tk. 38,000 which was Tk. 3,000 higher than tax depreciation.

(d) Asha had no other income during the year; however, Pasha and Rasha were also partners of another firm. The respective income of Pasha and Rasha from the firm for the year ended 30th June 2026 are as under:

Partners	Salary	Interest	Profit/ (Loss)
Pasha	Tk. 40,000	Tk. 10,000	Tk. (50,000)
Rasha	Tk. 60,000	Tk. 20,000	Tk. 20,000

(e) Rasha had income from interest on approved commercial securities of Tk. 30,000. Bank charged Tk. 300 as collection fee and Tk. 3,000 as interest on money borrowed from the bank for investment in approved commercial securities.

Compute tax liability of 'Asha, Pasha & Rasha Associates' for the assessment year 2026-27 and total income in the hands of partners from all sources.

Solution 2

(a) Computation of total income of the firm:

Particulars	Tk.	Tk.	Tk.
(1) Income from house property (U/s - 36)			
Annual value			
Actual rent (12 months @ Tk. 35,000)	420,000		
Roof top rent	10,000		
	430,000		
Reasonable rent (800,000/2)	400,000		
Whichever is higher		430,000	
Less:			
Repairs and maintenance (30% of annual value)	129,000		
Municipal tax for let-out portion (1/2 of 40,000)	20,000	149,000	
Net income from house property			281,000

(2) Income from business (u/s - 45) Gross profit as per Trading Account		1,000,000	
Add: Overstatement of opening stock (Tk. 800,000/1.02 x 0.02)	15,686		
Overstatement of purchase	200,000		
	215,686		
Less: Overstatement of Closing Stock (Tk. 1,000,000/1.02 x 0.02)	19,608		
		196,078	
		1,196,078	
Less: Operating expenses		450,000	
		746,078	
Add: Inadmissible Expenses			
1. Contribute to Aga Khan Dev. Network	50,000		
2. Municipal tax– ½	20,000		
3. Salaries to partners u/s 55	120,000		
4. Legal charges	10,000		
5. Bad debt not allowed by the DCT	15,000		
6. Loss on speculative transactions	50,000		
7. Accounting depreciation	38,000	303,000	
Less: Admissible expenses		1,049,078	
Tax depreciation		35,000	
Net income from business			1,014,078
(3) Income from other sources (U/s - 66)			50,000
From display of advertisement			**1,345,078**
Total income of the firm			

Computation of investment allowance:

Investment tax credit facility is only applicable for natural individual person only.

Computation of tax liability of the firm:

Income	Tax rate	Tax Amount (Tk.)
Tk. 1,345,078	27.5%	369,896

Allocation of profit among the partners Tk. 1,345,078

Particulars	Partners			Total	Amount left to be distributed
	Asha	Pasha	Rasha		
Amounts to be distributed Salaries					1,345,078
Profit (allocated on 1:1:1 ratio)	40,000 408,359	50,000 408,359	30,000 408,360	120,000 1,225,078	1,225,078
Total amount allocated	**438,359**	**438,359**	**438,360**	**1,345,078**	

Total Income in the hands of the partners:

Heads of income	Asha	Pasha	Rasha
1. Income from this firm			100,000
2. Income from another firm	438,359	438,359	438,360
3. Income from interest on securities			26,700
Total income	**438,359**	**438,359**	**565,060**

Self-assessment question

ABC & Co., a partnership firm engaged in trading business, submitted the following information for the income year ended 30 June 2026 firm earned net profit before Tax of Tk. 18,500,000.

Additional Information

1. Net profit has been arrived at after charging the following:
   (a) Partners' remuneration – Tk. 3,000,000
   (b) Interest on partners' capital @12% – Tk. 1,200,000
   (c) Depreciation as per books – Tk. 2,500,000
   (d) Donation to an approved charitable institution – Tk. 500,000
   (e) Donation to an unapproved organization – Tk. 300,000
   (f) Income tax paid – Tk. 900,000
   (g) Provision for doubtful debts – Tk. 700,000
   (h) Entertainment expenses – Tk. 800,000
   (i) Penalty imposed by a government authority – Tk. 250,000
2. The firm earned the following incomes during the year:
   (a) Interest on Fixed Deposit Receipts (FDR) – Tk. 1,000,000 (included in net profit)
   (b) Dividend from a listed company – Tk. 400,000 (included in net profit)
3. Capital expenditure of Tk. 1,500,000 on machinery was mistakenly charged to repairs and maintenance.
4. Tax depreciation allowable under the Third Schedule is Tk. 3,400,000.
5. The firm brought forward business loss of Tk. 2,200,000 and unabsorbed depreciation of Tk. 1,000,000.
6. Advance tax paid during the year amounted to Tk. 2,800,000.
7. Tax deducted at source (TDS) from FDR interest amounted to Tk. 100,000.
8. Assume the applicable income tax rate for the partnership firm is 27.5% and there is no minimum tax.

Required

Compute the total income of ABC & Co. for the income year ended 30 June 2026.

Chapter 20

Assessment of Companies

Introduction

Learning objectives

Examination context

Topic list

20.1 Companies

20.2 Method of accounting

20.3 Residential status of companies

20.4 Submission of return

20.5 Set-off and carry forward of losses and unabsorbed deprecition

20.6 Return of tax deducted at source

20.7 Advance payment of tax

20.8 Applicable tax rates for companies

20.9 Corporate Social Responsibility (CSR)

20.10 Scope of income

Worked examples & solutions

Self-assessment questions

Introduction

- Define different type of companies.
- Illustrate the assessment of companies.
- Identify the scope of income of companies.
- Specify major provisions regarding the assessment of companies.
- Identify rate for tax on varieties of income of a company.
- State the procedure of assessment of company's income.
- Specify the special provisions of assessing income of bank, insurance and leasing companies.

Practical significance

Corporate assessment is full of complexities that require special skill to handle. Understanding corporate accounting and converting it in line with the requirements of tax authorities is the first hurdle. Assessable income, non-assessable income, rebate, application of CSR, applying different rates for capital gain, dividend income and other income are some of the complexities.

As professional accountants mostly serve corporate houses, this chapter becomes mostly significant for them. Again, corporate tax planning, now-a-days, becomes a norm which necessitates extra skill on part of the qualified accountants. Government also requires this type of services from professional accountants due to the reasoning of maximizing its income.

Other common requirements like TDS, set-off and carry forward of losses, DTAA, grossing up of income are also applied in this chapter.

Stop and think

Did you realize that the assessment of companies is very important from every perspective? Are you confident enough to do the assessment of companies independently?

Working context

Assessment of tax is very important for every class of assessee. An assessee must require to be assessed in any way. Accountants have a great role to provide the technical assistance to their client in case of assessment. As there are many conditions, rules and procedures for different types of assessments, accountants' support sometime very significant to complete the assessment of their clients. In case of corporate client, this chapter becomes very significant.

Many companies are requiring the support for correct assessment from accountants in every year. Detailed knowledge of accountants on the technicalities of computation of total income and tax liability thereof for corporate assessee is important in case of required support for tax assessment.

Syllabus links

The topics covered in this chapter have the significance for professional study as you can utilize the knowledge throughout the application level and case study and also in your practical life.

Examination context

Exam requirements

In the examination, candidates may be required to:

- Do the assessment of corporate house.
- Identify total income of a company after adjusting expenses.
- Computing tax rebate in different scenario.
- Identify non-assessable income and its application in computing total income.
- Identify the procedure of assessment.
- Compute net tax liability after giving tax credit.
- Do the specialized assessment of bank, insurance and leasing companies.

Question practice

For question practice on these topics, go to the suggested answers covering this chapter.

ASSESSMENT OF COMPANIES

Section overview

- Scope of income for company is different from other assessee.
- Applicable tax rates for company are different from other assessee.
- Capital gain and dividend income of companies are taxable at different rates.
- Assessment of banks, insurance and leasing companies are to some extent different.
- Companies will enjoy tax rebate for CSR activities in specific areas.
- Company assessee will enjoy some common benefits like set-off and carry forward of losses, tax rebate, TDS adjustments, credit of advance tax etc.

20.1 Companies

Assessment of companies means applying the assessment procedures on the income of companies. Company has a definite meaning in the Income Tax Act, 2023. For the purpose of company tax assessment, some related definitions are produced below:

As per section 2(31) of the ITA, 2023, "Company" means a company as defined in the Companies Act, 1994 and includes -

(a) A liaison office, representative office or branch office or permanent establishment of a foreign entity.

(b) Body incorporated by the law of a foreign country.

(c) Entity engaged in banking, insurance, leasing or financing activities.

(d) Organization registered under NGO Affairs Bureau or Microcredit Regulatory Authority.

(e) Firm, association of person, or artificial juridical person if any of partner or participating persons is a company under the Companies Act, 1994.

(f) State owned enterprise, company, corporation, board, statutory or autonomous body corporate or authority having commercial activities.

(g) Any foreign association or body, not incorporated under any law, as declared by the Board.

Companies Act 1994 defines 'company' to mean a company formed and registered under the act or an existing company [U/s – 2(c) of Companies Act, 1994]. Again, 'existing company' means a company formed and registered under any law relating to companies in force at any time before the commencement of the act, and is in operation after commencement of the act [U/s – 2(h) of Companies Act, 1994].

However, at the time of prescribing the rate of taxes, companies are classified as –

1) Bank, Insurance, Financial Institutions
2) Mobile Phone Operator Company
3) Publicly traded company
4) Non-publicly traded company
5) Tobacco Manufacturing Company
6) One Person Company (OPC)

As per the provision of Income Tax Act, computing profit and loss for some specialized business shall be as follows:

- 4th Schedule: Computation of the profits and gains of insurance business
- 5th Schedule–Part I: Computation of profits and gains from the exploration and production of petroleum and the determination of the tax thereon
- 5th Schedule–Part II: Computation of profits and gains from the exploration and extraction of mineral deposits (other than oil and gas) in Bangladesh

Due to the typical nature of business, Income Tax Act, 2023 prescribes different methods of computation of profit and loss from these businesses.

Whatever the definitions or classifications made, profits or gains from any type of companies are taxable at specified rates.

20.2 Method of accounting

Section 73 of ITA, 2023, all company taxpayers, and any person deriving income from long-term contracts, and firms, associations of persons, Hindu undivided families, or artificial juridical persons having turnover exceeding Tk. 10 crore or capital exceeding Tk. 5 crore,

the financial statements submitted with the income tax return shall be audited and certified by a Chartered Accountant.

As per Section 75(2), where accounts of a taxpayer have not prepared and maintained in accordance with the provision of section 73, DCT can compute tax on such basis and such manner he/she thing fit.

So it is very important that before taking any action under Section 75(2) the DCT need to demonstrate that a non-compliance of Section 73 has actually occurred.

20.3 Residential status of companies

Residential status of companies is different from an individual and Income Tax Act, 2023 prescribes different rules for that. On the basis of residential status applicable for companies, there may be Bangladeshi or foreign companies. The provisions for deciding the residential status of companies are given below:

"Resident", in respect of any income year, means a Bangladeshi company or any other company the control and management of whose affairs is situated wholly in Bangladesh in that year [section– 2(45)(c)]. And, "non-resident" means a person who is not a resident [section – 2(4)]. Thus, to be resident:

1. The company should be a Bangladeshi company, i.e., formed and registered under the Companies Act, 1994 and includes a body corporate established or constituted by or under any law for the time being in force in Bangladesh having in either case its registered office in Bangladesh; or
2. Any other company the control and management of whose affairs are situated wholly in Bangladesh in that year.

If any of the two conditions have not been fulfilled, the status of such a company will be non-resident.

20.4 Submission of return

For the company taxpayers, the return shall be submitted on the 15th day of the 9th month following the end of the income year, or, where such 15th day falls before the 15th day of September, then the 15th day of September following the end of the income year, provided that taxpayer shall receive tax incentive or pay additional tax as below:

SL.	Time of submission	Incentive or additional tax
1.	At least two months before the expiry of the return filing deadline	An incentive equal to 5% of the tax payable under section 173(2) or BDT 25,000, whichever is lower.
2.	If the return is filed after the time mentioned in serial number 1 but before the expiry of the statutory date which is usually 15th day of the 9th month from the end of the income year.	No incentive and no additional tax
3.	After the return filing deadline but within the remaining period of the assessment year	An additional tax equal to 2% of the tax payable under section 173(2) or BDT 25,000, whichever is higher.

The return should be prepared in a prescribed form by inserting necessary descriptions and information, attaching schedules, statements, accounts, annexures, and documents, and signed by the principal officer as defined in section 2(54) of ITA, 2023. Further, tax computation sheet, as per section 73, shall be prepared and signed off by the chartered accountants or cost and management accountants or income tax practitioner.

20.5 Set-off and carry forward of losses and unabsorbed depreciation

Where a loss is assessed under any specific head of income, the company is permitted to set-off the loss against its income assessed under different heads in the same year. However, losses incurred under the categories of capital gains, business, speculative business, or losses related to the business of tobacco products cannot be set-off against any income from other heads. In cases where the loss cannot be entirely set-off, the remaining unabsorbed loss will be carried forward and set-off against income under the same heads over six consecutive assessment years.

Moreover, losses from any sources or heads where tax is exempted, or where tax is applied at a reduced rate, or where they are subject to a minimum tax requirement, cannot be set-off or carried forward.

Unabsorbed depreciation can be carried forward for an unlimited period. It is important to note that losses shall be carried forward and set off first; subsequently, unabsorbed depreciation needs to be utilized for set-off until it is fully absorbed.

20.6 Return of tax deducted at source

In accordance with the section 177 of the ITA, 2023, every company including other withholding entities, shall file a return of tax deducted or collected at source on quarterly basis (also called as withholding tax) to the DCT where the company is being assessed. Such return shall be prepared in the prescribed form and signed and verified by the principal officer of the company. Such return shall be filed as per following manner:

Date	Applicable Months
25 October	July, August and September
25 January	October, November and December
25 April	January, February and March
25 July	April, May and June

20.7 Advance payment of tax

Every company shall have to pay advance tax in four equal installments falling on 15th September; 15th December; 15th March and 15th June of each financial year if the latest assessed income exceeds Tk. 1,000,000. However, cigarette manufacturing company will pay advance tax monthly @ 5% on net sale.

On failure of payment of any installment, the company will be deemed to be an assessee in default. Penalty may be imposed for such default. If a company estimates that its income during any financial year will be less than the last assessed income, it may submit an estimate of income and pay the advance tax accordingly.

If the amount of advance tax together with the tax deducted at source, if any, is less than 75% of the tax payable on the basis of regular assessment, simple interest @10% per annum is leviable on the amount by which the tax so paid and deducted falls short of 75% of the assessed tax. On the other hand, the company is entitled to receive interest @10% on the amount by which the aggregate sum of advance tax paid during a financial year exceeds the amount of the tax payable on the basis of regular assessment. However, interest will be 50% higher if the person files the return after the expiry of the assessment year.

20.8 Applicable tax rates for companies

Charge of turnover tax: section 163(6)

In accordance with the section 163(6), where the tax on income from business or profession is less than the turnover tax specified in the following table, then irrespective of profit or loss, the person shall pay turnover tax on the gross receipts:

Sl. No.	Classes of assessee	Turnover tax
1.	Manufacturer of cigarette, bidi, chewing tobacco, smokeless tobacco, or any other tobacco products	3% of the gross receipts
2.	Carbonated beverage and sweetened beverage manufacturer	2.5% of the gross receipts
3.	Mobile phone operator, NTTN	1.5% of the gross receipts
*4.	Any other cases For gross receipt up to Tk. 2 crore For gross receipt from Tk. 2 crore to 4 crore For gross receipt above Tk. 4 crore	 0% of the gross receipts 0.50% of the gross receipts 1% of the gross receipts

Provided that turnover tax shall not apply to a person deriving income from the following businesses or professions:

(a) import, distribution or open-market sale of fertiliser, seeds or essential consumable goods by any government body or state-owned organisation or corporation.

(b) commission business.

(c) delivery order (DO) business.

(d) money-exchange business, and

(e) the business of buying and selling gold, silver, gold jewellery, silver jewellery, gems, diamonds or platinum.

Provided further that, rate of turnover tax shall be 0.20% for an industrial undertaking engaged in manufacturing and belongs to serial 4 in the above table for the first 3 years since commencement of production.

Provided further that where the amount of turnover tax paid exceeds the tax payable for that year, the excess amount shall be carried forward and set off against the tax payable in subsequent year.

Provided further that where an assessee has income from any source that is exempt from tax or is subject to tax at a reduced rate, the turnover tax shall be computed proportionately, having regard to the extent of such exemption or reduced rate of tax, as the case may be.

Illustration

Xerox Machine Ltd. is a Private Limited Company registered in Bangladesh. Following information are related to the income year 2025-2026:

Net operating income	Tk. 1,250,000
Interest income	Tk. 250,000
Total income	Tk. 1,500,000

Sales revenue / turnover for the year is reported at Tk. 30,000,000. Applicable tax rate is 27.5% as the company fails to fulfill the conditions to avail 25% tax rate. Assuming there was no tax deducted at source. Calculate tax liability of Xerox Machine Ltd. for the assessment year 2026-2027.

Solution:

Income tax at regular rate i.e. 27.5% is Tk. 412,500 (1,500,000 X 27.5%).

Turnover tax on business income= Tk. 30,000,000 x 0.50% = Tk. 150,000 whereas regular tax on business income= 1,250,000 x 27.5%= 343,750.

Since, the regular tax is greater than the turnover tax; the tax liability of Xerox Machine Ltd. will be Tk. 412,500. Turnover tax on interest income is not calculated here as turnover tax is applicable on business income only.

Corporate tax rate at a glance for the Assessment Year 2026-27

Type of Taxpayers		Tax Rates
Publicly traded companies offloaded over 10% of shares via Initial Public Offer (IPO) or direct listing or Repeat Public Offer (RPO)		22.5%*
Other publicly traded companies		25%*
Other companies as defined in Section 2(31)		27.5%*
Banks, insurance, and finance companies	Publicly traded	37.5%
	Non-publicly traded	40%
Cigarette, bidi, zorda and other tobacco product manufacturing companies		45%
Mobile phone operator companies		45%**
Taxpayers other than company manufacturing cigarette, bidi, zorda, gul and other tobacco products		45%
Trust, association of persons and firm		27.5%
Cooperative societies		20%
Private university, private medical, dental and engineering college, and college of information and communication technology education		5%

*If all transactions in the income year are made through the banking channel, tax rate will be decreased by 2.5%.

** Tax rate for listed mobile company shall be 40% if offloaded at least 10% of share capital where pre-initial public placement does not exceed 5%. Further, 10% tax rebate is allowed in the year of IPO if 20% shares are offloaded through Initial Public Offering (IPO).

Please note, employers will receive a tax rebate at a rate of 5% of the total tax liability or 75% of the salary paid to disabled persons if the employer offers jobs to disabled persons constituting over 10% of the total manpower or more than 25 persons. A similar tax rebate shall be applicable if the employer offers employment to third-gender people.

20.9 Corporate Social Responsibility [SRO 229- dated 04-07-2011, SRO.223 dated 27/06/2012 and SRO 186- dated 01-07-2014]

Allowable limit: Maximum limit of allowable expenditure under the head Corporate Social Responsibility (CSR) is 20% of total income or Tk. 120,000,000; or actual CSR whichever is lower. If actual expenditure exceeds this limit, such amount exceeding the limit cannot be used to compute tax rebate.

Tax rebate: Tax rebate will be computed @ 10% on such expenditure for CSR within the maximum limit.

Conditions: To claim tax rebate against CSR, the company must fulfill the following conditions:

1. Must pay salaries and allowances to its worker regularly and must have waste treatment plant if it involves with the production of industrial goods;

2. Must pay income tax, VAT and duty timely and must repay institutional loans;
3. Can only donate money to the institutions recognized by the government for the purpose of CSR;
4. Must fulfill all rules as per Bangladesh Labour Law, 2006.
5. Amount spent for CSR will not be considered as business expenditure.
6. Documents in support of actual CSR expenditure to be submitted to the concerned DCT.
7. Submit CSR plan to NBR and obtain exemption certificate.

However, no company can charge such expenditure on account of CSR in manufacturing or profit and loss account. Such company shall also submit sufficient documents with DCT to prove whether the expenditure claimed as CSR is really spent.

Areas of CSR

To encourage the companies to contribute towards the society, a new provision has been introduced in 2009 through an SRO and thereafter the area has been expanded in 2010 and further modified in 2011.In the year 2012 two new areas have been included and one area shifted to 6th Schedule (Part-I) Para-47. In 2014 one new area has been added. The present areas are:

1. Donation through any government bodies to reduce the misery of people of areas affected by natural calamities like Cyclone, Earthquake, Hurricane, Flood etc.;
2. Donation to the institutions engaged in the establishment of old home and its management;
3. Donation to any social organization engaged in the Welfare of mentally or physically disable people;
4. Donation to the educational institutions engaged in educating street / homeless children;
5. Donation to such institutions engaged in housing projects for people living in slums;
6. Donation to social organizations involved in building public awareness on women-right and against dowry system;
7. Donation to organizations involved in feeding and rehabilitating orphan / homeless children;
8. Donation to organizations involved in research on liberation war, campaign to uphold the spirit of liberation war and welfare of freedom fighters;
9. Donation to organizations engaged in maintaining healthy sewerage systems in Chittagong hill tract, alluvial land, river breakage areas;
10. Donation to organizations engaged in the treatment of hare-lipped, cataract; cancer, leprosy;
11. Donation to individuals and organizations engaged in providing Medicare services to the Acid Victims
12. Donation to specialized hospital providing free medical services to poor patients and work for improving the quality of treatment e. g., hospitals for Cancer, Lever, Kidney, Thalassemia, Eye and Cardio.
13. Donation to public universities;
14. Donation to any government recognized educational institution established for providing educational scholarship and financial assistance to poor freedom fighters' children along with promoting technical and vocational education to the poor meritorious students;

15. Donation to government or MPO included private educational institution engaged in establishing lab for training computer or IT or implementing English education programs;
16. Donation to organizations engaged in providing technical and vocational training to unskilled or semi-skilled workers for exporting manpower;
17. Donation to organizations engaged in the development of infrastructure and training for sports at national level;
18. Donation to national level museum established or to be established for preserving the memory of education war;
19. Donation to national level institutions engaged in protecting the memory of the father of the nation; and
20. Donations made to non-profit voluntary social welfare organizations engaged for running rehabilitation center, creation of awareness and treatment of HIV, AIDS and Drug addicted
21. Donations made to non-profit voluntary social welfare organizations engaged for running rehabilitation center for recovered children/women of cross boarder trafficking.
22. Donation to Govt. approved fund for helping victims of natural disaster or for any tournament or for any national level program.

20.10 Scope of income of a company

Income of a company should be computed with reference to the following sections:

Section 45: Income from business

Section 46: Special areas of business income

Section 49: General allowable deductions in computation of income from business

Section 50: Special allowable deduction in computation of income from business

Section 55: Deduction not admissible in certain circumstances

However, company may have income from following sources with respect to application of tax:

(a) Dividend income
(b) Capital gain
(c) Other income

Worked examples and solutions

Example 1

M/s. John Morris Inc. is a multinational company doing business in Bangladesh. The company filed return of income for the assessment year 2026-27 showing net income of Tk. 3,000,000. Examination of the audited financial statements filed with the return of income revealed the following:

1. Fine of Tk. 11,000 paid for violation of customs law charged to P&L Account.
2. Two Nissan Petrol Jeep purchased for Tk. 7,500,000 each during the year. Depreciation @ 10% charged on the full cost of the vehicles.
3. To procure business Tk. 1,000,000 has been paid as commission to a local agent. In making the payment, the provision of section 94 of the Income Tax Act, 2023 has not been complied with.
4. The company sold a motor vehicle for Tk. 465,000. Original cost of the vehicle was Tk. 525,000 and the WDV was Tk. 325,000. This has not been reflected in the accounts.
5. Tk. 15,000 donated to an un-recognized school.
6. Miscellaneous expenses include Tk. 722,000 paid as salaries to three servants who are working at the residence of the Managing Director. Further, conveyance expenses include Tk. 2,320,000 paid for air ticket of wife and son of the Managing Director for the visit of a European country.
7. Interest expense claimed at Tk. 3,350,000. The company has outstanding bank loan of Tk. 10 crore.
8. The company gave Tk. 7,500,000 interest-free loan to a sister-concern in Bangladesh.
9. Salary includes Tk. 330,000 paid to one Director working at the head office at California. He never visited Bangladesh and no tax, as such, has been deducted at the time of making the payment.

From the above information compute the total income of the company for tax purpose.

Solution 1

M/s John Morris Inc.
Computation of total income
Assessment year 2026-27

Particulars	**Amount (Tk.)**	**Amount (Tk.)**
Net profit before tax		**3,000,000**
Add: Inadmissible expenses		
Fine for violation of customs law (Note-1)	11,000	
Excess depreciation (Note-2)	300,000	
Interest @ 12% on informal loan u/s 46(11 ka) (Note-7)	900,000	
Donation to an un-recognized school (Note-5)	15,000	
MD's personal exp. borne by the company (Note-6)	3,042,000	4,268,000
		7,268,000
Revenue gain on sale of motor vehicle (Note-4)		140,000
Total income		**7,408,000**
Tax at 27.5%		2,037,200
+Tax u/s 56 for non-deduction of TDS (Note-8)		148,500
Total tax payable		**2,185,700**

Notes:

(1) Any fine or penalty for a breach of law is not an allowable expenditure under sections 49 and 54 of the Income Tax Act, 2023.

(2) Depreciation on the two jeeps shall be Tk. 1,200,000 (Tk. 6,000,000 × 2 × 10%). Since depreciation on Tk. 7,500,000 per jeep has been charged (as per 3rd schedule price of car for depreciation is capped to Tk. 60,00,000), the excess depreciation Tk. 300,000 [(Tk. 1,500,000 – Tk. 1,200,000)] has been disallowed.

(3) Section 94 of the Income Tax Act, 2023 requires deduction of tax at source on commission paid for product distribution, not on commission paid for procuring business for the company. Therefore, no disallowance arises in this case.

(4) The difference between the sale proceeds of the motor vehicle and its written down value (WDV), amounting to Tk. 140,000, is taxable as business income.

(5) The donation made to an unrecognized school is not an allowable deduction and shall be disallowed.

(6) The servant's salary and travel ticket fare are completely MD's personal expenditure which were borne by the company. Such expenditure which are not related to business is not allowable expenditure as per section 55(da). So full such expenditure Tk. 722,000 and Tk. 2,320,000 aggregating Tk. 3,042,000 shall be disallowed.

(7) Interest @ 12% on informal inter-company loan will be treated as income from business as per section 46(11 ka). As it was interest free loan, so full 12% will be added as income from business.

(8) The director resides in the USA and is therefore a non-resident. Accordingly, the applicable TDS rate on salary is 30%. But tax was not deducted. Therefore, TDS on the salary of Tk. 330,000 is Tk. 99,000 (Tk. 330,000 × 30%). In addition, an additional tax of Tk. 49,500 (50% of Tk. 99,000) is payable as per section 56. Thus, the total tax for non-deduction of tax at source would be Tk. 148,500 (Tk. 99,000 + Tk. 49,500).

Example 2

The profit and loss account of Care Pharmaceuticals Ltd. for the year ended on June 30, 2026 reports net income of Tk. 2,000,000. A scrutiny of accounts and supporting documents revealed the following facts:

(a) During the year the company sold some of its pharmaceutical supplies that remained unused for a long time in the storeroom. The company sold the supplies at a loss of Tk. 150,000 as the expiry period is very close and charged such loss against current year's profit.

(b) The company recovered Tk. 20,000 from bad debt which was written off in earlier year and was allowed by the tax authority. The amount so recovered is credited to sundry debtors account.

(c) Office rent paid in cash Tk. 80,000

(d) The company has a trading liability with one overseas company to the tune of Tk. 150,000 which has been totally waived by the overseas company under special agreement during this year.

(e) During the year, the company sold one equipment for Tk. 180,000 which was purchased at a total cost of Tk. 130,000 and had a WDV of Tk. 90,000 on the date of sale. The company reports Tk. 90,000 as gain on sale of equipment in the credit side of profit and loss account.

(f) Due to a sudden fire on the factory building, the extended portion of the building is totally destroyed and compensation received from the insurance company total Tk. 250,000. In addition, the company realized an additional sum of Tk. 30,000 by selling

the scrap. The extension of the building was constructed at a total cost of Tk. 400,000 and depreciation charged to date amounts to Tk. 50,000.

(g) The company sold a scientific apparatus used for scientific research for Tk. 80,000 which was originally purchased at Tk. 150,000 and fully depreciated. The sale proceed is not recorded at all.

(h) The company had export quota for exporting garments to EU countries. As the company has recently changed the line of operation (switched from garments manufacturing to pharmaceuticals), it transferred the export quota to another garment manufacturer for a sum of Tk. 70,000. This income is not reported at all.

(i) The company is entitled initial depreciation Tk. 500,000 for new machinery installed and run commercial production during the year.

(j) Sum of Tk. 120,000 donated to an institution for scientific research which is not approved by NBR.

(k) Sum of Tk. 500,000 expended for establishing a hospital for the benefit of employees is charged as revenue expenditure. The health benefit was provided by the company without taking any charge from the employees.

(l) Annual perquisites enjoyed by MD, Chairman and 5 members of Board of Directors amounted to Tk. 14,450,000.

(m) Normal accounting depreciation charged Tk. 250,000 but tax depreciation amounts to Tk. 300,000 excluding the amount of initial depreciation on machinery.

(n) Value of the free sample distributed claimed Tk. 200,000. Annual turnover during the year was Tk. 8,000,000.

(o) Cash salary paid Tk. 100,000

(p) Sum of Tk. 50,000 expended to train employees (Bangladeshi citizen) in connection with a scheme approved by the Board.

(q) The company expended a sum of Tk. 200,000 for visits abroad as a member of trade delegation sponsored by the government.

(r) Annual membership fee of Tk. 150,000 is paid to Bangladesh Pharmaceutical Society which is a professional body recognized by the Board.

(s) Expenditure on publicity and advertisement during the year Tk. 300,000.

(t) Entertainment claimed Tk. 150,000.

Required: Compute the total income of the company for the assessment year 2026-27.

Solution 2:

Care Pharmaceuticals
Computation of total income
Assessment year: 2026-27

Particulars		Tk.	Tk.
Income from business:			
Net profit as per Profit & Loss Account			2,000,000
Add:	Inadmissible expenses		
	Payment for scientific research not approved by NBR	120,000	
	Accounting depreciation (for separate consideration)	250,000	
	Excess amount of free sample [note-8]	40,000	

	Salary paid without bank transfer disallowed u/s 55	100,000 80,000	
	Rent paid without bank transfer disallowed u/s 55	500,000	
	Hospital establishment exp. disallowed u/s 55 being capital expenditure.	150,000	
	Entertainment (for separate consideration)		
			1,240,000
Less:	Admissible Expenses		
	Initial depreciation on machinery (1st year)	500,000	
	Tax depreciation (normal)	300,000	
	Loss on fire [350,000-280,000] [note-5]	70,000	(-)870,000
			2,370,000
Add:	Income not credited to P/L Account		
	Bad debt recovered [note-2]	20,000	
	Cancellation of indebtedness [note-3]	150,000	
	Sale proceeds of fully depreciated scientific apparatus	80,000	
	Income from transferring export quota	70,000	320,000
			2,690,000
Less:	Capital gain on sale of equipment shown as revenue gain [note-4]		(-)50,000
			2,640,000
Less:	Admissible entertainment [note-9]		(1,05,600)
Taxable income from business or profession			**2,534,400**
Capital gain [180,000-130,000]			50,000
Total income			**2,584,400**

Notes:

1. Loss on sale of supplies is an allowable deduction because supplies does not fall under the definition of capital asset as per section 2(77).
2. Amount of bad debt recovered will be treated as current year's income and should be credited to the profit and loss account, because bad debt was allowed earlier as expense.
3. As the company received waiver of a trading liability during this year, it should be treated as deemed business income u/s 46(8).
4. Computation of total gain, Capital Gain and Revenue Gain from the sale of equipment:

	Particulars	**Tk.**
1.	Sale proceeds	180,000
2.	Initial cost	(-) 130,000
3.	Capital gain (1-2)	50,000
4.	Written down value (cost less depreciation)	90,000
5.	Revenue gain (2-4)	40,000
	Gain on sale of equipment as shown in P/L Account (1-4)	**90,000**

5. As the insurance compensation received Tk. 250,000 plus scrap value Tk. 30,000 is less than the amount of written down value of the building Tk. 350,000, the difference Tk. 70,000 will be deducted from business income as per section 46(3) of ITA, 2023.
6. Sale proceeds of the asset used for scientific research shall be the deemed income in the year of sale.

7. Allowable perquisite limit for MD, Chairman and 5 Directors will be Tk. 17,500,000 (Tk. 2,500,000 ×7). Thus, there is no excess amount of perquisite, so nothing is disallowed as excess perquisites.
8. The allowable rate of free sample for a pharmaceutical industry is 2% for annual turnover up to Tk. 10 crore. The turnover of the company was Tk. 8.000,000 and free sample allowed is Tk. 160,000 (2% of Tk. 8,000,000). Thus, excess amount of Tk. 40,000 (Tk. 200,000 – 160,000) is disallowed.
9. Amount of admissible entertainment allowance on Tk. 2,640,000 at 4% is 105,600.

Example 3

The profit and loss account of Star Ltd. a listed Public Limited Company is given below for the income year 2025-26.

Star Ltd.
Profit and Loss Account
For the year ended on June 30, 2026

Particulars	Tk.	Particulars	Tk.
Cost of goods sold	1,500,000	Sales	3,500,000
Salaries [Note-1]	700,000	Dividend	120,000
Rent	150,000	Interest	30,000
Advertisement	200,000	Gain on sale of Asset [Note-4]	40,000
Interest on Loan	80,000	Interest on Tax-Free Securities	15,000
Utility Expenses	60,000	Interest on Foreign Investment	20,000
Donation	150,000		
Transportation	110,000		
Audit Fee	200,000		
Bad Debt	90,000		
Contribution to RPF	70,000		
Income Tax paid in Advance	30,000		
Fines paid to Customs	20,000		
Annual Membership	15,000		
Legal Expenses **[Note-3]**	25,000		
Insurance Premium	35,000		
Sundry Expenses	12,000		
Depreciation **[Note-2]**	65,000		
Net Profit	213,000		
Total	**3,725,000**	**Total**	**3,725,000**

Determine the taxable income of the company and net tax liability thereof. Consider the given data below and assume that:

[1] Salaries are paid in cash without bank transfer. Tk. 450,000.
[2] Tax depreciation amounts to Tk. 50,000
[3] Legal expenses are paid due to the infringement of trademarks
[4] The company has sold an asset for Tk. 100,000 that the company has purchased 4 years back at a cost of Tk. 80,000 with a written down value of Tk. 60,000 till date.

Solution 3:

Star Ltd.
Computation of Total Income
Assessment Year: 2026-27

Income from Business:			**Tk.**
Net Profit as per Profit and Loss Account			**213,000**
Less: Non-business income for consideration at respective head:			
[1]	Dividend	120,000	
[2]	Interest	30,000	
[3]	Interest on tax-free securities	15,000	
[4]	Interest on foreign investment	20,000	
[5]	Capital gain on sale of asset (100,000-80,000)	20,000	205,000
			8,000
Add: Inadmissible Expenses			
[1]	Salaries (paid in cash)	450,000	
[2]	Donation (assuming that condition to get CSR also not fulfilled)	150,000	
[3]	Income Tax (as income tax is not an expense)	30,000	
[4]	Fine (inadmissible expense due to violation of law)	20,000	
[5]	Legal expense (due to infringement of other's trademark)	25,000	
[6]	Accounting Depreciation (for consideration as per 3rd schedule)	65,000	740,000
			748,000
Less: Tax Depreciation as per 3rd schedule			50,000
Income from business			**698,000**
Capital Gain (sales price 100,000-cost price 80,000)			20,000
Income from financial assets:			
[1] Cash Dividend		120,000	
[2] Interest income		30,000	
[3] Interest on foreign investment		20,000	170,000
Total Income			**888,000**

Tax calculation:

Regular tax:	
Tax on total income excluding cash dividend & capital gain (22.5% of Tk. 748,000) (assuming condition to avail 20% tax rate not fulfilled)	168,300
Tax on dividend (20% of Tk. 120,000)	24,000
Tax on capital gain (15% of Tk. 20,000)	3,000
Total tax	195,300

or

Turnover tax: [As per changes at section 163 through Finance Act, 2026, turnover tax is applicable on business income only not on any other income]		
Tax on business turnover Tk. 3,500,000 @0%	0	
Tax on dividend @20% on Tk. 120,000	24,000	
Tax on capital gain @15% @15% on Tk. 20,000	3,000	
Tax on interest income @22.5% on Tk. 50,000	11,250	
Total	38,250	
Tax liability, higher one.		195,300
Less: Advance tax paid		(30,000)
Less: TDS on cash dividend (120,000x20%)		(24,000)
Less: TDS on bank interest (30,000x10%)		(3,000)
Net tax liability		**138,300**

Note: Due to lack of information foreign tax credit is not possible to allow on interest on foreign investment as per section 244 or 246

Example 4

The audited financial statement of XYZ Pharmaceuticals Limited for the year ended 30 June, 2026 is as follows:

Particulars	**Tk.**
Sales	12,000,000
Cost of Sales	(-)10,200,000
Gross Profit	**1,800,000**
Other Operating Income	1,600,000
Administrative Expenses	(-)14,500,000
Selling and Marketing Expenses	(-)74,500,000
Other Operating Expenses	(-)1,000,000
Profit from Operations	**= (-)86,600,000**
Financial Expenses	(-)25,000,000
Foreign exchange loss	(-)2,188,000
Profit/ (Loss) before Tax	**(113,788,000)**

Other information:

(i) Depreciation booked in the accounts during the year Tk. 30 million. As per tax law depreciation for the year would be Tk. 50 million.

(ii) Royalty charged to expense during the year Tk. 0.96 million (8% of net sales).

(iii) Expense incurred for free sample distribution Tk. 5 million.

(iv) Out of the total employees of the company 10 employees' salaries include perquisites on an average Tk. 2,550,000 each.

(v) Provision for gratuity charged during the year Tk. 1,000,000, whereas actual gratuity paid during the year Tk. 900,000.

(vi) The company contributed to the employees' provident fund during the year Tk. 1,500,000. The provident fund is duly recognized by concerned Commissioner of Taxes.

(vii) There was entertainment expense of Tk. 250,000 charged during the year.

(viii) Financial expense includes Tk. 2 million for the interest paid on the foreign loan received from its overseas parent company. The rate of interest is LIBOR+4.50. The transfer pricing officers of NBR have assessed that the arm's length rate of interest of the similar loan should LIBOR+3.0 [Assume the LIBOR rate was 0.50]

Required:

Compute total income and tax liability of the company for the assessment year 2026-27.

Solution 4:

XYZ Pharmaceuticals Ltd.
Computation of Total Income
Assessment year 2026-27

Particulars	Tk.	Tk.
Net profit (loss) before tax		(113,788,000)
Add:		
Accounting depreciation (for consideration as per 3rd schedule)	30,000,000	
Royalty expenses fully disallowed (as shown profit is negative)	960,000	
Free samples (for consideration as per section 55)	5,000,000	
Excess perquisites (Tk. 50,000 x 10 employees)	500,000	
Provision for gratuity (as provision is not allowable other than actual)	1,000,000	
Entertainment expenses (for consideration as per section 55)	250,000	
Interest on foreign loan (for consideration as per arm's length rate)	2,000,000	39,710,000
Less:		
Tax depreciation	50,000,000	
Samples expenses (Tk. 12,000,000 x 2%=240,000)	240,000	
Gratuity actually paid during the year	900,000	
Entertainment (Due to loss, no entertainment is allowed)	-	
Interest on foreign loan at arm's length rate (2,000,000/ 5 X 3.5)	1,400,000	(52,540,000)
Total Income		**(126,618,000)**

Computation of tax liability of the company

Tax liabilities	**Amount**	**Tax**
Business loss	(126,618,000)	Nil
Turnover tax on gross receipt at 0% (Tk. 12,000,000 x 0%)		Nil
Total tax payable		**Nil**

Example-5

Star Consumer Limited is a private limited company engaged in manufacturing and marketing of cosmetic products. The income statement of the company for the income year 2025-26 is as follows:

Debit	Tk.	Credit	Tk
Opening stock	8,000,000	Revenue	75,000,000
Purchase	43,000,000	Closing stock	6,000,000
Factory overhead	3,000,000		
Depreciation	2,000,000		
Gross profit (c/d)	25,000,000		
	81,000,000		81,000,000
Salaries and wages	6,970,000	Gross profit (b/d)	25,000,000
Office rent	1,100,000	Interest on FDR (Gross)	300,000
Legal expenses	320,000	Dividend (Net of tax)	40,000
Sample expenses	180,000	Bad debt recovered	95,000
Bad debt	120,000	Gain from sale of old machine	275,000
General expenses	120,000		
Research cost	260,000		
Interest paid	130,000		
Annual subs. to MCCI	20,000		
Tax expenses	3,627,500		
Net profit after tax	12,862,500		
Total	**25,710,000**		**25,710,000**

Other information:

a. Raw materials costing Tk. 170,000 was purchased from Mr. X by making payment through cash.

b. Depreciation allowance as per 3rd Schedule of the ITA, 2023 is Tk. 1,800,000.

c. Office rent was paid in cash although tax was deducted properly.

d. Legal expenses included Tk. 100,000 paid to a consultant without deducting tax at source.

e. Salaries included excess perquisite of Tk. 210,000.

f. General expenses included Tk. 60,000 paid for Director's family expenses.

g. A five years old machine having cost of Tk. 500,000 and book value of Tk. 300,000 was sold for Tk. 575,000.

h. A sum of Tk. 170,000 included in salary was related with gratuity provision.

i. A business loss of Tk. 16,000,000 was carried forward from previous year for setting off against current year business profit, if any.

Based on the above information, compute total income and tax liability of the company for the income year 2025-26.

Solution 5:

Star Consumer Limited
Computation of total income and tax liability
Assessment year: 2026-27

	Tk.	Tk.
1. Income from Business:		
Profit before tax (Profit Tk. 12,862,500 + Tax exp. 3,627,500)		16,490,000
Less: Non-business income for separate consideration:		
[1] Interest on FDR	300,000	
[2] Dividend income	40,000	
[3] Capital gain from sale of machine [575,000-500,000]	75,000	(415,000)
		16,075,000
Add: Expenses to be considered separately:		
[1] Provision for gratuity (Note-3)	170,000	
[2] Accounting Depreciation (separate consideration)	2,000,000	
[3] Sample expenses (for consideration as per sec 55)	180,000	2,350,000
Add: Inadmissible expenses:		
[1] Rent paid in cash- as per section 55	1,100,000	
[2] Excess Perquisites-as per section 55	210,000	
[3] Director's personal family expenses as per sec. 55	60,000	1,370,000
		19,795,000
Less: Admissible expenses as per law:		
[1] Tax depreciation	1,800,000	
[2] Allowable sample expenses (Note-1)	180,000	(-) 1,980,000
		17,815,000
Less: Loss carried forward from previous year [section 70]		(-) 16,000,000
Taxable Income from business		**1,815,000**
2. Capital gain		
Capital gain on sale of old machine (Note-2)		75,000
3. Income from financial asset under section-62		
[1] Interest on FDR		300,000
[2] Cash Dividend income [Gross-up @ 20%]		50,000
Total Income		**2,240,000**

Tax calculation	Amount	Rate	Tax
[1] Regular tax rate on Business income	1,815,000	27.50%	499,125
or			
[2] Turnover tax	75,000,000	1%	750,000

[3] Higher of [1] & [2]			750,000
[4] Tax u/s 56 for non- TDS (Note-5)			22,500
[5] Capital gain	75,000	15%	11,250
[6] Interest income	300,000	27.50%	82,500
[7] Dividend	50,000	20%	10,000
Total tax liabilities			**876,250**

Less: TDS and advance payment of tax:

[1] Advance payment of tax	3,627,500	
[2] TDS from Dividend	10,000	
[3] TDS from interest income 3,00,000 x 20%=	60,000	3,697,500
Refundable=		**2,821,250**

Notes:

1) Free Sample Expenses:

On Turnover Tk. 75,000,000 @ 0.50%=375,000	375,000
[As actual claim Tk. 180,000 is less than Tk. 375,000, so actual claim is allowed]	

2) Business profit and capital gain from sale of old machine:

Selling price	575,000
Less: Written down value	(300,000)
Total gain	275,000
Capital gain= difference between selling price and original cost	75,000
Business profit=difference between original cost and book value	200,000

3) Provision for gratuity is not allowed as expenses in the year when provision is made; rather it is allowed when actual payment is made.

4) Assume, legal services are taken from an individual legal expert thus tax at source required at 15%. Additional tax for non-deduction of TDS would be 100,000 x 15%=15,000 +50% of 15,000=22,500

5) Regular 27.5% tax rate applies for this company.

Example 6

From the following profit & loss account of Oman Bank Ltd., a non-resident bank, for the year ended on 31/12/2025, compute total income and tax liability.

Salaries and allowances -	2,200,000	Interest and commission-	12,000,000
Interest on deposit-	4,000,000	Capital Gain from sale of shares of listed companies-	1,000,000
Royalty	300,000		
Head office exp. (as per allocation by head office)	300,000		
Bad debt-	600,000		
Provision for bad debt-	400,000		
Audit fee -	200,000		

Depreciation -	1,500,000		
Technical fee -	100,000		
Scholarship to poor students-	800,000		
Special reserve-	200,000		
Advertisement -	700,000		
Entertainment -	800,000		
Travelling expense: - Within the country – Outside the country (including head office tour)	50,000 450,000		
Net profit before tax-	400,000		
	13,000,000		13,000,000

Additional information:

(1) Royalty paid TK. 300,000 to parent company.

(2) Tax at source was not deducted from car workshop bill of TK. 200,000.

(3) Provision for bad debt is within 1% of classified loan.

(4) Tax depreciation as per tax law is TK. 1,000,000.

(5) Advertisement bill paid to advertisement agency for periodic advertisement to private TV channel. No VAT was deducted therefrom though tax at source was deducted properly.

Solution 6:

Oman Bank
Computation of total income
For the year ended on 31st Dec. 2025
(Assessment year: 2026-27)

Particulars	Tk.	Tk.
Net profit as per Profit and Loss Account		400,000
Less: Capital gain from sale of shares		(1,000,000)
		(600,000)
Add: Expenses to be considered separately:		
(1) Accounting Depreciation	1,500,000	
(2) Entertainment	800,000	
(3) Head Office Expenses [Note-1]	260,000	
(4) Technical fee [Note-2]	60,000	
(5) Overseas travelling [Note-3]	450,000	
(6) Royalty [Note-2]	300,000	3,370,000
		2,770,000
Add: Inadmissible expenses:		
(1) Provision for bad debt [Note-5]	400,000	
(2) Scholarship to poor students [Note-6]	800,000	
(3) Special reserve [Note-7]	200,000	1,400,000
		4,170,000
Less: Admissible expense:		
(1) Tax depreciation (as per 3rd schedule)	1,000,000	
(2) Royalty & technical fees	60,000	
	60,000	

(3) Head Office Expenses (10% of Tk. 400,000)	40,000	1,160,000
Income before considering entertainment expense		**3,010,000**
Less: Entertainment expenses (note-8)		120,400
Income after considering entertainment expenses		**2,889,600**
Capital gain from sale of listed companies shares		**1,000,000**
Total income		**3,889,600**

Tax liability	**Income**	**Tax**
Total business income @40%	2,889,600	1,155,840
Tax on non-TDS u/s 56 [Note-4]		24,000
Capital gain @15%	1,000,000	150,000
		1,329,840

Notes:

1. Head office expenses is allowed up to 10% of disclosed business profit = 400,000x10%=40,000
2. Royalty and Technical fees are allowed up to 6% of turnover or 15% of net profit, whichever is lower=6%x12,000,000=720,000 or 15%x400,000=60,000, lower one= 60,000.
3. Overseas travelling is allowed up to 0.50% of turnover=0.50%x120,000=60,000
4. From car wash bill 200,000 tax deduction was required at 8%. Therefore, additional tax would be Tk. 24,000 (200,000 x 8%) + 50% of (200,000 x 8%).
5. Bad debt is disallowed being provision.
6. Scholarship to unapproved institutes is disallowed.
7. Special reserve is not expenses thus disallowed.
8. Allowable entertainment expenses – Direct 4% on Tk. 3,010,000 = 120,400

Example 7

Prime Leasing is a public limited company listed with Dhaka Stock Exchange. It has recently submitted its income tax return for the accounting year ending on 31 December 2025 showing net profit before tax of Tk. 113,725,000.

Further examination of the file, records and documents revealed the following:

(a) Depreciation on leased assets charged in the accounts of Tk. 38,050,000 and loss on disposal of leased assets was Tk. 2,988,000.This arose out of the shortage of residual value of returned or repossessed assets plus rentals received on the lease of these assets over the original cost of the assets.

(b) Provision for used assets and term finance has been made in the accounts at Tk. 5,135,500 and Tk. 1,913,900 respectively. This has been provided in accordance with FID Circular No. 8 issued by the Bangladesh Bank.

(c) Tax depreciation for the relevant year is Tk. 58,500,000.

(d) Balances of statutory reserve and paid-up share capital on 1.1.2025 were Tk. 18,600,000 and Tk. 120,000,000 respectively.

(e) Excess perquisites amounted to Tk. 695,000

(f) Legal expenses included Tk. 80,000 for professional fees for the acquisition of company's new office at Dhanmondi.

(g) Net profit included dividend received on investments of Tk. 1,998,000.

You are required to compute:

(a) Total income
(b) Tax liability of the company for the relevant assessment year.

Solution 7 :

Prime Leasing PLC
Assessment year: 2026-27
Computation of total income and tax liability

Particulars	Tk.	Tk.
Net profit before tax		113,725,000
Less: Dividend income (for consideration at respective head income from financial asset)		(1,998,000)
		111,727,000
Add: Inadmissible expenses		
Accounting depreciation on leased assets	38,050,000	
Loss on disposal of leased assets	2,988,000	
Provision for used assets	5,135,500	
Provision for term finance	1,913,900	
Excess perquisites	695,000	
Legal fee for acquiring capital asset	80,000	48,862,400
		160,589,400
Less: Tax depreciation		(58,500,000)
Income from business or profession		102,089,400
Income from financial assets [cash dividend]		1,998,000
Total income		**104,087,400**
Tax computation		
Tax on dividend income (20% on 1,998,000)		399,600
Tax on business income Tk. 102,089,400 @37.5%		38,283,525
Total		**38,683,125**

Notes:

1. Loss on disposal of leased assets is not allowable expenditure.
2. No provision for bad or doubtful lease or finance is allowed.
3. Turnover tax is not possible to compute due to lack of information.

Assessment of insurance companies

Under the Income Tax Act, 2023, income from the insurance business is computed separately in accordance with the provisions laid out in the Fourth Schedule. This Schedule provides a comprehensive framework for determining the taxable income of life insurance and general insurance companies, recognizing the distinct nature of their operations. It outlines the treatment of premiums, claims, reserves, reinsurance recoveries, and other technical provisions to ensure accurate reflection of the financial performance and tax liability of insurers. The computation principles differ based on whether the entity carries on life insurance, general insurance, or both, with special consideration given to actuarial valuations and surplus transfers in the case of life insurance. The objective of this separate treatment is to ensure that taxation aligns with the regulatory and financial reporting requirements specific to the insurance industry. Schedule also include the provisions relating to profits and gains of non-resident person engaged in insurance business in Bangladesh.

Assessment of life insurance business:

Under the provisions of the Fourth Schedule to the Income Tax Act, 2023, the profits and gains of a life insurance business, other than pension and annuity business, shall be computed as the higher of the following two methods:

Method A: Computation Basis

This method considers the difference between total external income and admissible management expenses:

(A) = P–Q, where:

P = Gross external income of the income year.

Q = Admissible management expenses, subject to a ceiling defined as the aggregate of R + S + T + U, where:

- R = 7.5% of the premium received during the year for single-premium life insurance policies.
- S = 7.5% of the entire premium amount for policies where the number of annual premiums payable is less than twelve or the premium-paying term is less than twelve years.
- T = 90% of the first-year's premium received during the income year for all other life insurance policies.
- U = 12% of all renewal premiums received during the income year.

Method B: Valuation Basis

This method is based on the actuarial surplus (or deficit), adjusted for specific items over the valuation period:

(B) = (V + W + X + Y) / Z, where:

V = Actuarial surplus or deficit, determined as the latest available from the following:

1. Surplus or deficit based on actuarial valuation in the assessment year.
2. Surplus or deficit based on actuarial valuation in the preceding income year, if the current year's valuation is not available.
3. Surplus or deficit for the latest available inter-valuation period, if neither (1) nor (2) is available.

W = Any surplus or deficit brought forward from prior periods that has been incorporated in the current actuarial valuation.

X = Any interim or final bonus paid or declared to policyholders during the period of surplus/deficit.

Y = Total amount of inadmissible expenditures as per Sections 49 to 53 of the Income Tax Act, incurred during the valuation period.

Z = One (1), or the number of years covered by the inter-valuation period used to determine "V" (if more than one year is covered).

The taxable income from the life insurance business shall be the higher of:

(a) Income computed under Method A (Computation Basis), and

(b) Income computed under Method B (Valuation Basis)

Assessment of Pension and Annuity Business – Profits and gains of pension and annuity business shall be taken to be the annual average of the surplus computed as per 2(B) above.

Deductions: In computing the surplus:

(a) Under paragraph 2(B), for life insurance business, 3/4th of amount paid to or reserved for or expanded on behalf of policyholders shall be allowed as deduction, and, under pension and annuity business (paragraph 3), amount paid to or reserved for or expanded on behalf of members of an approved superannuation fund shall be allowed as deduction.

Provided that, no amount shall be taken that are paid out of or in respect of any surplus brought forward from a previous inter-valuation period.

Provided further that, if any reserved for policyholders or members of an approved superannuation fund, as the case may be, ceased to be so reserved, and is not paid to or expanded on behalf of policyholders or member of the fund, as the case may be, one-half or 3/4th of such amount or the entire amount, as the case may be, if it has been previously allowed as a deduction, shall be treated as part of the surplus for the period in which the said amount ceased to be so reserved.

(b) Any provision or reserve created in the balance sheet– whether in normal accounts or actuarial valuation – to cover depreciation or loss from the sale of securities or other property will be treated as an allowable expense. Conversely, any gain or appreciation arising from the sale of such securities or property, if credited in the balance sheet, will be treated as income and included in the surplus for tax purposes.

(c) Interest received on tax free government securities shall be excluded.
Adjustment of Tax Paid by Deduction at Source – Where annual average surplus disclosed by a valuation for an inter-valuation period exceeding 12 months, credit shall not be given under Section 158 for the tax paid in the income year, but credit shall be given for annual average of the tax paid by deducting at source from interest on securities or otherwise during such period.

Definitions:

(a) "**Gross external incoming**"– interest, dividend, fines and fees, and other income from any sources (except premium received form policyholders, and interest and dividend on any annuity fund), and profits from reversion, sale or granting of annuities (but excludes profit on realization of securities or other assets). However, income from property shall be computed as per Section 36 [*Income from rent*] upon considering deductions applicable thereto.

(b) "**Management expenses**" include the entire expenditure, including commissions, exclusively incurred in managing the life insurance business, as well as a reasonable portion of the general management expenses attributable to the entire business, in the case of additional business. However, bonuses or other sums paid to or reserved on behalf of policyholders, depreciation of, and losses on the realization of securities or other assets, and any expenditure other than that specified under Section 48 [*Speculative business*], shall not be considered as management expenses.

Example 8

According to the last actuarial valuation at 31 December 2025, the Pioneer Life Insurance Co. Ltd. had a surplus of Tk. 1,000,000. There was a deficit of Tk. 300,000 in the preceding actuarial valuation. 60% of the surplus was reserved for bonus to the policyholders. The company had the following income in the accounting year 2025:

1. Premium Tk. 1,000,000
2. Interest on tax free government securities Tk. 100,000
3. Dividend Tk. 150,000
4. Fines and fees Tk. 80,000
5. Profits on sale of shares Tk. 90,000
6. Profits on granting and reversion of annuities Tk. 150,000

Management expenses claimed and admitted by the DCT are Tk. 250,000. During the undervaluation period, the company paid income tax at source of Tk. 300,000. Some of the share investments have depreciated in value during the year by Tk. 60,000. Determine the income of life insurance business of the company.

Solution 8:

Pioneer Life Insurance Co. Ltd.
Computation of Total Income
For the assessment year 2026-2027

	Tk.
Gross external income:	
Dividend	150,000
Fines and fees	80,000
Profit on annuity	150,000
	380,000
Allowable management expenses:	
Actual management expenses	250,000
Ceiling: R+S+T+U	
R=	-
S=	-
T=	-
U=12% of Tk. 1,000,000	120,000
(Since there is no policy type breakdown, assume all are renewable premiums, and assume R, S and T are nil)	
Lower one is-	120,000
Income under Computation Basis (A)	**260,000**
[gross external income - allowable management exp.]	
(V+W+X+Y)/Z	
Here:	
V=surplus in actuarial valuation	1,000,000
W=deficit included from previous valuation	(300,000)
X=bonus reserved for policyholders	600,000
Y=inadmissible expenses u/s 49-53 [TDS]	300,000
	1,600,000
Z= 1(valuation done annually)	
Income under Valuation Basis (B)	1,600,000
Income for the year [higher of (A) and (B)]	**1,600,000**

Computation of Income of Other Insurance Business:

The profits or gains of a non-life insurance business shall be computed based on the profit disclosed in the annual accounts, after making necessary adjustments for any expenditures that are not admissible under Sections 49 to 53 of the Income Tax Act. Additionally, any profit or loss arising from the realization of investments, and any depreciation or appreciation in the value of such investments, shall be accounted for in accordance with the provisions outlined in paragraph 4 of the Fourth Schedule, which governs similar treatment for life insurance business.

To meet exceptional losses incurred during the year, the insurer may deduct an amount up to 10% of the premium income earned in that year from the profit computed above. However, if any amount deducted for this purpose is paid, appropriated, or used for any reason other than to cover an exceptional loss, such amount shall be treated as income for the year in which the diversion occurs.

An exceptional loss refers to the amount by which the aggregate loss in an income year exceeds either 50% of the premium income of that year or 50% of the average premium income of the three immediately preceding years–whichever is higher–calculated based on the proportion of Bangladesh income to the global income of the insurer. In the case of a non-resident life insurance company whose profits are periodically determined through actuarial valuation, the income from its Bangladesh operations shall be computed in accordance with the rules applicable to life insurance business carried on in Bangladesh.

Profits and Gains of Non-Resident Person:

Profit or gains of the branches of an insurance company not resident in Bangladesh, in absence of more reliable data, may be deemed to be the proportion of the total world income computed as a proportion of premium income derives from Bangladesh bears to its total premium income. Non-resident life insurance company whose profits are periodically ascertained by actual valuation shall be computed based on the provision applicable for the life insurance business carried on in Bangladesh.

Example 9

Following is the profit and loss account of Sonar Bangla Insurance Co. Ltd. for the year ended on 31 December 2025:

	Amount		Amount
Directors' fee	48,000	Interest, dividend and rent	19,726,029
Audit fees	135,000		
		Profit transferred from	17,273,952
Registration, renewal etc.	205,331	other revenue accounts	
Advertisement	3,240,251		
		Other Income	9,832
Depreciation	792,127		
Interest on overdraft	181,198		
Balance transferred to			
Appropriation Account	32,357,906		
	37,009,813		37,009,813

Further scrutiny of the relevant papers, files and documents revealed the following:

(1) Gross premium received during the year was Tk. 125,607,426 and in three years immediately preceding were Tk. 131,212,308, Tk. 136,887,085 and Tk. 135,580,109 respectively.

(2) Net premium income of the year was Tk. 64,441,296 and the balance brought forward on reserve for exceptional loss was Tk. 101,945,720.

(3) Accounting depreciation Tk. 792,127 whereas as per tax law this has been computed at Tk. 919,029.

(4) Gratuity charged in the accounts Tk. 779,845 but actually paid Tk. 625,860.

(5) Analysis of the dividend, rent etc. revealed that an amount of Tk. 6,488,284 being interests on various bank deposits has been included therein.

Calculate taxable profit and tax liability of the company for the relevant assessment year:

Self-assessment question

Delta Consumer Products Bangladesh Limited ("Delta BD"), 100% owned subsidiary of Delta Inc., Singapore. Delta BD imports finished consumer products from various sources worldwide and sells to final consumers through its stores located in different parts of the country. The following Income Statement for the year ended June 30, 2026 is relevant for this question.

Particulars	**Amount (BDT)**
Revenue from Operations	80,000,000
Cost of Goods Sold	(40,000,000)
Gross Profit	**40,000,000**
Administrative Expenses	(12,000,000)
Selling & Distribution Expenses	(8,000,000)
Finance Cost	(1,500,000)
Depreciation	(2,000,000)
Other Income	1,000,000
Net Profit before Tax	**17,500,000**

Additional Notes:

(1) Administrative expenses include:
- Donation to a private hospital: BDT. 600,000
- Entertainment expense: BDT. 400,000 (only BDT. 250,000 is supported by documents).
- Salaries paid to a director: BDT. 2,000,000 (paid in cash)
- Depreciation as per accounting records: BDT. 1,250,000.

(2) Selling expenses include:
- Advertisement in a foreign magazine: BDT. 1,200,000 (by charging credit card of a director).
- Sales commission paid in cash: BDT. 300,000

(3) Finance cost includes:
- Unrealised foreign exchange losses: BDT. 300,000
- Interest expenses for the loan from an associated enterprise: BDT. 1,200,000

(4) Other income includes:
- Dividend from a resident company: BDT. 300,000 (gross)
- Gain on sale of machinery (accounting profit): BDT. 700,000

(5) Delta BD is processing a divided to its Singapore shareholders for the financial year ended June 30, 2025 for BDT. 5,000,000.

(6) Depreciable assets as per tax records: Opening WDV: BDT. 5,000,000, additions in the month of June 2026: BDT. 2,000,000, tax depreciation rate is 20%.

(7) Tax WDV of the sold machinery: BDT. 500,000, and sale proceeds was BDT. 1,200,000.

(8) 50% of the revenue comes from the sources where minimum tax applies. During the income year, revenue have been received in full in the income year and there is no receivable.

(9) Customer deducted tax at source for BDT. 1,200,000.

(10) The company is enjoying reduced rate of taxes at 10%, however, regular tax rate is 20%.

Requirements:

(a) Compute the taxable income of Delta Consumer Products Bangladesh Limited for the year ended June 30, 2026.

(b) Compute the income tax liability for the year.

Chapter 21

Liability in Special Cases and Assessment of Non Residents

Introduction

Learning objectives

Examination context

Topic list

21.1 Liability of representative in certain cases

21.2 Persons to be treated as agent

21.3 Right of representative or agent to recover tax paid

21.4 Liability of firm or AOP for unrecoverable tax due from partners or members

21.5 Liability of partners, etc., for discontinued business, etc.,

21.6 Liability of directors for unrecoverable tax of private companies

21.7 Liability of liquidator for tax of private companies under liquidation

21.8 Liability to tax in case of shipping business of non-residents

21.9 Liability to tax in case of air transport business of non-residents

Self-assessment questions

Introduction

Learning objectives

- Define the liability of a representative in certain cases in respect of income.
- Recognize the persons to be treated as agent.
- Identify the right of representative to recover tax paid.
- Recognize the tax liabilities of different persons such as firms or association, partners, directors, liquidator in certain cases
- Define the liability to tax in case of shipping and air transport business of non-residents.

Practical significance

There is no option to avoid the liability for payment of tax. In certain cases, the representative of any person in respect of income is liable to take some responsibilities especially for assessment. There is a list of persons who shall be treated as agent in relation to a non-resident. Representative who paid tax on account of his liability has some right to recover the sum so paid from the person on whose behalf it is paid.

There are different types of liabilities. Firm or association has liability for unrecoverable tax due from partners or members. Partners have liability for discontinued business of a firm. Directors have liability for unrecoverable tax of private limited companies. Liquidator has liability for tax of private companies under liquidation. The principal or the agent has liability to tax in case of air transport business of non-residents.

Stop and think

It is obvious that liability of tax cannot be ignored under tax law. The agents or representatives or other persons in certain cases are liable to pay tax on behalf of other persons.

Working context

The agents or representatives or other persons as defined in this chapter in relation to liabilities are sometime seeking expert opinion in this respect. Accountants can give support to their clients. As tax experts, accountants can also help in recovering tax liability from the representative or agent by providing his expertise in this regard.

Syllabus links

The topics covered in this chapter are fundamental to your understanding of income tax.

Examination context

Exam requirements

In the examination, candidates may be required to:

- Identify the liability of a representative in certain cases in respect of income.
- Identify the persons to be treated as agent.
- Illustrate the right of representative to recover tax paid.
- Liability of firm or association for unrecoverable tax due from partners or members.
- Mention the liability of partners, etc., for discontinued business of a firm, etc.
- Define the liability of directors for unrecoverable tax of private companies.
- Identify the liability of liquidator for tax of private companies under liquidation.
- Define the liability to tax in case of shipping business of non-residents.
- Define the liability to tax in case of air transport business of non-residents.

Question practice

For question practice on these topics, go to the suggested answers covering this chapter.

Examiner's comments on how students should tackle questions

Candidates have to remember to recognize the different types of liabilities of representative, agents and persons in different cases.

LIABILITY IN SPECIAL CASES AND ASSESSMENT OF NON RESIDENTS

Section overview

- There is no option to avoid the liability for payment of tax under tax law.
- Liability shall be taken by the representative or agent in certain cases.
- There is a list of persons who shall be treated as agent of a non-resident.
- Representative may have the right to recover the tax he paid.
- There are some procedures to recover tax liabilities of different assessee.
- Non-residents doing shipping business in Bangladesh will pay tax @ 8% on gross fare, which is considered as the final discharge of tax liability.
- Non-residents doing air transport business in Bangladesh will pay tax @ 3% on gross receipt which is considered as the final discharge of tax liability.

21.1 Liability of representative in certain cases: Section 252

Every representative of another person shall be subject to the same duties, responsibilities, and liabilities under this Act as if the income had been received by the representative in his own right. Such representative shall be liable to assessment in his own name and shall, for all purposes of this Act, be deemed to be the assessee in respect of that income.

Once the representative has been assessed in respect of any income, no further assessment shall be made on the same income under any other provision of this Act. However, nothing in this section shall relieve the person on whose behalf the representative receives or is entitled to receive the income from assessment or recovery of tax.

For the purposes of this section –

(a) a guardian, manager, trustee, sebayet, mutawalli, or any other person having financial responsibility who receives, or is entitled to receive, income on behalf of, or for the benefit of, a minor, a person of unsound mind, an incapacitated person, or any income-earning asset or establishment, shall be treated as the representative taxpayer in respect of such income.

(b) an Administrator General, Official Trustee, receiver, manager, or any other person appointed by a court who receives, or is entitled to receive, income on behalf of another person shall be treated as the representative in respect of such income.

(c) any trustee appointed under an instrument duly executed shall be treated as the representative of the relevant trust or waqf.

(d) any person treated as an agent under section 253 (Person to be Treated as Agent) shall be deemed to be the representative of a non-resident in respect of income deemed to accrue or arise in Bangladesh under section 27.

(e) where a taxpayer dies and the assets of the deceased have not yet been distributed among the legal heirs, any one of the legal heirs, nominated by consensus of the legal heirs or, in the absence of such consensus, nominated by the Deputy Commissioner of Taxes (DCT), shall be treated as the representative in respect of the income of the deceased taxpayer.

(f) where a taxpayer is unable to file a return of income or cannot be traced, any one of the legal heirs, nominated by consensus of the legal heirs or, in the absence of such consensus, nominated by the DCT, shall be treated as the representative in respect of the income of that taxpayer.

21.2 Persons to be treated as agent: Section 253

A person shall be treated as the agent of a non-resident or of a resident taxpayer who is unable to file a return or cannot be traced in any of the following circumstances:

- where the person is in Bangladesh and is employed by, or has a business connection with, the non-resident or resident taxpayer; holds or controls any money belonging to the taxpayer; acts as the trustee of the taxpayer; or is a person through whom the taxpayer receives any income, directly or indirectly;
- where the person, whether resident or non-resident, has acquired a capital asset situated in Bangladesh from a person residing outside Bangladesh; or
- where the person is declared or treated as an agent of a non-resident for any other reasonable cause.

However, an independent broker in Bangladesh who deals with a non-resident broker in a transaction, but not directly with the principal, shall not be treated as an agent, provided that the transaction is carried out by both brokers in the ordinary course of business.

No person shall be treated as an agent under this section unless that person has been given a reasonable opportunity of being heard.

21.3 Right of representative or agent to recover tax paid: Section 254

(1) A representative or agent who, on account of his liability u/s 252, pays any sum, shall be entitled to recover the sum so paid from the person on whose behalf it is paid, or to retain out of any moneys that may be in his possession or may come to him in his possession or may come to him in his capacity as a representative, an amount equivalent to the sum so paid.

(2) A representative or agent, or any person who apprehends that he may be assessed as a representative, may retain, out of any money payable to the beneficiary on whose behalf he is liable to tax u/s 252, a sum not exceeding his estimated liability.

(3) In the event of any disagreement between the beneficiary and the representative or agent or, as the case may be, the person apprehensive of being assessed as representative, as to the amount to be retained under sub-section (2), such representative or person may secure from the DCT a certificate stating the amount to be so retained pending the settlement of the liability and the certificate so obtained shall be the warrant for retaining that amount.

21.4 Liability of firm or AOP for unrecoverable tax due from partners or members: Sec. 255

(1) Where any tax payable by partner of a firm or a member of an AOP in respect of his share of the income from the firm or AOP, as the case may be, cannot be recovered from him, the DCT shall notify the amount of the tax to the firm or AOP.

(2) Upon notification of the amount of tax under sub-section (1), the firm or AOP so notified shall, notwithstanding anything contained in any other law for the time being in force, be liable to pay the said tax and shall, for the purposes of recovery thereof, be deemed to be an assessee in respect of such tax; and the provisions of ITA, 2023 shall apply accordingly.

21.5 Liability of partners for discontinued business: Section 256

(1) Where any business or profession carried on by a firm or an AOP has been discontinued, or where a firm or an AOP is dissolved, assessment of the total income of the firm or AOP may be made as if no such discontinuance or dissolution had taken place; and all the provisions of ITA, 2023 shall, so far as may be, apply accordingly.

(2) Where an assessment is made under sub-section (1) in respect of a firm or an AOP, every person who was a partner of the firm or member of the association at the time of discontinuance of business, or as the case may be, dissolution of the firm or association, and the legal representative of any such person who is deceased, shall be jointly and severally liable for the amount of tax found payable by the firm or association upon such assessment and shall, for the purpose of recovery of such tax, including penalty and other sum payable, be deemed to be an assessee; and the provisions of ITA, 2023 shall apply accordingly.

(3) Partnership firm registered with the RJSC shall be approved for dissolve by the relevant officer upon producing a Tax Clearance Certificate issued by the DCT.

21.6 Liability of directors for unrecoverable tax of private companies: Section 257

(1) Where any private company is wound up and any tax assessed on the company, whether before, or in the course of, or after its liquidation, in respect of any income of any income year cannot be recovered, every person who was, at any time during the relevant income year, a director of that company, shall, notwithstanding anything contained in the Companies Act 1994, be jointly and severally liable to pay the said tax and shall, for the purposes of recovery thereof, be deemed to be an assessee in respect of such tax and the provisions of ITA, 2023 shall apply accordingly.

(2) Notwithstanding the provisions of sub-section (1), the liability of any person there under in respect of the income of a private company shall cease if he proves to the DCT that non-recovery of tax from the company cannot be attributed to any gross neglect, misfeasance or breach of any duty on his part in relation to affairs of the company.

21.7 Liability of liquidator for tax of private companies under liquidation: Section 258

(1) A liquidator of a private company which is wound up, whether under the orders of a court or otherwise, shall, within 30 days after he has become such liquidator, give notice of his appointment as such to the DCT having jurisdiction to assess the company.

(2) The DCT shall, after making such enquiries or, calling for such information as he may consider necessary, notify to the liquidator, within 3 months of the date of receipt of the notice under sub-section (1), the amount which, in his opinion, would be sufficient to provide for any tax which is then, or is likely thereafter to become, payable by the company.

(3) On being notified under sub-section (2), the liquidator shall set aside an amount equal to the amount so notified and shall not, before he sets aside such amount, part with any of the assets of the company except for the purpose of payment of tax payable by the company or for making payment to secure such credit are entitled under the law to priority of payment over debts due to the Government on the date of liquidation.

(4) The liquidator shall be personally liable for payment of the tax on behalf of the company to the extent of the amount notified, if any, under sub-section (2), if he -

a) fails to give notice as required by sub-section (1): or

b) contravenes the provisions of sub-section (3)

(5) Where there are more liquidators than one, the obligations and liabilities of a liquidator shall attach to all the liquidators jointly and severally.

(6) This law shall have effect notwithstanding anything to the contrary contained in any other law for the time being in force.

(7) In this section, "liquidator" includes any person who has been appointed to be the receiver of the assets of the company under liquidation.

21.8 Liability to tax in case of shipping business of non-resident: Section 259

(1) Where a non-resident carries on the business of operation of ships as the owner or charterer thereof (hereinafter in this section referred to as the principal) tax shall be levied and collected in respect of such business in accordance with the provisions of this section.

(2) Before departure from any port in Bangladesh of any ship, the master of the ship shall prepare and furnish to the DCT a return showing-

(a) the amount paid or payable whether in or out of Bangladesh to the principal, or to any person on his behalf, on account of the carriage of passengers, livestock, mail or goods shipped at the port since the last arrival of the ship; and

(b) the amount received, or deemed to be received in Bangladesh by, or on behalf of, the principal on account of the carriage of passengers, livestock, mail or goods shipped at any port outside Bangladesh.

(3) On receipt of the return, the DCT shall determine the aggregate of the amounts referred to in sub-section (2) and, for this purpose, may call for such particulars, accounts or documents, as he may require and the aggregate of the said amounts so determined, shall be deemed to be income received in Bangladesh by the principal from the said business chargeable to tax under ITA, 2023 under the head "Income from business or profession", and tax thereon shall be charged @ 8% of such income.

(4) Where the DCT is satisfied that it is not possible for the master of the ship or the principal to furnish the return required under subsection (2) before the departure of the ship from the port and the principal has made satisfactory arrangements for the filing of the return and payment of the tax by any other person on his behalf, the DCT may, if the return is filed within 30 days of the departure of the ship, deem the filing of the return by the person so authorized by the principal as sufficient compliance with subsection (2).

(5) No port clearance shall be granted to the ship until the Commissioner of the Customs or any other officer duly authorized to grant the same, is satisfied that the tax payable under sub-section (3) has been duly paid or that satisfactory arrangements have been made for the payment thereof.

(6) The tax paid shall be deemed to be the final discharge of the tax liability of the assessee under IT Act,1984 and the assessee shall not be required to file the return of total income under section 166 nor shall he be entitled to claim any refund or adjustment on the basis of such return.

21.9 Liability to tax in case of air transport business of non-residents: Section 260

(1) Notwithstanding anything contained in this Act, where a non-resident person carries on the business of operation of aircraft, as the owner or charterer thereof (hereinafter in this section referred to as "the principal"), and any aircraft owned or chartered by him calls on any airport inside Bangladesh, the aggregate of the receipts arising from the carriage or passengers, livestock, mail or goods loaded at the said airport into that aircraft shall be deemed to be income received in Bangladesh by the principal from the said business chargeable to tax under the head "Income from business or profession", and tax thereon shall be charged at the rate of 3% of such income.

(2) The principal or an agent authorized by him in this behalf shall prepare and furnish to the DCT, within 45 days from the last day of each quarter of every financial year, that is to say, the thirtieth day of September, the thirty-first day December, the thirty-first day of March and the thirtieth day of June, respectively, return in respect of each quarter as aforesaid showing -

(a) the amount paid or payable whether in or out of Bangladesh to the principal, or to any person on his behalf, on account of the carriage of passengers, livestock, mail or goods loaded at the said airport; and

(b) the amount received, or deemed to be received, in Bangladesh by, or on behalf of, the principal on account of the carriage of passengers, livestock, mail or goods at any airport outside Bangladesh.

(3) On receipt of the return, the DCT may, after calling for such particulars, accounts or documents, as he may require, determine the aggregate of the amounts referred to in sub-section (2), and charge tax as laid down in sub-section (1).

(4) Where, the principal fails to pay the tax payable under sub-section (1) for more than 3 months, the Commissioner of Taxes may issue to the authority by whom clearance may be granted to that aircraft, a certificate containing the name of the principal and the amount of tax payable by him; and on receipt of such certificate, the said authority shall refuse clearance from any airport in Bangladesh to any aircraft owned or chartered by such person until the tax payable has been paid.

(5) The tax paid as per this section shall be deemed to be the final discharge of the tax liability of the assessee under ITA, 2023 and the assessee shall not be required to file the return of total income under section 166 nor shall he be entitled to claim any refund or adjustment on the basis of such return.

Thus, sections 259 and 260 of ITA, 2023, prescribe the tax rates on income of non-residents involved with shipping and air transport business which may be mentioned below:

Business	Income tax rate	Return submitted by	Status
Shipping	8%	Master of ship	Final discharge of tax liability
Air transport	3%	Principal or agent	Final discharge of tax liability

Self-Assessment Questions

1. ABC Trust earns rental income on behalf of a 15-year-old beneficiary. The trustee receives the income and manages all financial affairs of the trust. During assessment, the Deputy Commissioner of Taxes (DCT) assesses the trustee in respect of the rental income.

   Required:

   (a) Who is treated as the representative taxpayer under the Income Tax Act, 2023?

   (b) Can the same income be assessed again under another provision of the Act?

   (c) Does the assessment of the representative relieve the beneficiary from assessment or recovery of tax?

2. XYZ Ltd., a company in Bangladesh, regularly purchases goods from a non-resident supplier and also holds funds belonging to the supplier. The DCT proposes to treat XYZ Ltd. as the agent of the non-resident for tax purposes. XYZ Ltd. subsequently pays Tk. 800,000 as tax on behalf of the non-resident.

   Required:

   (a) Under what circumstances can XYZ Ltd. be treated as an agent of the non-resident?

   (b) Can the DCT declare XYZ Ltd. as an agent without giving it an opportunity of being heard?

   (c) What rights does XYZ Ltd. have to recover the tax paid on behalf of the non-resident?

Chapter 22

Special Provisions Relating to Avoidance of Tax

Introduction

Learning objectives

Examination context

Topic list

22.1 Avoidance of tax through transactions with non-residents

22.2 Avoidance of tax through transfer of assets

22.3 Avoidance of tax by transactions in securities

22.4 Tax clearance certificate required for persons leaving Bangladesh

Self-assessment questions

Introduction

Learning objectives

- Identify the measure in case of avoidance of tax through transactions with nonresidents
- Define the avoidance of tax through transfer of assets and transaction in securities
- Recognize the conditions and rules for tax clearance certificate required for persons leaving Bangladesh.
- Demonstrate the different forms for tax clearance and tax exemption certificate.
- Mention the conditions for exemption from production of tax clearance certificate.

Practical significance

The tax authorities have some measures in case of avoidance of tax through transactions with non-residents, transfer of assets and transaction in securities. The tax authorities can determine the reasonable amount of income in certain cases of such avoidance.

Subject to some exceptions and conditions, a person who is not domiciled in Bangladesh, or a person who being domiciled in Bangladesh at the time of his departure is required to obtain a tax clearance certificate or tax exemption certificate as the case may be.

Stop and think

There are some measures with tax authorities in case of avoidance of tax in certain cases. Do you think that any person can still avoid tax by any means?

Working context

In case of avoidance of tax through transaction with non-resident or otherwise, either intentional or unintentional, the tax clients are facing many problems from tax authorities. Sometimes they think that the measures taken by tax authorities are not in line with justice. In such a case accountant can help them by providing the expert service in this regard.

The accountants also can support by giving advice to his client in case of tax clearance/exemption certificate required for him while leaving Bangladesh.

Syllabus links

The topics covered in this chapter are fundamental to your understanding of income tax.

Examination context

Exam requirements

In the examination, candidates may be required to:

- Identify the measure in case of avoidance of tax through transactions with nonresidents
- Define the avoidance of tax through transfer of assets.
- Define the avoidance of tax through transaction in securities.
- Mention the conditions and rules for tax clearance certificate required for persons leaving Bangladesh.
- Exhibit the different forms of tax clearance and tax exemption certificates
- Recognize the conditions for exemption from production of tax clearance certificate.

Question practice

For question practice on these topics, go to the suggested answers covering this chapter.

SPECIAL PROVISIONS RELATING TO AVOIDANCE OF TAX

Section overview

- The tax authorities have some measures against avoidance of tax.
- Tax authorities can determine the reasonable amount of income in certain cases of tax avoidance.
- Tax clearance or exemption certificate is required for some person leaving Bangladesh at the time of his departure.
- There are some conditions for exemption from production of tax clearance certificate.

22.1 Avoidance of tax through transactions with non-residents: Section 240

Where any business is carried on between a resident and a non-resident and it appears to the DCT that, owing to the close connection between them, the affairs of business is so arranged that the business transacted between them produces to the resident either no profits or profits less than the ordinary profits which might be expected to yield in that business, the DCT shall determine the amount of income which may reasonably be considered to have accrued to the resident from such business and include such amount in the total income of the resident.

22.2 Avoidance of tax through transfer of assets: Section 241

(1) Any income which becomes payable to a non-resident by virtue, or in consequence, of any transfer of assets, whether alone or in conjunction with associated operation, shall be deemed to be the income of the person who-

(a) has acquired, by means of such transfer or associated operations, any right by virtue, or in consequence, of which he has the power to enjoy, whether forthwith or in future, the income which becomes so payable to the non-resident, or

(b) has received or is entitled to receive at any time, for reasons attributable to such transactions or associated operations, any sum paid or payable by way of loan or repayment of loan or any other sum, not being a sum paid or payable as income or for full consideration of money or money's worth.

(2) The income which becomes payable to a non-resident and is deemed under sub-section (1), to be the income of the person referred to therein shall be so deemed for all purposes of ITA, 2023 whether such income would or would not have been chargeable to tax apart from the provisions of this section.

(3) The provisions of this section shall not operate if it is shown to the satisfaction of the DCT -

(a) that neither the transfer nor any associated operation had for its purpose, or for one of its purposes, the avoidance of liability to taxation; or

(b) that the transfer and all associated operations were bona fide commercial transaction and were not designed for the purpose of avoiding liability to taxation.

(4) Where any person has been charged to tax on any income which is deemed under sub-section (1) to be his income, that income shall not again be deemed to form part of his income for the purpose of ITA, 2023 if it is subsequently received by him whether as income or in any other form.

(5) A person shall, for the purposes of this section, be deemed to have power to enjoy the income payable to a non-resident if-

(a) such income is in fact so dealt with as to be calculated to ensure at any time for the benefit of such person in any form; or

(b) the receipt or accrual of such income operates to increase the value of any assets held by such person or for his benefit; or

(c) such person receives or is entitled to receive at any time any benefit provided or to be provided-

(i) out of such income; or

(ii) out of money which is, or will be, available for the purpose by reason of the effect or successive effects of associated operations on such income and on any assets representing the income; or

(d) such person has, by means of the exercise of any power of appointment, revocation or otherwise, power to obtain for himself, with or without the consent of any other person, the beneficial enjoyment of such income; or

(e) such person is able to control, directly or indirectly, the application of such income, in any manner whatsoever.

(6) In determining whether a person has power to enjoy income, regard shall be had to the substantial result and effect of the transfer and any associated operation, and to all benefits which may at any time accrue to such person as a result of the transfer and associated operations irrespective of the nature or form of the benefit.

Explanation: For the purposes of this section –

(a) **'assets'** includes property or rights of any kind and 'transfer' in relation to assets being rights, includes creation of those rights;

(b) **'Associated operation'**, in relation to any transfer, means an operation of any kind effected by any person in relation to-

(i) any of the assets transferred; or

(ii) any income arising from such assets; or

(iii) any assets representing, directly or indirectly, any of the assets transferred, or the accumulation of the income arising from such assets;

(c) **'benefit'** includes a payment of any kind;

(d) references to assets representing any assets transferred, or any income or accumulation of income arising there from, includes references to shares in or obligation of any company to which, or the obligation of any other person to whom, any such assets or that income or accumulation of income is or has been transferred, and

(e) anybody corporate incorporated outside Bangladesh shall be treated as if it were a non-resident.

22.3 Avoidance of tax by transactions in securities: Section 242

(1) Where the owner of any securities sells or transfers those securities and buys them back or re-acquires them, or buys or acquires similar securities, and the result of the transaction is that any interest becoming payable in respect of the original securities sold or transferred by the owner is not receivable by the owner, the interest payable as aforesaid shall be deemed, for all purposes of ITA, 2023 to be the income of such owner and not of any other person, whether the interest payable as aforesaid would or would not have been chargeable to tax apart from the provisions of this subsection.

(2) Where any person has had for any period during an income year any beneficial interest in any securities and the result of any transactions within that year relating to such securities or the income thereof is that no income is received by him, or that the income received by him is less than the sum which the income would have amounted to, had the income from such securities accrued from day to day, and been apportioned to the said period, then the income from such securities for the said period shall be deemed to be the income of such person.

(3) Where, any person carrying on a business which consists wholly or partly in dealing in securities buys or acquires any securities from any other person and either sells back or re-transfers those securities, or sells or similar securities, to such other person, and the result of the transactions is that the interest becoming payable in respect of the securities bought or acquired by him is receivable by him but is not deemed to be his income by reason of the provisions of section 242(1), no account shall be taken of the transactions in computing for any of the purposes of ITA, 2023 any income arising from, or loss sustained, in the business.

(4) The DCT may, by notice in writing, require any person to furnish him, within such time, not being less than 28 days, as may be specified in the notice, such particulars in respect of all securities of which such person was the owner, or in which he had beneficial interest at any time during the period specified in the notice, as the DCT may consider necessary for the purpose of ascertaining whether tax has been borne in respect of the interest on all those securities and also for other purposes of this section.

Explanation: For the purposes of this section-

(a) **'interest'** includes dividend;

(b) securities shall be deemed to be similar if they entitle their holders to the same right against the same persons as to capital and interest and the same remedies for the enforcement of these rights, notwithstanding any difference in the total nominal amounts of the respective securities or in the form in which they are held or in the manner in which they can be transferred.

22.4 Tax clearance certificate required for persons leaving Bangladesh: Section 243

(1) A person who is not domiciled in Bangladesh, or a person who being domiciled in Bangladesh at the time of his departure is not, in the opinion of an income tax authority likely to return to Bangladesh, shall not leave Bangladesh without obtaining from the DCT authorized in this behalf by the NBR-

(a) a tax clearance certificate, or

(b) if he has intention of returning to Bangladesh, an exemption certificate which shall be issued only if the DCT is satisfied that such person has such intention; and such exemption certificate may be either for a single journey or for all journeys within the period specified in the certificate [section 107(1)].

(2) The owner or charterer of any ship or aircraft, who issues any authority to any person referred to in sub-section (1) for travel by such ship or aircraft from any place in Bangladesh to any place outside Bangladesh unless such person has a certificate required by that section, shall-

(a) be liable to pay the amount of tax, if any, which has or may become due and payable by such person and also to a penalty which may extend to twenty thousand taka; and

(b) be deemed, for the purposes of recovery of such tax and penalty, to be an assessee in default, and all the provisions of this Act shall apply accordingly.

Explanation: For the purposes of section 243-

a) **'exemption certificate'**, in relation to any person, means a certificate to the effect that such person is exempt from the requirement of having a tax clearance certificate for the purpose of the journey or journeys specified therein;

b) **'owner'** or **'charterer'** includes any representative, agent or employee who may be empowered by the owner or charterer of a ship or aircraft to issue an authority to travel by the ship or aircraft; and

c) **'tax clearance certificate'**, in relation to a person, means a certificate to the effect that such person has no liability under ITA, 2023 and the Gift-tax Act, 1990, or that satisfactory arrangements have been made for the payment of all or any of such taxes which are or may become payable by which person.

Self-assessment question

1. The following events took place during the income year:

(a) ABC Ltd. (Bangladesh) enters into an arrangement with its foreign parent company under which it sells goods at prices significantly below market value, resulting in substantially lower profits in Bangladesh.

(b) Mr. Rahman, a resident of Bangladesh, transfers an investment property to a company incorporated outside Bangladesh. The rental income is paid to the foreign company, but Mr. Rahman continues to enjoy the economic benefits arising from the property.

(c) Ms. Karim sells listed securities immediately before the dividend record date and repurchases the same securities shortly afterwards, thereby avoiding receipt of the dividend.

(d) Mr. Ahmed, a foreign national working in Bangladesh, intends to leave Bangladesh permanently without obtaining any certificate from the tax authority. The airline allows him to board the flight without verifying any tax-related certificate.

Required:

(a) Explain how the DCT may deal with the transaction between ABC Ltd. and its foreign parent under section 240.

(b) State whether the rental income received by the foreign company may be deemed to be the income of Mr. Rahman under section 241, and identify the circumstances in which no tax liability would arise.

(c) Explain the tax consequence of Ms. Karim's securities transaction under section 242.

(d) State the tax clearance requirements applicable to Mr. Ahmed before leaving Bangladesh and the consequences for the airline if it permits his departure without the required certificate.

Chapter 23

Powers of Income Tax Authorities Including Search and Seizure

Introduction

Learning objectives
Examination context

Topic list

23.1 Introduction
23.2 Power to call for information
23.3 Power to inspect records of business
23.4 Power of survey
23.5 Enquiries and invistigation
23.6 Power of search and seizure
23.7 Power to verify deduction or collection of tax
23.8 Retention of seized assets
23.9 Application of retained assets
23.10 Power of IJCT to revise orders of DCT
23.11 Revisional power of Commissioner
23.12 Power to take evidence on oath, etc.

Self-assessment questions

Introduction

Learning objectives

- Identify the power of respective income tax authorities to call for information.
- Identify the power to inspect the registers of company
- Recognize the power of survey.
- Demonstrate the additional power of enquiry and requiring the production of documents.
- Power of search and seizure.
- Power to verify withholding taxes.
- Right to retain the seized assets and application thereof.
- Power of revision of orders.
- Power to take evidence on oath.

Practical significance

To carry out the responsibilities and ensure compliance in adopting different rules, respective income tax authorities have been given sufficient powers. Such powers may be to call for information, inspect the registers, conduct survey, require for documents, search and seizure, verify deduction and collection of taxes, retaining seized assets, revise orders and take evidence of oath.

For different assesses, it is very important as they require to know the power of authorities so that they can comply with the specific requirements.

Stop and think

Respective income tax authorities enjoy required powers to carry out their job smoothly. Do you think that you know all of such powers applicable to different income tax authorities?

Working context

Powers of income tax authorities are very important for both income tax authorities and assesses. Accountants can provide valuable advises to clients in case of non-compliance and any type of failures if they know the power of income tax authorities properly. It will be helpful for the client to avoid excessive penalty or other types of punishment. It is also an important part of tax planning.

The accountants can also support by giving advice to his client in case of powers already exercised by income tax authorities for non-compliance or failures.

Syllabus links

The topics covered in this chapter are fundamental to your understanding of income tax.

Examination context

Exam requirements

In the examination, candidates may be required to:

- Mention the power of income tax authorities to call for information
- Identify the power to inspect the registers of company
- Demonstrate the additional power of enquiry and requiring the production of documents
- Power of search and seizure
- Power to verify the deduction and collection of taxes.
- Right to retain the seized assets and application thereof.
- Power of revision of orders.
- Power to take evidence on oath.

Question practice

For question practice on these topics, go to the suggested answers covering this chapter.

POWERS OF INCOME TAX AUTHORITIES INCLUDING SEARCH AND SEIZURE

Section overview

- The tax authorities enjoy powers to exercise required jobs and responsibilities.
- Tax authorities have powers to search and seize assets and retain them.
- Tax authorities may verify the documents of withholding taxes.
- Tax authorities may revise the orders already passed in respective cases.

23.1 Introduction

Income tax authorities enjoy the power of search and seizure of books of accounts, records, documents and moveable properties after searching through the business premises, residential building, vessel, aircraft, or any other places belonging to a person. This chapter covers required provisions under ITA, 2023 regarding such power of income tax authorities.

23.2 Power to call for information: Section 200

Officials holding a rank not lower than that of Deputy Commissioner of Taxes (DCT) are authorized to request information by issuing a notice in accordance with the prescribed manner and time stipulated in the notice, as part of their duties under this Act. Furthermore, any officer with a rank not lower than that of DCT is entitled to request information to facilitate the resolution of investigations pertaining to disputed matters or ongoing proceedings under this Act. Such requests should adhere to the manner and timeline specified in the written notice or communicated through electronic means.

However, officers operating under the Commissioner of Tax are prohibited from soliciting information from banks or financial institutions without obtaining the prior approval of the Commissioner of Taxes.

23.3 Power to inspect records of business: Section 202

Any income tax authority has the right to require an individual or business to furnish records or copies of records that are pertinent to any investigation or ongoing proceeding concerning unresolved matters under the Income Tax Act, 2023.

23.4 Power of survey: Section 205

Section 205 of the Income Tax Act, 2023, empowers the Board or the Commissioner of Taxes to grant authorization to income tax authorities for conducting surveys to evaluate the tax liability of person under the Act. This authorization allows income tax authorities to enter premises where business operations occur or rental income is generated. The entry is subject to specific conditions: during business hours for places of business activities and between sunrise and sunset for other cases. Within these premises, the income tax authority is authorized to undertake several actions, including collecting copies or summaries from income, assets, or liability records, securing and inventorying income-related records, documenting statements from relevant individuals, and making necessary inquiries.

Individuals associated with the business or residing in the premises are obligated to cooperate by providing access to records and documents, facilitating inspections, and offering information as required for the proceedings under the Act. Notably, while income tax authorities possess considerable powers for inspection and inquiry, they are restricted from removing cash, stock, or valuable items from the premises, except as specified under section 206 of the Act. No income tax authority without permission of Commissioner of Taxes shall hold the seized items for more than one month. Income tax authority except Tax Inspector, shall have same power vested under section 223(1) in case of non-cooperations in performing duties under this section.

23.5 Enquiries and investigation: Section 204

Investigating income tax authority may make any enquiry which they consider necessary as respects any person liable, or believed by them to be liable, to assessment under ITA, 2023

within his jurisdiction or require any such person or any other person in relation to such enquiry to appear before him at the time and place as directed for providing any information or to produce or cause to be produced necessary documents.

Board will publish a workbook in support of enquiries and inspections to fulfil the purpose of this section.

23.6 Power of search and seizure: Section 206

Section 206 of the Income Tax Act, 2023 lays out the provisions regarding the power of search and seizure. According to this section, when the inspecting income tax authority has reasonable belief based on information in the possession of the Board or inspecting income tax authority, he can exercise the powers mentioned in subsection (3). These powers include the authority to enter and search various locations, such as buildings, vessels, vehicles, and aircrafts, where there is suspicion that specific items like books of accounts, documents, electronic records, money, bullion, jewelry, or other valuables subject to the Income Tax Act have been concealed.

The authorized officer is empowered to break locks if necessary, search individuals, seize relevant items, place marks of identification on documents, and even access electronic records by bypassing password protection.

The authorized officer can also seek assistance from police officers, government officials, or professional experts. If seizure isn't possible, the officer can issue an order preventing the removal or disposal of the items. Statements made during the search can be used as evidence in proceedings under the Act, and the possession of items found during a search is considered evidence of ownership and accuracy. Procedures for copying seized documents, retaining them, and objections to retention are defined, with specific time limits. The Code of Criminal Procedure, 1898, applies to search and seizure processes, and the term "proceeding" includes pending and future actions under the Act.

23.7 Power to verify deduction or collection of tax: Section 147

Authority empowered in writing from the Commissioner of Taxes or Director General (Inspection) or Director General (Central Intelligence Cell) for the purpose of verification of tax deducted and collected at source can:

(a) In relation to a person or entities, get access to any place, goods, accounts or record of economic activities kept in any means, any encrypted or formatted data kept in computer systems, electronic record or systems and extract them, break password to get access, analyze information, books of accounts, documents, image or inputs, mark or stamp on the books of accounts and other documents, get an extract or copy them, seize of kept in hold of the same, order someone to do or not to do activities;

(b) can accompany appropriate expertise or agencies;

(c) authorities are empowered to fine a person up to Tk. 5,000,000 in case any barrier, noncooperation caused in performing the above works;

(d) for failure to comply with this section, DCT may realize tax and penalty upon recording the person's explanation, if available.

23.8 Retention of seized assets: Section 209

(1) When any money, bullion, jewelry, or other valuable article or item (referred to as 'assets') is seized under section 206 and handed over to the Deputy Commissioner of Taxes (DCT), the provisions of sub-section (2) shall be applied:

(2) The DCT shall, within 90 days of the seizure, provide the individual concerned with a fair opportunity to present their case and conduct an inquiry. Based on this, the DCT will make a decision using their best judgment to estimate undisclosed income or income from assets. They will then calculate the associated tax and other charges, including taxes in default.

(3) This 90-day period shall not include any time resulting from orders or sanctions.

(4) In cases where the income and related tax cannot be determined for the income year connected to the seized assets or any portion thereof, the DCT may consider the income year in which the assets were seized.

(5) Upon obtaining permission from the Commissioner of Taxes, the DCT may issue a notice to demand the amount determined under sub-section 2(b).

(6) If the person takes satisfactory measures to pay the demanded amount, the DCT shall release the seized assets. Otherwise, they may take appropriate actions as they deem fit

(7) If satisfactory measures are not taken to settle the demanded amount, the person shall be deemed a defaulter for the unpaid sum. The DCT may retain a portion of the asset that is sufficient to cover the defaulted demand.

(8) If the person to whom the demand notice is served feels aggrieved, they have the right to submit written complaints. Upon being given a reasonable opportunity for a hearing, the DCT shall issue an appropriate order.

23.9 Application of retained assets: Section 210

(1) Where the assets retained under sub-section (7) of section 206 consist solely of money, or partly of money and partly of other assets, -

(a) the DCT shall first apply such money towards payment of the amount in respect of which the person concerned is deemed to be an assessee in default under that sub-section; and thereupon such person shall be discharged of his liability to the extent of the money so applied; and

(b) where, after application of the money under clause (a), any part of the amount referred to therein remains unpaid, the DCT may recover the amount remaining unpaid, by sale of such of the assets as do not consist of money in the manner movable property may be sold by a Tax Recovery Officer (TRO) for the recovery of tax; and for this purpose, he shall have all the powers of a TRO under ITA.

(2) Nothing contained in sub-section (1) shall preclude the recovery of the amount referred to in section 206 (7) by any other mode provided in ITA for the recovery of any liability of an assessee in default.

(3) Any assets or proceeds thereof which remain after the discharge of the liability in respect of the amount referred to in section 206 (7) shall forthwith be made over or paid to the persons from whose custody the assets were seized.

23.10 Power of IACT to revise order of DCT: Section 213

The Inspecting Additional Commissioner of Taxes (IACT) may request information from the DCT (Deputy Commissioner of Taxes) and review the records of any proceeding under the Income Tax Act. If the IACT believes that any order issued by the DCT is erroneous, to the extent that it adversely affects the interests of the revenue, the IACT may, after giving the assessee an opportunity to be heard, and after conducting any necessary inquiry, issue an appropriate order. This order could involve enhancing or modifying the assessment, cancelling the assessment, or directing a fresh assessment to be conducted within four years from the date of the order that is being considered for revision.

Nothing in section 212 shall bar any proceeding under this section in applicable cases. Here, return shall deem to be erroneous if:

(a) heads of income is wrong in the order;

(b) in developing order, provision of law have been wrongly interpreted;

(c) provide orders without verifications where it was necessary to verify;

(d) issue order upon accepting tax rebate without verifying that;

(e) provide order without complying with orders, instruction under section 10;

(f) it is certainly confirmed upon seeing the order that order was erroneous.

23.11 Revisional power of Commissioner: Section 285

(1) The Commissioner may on an application made by the assessee, call for the record of any proceeding under ITA in which an order has been passed by any authority subordinate to him and may make such enquiry or cause such enquiry to be made and, subject to the provisions of ITA, may pass such order thereon, not being an order prejudicial to the assessee, as he thinks fit.

(2) The application for revision of an order under ITA passed by any authority subordinate to the Commissioner shall be made within 60 days of the date on which such order is communicated to the assessee or within such further period as the Commissioner may consider fit to allow on being satisfied that the assessee was prevented by sufficient cause from making the application within the said 60 days.

(3) The Commissioner shall not exercise his power in respect of any order-

(a) where an appeal against the order lies to the AJCT or to the Commissioner (Appeals) or to the Appellate Tribunal and the time within which such appeal may be made has not expired or the assessee has not waived his right of appeal; or

(b) where the order is pending on an appeal before the AJCT or it has been made the subject of an appeal to the Commissioner (Appeals) or to the Appellate Tribunal.

(4) No application under sub-section (1) shall be entertained unless-

(a) it is accompanied by a fee of two hundred Tk.; and

(b) payment of recognized tax.

Explanation- The "undisputed portion of the tax" means the tax payable under section 173.

(5) For the purposes of this section, an order by the Commissioner declining to interfere shall not be construed as an order prejudicial to the assessee.

(6) Notwithstanding anything contained in IT Act, an application for revision made under sub-section (1) shall be deemed to have been allowed if the Commissioner fails to make an order thereon within a period of 60 days from the date of filing the application.

(7) For the purposes of this section, the AJCT shall be deemed to be an authority subordinate to the Commissioner to whom the DCT, whose order was the subject-matter of the appeal order under revision, is subordinate.

23.12 Power to take evidence on oath, etc.: Section 211

(1) The DCT, the Additional Commissioner, the Commissioner, the DG, Central Intelligence Cell, the Commissioner (Appeals) and the Taxes Appellate Tribunal shall, for the purposes of IT Act, have the same powers as are vested in a Court under the Code of Civil Procedure, 1908 (Act V of 1908), when trying a suit in respect of the following matters, namely:

(a) discovery and inspection;

(b) enforcing the attendance of any person and examining him on oath or affirmation;

(c) compelling the production of accounts or documents (including accounts or documents relating to any period prior or subsequent to the income year); and

(d) issuing commissions for the examination of witness.

(2) The DCT shall not exercise his powers under this section for the purpose of enforcing the attendance of an employee of a scheduled bank as a witness or compelling the production of books of account of such a bank except with the prior approval of the Commissioner.

(3) Any authority mentioned in sub-section (1) may impound and retain in its custody for such period as it considers fit, any books of accounts or other documents produced before it in any proceeding under ITA.

(4) DCT shall not size any documents related to the income without record the reason, or without permission of chief commissioner or commissioner, he shall not retain income related document for more than 15 days excluding public holidays.

(5) Any proceeding under IT Act, before any authority mentioned in sub-section (1), shall be deemed to be a judicial proceeding within the meaning of section 193 and 128, and for the purposes of section 196, of the Penal Code (Act XLV of 1860).

(6) Proceeding or any order under this section shall be consider as the order of the civil court.

Self-Assessment Questions

1. Under which circumstances can an income tax authority search a person's premises and seize documents or valuables, and what safeguards are in place regarding the retention of such seized assets?
2. What powers are granted to income tax authorities under section 205 for conducting surveys, and what restrictions must they follow while entering business premises?
3. When can the Inspecting Additional Commissioner of Taxes (IACT) or the Commissioner revise an order passed by the DCT, and what are the timelines and conditions for such revision

24.17	Offences and prosecution

Self-assessment questions

Introduction

Learning objectives

- Mention the different non-compliances of tax law for which penalties are imposed.
- Identify the penalties due to non-compliance of tax law in certain cases.
- Define the measures against any order of penalty.

Practical significance

If any person without any reasonable cause failed to comply with tax law in certain cases the tax authorities may impose penalty on that person. There are requirements by tax law such as maintaining of accounts in the prescribed manner, filing of return, statements, accounts or information, payment of advance tax, compliance with notices, payment of tax on the basis of return etc. Non-compliance of these requirements may cause to penalties payable by the persons for such non-compliances. Concealment of income and default in payment of tax are also caused penalties.

No penalties mentioned here shall be made on any person unless such person has been heard or has been given a reasonable opportunity of being heard. The imposition of any penalty on any person shall be without prejudice to any other liability.

Stop and think

Did you realize how important it is to ensure the compliance of the requirements of tax law mentioned in this chapter for avoiding penalties? The penalties can be quite extensive in some cases.

Working context

You need to know the consequences for non-compliance of the requirements of tax law in this chapter. You must keep it in mind that the penalties may be massive and imposition of penalties for such non-compliance can also harm the reputation of the assessee and his financial sustainability.

The accountants can help the clients to comply with all the requirements of tax law in this regard so that the clients can avoid any such penalties and retain the esteem from tax authorities and stakeholders.

Syllabus links

The topics covered in this chapter are very important as it is dealt with the legal requirement of tax law.

Examination context

Exam requirements

In the examination, candidates may be required to:

- Identify the penalty for not maintaining accounts in the prescribed manner.
- Identify the penalty for failure to file return, statement, accounts or information.
- Identify the penalty for failure to pay advance tax and failure to pay tax on the basis of return.
- Identify the penalty for non-compliance with notice, concealment of income and default in payment of tax.
- Mention the bar to impose penalty.
- Demonstrate the authority and procedures for imposition of penalty.

Question practice

For question practice on these topics, go to the suggested answers covering this chapter.

Examiner's comments on how students should tackle questions

Candidates must remember the requirements of tax law in relation to imposition of penalty in case of non-compliance with the amount or rate of penalties.

PENALTY

Section overview

- Penalties can be imposed on any person for non-compliance of certain tax law.
- The amount and rate of penalties can be varied in case to case.
- Unless giving reasonable opportunity of being heard, no penalties shall be imposed other than a few.

24.1 Introduction

Penalty is the outcome of non-compliance of any provisions of ITA in any manner. Such penalties are important to encourage compliance and establish equity at the time of imposing penalty. As per Part 19 of The Income Tax Act, 2023 a penalty may be imposed on following grounds:

a) for not maintaining accounts in the prescribed manner
b) for failure to file return, statement, accounts or information
c) for using fake Tax-payer's Identification Number (TIN)
d) for failure to pay advance tax
e) for non-compliance with notices
f) for failure to pay tax based on return
g) for concealment of income
h) for default in payment of tax

Each of the above-mentioned failures or non-compliances is offence and subject to specific penalty as per the provisions laid down in Part 19 of ITA, 2023 except penalty for default in payment of tax (h) above on which penalty is imposed as per the provisions laid down in section 275 of ITA, 2023.

24.2 Penalty for not maintaining accounts in the prescribed manner: Section 267

Where any person, who does not have income from tangible assets, has, without reasonable cause, failed to comply with the provisions of any order or rule made in pursuance of, or for the purposes of section 72(3), the DCT may impose on him a penalty –

(a) of a sum not exceeding one and a half times the amount of tax payable by him; and

(b) Where the total income of such person does not exceed the maximum amount on which tax is not chargeable, of a sum not exceeding Tk. 5,000.

Where any person who has the income from tangible assets, without reasonable cause, failed to comply with the provisions of any order or rule made in pursuance of, or for the purposes of section 72(3), the DCT may impose on him a penalty up to 50% of tax payable on the income of tangible assets or Tk. 5,000, whichever is higher.

24.3 Penalty for failure to file return, statement, accounts or information: Section 266

(1) Where any person has, without reasonable cause, failed to file a return of income required by or under sections 166, 172, 191, 193 and 212, the DCT may impose upon such person a penalty amounting to 10% of tax imposed on last assessed Income subject to a minimum of Tk. 1,000, and in the case of a continuing default a further penalty of Tk. 50 for every day during which the default continues.

However, total amount of such penalty will not exceed Tk. 5,000 in case an individual who was not previously assessed. And in case of existing individual assessee maximum penalty will not exceed 50% of last assessed tax or Tk. 1,000 whichever is higher.

(2) For non-submission of statement or return u/s 177, DCT may impose penalty at 10% of last assessed tax or Tk. 5,000 whichever is higher, and Tk. 1,000 per month or portion thereof for continuing default.

(3) For not providing certificate u/s 145, DCT may impose penalty for up to Tk. 5,000 and Tk. 1,000 per month or portion thereof for continuing default.

(4) For failure to provide information u/s 200, income tax authority who sought such information may impose penalty up to Tk. 50,000 and Tk. 500 per day for continuing default.

24.4 Penalty for using fake TIN: Section 268

Where a person has, without reasonable cause, used TIN of another person or used fake TIN on a return of income or any other documents where TIN is required under ITA, the DCT may impose a penalty not exceeding Tk. 20,000 on that person.

24.5 Penalty for failure to pay advance tax: Section 269

Where, during any proceeding in connection with the assessment of tax, the DCT is satisfied that any person has –

(a) without reasonable cause, failed to pay advance tax as required by section 154; or

(b) furnished under section 155 any estimate of tax payable by him which he knew, or had reason to believe, to be untrue, he may impose upon such person a penalty of a sum not exceeding the amount by which the tax actually paid by him falls short of the amount that should have been paid.

24.6 Penalty for non-compliance of notice: Section 270

Where any person has, without reasonable cause, failed to comply with any notice issued under section 167, 168, 179, 181, 183 or 212 the DCT may impose on him a penalty not exceeding the amount of tax chargeable on the total income of such person.

24.7 Penalty for failure to pay tax on the basis of return: Section 271

Where, in the course of any proceeding under the Act, the DCT is satisfied that any person has not paid assessed tax, he may impose upon such person a penalty of a sum not exceeding 25% of the whole tax or 100% of the shortfall as the case may be.

24.8 Penalty for concealment of income: Section 272

Where, in the course of any proceeding under the Act, any authority is satisfied that any person has, either in the said proceeding or in any earlier proceeding relating to an assessment in respect of the same income year, provide information in relation to his income, assets, liabilities, expenses or other important information regarding payable amount incorrect that led evasion of payable amount, may be penalized equal to (A), where:

A= Evaded amount x10% x B
B= Total number of years from the year of concealment and the year of detection.

24.9 Penalty for false audit report signed by chartered accountant [section 273]

Where, the DCT or Additional Commissioner of Taxes (Appeals) or Commissioner of Taxes (Appeals) or the Tax Appellate Tribunal found that the audit report is not properly certified by the Chartered Accountant to the effect that, in respect of keeping accounts, preparing statements and reporting as per International Accounting Standard (IAS) and International Financial Reporting Standard (IFRS) and auditing as per International Standard of Auditing (ISA); or the report is false or incorrect, then they can impose penalty of minimum Tk.50,000 and maximum Tk. 2,00,000 upon the chartered accountant who signs such false audit report.

24.10 Penalty for filing fake audit report [section 274]

Where, in the course of any proceedings under Income Tax Act, the DCT, or Additional Commissioner of Taxes (Appeals) or Commissioner of Taxes (Appeals) or Taxes Appellate Tribunal found that, the audit report is not signed by the Chartered Accountant or is believed to be false, the said authority or, as the case may be, the Tribunal can impose a penalty of Tk.1,00,000 on the concerned taxpayer who prepared fake audit report in the name of CA firm.

24.11 Penalty for default in payment of tax: Section 275

Where an assessee is in default or is deemed to be in default in making payment of tax, the DCT may direct that, in addition to the amount of tax in arrears, a sum not exceeding that amount shall be recovered from the assessee by way of penalty.

24.12 Bar to imposition of penalty without hearing: section 280

No order imposing a penalty under this Part shall be made on any person unless such person has been heard or has been given a reasonable opportunity of being heard.

24.13 Previous approval of IJCT for imposing penalty: Section 281

The DCT shall not impose any penalty under this Chapter without the previous approval of the IJCT except in the cases referred to in section 266, 275, 276, 277, 278, and 279.

24.14 Orders for penalty to be sent to DCT: Section 282

The Taxes Appellate Tribunal or any income tax authority other than DCT himself making an order imposing any penalty under this Part shall forthwith send a copy of the order to the concerned DCT, and thereupon all the provisions of the Act relating to the recovery of penalty shall apply as if such order were made by the DCT.

24.15 Penalty to be without Prejudice to other liability: Section 283

The imposition on any person of any penalty under this Part shall be without prejudice to any other liability which such person may incur, or may have incurred, under the Act or under any other law for the time being in force.

24.16 Revision of penalty based on revised income: Section 284

DCT shall revise the penalty order during the process of income revision, as per the order issued under this Act. The amount of penalty cannot be increased without providing a reasonable opportunity for the assessee to be heard. If a revised penalty order is not issued and the taxpayer lodges an application requesting the DCT to revise the penalty amount, and if the revised order is not issued within 180 days from the date of the application, then the order will be deemed as revised.

24.17 Offences and prosecution

IT Act 2023 presents the rules for punishment through sections 164 to 168 due to specified types of offences committed by different classes of assessee. Such punishments in line with the offences are presented below:

No prosecution for an offence punishable under any provisions shall be instituted except with the previous sanction of the Board. The Board may compound such offence either before or after the institution of any proceedings or prosecution for a punishable offence.

Section	Offence	Punishment
311	Non-compliance of certain obligations	with imprisonment for a term which may extend to one year, or with fine, or both
312	Evade tax	with imprisonment for a term which may extend to 5 years, but shall not be less than 6 months, or with fine, or both
313	False statement upon verified	with imprisonment for a term which may extend to 5 years, but shall not be less than 6 months, or with fine, or both
314	False certificate	with imprisonment for a term not exceeding one year, but shall not be less than 3 months
315	Failed to deduct or collect tax at source and deposit to treasury	with imprisonment which may extend to one years, or with fine, or with both
316	False audited financial statements	With rigorous imprisonment for a term not exceeding 5 years, but shall not be less than 6 months
317	Misuse of TIN	with imprisonment for a term which may extend to 1 year, or with fine up to Tk. 100,000 or both
318	For distracting income tax authority	with imprisonment for a term which may extend to 1 year, or with fine or both

Self-Assessment Questions

1. Imagine you are a taxpayer who failed to file your income tax return on time without any reasonable cause. Reflecting on the Income Tax Act, 2023, particularly Section 266, explain what types of penalties may be imposed on you. Consider how these penalties vary for new and existing assessees and discuss whether the penalty amount can increase over time if the default continues.
2. Suppose a business owner did not maintain accounts in the prescribed manner and also used a fake TIN in official documents. Based on the provisions of Sections 267 and 268 of the Income Tax Act, 2023, describe the possible penalties the Deputy Commissioner of Taxes (DCT) can impose. Also, comment on whether the taxpayer would be given an opportunity to be heard before such penalties are enforced.
3. You are reviewing the legal framework on penalties under the Income Tax Act, 2023. Summarize the circumstances under which the DCT must obtain prior approval from the IJCT before imposing a penalty. Additionally, explain how a taxpayer may seek revision of a penalty if the assessed income is revised later on, and what happens if the DCT fails to act within the prescribed timeline.

Chapter 25

Recovery of Tax

Introduction

Learning objectives
Examination context

Topic list

25.1 Notice of demand
25.2 Penalty for default in payment of tax
25.3 Certificate for recovery of tax
25.4 Method of recovery by Tax Recovery Officer (TRO)
25.5 Power of withdrawal of certificate and stay of proceeding
25.6 Validity of certificate for recovery not open to dispute
25.7 Recovery of tax through Collector of District
25.8 Other modes of recovery

Self-assessment questions

Introduction

Learning objectives

- Define the notice of demand.
- Identify the penalty for default in payment of tax.
- Define the certificate for recovery of tax.
- Identify the different methods and modes of recovery of tax.

Practical significance

A notice of demand in the prescribed form shall be served upon the assessee specifying the sum payable and the time within which it is payable where any tax is payable in consequence of any assessment made or any order passed under or in pursuance of the Act.

An assessee in default or is deemed to be in default in making payment of tax may be directed to pay penalty in addition to tax in arrears. For recovery of tax from an assessee in default, a certificate for recovery of tax may be issued. The TRO upon receipt of that certificate can recover the tax in compliance with the method and mode of recovery as specified. Tax can also be recovered by the Collector of Districts or through Special Magistrates. There are other modes of recovery mentioned in this chapter.

Stop and think

Do you have the idea about the method and mode of recovery of tax by the tax authority? Do you know about notice of demand and penalty for default in payment of tax?

Working context

The tax authority has some procedures to recovery of taxes. They can serve notice of demand; they can issue certificate for tax recovery. They can recover tax even through Collector of District or Special Magistrate. They have also other modes of recovery. So, it is not easy for any assessee to get rid of from payment of tax. Besides an assessee in default or is deemed to be in default in making payment of tax may be penalized.

Accountants can suggest their clients to pay the tax on the basis of assessment in due time. They can aware the clients that making default in payment of tax may cause to penalty in addition to tax payable.

Syllabus links

The topics covered in this chapter are fundamental to your understanding of income tax.

Examination context

Exam requirements

In the examination, candidates may be required to:

- Define the notice of demand.
- Identify the penalty for default in making payment of tax.
- Define the certificate for recovery of tax.
- Identify the method of recovery by TRO.
- Define the power of withdrawal of certificate and stay of proceeding.
- Define the recovery of tax through Collector of District.
- Define the recovery of tax through Special Magistrates.
- Identify other modes of recovery.

Question practice

For question practice on these topics, go to the suggested answers covering this chapter.

RECOVERY OF TAX

Section overview

- Notice of demand can be served upon the assessee for recovery of tax
- Default assessee may be directed to pay penalty in addition to tax in arrears.
- Certificate of recovery may be issued for tax recovery from default assessee.
- Tax can also be recovered by the Collector of Districts or through Special Magistrates.
- There are different methods and modes of recovery of tax.

25.1 Notice of demand: Section 214

(1) Where any tax is payable in consequence of any assessment made or any order passed under or in pursuance of the Act, the DCT shall serve upon the assessee a notice of demand in the prescribed form specifying therein the sum payable and the time within which, and the manner in which, it is payable, together with a copy of an assessment order.

(2) Where any tax is refundable in consequence of any assessment made or any order passed under this Act, the DCT shall inform the assessee about the amount refundable and process of refund in the notice so served under subsection (1) unless the refundable amount is adjusted with outstanding under section 225.

(3) No adjustment shall be made against any dues without giving the opportunity of hearing.

(4) Where the assessee upon whom a notice of demand has been issued under section 214(1) makes an application in this behalf before the expiry of the date of payment specified in the notice, the DCT may extend the time for payment or allow payment by installments subject to such conditions, including payment of interest on the amount payable, as he may think fit in the circumstances of the case.

(5) If the sum payable is not paid within the time specified in the notice of demand issued under sub-section (1) or, as the case may be, within the time as extended under sub-section (4), the assessee shall be deemed to be in default.

(6) Where the assessee has presented an appeal under this Act in respect of the assessment or imposition of the tax or of the amount thereof, the DCT shall treat the assessee as not being in default for so long as such appeal is not disposed of.

(7) If, in a case where payment by installment has been allowed under sub-section (4), the assessee commits default in paying any one of the installments within the time fixed thereof, the assessee shall be deemed to be in default as to the whole of the amount then outstanding, and the other installments shall be deemed to have been due on the same date as the installment in respect of which default has actually been committed was due for payment.

(8) Where an assessee has been assessed in respect of income arising outside Bangladesh in a country the laws of which prohibit or restrict the remittance of money to Bangladesh, the DCT shall not treat the assessee as in default in respect of that part of the tax which is due in respect of such amount of income as cannot, by reason of the prohibition or restriction, be brought into Bangladesh, and shall continue to treat the assessee as not in default in respect of such part of the tax until the prohibition or restriction is removed.

(9) For the purposes of this section, income shall be deemed to have been brought into Bangladesh if it has been or could have been utilized for the purposes of any expenditure actually incurred by the assessee outside Bangladesh or if the income, whether capitalized or not, has been brought into Bangladesh in any form.

25.2 Penalty for default in payment of tax: Section 275

Where an assessee is in default or is deemed to be in default in making payment of tax, the DCT may direct that, in addition to the amount of tax in arrears, a sum not exceeding that amount shall be recovered from the assessee by way of penalty.

25.3 Certificate for recovery of tax: Section 216

1. When an assessee is in default or in deemed to be is default in making payment of tax, the DCT may forward to the TRO a certificate for recovery of the tax, under his signature specifying the amount of arrears due from the assessee; and such certificate may be issued notwithstanding that proceedings for recovery of the arrears by any other mode have been taken.

2. A certificate under sub-section (1) may be forwarded to –

   (a) the TRO within whose jurisdiction the assessee carried on his business or profession, or the principal place of business or profession of the assessee is situated; or

   (b) the TRO within whose jurisdiction the assessee resides, or any movable or immovable property of the assessee is situated; or

   (c) the TRO who has jurisdiction in relation to the assessee whose income is assessable by the DCT forwarding the certificate.

25.4 Method of recovery by Tax Recovery Officer (TRO): Section 217

1. Upon receipt of certificate forwarded to him under section 216, the TRO shall proceed, in accordance with the rules made in this behalf by the Board, to recover from the assessee the amount specified in the certificate by one or more of the following modes, namely-

   (a) attachment and sale, or sale without attachment, of any movable or immovable property of the assessee;

   (b) arrest of the assessee and his detention in prison;

   (c) appointment of a receiver for the management of the movable and immovable properties of the assessee.

2. While recovering under sub-section (1) the amount specified in the certificate forwarded to him, the TRO may also recover in the same manner from the assessee in default, in addition to such amount, any cost and charges, including expenses on the service of any notice or warrant, incurred in the proceedings for the recovery of the tax in arrears.

3. If the TRO to whom a certificate is forwarded under section 216 is not able to recover the entire amount by the sale of movable and immovable properties of the assessee within his jurisdiction, but has information that the assessee has property within the jurisdiction of another TRO, he may send the certificate to such other TRO or to the TRO within whose jurisdiction the assessee resides; and the TRO to whom the certificate has been so sent shall proceed to recover under Chapter XVI the amount remaining un-recovered as if the certificate was forwarded to him by the DCT.

25.5 Power of withdrawal of certificate and stay of proceeding: Section 218

1. The DCT shall have power to withdraw or correct any clerical or arithmetical error in the certificate and inform the Tax Recovery Officer.

2. Where the order giving rise to a demand of tax for which a certificate for recovery has been issued has been modified in appeal or other proceedings under this Act and, as a consequence thereof, the demand is reduced but the order is the subject matter of further proceedings under this Act, the DCT shall stay the recovery of such part of the amount of the certificate as pertains to the said reduction for the period for which the appeal or other proceedings remain pending.

3. Where a certificate for recovery has been issued and subsequently the amount of outstanding demand is reduced as a result of appeal or other proceedings under this Act, the DCT shall, when the order, which was the subject matter of such appeal or other proceeding, has become final and conclusive, amend the certificate or withdraw it, as the case may be.

4. The DCT shall communicate to the TRO any orders of cancellation, correction, stay of proceeding, withdrawal or amendment, as the case may be, of a certificate for recovery.

25.6 Validity of certificate for recovery not open to dispute: Section 219

When the DCT forwards a certificate for recovery under section 216 to a TRO, it shall not be open to the assessee to dispute before the TRO the correctness of the assessment, and the TRO shall not entertain any objection to the certificate on any ground whatsoever.

25.7 Recovery of tax through Collector of District: Section 220

1. The DCT may forward to the Collector of District in which the office of the DCT is situate or the district in which the assessee resides or owns property or carries on business or profession, a certificate under his signature specifying the amount of arrears due from an assessee, and the Collector, on receipts of such certificate, shall proceed to recover, from such assessee the amount specified therein as if it were an arrear of land revenue.

2. Without prejudice to any other powers which the Collector of District may have in this behalf, he shall, for the purposes of recovery of the amount specified if the certificate for recovery forwarded to him under sub-section (1), have the powers which a Civil Court has under the Code of Civil Procedure, 1908, for the purposes of recovery of an amount due under a decree.

3. The DCT may, at any time, recall from the Collector of District a certificate forwarded to him under sub-section (1) and upon such recall, all proceeding commenced in pursuance of the certificate shall abate. However, the recall of a certificate shall not affect any recoveries made by the Collector before the recall as if the certificate had not, to the extent of such recovery, been recalled; nor shall the recall of a certificate issued at any time prevent the recovery, by issue of a fresh certificate, of any amount which was recoverable at the time the certificate so recalled was issued.

Provided that, before taking action under this section, the proceedings under Sections 216, 217 and 221 must be completed.

25.8 Other modes of recovery: Section 221

(1) Notwithstanding the issue of a certificate for recovery of tax under section 216 or section 220, the DCT may also recover the tax in the manner provided in sub-section (2) or (3).

(2) For the purpose of recovery of tax payable by an assessee which is not disputed in appeal to any appellate forum, the DCT may, with the previous approval of the Commissioner, after giving the assessee an opportunity of being heard, stop movement of any goods and services from the business premises of such assessee and also shutdown such business premises till the recovery of the tax referred to above or any satisfactory arrangement has been made for the recovery of such tax.

(3) For the purposes of recovery of any tax payable by an assessee, the DCT may, by notice in writing, require following person to deposit the amount or deduct tax and deposit to the treasury:

i. To whom any money or goods of the assessee is due or may become due;

ii. Who holds or controls the receipt or disposal of, or may subsequently hold, or control the receipt or disposal of, any money or goods of the assessee;

iii. Who hold, supervise or operate any assets of any kind of the assesses on his behalf;

iv. Who hold, supervise or operate any assets of a non-resident assessee as an agent or may subsequently hold, supervise or operate;

v. Who is responsible to disburse income from employment to the assessee;

vi. Who is responsible to pay rental income to the assessee.

(4) Person who has paid any sum as required by sub-section (3) shall be deemed to have paid such sum under the authority of the assessee and the receipt by the DCT shall constitute a good and sufficient discharge of the liability of such person to the assessee to the extent of the sum specified in the receipt.

(5) If the person to whom a notice under sub-section (3) is sent fails to make payment or to make deductions in pursuance of the notice, he shall be deemed to be an assessee in default in respect of the amount specified in the notice and proceedings may be taken against him for realization of the amount as if it were an arrear of tax due from him; and the provisions of this Chapter shall apply accordingly.

(6) The DCT may at any time amend or revoke any notice issued under sub-section (3) or extend the time for making any payment in pursuance of such notice.

(7) DCT may direct respective authority to disconnect or stop providing gas, electricity, water, or other services for the purpose of recovering arear tax and authority shall stop or disconnect the services within 21 days upon receiving notice.

(8) Person shall be deemed to be the defaulter if he fails to comply with the notice and shall be personally liable.

(9) Peron shall restore the connection as discussed in the sub-section (7) upon getting permission from DCT.

(10) In any area with respect to which the Commissioner has directed that any arrears may be recovered by any process enforceable for the recovery of an arrear of any municipal tax or local rate imposed under any enactment for the time being in force in any part of Bangladesh, the DCT may proceed to recover the amount due by such process.

(11) Commissioner shall determine the process and responsibility of the concern authorities to recover tax as per statutory act or VAT and SD Act 2012, or Customs Act 1969 with the municipal tax, local tax, and other taxes under sub-section (10)

Self-assessment question

Discuss briefly the salient features of the various provisions of the Income Tax Act, 2023 relating to recovery of tax by the Tax Authorities.

Chapter 26

Double Taxation Relief

Introduction

Learning objectives

Examination context

Topic list

26.1 Double taxation – some basic concepts

26.2 Agreement to avoid of double taxation

26.3 Relief In respect of income arising outside Bangladesh

26.4 Comparative picture of Double Tax Avoidance and tax relief

26.5 Methods of avoiding double taxation?

26.6 Tax treaty

26.7 Some other concepts used in DTAA

26.8 Other topics in International Taxation

Introduction

Learning objectives

- Define the agreement to avoid double taxation.
- Recognize the tax relief in respect of income arising outside Bangladesh.

Practical significance

The Government of Bangladesh may enter into an agreement with the Government of any other country for the avoidance of double taxation and the prevention of fiscal evasion with respect to income taxes. The agreement can provide some provisions for implementation such as relief from the tax payable, recovery of tax leviable under the Act and under the corresponding law in force in that country etc.

If any person who is resident in Bangladesh in any year proves that he has paid tax on any income for any income year outside Bangladesh in any country with which there is no reciprocal agreement for relief or avoidance of double taxation, tax shall be deducted from the tax payable by him under the Act, subject to such rules as the NBR may make in this behalf, a sum equal to the tax calculated on such doubly taxed income at the average rate of tax of Bangladesh or the average rate of tax of the said country, whichever is the lower.

Stop and think

Do you realize the impact of agreement to avoid double taxation? Do you know the list of countries with which Bangladesh has agreement to avoid double taxation? Do you know about the relief in respect of income arising outside Bangladesh?

Working context

Accountant can help their clients by giving advice with procedures to avoid double taxation. They should have the updated knowledge on various agreements for avoidance of double taxation with different countries. Based on the provisions of these agreements they can support their clients in this regard.

Examination context

Exam requirements

In the examination, candidates may be required to:

- Define the agreement to avoid double taxation.
- Recognize the provision mentioned in agreement to avoid double taxation.
- Identify the relief in respect of income arising outside Bangladesh.
- List the name of countries with whom Bangladesh has agreement for avoidance of double taxation.

Question practice

For question practice on these topics, go to the suggested answers covering this chapter.

DOUBLE TAXATION RELIEF

Section overview

- For the avoidance of double taxation, Bangladesh enters into agreement with many countries.
- Double taxation agreement also prevents the fiscal evasion with respect to income taxes.
- Under double taxation relief system, the payable tax will be the sum equal to the tax calculated on such doubly taxed income at the average rate of tax of Bangladesh or the average rate of tax of the foreign country, whichever is the lower.

26.1 Double taxation – some basic concepts

What is double taxation?

Double taxation means taxing the same income twice, once in the home country and again in the host country. For example, a Bangladeshi citizen may have income arose in India which is once taxed in India and again in Bangladesh.

How does double taxation arise?

Double taxation may arise in the following two ways:

(i) The jurisdictional connections used by different countries may overlap with each other. For example, Mr. Rolex, a resident under the Bangladesh Income Tax Act, 2023 must pay tax on his total world income in USA also as citizen of USA (Residential jurisdiction).

(ii) The taxpayer or his income may have connections with more than one country. For example, Mr. Rahamat, a Bangladeshi citizen, has income from Romania on investments and dividend income from France in addition to income from Bangladesh. He has to pay tax on his total world income in Bangladesh and also on income earned in Romania and France (Source jurisdiction).

What are the broad objectives of Bangladesh DTAA?

The major objectives of Bangladesh DTAA are as follows:

(i) To obtain a more effective relief from double taxation compared to relief allowed under unilateral measures.
(ii) To create a favorable climate for the inflow of FDI in Bangladesh.
(iii) To make special tax incentives provided by Bangladesh fully effective for the taxpayers of the capital exporting countries.
(iv) To prevent tax evasion.
(v) To foster long term, mutually beneficial economic relationship with others specially the developed countries.

Which model of avoidance of double taxation agreement is followed in Bangladesh?

There are two models of avoidance of double taxation agreement viz., UN Model and OECD Model. Bangladesh generally follows UN model of avoidance of double taxation agreement which consists of the following 29 articles:

Article	Heading	Main Contents
1.	Scope of the convention	To whom applicable
2.	Taxes covered	Specific taxes covered
3.	General definitions	Person, company, enterprise, international traffic, competent authority
4.	Resident	Resident of a contracting state
5.	Permanent establishment (PE)	What constitutes /does not constitute PE
6.	Income from immovable property	Immovable property and income there from
7.	Business profits	Determination and taxation of profits arising from business carried on through PE

8.	Shipping, inland waterways, transport and air transport	Place of deemed accrual of profits and mode of taxation thereon
9.	Associated enterprises	Enterprises under common management and taxation of profits arising there from
10.	Dividends	Definition and taxation of dividends
II.	Interest	Definition and taxation of interest
12.	Royalties	Taxation of royalties, country where taxable
13.	Capital gains	Taxation of capital gains, country where taxable
14.	Independent personal services	Types of services, country where taxable
15.	Dependent personal services	Definition, country where taxable
16.	Directors' fees and remuneration for top level managerial officials	Definition, country where taxable
17.	Income earned by entertainers and athletes	Types of activities, mode and country where taxable
18.	Pension and social security payments	Country where taxable
19.	Remuneration and pensions in respect of Government servants	Type of remuneration, country where taxable
20.	Payment received by students and apprentices	Taxation and related exemptions
21.	Other income	Residual article to cover incomes not covered under articles, mode of taxation and country where taxable
22.	Capital (tax on wealth)	Mode of taxation, country where taxable
23.	Non-discrimination	Equitable basis of taxing nationals and citizens of foreign state
24.	Mutual Agreement Procedure	Where taxation is not as per provisions of the convention, a person may present his case to competent authority of respective states
25.	Exchange of information	Competent authorities to exchange information for carrying out the provisions of the convention, methodology for the same
26.	Diplomatic agents and consular officers	Privileges of this category to remain unaffected
27.	Entry into force	Effective date from which the convention comes into force,
28.	Termination of treaty	Time and notice period mode

Besides the above clauses, DTAAs normally contain a Protocol or Memorandum, which is like a supplement to the Treaty. This is attached normally at the end of the treaty, which clarifies borderline issues, and rectifies unintended omissions.

The other model, OECD model, is mostly followed amongst 29 OECD countries. The fundamental difference between these two is essentially one; UN model is based on taxing the income on source principle whereas OECD model is on resident principle. Since FDI flows from developed to developing countries, the latter tends to benefit the developed countries.

What impact double taxation in general, would have on global economic activities?

(a) It hampers free flow of capital and technology across borders and

(b) It becomes a prohibitive burden on concerned taxpayers leading to decline in foreign investments.

What are the effects of DTAA in Bangladesh?

The effects of an agreement entered by virtue of section 244 of Income Tax Act, 2023 would be:

1. If no tax liability is imposed under the Act, the question of resorting to DTAA would not arise. No provision of DTAA can possibly fasten a tax liability which is not imposed by the Act. The treaties with all intent and purpose, can lessen the vigor of double taxation cannot, however, enhance it.
2. In case of a difference in the provisions of the Act and those of the DTAA, to the extent they are more beneficial to the provisions of the Act, will override the Act which is the fundamental concept in treaty override.

What are the differences between double tax relief and double tax avoidance?

Double tax relief means granting of relief in respect of income on which income tax has been paid under the Bangladesh tax laws and in other country.

Double taxation avoidance means avoidance of double taxation on income under the tax laws of the two countries. One important distinction between the two is that in the case of avoidance of double taxation the assessee does not have to pay the tax first to claim refund later, but he would be obliged to do so in the case of relief against double taxation.

The other distinction is that no benefit is given unless otherwise stipulated in the DTAA, but relief can be awarded unilaterally against double tax even when there exists no DTAA. Section 244 of the Income Tax Act, 2023 empowers the DCT to grant such relief, subject to such rules as the NBR may make in this behalf.

Firstly, as per section 244 of Income Tax Act, 2023, where Bangladesh Govt. has entered any DTAA, the provisions of that agreement would normally apply to the case of an assessee covered by such agreement. However, if the relevant provisions in the Bangladesh Income Tax Act are more favorable, then to that extent he can seek applications of the provisions of the Act as against those of the agreement.

26.2 Agreement to avoid double taxation: section 244

This section confers the right to GOB to enter into an agreement with the government of any other country for the avoidance of double taxation and the prevention of fiscal evasion with respect to income tax and may, by Gazette Notification, make such provisions as may be necessary to implement the agreement.

Income tax policy section of NBR is entrusted to negotiating the Double Taxation Avoidance Agreement (DTAA) with foreign countries to promote foreign direct investment in Bangladesh. DTA is an agreement between two countries seeking to avoid double taxation by defining the taxing rights of each country regarding cross border flows of income, providing for tax credits or exemptions to eliminate double taxation.

At present, Government of Bangladesh has entered into Double Taxation Avoidance Agreement (DTAA) with 43 countries and a comparative Rates in Double Taxation Avoidance Agreement are given below:

Sl. No.	Name of the Country	Permanent Establishment	Maximum tax rate for dividend	Maximum tax rate for Interest	Maximum tax rate for Royalties
1	Bahrain	183 days	10%/15%	10%	10%
2	Belarus	6 months	10%/12%	7.50%	10%
3	Belgium	183 days	15%	15%	10%
4	Bhutan	183 days	10%/15%	10%	10%
5	Canada	183 days	15%	10%	10%
6	China	6 months	10%	10%	10%
7	Czech Republic	6 months	10%/15%	10%	10%
8	Denmark	183 days	10%/15%	10%	10%
9	France	183 days	10%/15%	10%	10%
10	Germany	183 days	15%	10%	10%
11	Hong Kong	183 days	10%	10%	10%
12	India	183 days	10%/15%	10%	10%
13	Indonesia	183 days	10%/15%	10%	10%
14	Iran	183 days	10%	10%	7.5%
15	Italy	183 days	10%/15%	10%/15%	10%/15%
16	Japan	6 months	10%/15%	10%	10%
17	Korea	183 days	10%/15%	10%	10%
18	KSA	6 months	10%	7.50%	10%
19	Kuwait	183 days	5%/10%	10%	10%
20	Malaysia	183 days	15%	15%	15%
21	Maldives	183 days	10%/15%	10%	10%
22	Mauritius	12 months	10%	0%	0%
23	Morocco	6 months	10%	10%	10%
24	Myanmar	6 months	10%	10%	10%
25	Nepal	183 days	10%/15%	10%	15%
26	Netherlands	6 months	10%/15%	10%	10%
27	Norway	6 months	10%/15%	10%	10%
28	Oman	Only airlines			
29	Pakistan	183 days	15%	15%	15%
30	Philippines	6 months	10%/15%	15%	15%
31	Poland	183 days	10%/15%	10%	10%
32	Qatar	9 months	5%	7.5%	7.5%
33	Romania	183 days	10%/15%	10%	10%
34	Singapore	183 days	15%	10%	10%
35	Sri Lanka	183 days	15%	15%	15%
36	Sweden	183 days	10%/15%	10%	10%
37	Switzerland	183 days	10%/15%	10%	10%
38	Thailand	183 days	10%/15%	10%/15%	15%
39	Turkey	12 months	10%	10%	10%
40	U.K	183 days	10%/15%	7.5%/10%	10%

41	UAE	6 months	5%/10%	10%	10%
42	USA	183 days	10%/15%	10%	10%
43	Vietnam	6 months	15%	15%	15%

Please note, the Income Tax Act, 2023 mandates that tax treaties shall have priority over the provisions of the Act.

26.3 Relief in respect of income arising outside Bangladesh: section 246

This section empowers DCT to allow relief to an assessee in respect of any income accrued or arisen in any other country with which Bangladesh does not have DTAA. The assessee must prove that he has suffered tax on that income by way of deduction or otherwise, then the DCT may, subject to such rules as the NBR may make in this behalf, deduct from the tax payable by the assessee a sum equal to tax calculated on such doubly taxed income at the average rate of tax of Bangladesh or the average rate of tax at the said country, whichever is lower. Average rate of tax means the rate arrived at by dividing the amount of tax calculated on the total income by such income.

26.4 Comparative picture of Double Tax Avoidance and tax relief

Double tax avoidance and tax relief as presented in sections 244 and 246 respectively in ITA, 2023 have conceptual difference which is presented in the table below:

Ref.	Income	Heading of the section	Tax advantages
Section 244	Arises from those countries with whom there is DTAA	Avoidance of Double Taxation	Tax calculated as per rate in the agreement, but it will not be more than the tax amount calculated on the basis of the average tax rate applicable in Bangladesh (considering foreign income in total income) on the foreign income.
Section 246	Arises from those countries with whom there is no DTAA	Relief	Tax calculated on such doubly taxed income at the average rate of tax of Bangladesh or the average rate of tax of the said country, whichever is lower subject to such rules as the NBR may make in this behalf.

Example 1

Mr. Nazim, a Bangladeshi resident, received net interest income of Tk. 450,000 from Indonesia after deduction of 10% of tax at source during the year ending on 30 June 2026. His other income in Bangladesh amounts to Tk. 400,000 for the same year. Compute the net tax liability of Mr. Nazim.

Solution

Mr. Nazim
Assessment year: 2026-27

Heads of income	**Amount (Tk.)**
Income from Bangladesh sources	400,000
Foreign income (Tk. 450,000/0.90)	500,000

Total income			900,000

Computation of tax liability:

Tier of income		Rate	Amount (Tk.)
On first	Tk. 400,000	0%	Nil
On next	300,000	10%	30,000
On balance	200,000	15%	30,000
	Tk. 900,000		60,000

Thus, the average tax rate in Bangladesh is 6.67% (Tk. 60,000 / Tk. 900,000 × 100). So, the maximum limit of tax credit will be Tk. 33,350 (Tk. 500,000 × 6.67%) though he already paid Tk. 50,000 tax in Indonesia as because tax credit would be lower of tax at average rate that is Tk. 33,350 or tax already paid at foreign country Tk. 50,000 whichever is lower. Mr. Nazim will have to pay Tk. 26,650 (Tk. 60,000 – Tk. 33,350) as remaining tax in Bangladesh.

Example 2

Mr. Khan Jahan records the income for the income year 2025-26 as income from Bangladesh Tk. 1,850,000; income from Sweden Tk. 600,000; income from Singapore Tk. 400,000; and income from Russia Tk. 1,000,000. The income tax rate for foreigners in Sweden is 30%, but he has paid tax @ 25% as per DTAA. 20% tax has been paid in Russia for the income generated in Russia and 25% tax has been paid in Singapore for the income generated in Singapore. Show the application of double taxation relief due to these foreign incomes for the assessment year 2026-27.

Solution

Mr. Khan Jahan
Computation of total income
For the assessment year 2026-27

Particulars	Tk.	Tk.
1. Income from Bangladesh		1,850,000
2. Income from Sweden		600,000
3. Income from Russia [No DTAA]		1,000,000
4. Income from Singapore		400,000
Total income		3,850,000

Mr. Khan Jahan
Computation of tax payable in Bangladesh

Particulars	Rate.	Tk.
On first 400,000	0%	-
On next 300,000	10%	30,000
On next 400,000	15%	60,000
On next 500,000	20%	100,000
On next 2,000,000	25%	500,000
On rest of income – 250,000	30%	75,000
Total Tax		765,000
Less: Double taxation relief (Note-5)		198,700
Net tax payable		566,300

Notes:

1. Average tax rate in Bangladesh = [(765,000 /3,850,000) ×100] = 19.87%
2. No tax relief from income from Russia (as there is no DTAA)
3. Tax relief from income from Sweden (DTAA exists) = (600,000 ×25%) = Tk. 150,000. However, maximum limit is Tk. 119,220 (600,000 ×19.87%).
4. Tax relief from income from Singapore (DTAA exists) = @ 25% or average tax rate, whichever is lower = (400,000 ×19.87%) = Tk. 79,480
5. Total double taxation relief is = Tk. (119,220 + 79,480) = Tk. 198,700

Example 3

Asia limited, Singapore has opened a liaison office in Bangladesh. Initially, they have hired 3 employees and expect to hire more people in future. The entity has finalized the total benefits per employee. The GM of the entity has heard that, proper structuring of salary components (e.g., basic, house rent, etc.) in Bangladesh can bring in tax benefits to the employee. One of the newly joined employees is asking for salary payment in cash. S/he said that, cash payments are not subject to withholding tax in Bangladesh.

The GM wants to be fair in tax practice. He also wants to avail the maximum tax benefits for himself and the other employees. The entity does not have any fixed payroll structure ratio. Below is the salary pay structure plan.

Pay structure

Asia Ltd. - Bangladesh Liaison Office

Name: Mr. Kei San
Position: General Manager
Gender: Male
Monthly salary: Tk. 500,000.
Joining date: 1st July 2025

Required

Calculate the most tax efficient salary structure ratio for Mr. Kei - San that will result in withholding tax per month. The comparison is shown below:

Particulars	Ratio 1	Ratio 2	Ratio 3
Basic Salary	50%	40%	40%
House rent allowance	30%	30%	30%
Medical Expenses	10%	20%	10%
Conveyance Allowance	10%	10%	20%
	100%	100%	100%

Solution

In every situation taxable income and withholding tax are same because his yearly salary is Tk. 6,000,000. Whereas non-taxable ceiling is 1/3rd of gross salary or Tk. 500,000 which is lower and same in every situation and his taxable salary will be Tk. 6,000,000 – Tk. 500,000 = Tk. 5,500,000 in all situation. Accordingly withholding tax in every situation will also be the same. Tax planning will not work here due to high salary.

Example 4

Mr. Z an individual, working for a large food company having compliant tax practices, has come to you to seek your advice on the following:

For the Assessment Year 2026-27 Mr. Z received Tk. 190,000 from the Workers' Profit Participation Fund established under Bangladesh Labor Act, 2006 after deduction of 10% tax as per ITA.

In connection with the above, while discussing about this withholding tax (which was not applicable earlier) with one of his colleagues, he told that although there is tax applicable on income from Workers' Profit Participation Fund but it is in fact exempted from income taxes as per the Bangladesh Labor Act, 2006 for the workers. For the Assessment Year 2026-27, while assessed Mr. Z's total income is already at the highest slab of tax rate without this income from Workers' Profit Participation Fund.

Mr. Z is requiring following advice from you:

i) What would be his legal position based on the tax laws and labor law? If he has to pay taxes on income from Workers' Profit Participation Fund,

ii) Tax liability considering the withholding taxes and exemption if any as per the tax laws (ignore investment allowances)

Solution

(i)	The legal position on the taxability on income from Workers' Profit Participation Fund based on the tax laws and labor law: **On the application of withholding taxes:** It is correct that as per Bangladesh Labor Act, 2006 ("Labor Act") it has been mentioned that income from Workers' Profit Participation Fund is exempted from taxes for the workers defined under the said Labor Act. However, while introducing this withholding tax provision u/s 88 of tax law, taking into account such provisions in other laws, it is clearly mentioned that notwithstanding anything contained in any other provisions of ITA or any other laws being in force in respect of exemption from tax on payments from Workers' Profit Participation Fund …withholding taxes @10% shall be applicable. Hence, it is clear that the Income Tax law has an overriding authority over the labor law in this regard. **On the application of income taxes:** As per Income tax law, exemptions are considered only when there is expressed provision as per Sixth Schedule Part I (Exclusions from total Income) or through a SRO irrespective of any exemption given under other laws. This is because; section 3 of the Act has given the Act an overriding authority on other laws. Hence, any income from Workers' Profit Participation Fund shall be taxable subject to any exemption allowed as per the Sixth Schedule Part I (Exclusions from total Income) or any SRO thereof.

(ii)	If he has to pay taxes on income from Workers' Profit Participation Fund, net tax liability of Mr. Z on income from Workers' Profit Participation Fund considering the withholding taxes and exemption if any:

Description	Amount
Gross income from WPPF (190,000 (90%)	211,111
Tax @ 30% (being in the highest slab) Tax already deducted u/s 88	63, 333 (21,111)
Net Tax liability	42,222

Example 5

A multinational Tobacco Company i.e., MTC Co. has been running their tobacco business in Bangladesh for some time. The company is a private limited company. Now it is contemplating to explore the possibility of introducing new product(s)/service line(s) of non-tobacco nature along with their existing tobacco business. Hence, the company has considered the following options and asked for the certain queries under each option:

Option A: Integration of the new product/service line within the existing business which will be producing and marketing both tobacco and non-tobacco product/service lines.

Option B: Setting up a separate local subsidiary which will be owned by existing company i.e. MTC Co.

Option C: Setting up a legal entity which will be owned by the non-resident parent company of the existing company in Bangladesh.

Besides, the company has outlined some specific queries under each option which have been outlined below:

Queries for Option A:

(i) Whether the income generated from non-tobacco business would be taxed separately or the tax rate of current tobacco business would be imposed on non-tobacco business as well?

Queries for Option B:

(i) How would the cost of the management team be allocated to the subsidiary as most of the management work of the subsidiary would be done by the Parent company management team.

(ii) What is the tax implication on the charge of management fees to the subsidiary company?

(iii) What would be the tax implication of the subsidiary company considering the two scenarios:

1. If its legal status is a listed company
2. If its legal status is a private limited company

(iv) How would the dividend income be treated in the financial statements of the Parent company and what would be the tax implication therein along with the net income of Ultimate parent company situated in JAPAN, upon distribution of dividend.

(v) Would the parent company and subsidiary company both require to submit tax return? If so, would there be a requirement to submit tax return for the consolidated profit as well.

The company has approached Mr. X, the partner of a one of the reputed CA firms for an expert opinion with optimal tax structure on the above-mentioned business options and queries pertained to them. You are currently acting the role of a senior manager in the firm since long as a qualified Chartered Accountant. And the partner of the firm has delegated the assignment to you.

Requirements:

Explanation of each option mentioned above in the light of Income Tax Act, 2023. This should also include the following:

- Double tax treaty benefits if any in case of repatriation of dividend to ultimate parent company, situated in JAPAN, of the tobacco Co. Assume 100% foreign holding
- Financial analysis considering the new company to be considered as a subsidiary of MTC as a private entity and as a public entity
- Financial analysis considering the new company to be considered as a subsidiary of MTC or of non-resident parent entity of MTC as a private entity

Solution

Option-A

(i) Would the income generated from non-tobacco business be taxed separately or would the tax rate of current tobacco business be imposed on non-tobacco business as well?

As per my understanding, current business income being generated from Tobacco, is subject to corporate tax @ 45% along with income surcharge @ 2.5% which in total comes to 47.5%. However, as for the income to be generated from non-tobacco business, regular rate of tax will be applicable which is 22.5% being a publicly listed company, if you can evidently categorize your new product stream as non-tobacco.

Now question comes, as to whether authority will allow you to effectively use different rates for each of your segregated business lines.

In my view, there is a perception risk of operating both the product lines under the umbrella of Tobacco business, where the tax authority may impose the tax rate of 47.5% on the overall income generated from each product stream, due to the principal business of tobacco company to manufacture and sale of tobacco products. However, from my practical experience, where an assessee who generated income from more than one business, one business income was subject to tax at regular rate @ 25% and another business was subject to tax at reduced rate.

An example has been furnished outlining the tax impact based on what have been discussed above:

	With no segmentation	With segmentation		
		Tobacco	Non-Tobacco	Total
Revenue	2,000	1,600	400	2,000
Less: Operating Expenses	(400)	(320)	(80)	(400)
Profit Before Tax	**1,600**	**1,280**	**320**	**1,600**

Corporate Tax (Tobacco 47.5%; Non-Tobacco 25%)	(760)	(608)	(80)	(688)
Profit After Tax	**840**	**672**	**240**	**912**
Available for profit repatriation (72.91%)	612			665
WHT thereon (10% as there is DTTA)	(61)			(66)
Net Available for profit repatriation	**551**			**598**

Option-B

(i) **How would the cost of the management team be allocated to the subsidiary as most of the management work of the subsidiary will be done by the Parent company management team.**

If the company intends to establish a separate legal subsidiary for the new business, as per my understanding, it is very unlikely that the tax authority will accept the allocation of management cost incurred by the Parent company to the subsidiary, unless the company invoices the subsidiary on an agreed management fee basis, which is applied consistently in terms of calculation mechanism. In such case, the company needs to maintain documentation to support the cost allocation.

Here, question comes as to whether the company can be engaged in rendering such management services. In my view it is possible provided that there is an object clause in MoA.

(ii) **Tax & VAT implications on management fees:**

TDS implication:

As per section 90 of the ITA, 2023, any company (in this case the new subsidiary company) responsible for making any payment which constitutes as income of the payee shall deduct tax at source at the applicable rate.

Hence, management fees will be subject to tax deduction at source (TDS) @ 10% as per section 90.

Corporate tax implication:

Such income will be considered as other income for the Parent company. Hence, such income will be subject to corporate tax @ 20% or 22.5% being a publicly traded company.

(iii) **What would be the tax implication of the subsidiary company depending on its listing status.**

Tax on Business income

Business income of the private limited company is subject to corporate tax @ 25%, and as for publicly listed company, the tax rate is 20%. This is to reiterate that, if the new line of business is considered as non-tobacco business, in that case, regular rate of tax will be applicable.

(iv) **How would the dividend income be treated in the financial statements of the Parent company and what would be the tax implication therein.**

Treatment of dividend income:

As per International Accounting Standard (IAS-1), dividend income should be presented as non-operating income in the financial statements of the Parent company (i.e. MTC).

Tax implication on dividend income of Foreign Parent Company:

As per section 117 of ITA, 2023, any company, at the time of paying dividend to a shareholder, is required to deduct tax on the amount of such dividend, at the rate applicable to a company. Please note that, the law applies in case of payment of dividend to both resident and non-resident shareholder.

If the income of the new subsidiary is to be distributed as dividend income to the Parent company, then with reference to section 117 as mentioned above, tax shall be deducted @20% on the dividend income distributed to MTC, **which is the final tax for the Parent company on dividend income as the rate of tax on dividend income is also 20%.**

However, if the parent company further distributes the dividend income to its foreign shareholder situated in JAPAN, as per section 119 of ITA, 2023, such payment shall be subject to a further withholding tax @ 20%. A reduced rate of 10% in place of 20% may be applicable because there is DTAA with JAPAN. But this is subject to obtaining certificate from NBR as per section 119.

An example has been furnished below showing the various level of taxation and the ultimate net income in the hand of ultimate Parent company, situated in JAPAN.

	With Non-Listed Subsidiary			With Listed Subsidiary		
	Subsidiary Company (X)	(Parent Company)	Consolidated Financials	Subsidiary Company (X)	(Parent Company)	Consolidated Financials
Revenue	400	1,600	2,000	400	1,600	2,000
Cost	(80)	(320)	(400)	(80)	(320)	(400)
Profit Before Tax	**320**	**1,280**	**1,600**	**320**	**1,280**	**1,600**
Corp. Tax (Non-listed subsidiary 27.5%; Listed 22.5%; Tobacco Co. 47.5%)	(96)	(608)	(704)	(72)	(608)	(680)
Divisible Profit before Dividend Income	**224**	**672**	**896**	**248**	**672**	**920**
(Dividend to Parent)/ Dividend from X	(224)	224	-	(248)	248	-
WHT (20%) on Dividend Income from X		(45)	(45)		(50)	(50)
Divisible Profit of Parent	**-**	**851**	**851**	**-**	**870**	**870**
Available for Ultimate parent (72.91%)			620			634
WHT (10%)			(62)			(63)
Net Income for Ultimate Parent			**558**			**571**

(v) **Would the parent company and subsidiary company both require to submit tax return? If so, would there be a requirement to submit tax return for the consolidated profit as well.**

With reference to section 73 of ITA, 2023 states that, every public or private company (as defined under Companies Act 1994) shall be required to furnish a copy of audited financial statements as certified by a chartered accountant at the time of filing the return of income.

There is no provision in the ITA, 2023 for separate audit of the consolidated financial statement and separate tax return submission for the consolidated financial statement.

Example 6

A multinational company "Fantastic Limited" is owned by a China based company and by a Sarkar family in Bangladesh. The China based company holds 45% shares and Sarkar family holds 55% (of which Mr. Sarkar himself holds 35% and the rest are equally divided between his two sons) shares in Fantastic Limited. The Sarkar family has decided to transfer their shares and a German based company (GZR Inc.) has expressed their interest to buy the shares of Sarkar family in Fantastic limited. Please note that the China based company and the German based company are the concern of same holding company.

The acquirer company has contemplated the following options as part of the consideration to be given to the Sarkar Family against the purchase of the shares:

Option A:

- Dividend of USD 2,000,000 equivalent to Tk. 170,000,000 will be distributed out of previous year's retained earnings (estimated around 4 years' earnings) to Sarkar Family and to the China based company on the basis of their proportion of shares the "Fantastic Limited".
- The acquirer company will provide USD 2,135,000 equivalent to Tk. 181,475,000 to purchase the shares of Sarkar Family in the "Fantastic Limited".

Option B:

- No dividend will be distributed rather the acquirer company would like to add the cash part of USD 1,020,000 equivalent to Tk. 86,700,000 along with the original purchase price of USD 2,135,000 equivalent to Tk. 181,475,000 which in total comes to USD 3,135,000 equivalent to Tk. 268,175,000 for the purchase of shares from Sarkar Family held in the "Fantastic Limited"

Note: Total number of shares held in Fantastic Limited is 20,000. Face value of the share is valued @ Tk. 250 per share. And the current fair value of the share is valued @ Tk. 25,000 applying the market value approach. Mr. Sarkar from the Sarkar Family approached one of the Partners of your CA firm and you have been assigned to cater the queries from tax point of view.

Requirements:

(i) Tax implication on dividend distribution assuming that there is tax treaty between BD and China.

(ii) Capital Gain Tax implication.

(iii) Analysis of pros and cons of the proposed option from financial aspects on the basis of below mentioned scenario.

(iv) Recommendations.

Please note that, your analysis and recommendation should take into account the following tax implication on the basis of assumptions mentioned below under two scenarios:

Scenario-1

- Consider the yearly income of Mr. Sarkar of Tk. 25,000,000
- Consider the dividend income and capital gain earned from option A.
- Share disposal took place within 5 years from the date of acquisition.

Scenario-2

- Consider the yearly income of Mr. Sarkar of Tk. 25,000,000
- Consider capital gain earned from option B.
- Share disposal took place after 5 years from the date of acquisition.

Solution

(i) Tax implication on dividend distribution

Dividend Repatriation to China Based Company:

As per section 119 of the ITA, 2023, repatriation of dividend is subject to tax deduction at source @ 20%. Since there is double taxation avoidance agreement (DTAA) between Bangladesh and China, dividend repatriation to China Based Company will be subject to tax @ 10%.

Dividend distribution to Sarkar Family:

As per section 117 of ITA, 2023, distribution of dividend to Sarkar family will be subject to tax deduction at source @ 10%.

Please note that this source tax is not the final tax. However, this tax can be adjusted with total tax liability. As the tax rate on dividend income for the assessment year 2026-27 is 15%, so another 5% is to be paid.

(ii) Capital Gain tax implication

As per section 57 of ITA, 2023, tax shall be payable by an assessee under the head "Capital gains" in respect of any profits and gains arising from the transfer of a capital asset and such profits and gains shall be deemed to be the income of the income year in which the transfer took place.

As per 7th Schedule of the ITA, 2023, tax payable on capital gain will be depending upon the tax slab rate applicable for the individual on his total income if the disposal of shares takes place within 5 years from the date of acquisition.

However, if the disposal of shares takes place after five years from the date of acquisition, in that case, tax @ 15% on the capital gain which will be applicable.

(iii) Analysis of pros and cons of the proposed option from financial aspects

- Dividend entitlement of Sarkar family will be compensated as purchase consideration on the disposal of shares.
- Capital route is tax effective as compared to dividend route if:

  1. The individual holds the share more than five years and if
  2. The individual is now at higher tax bracket

Now let us analyze the two routes from tax exposure point of view:

Scenario-1

Yearly usual income of Mr. Sarkar is Tk. 25,000,000. He is expected to earn capital gain of Tk. 61,766,250 from the disposal of shares held in Fantastic Ltd and dividend income of Tk. 59,500,000. This is to note that the share disposal took place within 5 years from the date of acquisition. Hence, total income comes to Tk. 146,266,250. Now let us calculate the tax payable.

Income Slab		Tax rate	Tax payable
First	400,000	Nil	Nil
Next	300,000	10%	30,000
Next	400,000	15%	60,000
Next	500,000	20%	100,000
Next	2,000,000	25%	500,000
Remaining	142,666,250	30%	42,799,875
	146,266,250		**43,489,875**

That means, capital gain is taxable @ 30% as share disposal took place within 5 years.

Scenario-2

Yearly usual income of Mr. Sarkar is Tk. 25,000,000. He is expected to earn capital gain of Tk. 92,111,250 from the disposal of shares held in ABC Co. This is to note that the share disposal took place after 5 years from the date of acquisition. Hence, total income comes to Tk. 117,111,250. Now let us calculate the tax payable.

Income Slab		Tax rate	Tax payable
First	400,000	Nil	Nil
Next	300,000	10%	30,000
Next	400,000	15%	60,000
Next	500,000	20%	100,000
Next	2000,000	25%	500,000
Remaining	21,400,000	30%	6,420,000
	25,000,000		**7,110,000**
Capital gain	92,111,250	15%	13,816,688
Total	**117,111,250**		**20,926,688**

(iv) Recommendations:

Upon considering the pros and cons of the two options, option B seems lucrative from tax savings point of view but from income perspective option-A seems more feasible as compared to option B.

Example 7

Since 2017, "ABC Co." a branch of a Spanish Company situated in India has been working with XYZ Co. in India as a Joint Venture (JV) for the Bangladeshi Government providing consultancy services for the design and construction supervision of the Construction of the Dual Gauge Railway Track between Dhaka – Tongi and Tongi- Joydebpur sections.

ABC Co. performed the design services from India but now there is an important part of the works (construction supervision) to be carried out in Bangladesh (with Indian and Bangladeshi staff). Until now, the project has been carried out through an Indian Joint Venture (the Government received a financing for the Project and one of the requirements from the Bank was to be registered in India) formed by XYZ Co. and ABC Co.

Below are the salient points of the project:

- The Project was awarded to an Indian Consortium (not company) formed by ABC Co. (50%) and XYZ Co. (50%).
- The project is divided into 3 stages: Stage 1 – Detailed Design, Stage 2 – Construction Supervision, Stage 3 – Development Phase
- Stage 1 is already completed
- Duration of stage 2 is 3 years (tentatively). It was started in July 2023.
- Duration of stage 3 is 6 months (tentatively).
- XYZ Co. has developed its part of the work since the beginning of the Project
- For the performance of stages 2 and 3, ABC Co. and XYZ Co. have established a JV in India.
- The price is going to be paid in USD & Tk.
- 5 Indian engineers to be located in Dhaka (3 from ABC Co. and 2 from XYZ Co.)
- One or some local subcontract/s
- The project is financed by a bank situated in India. Invoices are issued to the Client (Bangladesh Railways) but payment is done in India by the Indian Bank, including the Taka component that the bank converts into USD at a fixed rate (100 Tk./USD) for payment.

Now the JV is considering to set up either a branch or a company in Bangladesh to carry out the phase 2 and 3 of the project.

Requirements:

(i) Whether the establishment of a branch office will trigger PE from local tax point of view and from the perspective of Double Tax Treaty agreement?

(ii) Whether PE risk if any can be averted if JV hires own employees instead of opening a branch office or a company i.e., JV?

(iii) Should the income generated through PE be subject to tax in Bangladesh and if so, then how it should be taxed in the light of ITA, 1984?

(iv) Advising any other way out to avoid PE risk, if any?

Solution

(i) Whether the establishment of a branch office will trigger PE from local tax point of view and from the perspective of Double Tax Treaty agreement?

From local tax point of view:

As per new section 2(92) of the ITA, 2023, permanent establishment, in relation to income from business or profession, means a place or activity through which the business or profession of a person is wholly or partly carried on, and includes-

(a) a place of management;

(b) a branch;

(c) an agency;

(d) an office;

(e) a warehouse;

(f) a factory;

(g) a workshop;

(h) a mine, oil or gas well, quarry or any other place of exploration, exploitation or extraction of natural resources;

(i) a farm or plantation;

(j) a building site, a construction, assembly or installation project or supervisory activities in connection therewith;

(k) the furnishing of services, including consultancy services, by a person through employees or other personnel engaged by the person for such purpose, if activities of that nature continue (for the same or a connected project) in Bangladesh; and

(l) any associated entity or person (hereinafter referred to as "Person A") that is commercially dependent on a non-resident person where the associated entity or Person A carries out any activity in Bangladesh in connection with any sale made in Bangladesh by the non-resident person;"

From DTAA perspective:

Article 5 of the DTAA between India and Bangladesh defined the meaning of "permanent establishment" which are as follows:

(a) a place of management;

(b) a branch;

(c) an office;

(d) a factory;

(e) a workshop;

(f) a warehouse, in relation to a person providing storage facilities for others and

(g) a mine, an oil or gas oil, a quarry or other place of extraction of natural resources;

(h) a building site or construction or installation project constitutes a permanent establishment only if it lasts more than 183 days

Hence, establishment of a branch office will trigger PE from both local tax point of view and from the perspective of Double Tax Treaty agreement.

(ii) Whether PE risk if any can be averted if JV hires own employees instead of opening a branch office from local tax and DTAA perspective?

As discussed above, as per serial no. (k) of section 2(92) of the ITA, 2023, furnishing of services, including consultancy services, by a person through employees or other personnel engaged by the person for such purpose, if activities of that nature continue (for the same or a connected project) in Bangladesh shall constitute PE in Bangladesh. Hence, PE risk cannot be averted if JV hires own employees instead of opening a branch office.

In addition to that, from the perspective of DTAA, stay period of more than 183 days shall constitute PE. Since, the project will run for more than three (3) years, hence, PE risk cannot be averted from DTAA perspective even.

(iii) Should the income generated through PE be subject to tax in Bangladesh and if so, then how it should be taxed in the light of ITA, 2023?

As per section of 27 of the ITA, 2023, any income accruing or arising, whether directly or indirectly, through or from any permanent establishment in Bangladesh shall be taxable in Bangladesh.

(iv) Advising any other way out to avoid PE risk, if any?

As per para 5 of the DTAA, an enterprise of a Contracting State shall not be deemed to have a permanent establishment in the other Contracting State merely because it carries on business in that other State through a broker, general commission agent or any other agent of an independent status, where such persons are acting in the ordinary course of their business.

This means that, if the JV outsource the full function to an independent third party to carry out the onsite services, in that case, JV will not be exposed to PE in Bangladesh from DTAA perspective.

Illustration 8

A Sweden based company i.e., CNPC Co. has sold electrical power generators to a Bangladeshi Company i.e., PQR Co. The seller needs to deliver the services for the electrical power generators supplied to PQR Co. The Sweden based Co. has a subsidiary in Bangladesh called MNC Limited which can provide the service to PQR Co. on behalf of CNPC Co. Alternatively, CNPC Co. can also appoint an independent subcontractor to deliver those service to PQR Co.

To render the services to PQR Co., engineers of both CNPC Co. and independent subcontractors are necessary regardless of the transaction structure CNPC Co. chooses.

The entity has considered the following options to carry out the onshore services in Bangladesh:

- **Option-1:** The contract will be signed between CNPC and MNC. As per the contract, MNC will deliver the onshore services to PQR.
- **Option-2**: There will be a contract between MNC and PQR only to render services to PQR.
- **Option-3**: There will be a contract between CNPC and PQR. PQR will bring the employees of CNPC employees under their banner
- **Option-4**: There will be a contract between CNPC and PQR. CNPC sub contracts to Independent 3rd party (3P) to deliver the services to PQR Co.

Requirements:

(i) Withholding tax and corporate tax implication, transfer pricing implications and DTAA implication (if any) for each of the option.

(ii) Recommendations for the management of the company.

Solution

(I) **Withholding tax and Corporate tax implication and DTAA implication (if any) for each of the option.**

Option-1 (Agreement between CNPC and MNC):

Withholding Tax

The banker of MNC, at the time of crediting service amount from CNPC, shall deduct withholding tax @ 10% as per section 124 of the ITA, 2023 from the proceeds.

Corporate Income Tax

From MNC Perspective:

Service value will be considered as income from business for MNC and it will be taxed at standard corporate tax rate of 27.5% or 25% on income from business i.e., after deducting allowable business expenditure from the service value. However, minimum corporate income tax of MNC will be 0.6% on gross receipts.

MNC can adjust the withholding tax deducted by Bank with its corporate tax payable at year end provided corporate tax liability of MNC is higher than the amount of withholding tax deducted. If the TDS is higher than corporate tax liability, in that case, the excess amount cannot be claimed as refund as because tax suffered at source u/s 124 is considered to be minimum tax u/s 163 of the ITA, 2023.

From CNPC Perspective:

As per section 2(92) of the ITA, 2023, if an associated entity or person is commercially dependent on a non-resident person to carry out the services in a connected project, in that case, such activities shall constitute PE in Bangladesh.

Here, since MNC is commercially dependent on CNPC a non-resident entity, in that case, CNPC is likely to be exposed to Bangladesh tax through the creation of PE with reference to section 27 of the ITA, 2023.

If CNPC is exposed to Bangladesh tax, in that case, question will come how the income will be determined. In such case, the DCT can determine the income of the non-resident as per rule.

Transfer Pricing

MNC will be exposed to the transfer pricing regulation if it enters into contract with CNPC to deliver service to PQR as it is an inter-company cross-border jurisdictional transaction. MNC will be required to submit transfer pricing return (TP return) called "Statement of International Transaction" along with the corporate tax return. In TP return, MNC will be required to declare the amount of international transactions and respective transfer pricing methods. MNC will also be required to keep detailed documentation related to transfer pricing. If the total amount of international transactions during an income year exceeds Tk. Thirty (30) million

(approximately Euro 300K) then tax authority may ask MNC to provide a report from Chartered Accountants or Cost and Management Accountants on its Transfer Pricing Compliance.

Option-2 (Agreement between MNC and PQR):

Withholding Tax

Construction Work is done through the Contract and as such would require tax deduction at source under section 89 of ITA, 2023 and related rule when payment is made to MNC by PQR. The current withholding tax rate is for such type of payment of amounting contract value of service is @ 7% which is much lower than option 1.

Corporate Income Tax

Service value will be considered as income from business for MNC and it will be taxed at standard corporate tax rate of 25% or 27.5% on income from business i.e., after deducting allowable business expenditure from the service value.

MNC can adjust the withholding tax deduction at source with its corporate tax payable at year end provided corporate tax liability of MNC is higher than the amount of withholding tax deducted. If the TDS is higher than corporate tax liability, in that case, the excess amount cannot be claimed as refund as because tax suffered at source u/s 89 is considered to be minimum tax u/s 163 of the ITA, 2023.

From CNPC Perspective:

There will be no tax implication under option-4 from CNPC perspective

Transfer Pricing

MNC will not be exposed to transfer pricing regulation.

Option-3 (Agreement between CNPC and PQR):

Withholding Tax

Question comes whether the service will be considered as technical know-how fee or technical assistance fee. If this is so considered and PQR signs an agreement with the Government to establish an electricity power plant run by other than coal subject to fulfillment of the conditions of **"Private Power Generation Policy of Bangladesh"** then usually no tax is payable on technical know-how fee or technical assistance fee.

If this is not so considered, PQR might be required to deduct tax on the amount payable to CNPC.

Corporate Income Tax

Generally, there will not be any Corporate Income tax for CNPC or MNC in Bangladesh on the transaction. But, Permanent Establishment of CNPC in Bangladesh may be created if CNPC renders the service through the secondment of employees as per section 2(92) of the ITA, 2023 and if their stay in Bangladesh in aggregate exceeds 183 days in any 12-month period commencing or ending in the fiscal year concerned.

Hence, position of CNPC is likely to be exposed.

And as per amended section of 27 of the ITA, 2023, any income accruing or arising, whether directly or indirectly, through or from any permanent establishment in Bangladesh shall be taxable in Bangladesh.

Option-4 (Agreement between CNPC and Third party):

There will be no tax implication under option-4 from CNPC perspective.

Implication of DTAA:

As per article 5 of the DTAA between Bangladesh and Sweden, meaning of PE is as follows:

a. a place of management;
b. a branch;
c. an office;
d. a factory;
e. a workshop;
f. a warehouse, in relation to a person providing storage facilities for others and
g. a mine, an oil or gas oil, a quarry or other place of extraction of natural resources;
h. a building site or construction or installation project constitutes a permanent establishment only if it lasts more than 183 days

As per Article 6 of the said agreement, an enterprise of a Contracting State shall not be deemed to have a permanent establishment in the other Contracting State merely because it carries on business in that other State through a broker, general commission agent or any other agent of an independent status, where such persons are acting in the ordinary course of their business and their business and their activities do not fall within the meaning of sub-paragraph (c) of paragraph 5.

Contradiction between DTAA and ITA, 2023:

Definition of PE incorporated in the Income Tax Act, 2023 and definition of PE in respective DTAA seems to be contradictory in couple of aspects. For example, the following two items are included in the definition of DTAA as provided in the ITA, 2023 which are not included in the DTAA:

- the furnishing of services, including consultancy services, by a person through employees or other personnel engaged by the person for such purpose, if activities of that nature continue (for the same or a connected project) in Bangladesh; and any associated entity or person (hereinafter referred to as "Person A") that is commercially dependent on a non-resident person where the associated entity or Person A carries out any activity in Bangladesh in connection with any sale made in Bangladesh by the non-resident person.

Furthermore, if we look at the definition of PE given in the DTAA in relation to a building site, construction, assembly or installation projects, PE will be constituted if number of days lasts more than 183 days whereas in the Income Tax Act, 2023 there is no such days mentioned. Hence it is implied that even single day presence might create PE in Bangladesh to meet the purpose as mentioned above as per the definition given in the Income Tax Act, 2023.

Again, if we look at the relevant Article of the DTAA in relation to the Engagement of Independent third party it will not create a PE in Bangladesh whereas as per the definition given in the Income Tax Act, 2023, Engagement of Independent third party will create PE as explained above.

Now the question comes which will prevail in any contradictory scenario between DTAA and Income Tax Act, 2023 from local law perspective.

Section, 244 of the ITA, 2023 states that, agreement signed between the two contracting states and the provision shall have effect notwithstanding anything contained in any other law. This implies that provisions of the DTAA shall prevail of the Income Tax Act, 2023 if such matter is expressly covered in the DTAA.

However, the real challenge are those cases which are not expressly covered in the DTAA and interpretation is required thereon. In such case, the tax authority normally disallow DTAA benefit and impose tax as per the ITA, 2023.

(ii) **Recommendations:**

Upon considering the above-mentioned scenario, CNPC in all the way will be exposed for Bangladesh tax except option-4. Hence the only way forward is that CNPC can no way be involved in rendering installation and maintenance work rather to engage the third party to render the activities.

Example 9

The Owners of a project undertaken by a world-renowned hotel company in Bangladesh wants to remit Royalty fees and P&S charges ("Reimbursable") to the company "XYZ" based in Sudan. The payment will be made to the company based in Singapore.

Permission is required from Bangladesh Investment Development Authority (BIDA) or Bangladesh Bank in order to remit money abroad. The client informed that approval from BIDA and BB are granted on the basis that withholding tax has to be deducted on Royalty fees and reimbursable by the authorized bankers to the company in accordance with domestic tax law.

Payment of such reimbursable cost with deduction of tax from Bangladesh will become cost to the company. And hence, the company wants to gross up the reimbursable charges inclusive of WHT as such treatment is not prohibited in Bangladesh. Besides, this treatment is followed by other hotels and industries.

In this regard, the hotel company XYZ is contemplating the following options and seeks expert opinion in the light of Bangladesh tax law and regulations:

Option 1: Grossing up P & S charges (reimbursable) inclusive of WHT.

Option 2: Setting up a local entity to receive the P & S charges (reimbursable) in Bangladesh and subsequent repatriation of the payment to XYZ as dividend.

Option 3: Setting up a local entity to receive both Royalty fees and P & S charges (reimbursable) in Bangladesh and subsequent repatriation of the payment to XYZ as dividend.

Requirement:

(i) Withholding tax and Corporate tax implication and DTAA implication if any of each option. And the answer should include the financial analysis if any along with recommendations.

Solution

(i) Withholding tax and Corporate tax implication and DTAA implication if any of each option. And the answer should include the financial analysis if any.

Option-1 (Grossing up P & S charges (reimbursable) inclusive of WHT)

WHT implication:

As per section 119 of the ITA, 2023, any payment made by a resident in Bangladesh to a non-resident will be subject to withholding tax in Bangladesh at the applicable rate.

Hence, the payment of P & S charges to the hotel company based in Singapore will be subject to tax deduction at source (TDS) @ 20%.

An example has been furnished below:

If XYZ grosses up the fee of Tk. 100 on the basis of applicable tax rate, in that case, invoice amount will stand at Tk. 125 (100/.80) and the company will receive net amount of Tk. 100 after deduction of tax of Tk. 25 (125*20/100).

If the fee is grossed up and tax and VAT is deducted at source at the applicable tax rate, in that case, the assessing officer is unlikely to raise question as to the extent of such expenses.

DTAA implication:

Currently there is no DTAA agreement between Bangladesh and Sudan, hence DTAA benefit cannot be availed on the payment of P & S charges (reimbursable).

Option 2: Setting up a local entity to receive P & S charges in Bangladesh WHT implication:

As per section 90 of the ITA, 2023, payment made to a resident by a specified person on account of services mentioned therein will be subject to tax deduction at source at the applicable rate(s).

Payment of reimbursement expenses is not subject to tax deduction at source if the reimbursement is related to professional fees. But in other cases, law is silent which implies that reimbursement is subject to tax deduction at source except on professional fees. Hence, payment made to the local entity of Marriott by the owners on account of P & S charges will be subject to TDS @ 7.5%. Please note that tax suffered at source by the local entity of XYZ is tax creditable against its corporate tax liability.

Corporate tax implication:

Income of the local entity of the XYZ will be subject to corporate tax @ 25% or 27.5%. As mentioned above, tax suffered at source can be tax creditable with the corporate tax liability.

Local entity of XYZ can repatriate the remaining income (after payment of corporate tax) to XYZ in the form of dividend. Please note that with reference to section 119 of the ITA, 2023, dividend payment will be subject to TDS @20%.

An example has been furnished below:

Particulars	TK.
Income	100
Corporate tax @ 27.5% (assuming that conditions to avail 25% tax rate not fulfilled)	27.5
Less: AIT @ 7.5% of Tk. 100	7.5
Net tax payable	20
Profit after tax (PAT)	80
Withholding tax on dividend @ 20%	16
Net repatriation of after tax profit after deducting tax	64

DTAA implication:

Please note that as per section 119 of the ITA, 2023, there is a provision to apply to NBR to obtain reduced rate certificate or non-deduction certificate in the light of tax treaty. We note that the payment is to be remitted to Sudan. There is currently no Double Taxation Avoidance Agreement (DTAA) between Bangladesh and Sudan. Hence, no DTAA benefit can be availed on the payment of Dividend.

Option 3: Setting up a local entity to receive both Royalty fees and P & S charges (reimbursable) in Bangladesh

WHT implication:

Under Option 3, if the local entity of XYZ receives payment of royalty fees in addition to P&S charges, payment of royalty fee will be subject to tax deduction at source @ 7.5% u/s 90 of the ITA, 1984. P&S charge already discussed in option 2.

Corporate tax implication:

As we have discussed in Option 2, income of the local entity of XYZ will be subject to corporate tax @ 27.5%. And tax suffered at source can be tax creditable against the corporate tax liability. Local entity of XYZ can repatriate the remaining income (after payment of corporate tax) to XYZ in the form of dividend. Please note that as per section 119 of ITA, 2023 dividend payment will be subject to TDS @20%.

DTAA implication:

As per section 119 of the ITA, 2023, there is a provision to apply to NBR to obtain reduced rate certificate or non-deduction certificate in the light of tax treaty. We note that the payment is to be remitted to Sudan. There is currently no Double Taxation Avoidance Agreement (DTAA) between Bangladesh and Sudan. Hence, no DTAA benefit can be availed on the payment of Dividend.

An example has been furnished below:

Particulars	**TK.**
Income	200
Corporate tax @ 27.5%	55
Less: AIT @ 7.5% on Tk. 200	15
Net tax payable	40
Profit after tax [200-55]	145
Withholding tax on dividend @ 20% on Tk. 145	29
Net remittance as Dividend	**116**

Summary of the options discussed:

Particulars	Net reimbursable receivable (TK)	Net Royalty fees receivable (TK)	Total net Payment (TK)
Option 1	100	80	180
Option 2	64	80	144
Option 3			116

Upon considering the aforementioned facts, it is recommended to opt for option 1.

26.5 Methods of avoiding double taxation

There are four methods of avoiding double taxation. These are –

(i) Unilateral relief
(ii) Bilateral relief
(iii) Multilateral relief
(iv) Non-tax treaties

Unilateral relief

Under this system whether the income is subject to tax abroad or not is immaterial, relief is given by way of tax credit for the tax paid abroad.

Under Section 246 of the Income Tax Act, 2023, tax credit method is followed. A resident in Bangladesh who has paid income tax in any country with which Bangladesh does not have a treaty for the relief or avoidance of double taxation is allowed credit against his Bangladesh income tax for an amount equal to Bangladesh coverage rate i.e. average rate or the foreign rate whichever is lower, applied to the doubly taxed income. This is done as follows:

(a) Where the foreign tax is equal to Bangladesh tax, full amount of foreign tax will be given credit.
(b) Where the foreign tax exceeds the Bangladesh tax, the liability to Bangladesh tax is nil. However, no refund in respect of the excess amount is allowed.
(c) Where foreign tax is less than Bangladesh tax, the difference would be payable by the taxpayer.

The basic principle to remember is that credit/relief will never exceed the Bangladesh income tax on the concerned income calculated at average rate.

Bilateral relief

It may take one of the following two forms:

Firstly, the treaty may apply exempting method, the country in question refraining from exercising jurisdiction to tax a particular income.

For instance, the country of source where PE is located is assigned an exclusive jurisdiction to tax the profits of the establishment. In turn it may agree to refrain from exercising its jurisdiction to tax the owner of these profits.

Alternatively, the treaty may provide relief from double taxation by redacting the tax ordinarily due in one or both of the contracting states on that income which is subject to double taxation.

For instance, the country, which is the source of a dividend, often agrees to reduce the withholding rate normally applicable to dividends paid to non-resident and the country of residence agrees to give tax credit or similar relief for the tax paid in the source country. In such a case, both the countries exercise the rights to jurisdiction, while mutually agreeing for adjustments, many DTAAs combine both the methods of relief.

Multilateral treaties

These are similar to bilateral treaties achieved through agreement between many countries i.e. EEC.

Non-tax treaties

These are not direct tax treaties but are of friendship, co-operation cultural exchange, political and diplomatic relations, but which consequently may reflect upon tax matters

26.6 Tax treaty

What is tax treaty and how does it work?

'Treaty' as commonly understood is a formally concluded and ratified agreement between independent nations. Tax treaties are generally a matter of bargain and prolonged negotiations centering on economic interests of the countries involved.

What is the scope of tax treaties in determining jurisdiction?

Normally tax treaty between two countries covers-

(i) Persons (ii) Taxes (iii) Territory (iv) Time

The treaty, generally applies to residents of the contracting states. Each country retains the power to tax its citizens and residents on their total world income (Status jurisdiction) and tax others, non-citizens, non-residents only on their income in the country (Source jurisdiction). However, the treaty provisions protect the taxpayer from suffering double taxation on the same income.

How does a treaty become a law?

The agreement entered into becomes a part of domestic law only when it has sanction of the constitutions of the nations which are parties to it. The power to legislate is conferred on our Parliament and therefore, the Government has authority to enter into DTAA. However, all treaties are also required to be formally approved by official gazette notification.

26.7 Some other concepts used in DTAA

Treaty override

The executive of the state has been given rights under our Constitution to enter into DTAAs. This is an executive power exercisable by the Govt. like legislative and judicial powers. As the power to enter into DTAAs comes from the Constitution, the relevant article thereof will have the effect of the DTAA overriding the Act, as the executive also has to exercise jurisdiction keeping in mind DTAA obligations and commitments made thereon. It is now an undisputed proposition that DTAA overrides the Act.

For this very reason, section 244 explicitly states that the provisions of tax treaties shall take precedence over the provisions of the Act.

Treaty shopping

Just as the domestic law can, sometimes, be used more than fairly to the advantage of a taxpayer, the DTAA too can be exploited through popularly known means of "Treaty Shopping". A non-resident seeking shelter under a DTAA is still open to domestic assessment when the tax authorities feel that, he is taking an undue advantage of provisions of the DTAA or has structured the commercial arrangement in such a way so as to avail the DTAA benefit otherwise not available to him. The authorities may then deny the benefits of the DTAA. The most common form of Treaty Shopping is setting up of a dummy enterprise. This is set up by say, Company A, in one of the Contracting States, to avail DTAA benefits, which the company, not being a resident of either Contracting States, would otherwise not be entitled to. In such a case, the Court can lift the corporate veil.

Attribution Rule

The basic requirement to bring the business profits to tax they should be capable of being attributable to the Permanent Establishment (PE) or residency. The question to be asked is the enterprise trading with the country on a regular basis? If yes, what is the nature of establishment in Bangladesh? If the income arises out of the business activity carried on in that state and if it can be attributed to the PE, it can be taxed to that extent of attribution.
Certain established and accepted rules are to be followed in the determination of such income. Generally, the expenses that can or cannot be considered will depend upon the taxation laws of each state.

Force of attraction rule

It means all income arising from all source in a country where the foreign enterprise maintains a PE is subject to tax in that country irrespective of whether the said income is attributable to the PE or not. Therefore, profits arising from transactions outside PE are also taxable. As per this rule not only the profits attributable to the sale of same or similar kind of goods is brought to tax and any other income from sources within the country are also regarded income attributable to the PE.

Exchange of Information amongst Two Countries

(1) The competent authorities of the Contracting States shall exchange such information as is necessary for the carrying out of this Convention and of the domestic laws of the Contracting States concerning taxes covered by this Convention in so far as the taxation thereunder is in accordance with this Convention. Any information so exchanged shall be treated as secret and shall not be disclosed to any persons or authorities other than those concerned with the assessment or collection of the taxes which are the subject of the Convention.

(2) In no case shall the provisions of paragraph (1) of this Article be construed so as to impose on one of the Contracting States the obligation:

  (a) To carry out administrative measures at variance with the laws or the administrative practice of that or of the other Contracting State.

  (b) To supply particulars which are not obtainable under the laws or in the normal course of the administration of that or of the other Contracting State;

  (c) To supply information which would disclose any trade, business, industrial, commercial or professional secret or trade process, or information, the disclosure of which would be contrary to public policy.

Students should carefully note the following main objectives of DTAA:

a) Any income earned by a resident of a contracting state in the other contracting state cannot escape from tax assessment in both the contracting states.

b) Any income earned by a resident of a contracting state in the other contracting state cannot be taxed in both the contracting states.

c) Conditions of taxability and rates of tax payable of a resident of a contracting state in respect of incomes from various heads earned in the other contracting state.

26.8 Other topics of International Taxation

26.8.1 Tax havens

There are some common misconceptions about 'Tax Havens'. Many people consider any jurisdiction with nil or very low tax rate as 'tax haven' which may not always be correct.

As per the definition provided by OECD, Tax haven refers to a country which imposes a low or no tax is used by corporations to avoid tax which otherwise would be payable in a high-tax country. According to OECD report, tax havens have the following key characteristics:

- No or only nominal taxes;
- Lack of effective exchange of information; and
- Lack of transparency in the operation of the legislative, legal or administrative provisions

As per the International Consortium of Investigative Journalist (ICIJ), who were responsible for publishing leaked documents in the name of 'Paradise Papers' and the Panama Papers' tax havens, or offshore financial centers, are generally countries or places with low or no corporate taxes that allow outsiders to easily set up businesses there. Tax havens also typically limit public disclosure about companies and their owners. Because information can be hard to extract, tax havens are sometimes also called secrecy jurisdictions.

Tax havens are speeded all over the world. Some are independent countries like Bermuda, Panama, Mauritius, Cyprus etc. and some are territories like British Virgin Islands (BVI), Cayman Islands, etc.

So, Tax haven nations are those with nil or moderate level of taxation and/or offering liberal tax incentives for export activities, shipping business. These tax havens attract investments as the corporate tax rate is low. They may also exempt dividends and capital gains on the transfer or exchange of movable assets like shares and sometime immovable properties like land, building, plants etc. Besides these, tax haven countries may also pursue absolute secrecy and easy exchange control policies to attract offshore investors.

There are two types of tax haven –

1. Nil tax haven
2. Nil tax outside haven countries

26.8.2 Thin capitalization

A company is typically financed (or capitalized) through a mixture of debt and equity. Thin capitalization refers to the situation in which a company is financed through a relatively high level of debt compared to equity. Thinly capitalized companies are sometimes referred to as highly leveraged or highly geared.

Why is thin capitalization significant?

The way a company is capitalized will often have a significant impact on the amount of profit it reports for tax purposes. Country tax rules typically allow a deduction for interest paid or payable in arriving at the tax measure of profit. The higher the level of debt in a company, and thus amount of interest it pays, the lower will be its taxable profit. For this reason, debt is often a more tax efficient method of finance than equity.
Multinational groups are often able to structure their financing arrangements to maximize these benefits. Not only are they able to establish a tax-efficient mixture of debt and equity in borrowing countries, they are also able to influence the tax treatment of the lender which receives the interest - for example, the arrangements may be structured in a way that allows the interest to be received in a jurisdiction that either does not tax the interest income, or which subjects such interest to a low tax rate.

Example 1: Debt to equity investment of 1 to 1.

Company X, a corporation from Country A, establishes group affiliate Company Y in Country B with an investment of $50 in equity capital and a loan of $50 from Company X at a 10% interest rate. Company Y generates pre-tax and pre-interest operating income of $15 for year 2020, and pays interest to Company X at 10% i.e. an interest payment of $5. The post-interest taxable profit of Company Y is $10 and, taxed at a 30% tax rate, generates tax revenue of $3 for Country B and net profit of $7 for Company Y.

Example 2: A debt to equity investment of 9 to 1.

Company X, a corporation from Country A, establishes another group affiliate Company Z in Country C with an investment of 10 in equity capital and a loan of $90 from Company X at a 10% interest rate. Company Z also generates pre-tax and pre-interest income of $15 for year 2020, and pays interest to Company X at 10% i.e. a total interest payment of $9. The remaining taxable profit of Company Z is $6 and taxed at a 30% tax rate, which generates tax revenue of $1.8 for Country C and $5.20 for Company Y.

Apparently, it would indicate that Company Y in Country B is more profitable as it is earning $7 in year 2020 against $5.20 earned by Company Z in Country C. However, if the interest payment is also considered than it would appear that Company Y could remit $12 (interest $5 + Profit $7) but Company Z's remittance is $14.20 (interest $9 + Profit $5.20). The excess amount of remittance by Company Z is due to the additional tax benefit taken on interest payment.

What are thin capitalization" rules?

As described above, the manner in which a company is capitalized can have a significant effect on the amount of profit it reports, and thus the amount of tax it pays.

For this reason, country tax administrations often introduce rules that place a limit on the amount of interest that can be deducted in calculating the measure of a company's profit for tax purposes. Such rules are designed to counter cross-border shifting of profit through excessive debt, and thus aim to protect a country's tax base. From a policy perspective, failure to tackle excessive interest payments to associated enterprises gives MNEs an advantage over purely domestic businesses which are unable to gain such tax advantages.

Thin capitalization rules typically operate by means of one of two approaches:

a) determining a maximum amount of debt on which deductible interest payments are available; and

b) Determining a maximum amount of interest that may be deducted by reference to the ratio of interest (paid or payable) to another variable.

26.8.3 The Base Erosion and Profit Shifting (BEPS)

The international tax landscape has changed dramatically in recent years. With political support of G20 Leaders, the international community has taken joint action to increase transparency and exchange of information in tax matters, and to address weaknesses of the international tax system that create opportunities for BEPS. The internationally agreed standards of transparency and exchange of information in the tax area have put an end to the era of bank secrecy. With over 130 countries and jurisdictions currently participating, the Global Forum on Transparency and Exchange of Information for Tax Purposes has ensured consistent and effective implementation of international transparency standards since its establishment in 2009.

At the same time, the financial crisis and aggressive tax planning by multinational enterprises (MNEs) have put BEPS high on the political agenda. With a conservatively estimated annual revenue loss of USD 100 to 240 billion, the stakes are high for governments around the world. The impact of BEPS on developing countries, as a percentage of tax revenues, is estimated to be even higher than in developed countries.

Domestic tax base erosion and profit shifting (BEPS) due to multinational enterprises exploiting gaps and mismatches between different countries' tax systems affects all countries. Developing countries' higher reliance on corporate income tax means they suffer from BEPS disproportionately.

Business operates internationally, so governments must act together to tackle BEPS and restore trust in domestic and international tax systems. BEPS practices cost countries 100240 billion USD in lost revenue annually, which is the equivalent to 4-10% of the global corporate income tax revenue.

Working together in the OECD/G20 BEPS Project, over 60 countries jointly delivered 15 Actions to tackle tax avoidance, improve the coherence of international tax rules and ensure a more transparent tax environment.

26.8.4 Anti-Avoidance Rules against International Tax Planning

The main anti-avoidance rules against international tax planning in place among OECD and G20 countries are based on five main dimensions. Anti-avoidance rules can effectively reduce tax planning by multinational enterprises (MNEs). Also strong anti-avoidance rules can reduce the impact of tax planning on market concentration and increase the sensitivity of tax-planning MNEs' investment to changes in the corporate tax rate.

Strong rules reduce manipulation of debt location. Finally, strong anti-avoidance rules can reduce the strategic tax-motivated location of patents.

The main types of anti-avoidance rules against international tax planning can be described as follows:

1. **Transfer price rules** require that cross-border transactions between related firms should be valued at market price (so-called "arm's-length" principle). When no comparable transaction exists, different valuation methods can be used, for instance based on cost plus a fixed mark-up or using economic models to split the relevant profit among entities.
2. **Thin capitalization rules and rules limiting interest deductibility** disallow the deduction of certain interest expenses when the debt-to-equity or the interest-to-earnings ratio of the debtor is considered excessive. These rules apply either to total or related-party debt.
3. **Controlled foreign company (CFC) rules** aim at eliminating the deferral of tax on certain income by using lower-tax foreign affiliates or the exemption on certain mobile foreign source income.
4. **General anti-avoidance rules (GAARs)** prohibit "aggressive" tax avoidance, for instance, by denying tax benefits from a transaction that lacks economic substance.
5. **Withholding taxes on interest, royalties and dividends** are not anti-avoidance rules in a strict sense, but they can also influence firms' profit shifting opportunities. For instance, withholding taxes on interest payments can discourage the use of (internal) debt for tax planning. Withholding taxes on royalties can discourage the allocation of royalties to certain jurisdictions to gain a tax advantage.

26.8.5 International tax disputes

International tax disputes are between the taxes authorities of two different countries. They result from differing interpretations of the provisions of a tax treaty between the two countries. However, they mainly affect taxpayers with cross-border economic activities, usually transnational corporations (TNCs) commonly known as multinational company (MNC) operating in at least Two or more than countries.

Most disputes concern the allocation of profits of MNCs, and the growth has occurred as enforcement of transfer pricing rules has strengthened. Developing countries have been introducing transfer pricing rules and are now improving enforcement. So MNCs fear there will be more disputes. This fear may be justified, since the OECD Transfer Pricing Guidelines are complex and do not provide clarity. They require tax officials to identify the functions performed by each part of the MNC, by analyzing its business model. This requires specialized knowledge and involves discretionary and subjective judgements.

Double Tax treaties are normally incorporated into domestic law. So, taxpayers can go to court if they disagree with how a treaty rule is applied. But tax treaties also give them the right to complain to the competent authority in the relevant national tax administration. The competent authority is obliged either to resolve the issue, or, under the mutual agreement procedure (MAP), to consult with the competent authority of the Double Tax treaty partner.

Under the MAP, the competent authorities must 'endeavor' to solve the problem – but are not obliged to do so. The MAP is totally secret. Even the existence of a claim is not made public. Tax advisers prefer the MAP over court cases, which generally are public. But they complain that the MAP takes too long, and does not guarantee an outcome. They have long urged that unresolved disputes should go to binding third party arbitration.

When a MAP request is submitted, the Competent Authority (CA) will need some preliminary information to consider whether the case is eligible for MAP. The information necessary to process a MAP depends on the nature and complexity of the case. If the main focus of the case is on the interpretation and application of a particular article in the tax treaty, the taxpayer may not need to prepare any documentation other than some basic information about the case. On the other hand, if the case is highly factual and complex and therefore requires rigorous analysis and evaluation of facts and circumstances, the CAs involved in the process would need a considerable amount of information to examine the case properly. In either situation, it should be stressed that at the initial stage of MAP it would be enough to establish the taxpayer's eligibility for MAP, therefore it would not be necessary to review the substantive basis of the case. Accordingly, documentation the taxpayer has to provide at this stage would be considered in light of what information the CA needs to confirm the eligibility of the case for MAP.

Worked examples & solutions

27.1 Concept of transfer pricing

Transfer pricing is the setting of prices of goods & services sold between controlled legal entities.

If a subsidiary company sells goods to a parent company; the cost of those goods is the transfer price. Suppose a company 'A' purchases goods for Tk. 1,000 and sells it to an associate company B for Tk. 2,000 who then sells in the open market for Tk. 4,000. Had A sold it directly in open market it could earn a profit of Tk. 3,000. By routing through B the profit is restricted to Tk. 1,000. The profit of Tk. 2,000 is shifted to country of B. The goods are transferred on an arbitrary price (transfer price) and not open market price.

The expression "transfer pricing" thus refers to prices of transaction between associated enterprises which may take place under different condition from those between two independent enterprises. The effect of transfer pricing is that the parent company or a subsidiary tends to declare insufficient taxable income or excessive loss in transaction because corporate tax rate varies between countries. Multinational companies tend to reduce their tax burden by shifting profit of countries where tax rate is higher to country where tax rate is lower.

Transfer pricing may occur in transaction of (a) goods (b) service (c) use of property (including intangible property). This may occur:

(a) Between two related enterprises.

(b) Through transaction in foreign currency.

Most countries including Bangladesh have taken policy of **'arm's length price'** to combat transfer pricing.

27.2 Introduction of transfer pricing regulations in Bangladesh

The incorporation of transfer pricing regulations into the Income Tax Act occurred as a significant development with the Finance Act, 2012. Addressing this complex matter, Chapter II of Part 15 (section 233 to 239) of the Income Tax Act of 2023, along with Rule 71, 72, 73, 74, 75, and 75A from the Income Tax Rules of 1984, comprehensively encompasses the framework for transfer pricing regulations. These regulations are strategically introduced beforehand, serving multiple objectives. Firstly, they provide taxpayers with adequate time to meticulously prepare their records in compliance with the regulations. Secondly, these regulations afford the tax authority the necessary time to establish and consolidate a robust database. Lastly, a critical facet involves training tax officials and enhancing their capacity to effectively implement the transfer pricing regulations.

In accordance with these regulations, the scope of transfer pricing extends to two pivotal scenarios – it applies to international transactions involving associated enterprises, ensuring that transactions between these interconnected entities adhere to fair market values, and the transfer pricing regulations come into play when at least one of the enterprises involved is non-resident. This comprehensive approach ensures the integrity of financial transactions and the equitable distribution of taxes in cross-border economic activities.

27.3 Important definitions relating to transfer pricing

(a) **Associated enterprise:** An "associated enterprise" refers to an enterprise that shares a certain relationship with another enterprise during a given income year. This relationship is defined by several criteria. First, if one enterprise engages in the management, control, or capital aspects of another enterprise, either directly, indirectly, or through intermediaries, they are considered associated. Similarly, if one enterprise holds shares

with more than 25% of the voting power in the other or provides cumulative borrowing exceeding 50% of the recipient's book value of total asset or gives cumulative guarantees exceeding 10% of the recipient's total book value of borrowing, shall be considered as associated enterprise. Moreover, if one enterprise appoints over half of the other's board members, has practical decision-making influence, or appoints or shares executive directors or members, then it would become associated enterprise.

This definition also encompasses situations where the same individual participates in the management, control, or capital of both enterprises, directly or indirectly, or holds controlling shares exceeding 25% of voting power, or appoints over 50% of board members or executive directors or members.

(b) **International transaction:** "International transaction means any transaction between two associate enterprises (at least one being a non-resident), involving purchase, sale, lease or exchange of goods, services, tangible or intangible property, lending or borrowing of money, or any other arrangement affecting profit, income, loss, assets, financial position, or economic value. It also includes a transaction between B and C if A controls the transaction, where A and B are associate enterprises but B and C are not.

(c) **Property:** "Property" includes goods, articles, things or items, patent, invention, formula, process, design, pattern, know-how, copyright, trademark, trade name, brand name, literary, musical, or artistic composition, franchise, license or contract, method, program, software, database, system, procedure, campaign, survey, study, forecast, estimate, customer list, technical data, any aspects of advertising and marketing, any item which has substantial value, or any other intangible property;

(d) **Transaction:** "Transaction"—any arrangement, understanding or action, whether formal or written or intended to be legally enforceable or not;

27.4 Arm's length price – the basis of determining transfer pricing

Price shall be determined based on nature, availability of information, functions performed, assets employed, risk assumed etc. by applying most appropriate method like–

(a) Comparable uncontrolled price method;
(b) Resale price method;
(c) Cost plus method;
(d) Profit split method;
(e) Transactional net margin method;
(f) Any other method that yields a result consistent with the arm's length price.

Where most appropriate method applied is a method other than (d) and (f), the dataset of the arm's length price consists six or more entries, arm's length range beginning from the 30% and ending on the 70% of the dataset shall be constructed and arm's length price shall be:

- actual price if the price belongs to the said range;
- if actual price is outside the range, then arm's length price shall be the median of the dataset.

In case the dataset is less than six entries, the arm's length price shall be the arithmetical mean of all the values included in the dataset. Arm's length price shall not result lower income basis the international transaction actually undertaken. DCT may determine arm's length price if he

think the price has not been determined as per provision or fails to maintain required documents or the price computation is not reliable or incorrect.

27.4.1 Comparable uncontrolled price method:

1. the price charged or paid for property transferred or services provided in an uncontrolled transaction or a number of transactions of comparable circumstances is identified;
2. if the price so identified differs from the price of the international transaction, the differential amount is calculated;
3. the price of international transaction is then adjusted by the said differential amount;
4. the adjusted price under sub-clause (iii) is taken to be the arm's length price of the property transferred or services rendered in the international transaction.

27.4.2 Resale price method:

(i) the price at which the said property or service is resold to an independent enterprise is identified;

(ii) the price, as identified in sub-clause (i), is reduced by a comparable normal gross margin;

(iii) the price so arrived at is then adjusted for other unique costs (such as customs duty) associated with the purchase of the property or services;

(iv) the price so arrived at is then adjusted to take into account the material differences (differences that could materially affect the gross margin in open market condition) such as functions performed, risks involved, assets employed, time gap between the original purchase and the resale and accounting practices between the international transactions and the comparable uncontrolled transactions, or between the enterprises undertaking such transactions;

(v) the adjusted price under sub-clause (iv) shall be taken to be the arm's length price of the property purchased or the service obtained in the international transaction.

27.4.3 Cost plus method:

(i) the direct and indirect costs incurred in the supply of property or the provision of services, hereinafter referred to as cost base, are determined;

(ii) a comparable profit mark-up (based on comparable accounting policies) is identified;

(iii) appropriate adjustment is then made to the comparable profit mark-up adjusted to take into account the material differences (differences that could materially affect the mark-up in open market condition) such as functions performed, risks involved, assets employed, contractual terms and market conditions between the international transactions and the comparable uncontrolled transactions, or between the enterprises undertaking such transactions.

(iv) the adjusted profit mark-up under sub-clause (iii) is then added to the cost base;

(v) the sum so arrived at is taken to be the arm's length price of the property transferred or services provided in the international transaction.

27.4.4 Profit split method:

(i) the combined profit, arising from international transaction or transactions and divisible among the associated enterprises, is identified.

(ii) the combined profit is then divided among the associated enterprises by using the following approaches:

(a) each of the associated enterprises is allocated a basic return based on the basic functions (manufacturing, distribution, service provision etc.) each enterprise performed and determined by reference to market returns earned by independent enterprise in similar transaction. This basic return does not usually account for the return that would be generated by any unique and valuable assets possessed by the associated enterprises. The residual profit (which may be attributable to such unique assets), calculated by deducting the sum of basic returns allocated to associated enterprises from the combined profit, is then apportioned to the associated enterprise based on their relative contribution and taking into consideration how independent enterprises in similar circumstances would have divided such residual profit; or

(b) basic return is not allocated to the associated enterprises; the combined profit is divided among the associated enterprises based on the relative contribution of each the associated enterprises to that profit;

(iii) the profit thus allocated to the assessee under sub-clause (ii) is taken to be the arm's length price.

27.4.5 Transactional net margin method

The net profit margin earned by the associated enterprise from the international transaction with the associated enterprise is computed having regard to an appropriate base such as costs, sales or assets;

(i) the net profit margin earned by an independent enterprise or enterprises from comparable uncontrolled transaction or a number of such transactions is computed having regard to the same base;

(ii) appropriate adjustment is then made to the net profit margin referred to in sub-clause (ii) to take into account the differences, that can materially affect the net profit margin, between the international transactions and the comparable uncontrolled transactions, or between the enterprises undertaking such transactions;

(iii) the adjusted net profit margin under sub-clause (iii) is then applied to the base as referred to in sub-clause (i) to arrive at the arm's length price in relation to the international transaction.

27.5 Factors to be considered in judging uncontrolled international transaction

(1) The factors to be considered in judging uncontrolled international transaction is described in rule 71. These are as follows:

(a) the characteristics of property, services or intangible properties involved in the transaction:

(i) the case of tangible property: physical features, quality and reliability, availability, volume and timing of property transferred;

(ii) in the case of services provided: the nature and extent of the services;

(iii) in the case of intangible property: the type of intangible, the form of transaction, the expected benefits, the duration of protection, the degree of protection, etc.;

(b) the functions performed, the risks assumed and the assets employed, especially the functions, risks and assets that are materially significant in determining the price or margin in relation to the international transaction;

(c) the contractual terms (whether or not such terms are formal or written) dictating the allocation of responsibilities, risks and benefits between enterprises involved in the international transaction;

(d) economic circumstances, that affect the international transaction and uncontrolled transactions, including geographic location, the size and level of markets; the extent of competition in the market, the availability of substitute goods and services, the purchasing powers of consumers, government orders and policies and the timing of the transaction;

(e) Any other factors that have material effect on the international transaction and uncontrolled transaction.

(2) An uncontrolled transaction shall be deemed to comparable to an international transaction if:

(i) there are no material differences in respect of cost, price or margin between the transactions being compared or between the enterprises undertaking such transactions; or

(ii) reasonably accurate adjustments can be made to eliminate any material differences in the transactions.

(3) In analyzing the comparability, data relating to the relevant financial year (in which the international transaction has been entered into) shall be considered.

Provided that data relating to a period prior to the financial year may also be considered if such data bears such facts which could have an influence on the analysis of comparability.

27.6 The factors to be considered for the most appropriate method

The factors to be considered for the most appropriate method are described in rule72:

(a) the nature and class of the international transaction, and of enterprises entering into the international transaction;

(b) the comparability factors (industry, functions, risks, contractual terms, market level) that are materially significant in determining the price or margin in relation to the international transaction;

(c) the quality (availability, coverage, validity and reliability) of relevant data;

(d) the reliability of assumptions in the method;

(e) the sensitivity of results in the deficiency in data and assumptions;

(f) the extent to which the reliable and accurate adjustments can be made to eliminate the differences, if any, between the international transaction and the comparable uncontrolled transaction or between the enterprises entering into such transactions.

27.7 Reporting of information relating to international transaction

According to section 237 every person having international transaction will keep information and maintain record as per rule 73 as under:

(a) Ownership profile of the multinational group in which the assessee enterprise is a member. Profile should include information on groups global organizational structure, showing in details the name, location, legal status and country of tax residence of the enterprises in the group with whom the assessee enterprise have international transactions, and ownership linkages among them;

(b) business profile of the group including the line of business, industry dynamics, and market and economic environment in which the group operates, and the business model and strategies of past, present and future;

(c) brief business profiles of each of the member of the group;

(d) information on the business relationship (purchase and sells of goods, provision of services, use of assets and intangibles etc.) among the members of the groups;

(e) consolidated financial statement of the group;

(f) profile of the assessee enterprise and each of the associated enterprises operating in Bangladesh, including tax and VAT registration number, IRC & ERC numbers, address, locations of activity centers etc.;

(g) business profile of the assessee enterprise and each of the associated enterprises operating in Bangladesh including the line of business, industry dynamics, and market and economic environment in which the assessee enterprise operates, and the business model and strategies of past, present and future of the assessee enterprise;

(h) brief description of the functions performed, risks assumed and assets employed or to be employed by the assessee and by the associated enterprises involved in the international transaction;

(i) financial statements of the assessee enterprise and each of the associated enterprises operating in Bangladesh;

(j) information on economic and market analyses, forecasts, budgets or any other financial estimates prepared by the assessee enterprise and each of the associated enterprises operating in Bangladesh either for whole business or for any segment or line of product;

(k) details of all transactions with the associated enterprises;

(l) contracts, terms and agreements of the transactions with associated enterprises;

(m) segment financial statements with respect to the transactions with associated enterprises;

(n) the manner of choosing tested party including the rationale for the choice;

(o) details of comparable including the manner in which the comparable have been screened and the adjustment made to achieve comparability;

(p) details of comparability analysis;

(q) the manner of choosing tested party including the rationale for choice;

(r) information on transfer pricing method chosen considered for determining the arm's length price including the justification stating why the method is considered most appropriate;

(s) records showing the calculations and workings regarding the determination of the arm's length price/margin including the explanation of any assumption;

(t) any assumption, policy and price negotiations which may have an effect on the determination of the arm's length price;

(u) information on any adjustment made to transfer prices to align them with arm's length prices determined under these rules and consequent adjustment made to the total income for tax purposes;

(v) any other information, data or document, including information or data relating to the associated enterprise, which may be relevant for determination of the arm's length price.

The information specified above shall be supported by authentic documents, which may include the following:

(a) Official publications, reports, studies and data bases from the Government of the country of residence of the associated enterprise, or of any other country;

(b) Reports of market research studies carried out and technical publications brought out by institutions of national or international repute;

(c) Price publications including stock exchange and commodity market quotations;

(d) Published accounts and financial statements relating to the business affairs of the associated enterprises;

(e) Agreements and contracts entered into with associated enterprises or with unrelated enterprises in respect of transactions similar to the international transactions;

(f) Letters and other correspondence documenting any terms negotiated between the assessee and the associated enterprise;

(g) Documents normally issued in connection with various transactions under the accounting practices followed.

The information and documents specified shall be kept and maintained for a period of eight years from the end of the relevant assessment year.

According to section 238, every person, having international transaction is required to furnish information regarding international transaction in prescribed form. Such form is prescribed in rule 75A.This information in prescribed form is to accompany annual tax return.

27.8 Assessment procedure of transfer pricing issues:

The chronology of processing of international transaction by tax authority is stated in section 236. According to section 236:

(a) DCT with prior approval of NBR refers a case to TPO for determination of arm's length price.

(b) TPO will then on approval of NBR proceed to determine arm's length price in relation to international transaction. He will then serve notice to taxpayer to produce evidences in support international transaction.

(c) TPO will then determine arm's length price in relation to international transaction considering evidences produced and all other related information he will send his report to the DCT.

(d) DCT will then assess total income &taxes payable on the basis of report of TPO and all other relevant matter.

27.9 Penalties in transfer pricing regulation:

1. According to section 277 income tax authority may impose a penalty up to 1% of international transaction for failing to furnish information or not maintaining records.
2. According to section 276 income tax authority may impose a penalty up to 1% of international transaction for failing to comply with requisition of a notice.
3. According to section 278 income tax authority may impose a penalty up to 2% of the value of such international transaction for non-submission of statement of international transaction as per section 238.
4. According to section 279 income tax authority may impose a penalty up to Tk. 3 lakh for failing to furnish report of chartered accountant as per section 239.

Example 1

a) FruitCo, a company based in Bangladesh, produces a unique non-alcoholic beverage called "FruitMountain." It sells this beverage to high-end nightclubs across Asia through associated distributors, who report a gross margin of 10%. The market price for one can of "Fruit Mountain" is USD 100.FruitCo does not sell the beverage to independent distributors in Bangladesh or other Asian countries. There is a comparable beverage called "Nature Valley" produced by JuiceCo, a local company in Bangladesh. The market price for one can of "Nature Valley" is also USD 100. Distributors of "Nature Valley" report a gross margin of 12% per can sold. Requirements:

i) Calculate Arm's length price following Resale Price method.

ii) Highlight two key challenges under Resale Price method.

b) Khidmah and Pious, based in UAE, brews a very exclusive non-alcoholic beverage called "the Miarge". It sells this beverage to high-end clubs and restaurants across the Middle east and Asia via associated distributors. The market price for one can of "the Mirage" is USD 20 in UAE. Khidmah and Pious is contemplating to incorporate a subsidiary in Bangladesh to import and distribute its product in Bangladesh. There are comparable distributors in UAE that sell "the Cheers". This is a competing alcoholic beverage produced by Jinn & Juice, a company based in the Netherlands. The market price for one can of "the Cheers" in UAE is also USD 20. Distributors of the Cheers report gross profit of 5% per can across middle east and Asia. Price of one can of "the Cheers" in Bangladesh is Tk. 3,000. Customs duty in Bangladesh per can is Tk. 310.

Requirement: Propose an arm's length import price per can for Bangladesh subsidiary of Khidmah and Pious adopting resale price method.

c) Rising Construction Co. Ltd. is a construction company of China and established a branch office in Bangladesh. It has won a river bank construction project floated by Bangladesh Water Development Board. Due to the ongoing crisis of foreign currency in Bangladesh, the head office of the branch paid a designing fee of USD 2,000,000 for the project from its own fund to an independent Chinese designing firm. The head office would recover it from the branch at actual cost (i.e. without any profit) when the branch would be able to pay the same in USD. The branch recognized a designing fee expense and corresponding liability to its head office in its financial statements.

Requirement: Suggest the appropriate TP method and code for this transaction for reporting it in the statement of international transactions of the branch as supported by logics you think fit.

Solution

1(a) (i):

To determine the arm's length transfer price for the supply of "Fruit Mountain" to the associated distributors in Bangladesh, we can consider comparable distributors of a competing non-alcoholic beverage in the local market. Based on this information, we can use the Resale Price Method (RPM) to determine the arm's length transfer price for "Fruit Mountain" in Bangladesh.

The RPM compares the resale price charged by the distributors to the end customers to an appropriate gross margin percentage. Hence,

Arm's Length Resale Price = Market Price - Gross Margin

Arm's Length Resale Price = USD 100 - USD 12

Arm's Length Resale Price = USD 88

1(a) (ii):

- Identifying Comparable Transactions: Finding reliable and comparable transactions between unrelated parties can be challenging, especially if the product or service being sold is unique or specialized. It requires careful analysis and consideration of various factors such as product characteristics, market conditions, and contractual terms.
- Determining the Appropriate Resale Price Margin: Calculating the appropriate resale price margin can be complex. It involves analyzing comparable transactions to determine the range of resale price margins observed in the market. Factors such as industry-specific characteristics, economic conditions, and functions performed by the distributor need to be considered.

1(b):

Particulars	Amounts in Tk.
Market price of one can of the Cheers	3,000
Gross margin of associated distributors	(150)
Customs duty imposable at import stage	(310)
Arm's length import price	2,540

1(c):

The core objective of transfer pricing regulations is to impose tax based on fair price of transactions between associated enterprises. Since the branch would reimburse the designing fee to the head office at actual cost i.e. without any profit, the transaction is already in arm's length. No specific transfer pricing method is to applied to determine fair price of the transaction. The appropriate TP method would be the "Other method" as mentioned in Section 235('Cha') of the ITA, 2023 and for the purpose of reporting the transaction in the statement of international transactions of the branch, the TPM code would be 6.

Example 2

XYZ Bangladesh Ltd. a 100% Chinese equity-held 'A' category private company, operating as export-oriented(deemed) security label products factory in Savar EPZ and enjoying 10-year tax holiday, have related party transactions. You are an ACA, working as deputy to the CA Firm's tax partner who specializes in TP. Tax partner advised XYZ as to the appropriate methods for pricing international transactions. He filed tax return of XYZ Bangladesh Ltd. for income year ended 30.06.2026 together with Statement u/s 238 of the Act, Rule 75A; selected extracts are:

Particulars of International Transactions (XYZ Bangladesh Ltd. For y/e 30.06.2026)

PART – I Tangible property of revenue and capital nature transactions

Item	Expense ('000)	TPM Code	%	Revenue ('000)	TPM Code
Export of F/G			15%		TNMM
Import of R/M	50,000	OTHER	10%	150,000	
Import of Machineries	200,000	TNMM	75%		
Service-related transactions	**Expense**	**TPM Code**	**%**	**Revenue**	**TPM Code**
Management Fee	10,000	TNMM	100%		

PART – II

Interest free loans, advances and investments (figures in '000 Tk.)				
Item	**Opening Balance**	**Increase**	**Decrease**	**Closing Balance**
Due to Assessee	----	5,000	---	5,000
Current accounts and similar items (figures in thousand Tk.)				
Item	**Opening Balance**	**Increase**	**Decrease**	**Closing Balance**
Accounts Payable	35,000	50,000	--	85,000
Accounts Receivable	65,000	50,000		115,000

Exports of F/G to AE are same "label products". The import of R/M includes semi-finished label papers of high specifications which are available only with one Chinese supplier; the AE in question has global volume contract with Chinese Supplier. Machineries include state-of-the-art printers from proprietary sources. Management fee is shared cost of technical team sitting in China under a Management Service Agreement with assessee. "Due to Assessee" includes remittance made to Paris trading office of the company to support its initial set-up cost (opened in June 2022). This new trading office is set up to secure nominations for its label products from EU customers who source apparel products from Bangladeshi suppliers. DCT referred the case for y/e 30.06.2026 to TPO u/s 236. TPO served a notice to XYZ Bangladesh Ltd. u/s 236 (2) requiring to explain:

1. Why assessee relied on TNMM and 'OTHER' method for reported/selected transactions with AEs?
2. Why TP adjustment should not be given on management fee paid to AE in Shanghai?
3. Why TP adjustment should not be given on interest-free remittance to AE in Paris?
4. Why TP adjustment should not be given for interest on overdue receivable from AEs?

Long working with TP specialist tax partner brought you experience on TP advisory. NBR formed TP cell comprising of proven high-caliber officials from department. TP regulations are new in Bangladesh. NBR advertised for a short-term consultant (preferably CA) to seek technical supports to the cell in these initial days. You got this one-year engagement at NBR to work as Consultant at TP Cell, to begin from August, 2026.

Requirements:

a) Your tax partner wants you to draft explanations in ref to TPO notice. Cover reasons why 'TNMM' and 'Other' methods are used by XYZ Ltd in its reported transactions as opposed to other methods.

b) Draft explanation for your partner covering the reasons as to why TP adjustments should not be given for reported management fee, interest-free remittance and overdue receivable.

During incumbency at NBR, you will support TP team with your findings identifying potential adjustments involving critical returns. Assume, you are tasked by TP head to provide findings on a return filed by your ex-Tax partner. Answer your position covering ethical threats, if any, and your possible actions.

Solution

2(a)

A TP study on XYZ Ltd was carried out, ready for submission to tax authority. At XYZ Ltd., operating margin is taken as profit level indicator (PLI) when using TNMM method. Rule 70(1) of the IT Rules, 1984 was taken as guidance and thus the selected methods were decided for given international transactions. TNMM uses objective measures of profitability, called Profit Level Indicators (PLI) to evaluate whether the price of controlled transactions is at arm's length and so it was taken as appropriate for finished goods sale (export), raw material import and Management fee. At XYZ Ltd. when using **Transactional net margin method** (TNMM) for determining selling price of 'label products', PBIT margin on export sales from sale transactions with AEs were compared with the PBIT margin on sale from export transaction with unrelated customers. Adjustments for difference in functional analysis between transactions with AEs and unrelated parties were also given.

Similarly, for purchase of materials from AEs, PBIT margin on cost from transactions of purchase raw material transactions with AEs were compared with the PBIT margin on cost from transactions of purchase raw material transactions with unrelated suppliers. As the raw materials semi-finished, of high specifications and they are sourced from selected Chinese suppliers under the global volume contract with AEs in Shanghai, the scope of comparability with uncontrolled transactions were less. However, as the r/m is procured under global volume contract with AE, the price of raw material received by XYZ Ltd. was already competitive.

TNMM was used for Management fee also on the ground of simplicity. When doing this, the PBIT margin-Management fee to AE at XYZ Ltd. was compared with the PBIT margin-Management fee relationship practiced by unrelated competitors in the same industry sector (Label Products). Such comparison revealed the size of management fee at XYZ is lower than that practiced at uncontrolled competitors.

Application of TNMM for export sale, r/m purchase and management fee thus made the operations simple, objective and so the prices are duly in arm's length. Net margin under TNMM is less affected by transactional difference than in the case with price under CUP method. Net margin is also a better indicator than gross margin which is used in the case of CPM and RPM. PSM better suits service industry.

Use of 'OTHER' method was used for transactions with AEs for purchase of machineries. These are state-of-the art machines, purchased from proprietary sources to maintain the quality of label products. As the source is 'proprietary' and having no other alternative, no ALP pricing methods could be applied but the price of the supplier was taken as it is, i.e., the method falls under 'OTHER'. Section 235(1)(f) allows using 'any other method' where it can be demonstrated that none of the specific five methods can be reasonably applied to determine ALP for given international transaction. XYZ had to resort to section 235 for 'machinery import from proprietary source.

2(b)

Rule 70(1) was duly complied when determining the ALP methods for the three items of international transactions. Further grounds why TP adjustments should not be given on those three items:

Management Fee to AE in Shanghai, China

- Management fee is paid to AE using TNMM method which is the most reliable measure on merit, duly being backed by Rule 70(1) of the IT Act.
- Management fee paid is still lower than size of the item practiced by the uncontrolled competitors in the same industry of label products export, revealed by TNMM approach.
- Pricing method has been determined after a detailed TP study, submitted with tax return.
- The payment is well documented and the amount within the limit of section 55(e) of ITA,2023.
- The amount paid to AE is towards sharing of the cost of the technical team in China (head quarter), well documented, and under a formalized agreement duly approved by BIDA. The management fee recovers proportionate cost of AE without any savings, as revealed by TP study FAR analysis.

Remittance to AE in Paris

- New trading office in Paris was set up to market, coordinate and secure nominations of the EU retainers for the assessee's label products, which will be a direct increase of assessee's export.
- AE in Paris, being non-resident, cannot make any local borrowing there. The only option for initial set up cost was funding from the assessee. This remittance is also approved by Bangladesh Bank.
- Fund remitted to start the set-up could otherwise be treated as 'capital expenditure' whereas the remittance has been recognized as repayable loan to AE. This means better protection to the assessee.
- Financial support made to AE comes under the ordinary business practice of assessee's operations. This is a one-off assistance and amount is not very large. Assessee's business is not 'lending'. Therefore, there cannot be any interest charge on the funds remitted.
- The decision to support AE in Paris was duly approved by the BOD for greater business cause.

Receivable from AE

- Receivable with AE is in the ordinary course of assessee's business operations, not extraordinary.
- Receivable is not alone with AE, other parties also have receivable balance as per payment term. Such receivable is unavoidable in business.
- The annual increase figure of receivable is for an amount which is equally off-set by the payable to AE. The net effect on assessee is well balanced.
- There is no term of interest charge on the receivable with the AEs when sale was done.

2(c)

As NBR consultant, I shall be in the character of a PAIB. Working on a file of my ex-tax partner's client at my incumbency at TP cell may be an issue of 'conflict of interest' which may create threats to objectivity and other fundamental principles, such as, integrity, confidentiality and good reputation of my profession. I shall be subject to NBR contractual terms, policies and procedure of NBR and the Govt. Secrecy law. I shall be exposed to 'familiarity threats' for my long association with ex-tax partner plus a threat of 'self-interest' for the likely slide of my image if I fail to do a just job at TP cell.

The threats are significant. No safeguard seems to be relevant. I have to a firm position. As a TP Cell consultant, I shall draw an ethical wall both in fact and appearance under the circumstances. I shall remain objective, confidential at all times and shall not allow any undue influence including any familiarity pressure in my mind to override my professional judgment. I shall not allow conflict of interest but shall disclose to my TP cell boss the fact of my relationship with ex-tax partner and the tasked file in hand. If I am still tasked to do the job, on merit, I shall bring change in my conduct with my ex-tax partner during my incumbency at TP Cell. Major threats as mentioned could thereby be managed well.

Example 3

A Bangladeshi entity X Ltd, purchases certain finished goods from an associated enterprise in Singapore Y Pvt. Ltd, which it sold to an independent enterprise in Bangladesh XY Ltd at Tk. 575,000 (inclusive of 15% VAT). Another entity BB Ltd in Bangladesh around same time procured similar goods from an independent enterprise in Singapore SS Pvt. Ltd at Tk. 440,000 (inclusive recoverable VAT of Tk. 40,000), which was sold to another independent party ZA Ltd at Tk. 690,000 (inclusive of 15% VAT) with an associated freight cost Tk. 35,000 and insurance cost of Tk. 15,000.

Required:

i) Determine the most appropriate method for determining the Arm's length price and explain why this should be applied.

ii) Compute the Arm's length purchase price of X Ltd.

Solution

(i)

Most appropriate method for this transaction would be Transactional Net Margin Method (TNMM).

The reasons behind selecting TNMM as the most appropriate method:

- General, marketing and administrative expenses are like establishment costs and therefore they do not directly affect the prices of the goods in the market
- TNMM tests the net margins of the tested party as oppose to gross margins in case of Resale Price Method RPM or Cost Plus Method
- TNMM becomes inevitable where the assessee has interlinked transactions of purchase and sale from/to related parties where they cannot be benchmarked isolated.

(ii)

Independent Enterprise transaction:

Description	Amount (Tk.)
Sales by BB Ltd excluding VAT (690,000X (100/115)	600,000
Material cost (purchased from independent enterprise): Total cost including VAT 440,000 (-) Recoverable VAT 40,000 Material cost without VAT Freight Insurance	 400,000 35,000 15,000
Operating profit	150,000
Operating Profit in %	25%

Arm's Length price computation of X Ltd:

Description	Amount
Sales by X Ltd to independent enterprise excluding VAT (575,000X (100/115)	500,000
(-) Operating profit margin @ 25%	125,000
Arm's length purchase price from associated enterprise	375,000

Example 4 (A) [CUP Method]

Bio Chem Limited (A German Company) sold 500 vaccines to its subsidiary Bio Chem BD Limited (Bangladeshi Company) for $200 each on CIF (Cost, Insurance & Freight) basis. It sells the vaccine to Beximco Pharma in Bangladesh also at $190 each on FOB basis. Transportation cost from Germany to Chittagong port is $3.5 for each vaccine. Insurance cost for the transportation is $2500 for all 500 vaccines. The subsidiary in Bangladesh incurs additional cost of $5.5 for packaging of the vaccine while the parent takes the responsibility for packaging to other subsidiaries for which the cost is $15 for each vaccine.

Please compute the Arm's Length price for the vaccine in Bangladesh and the required adjustment required.

Solution 4 (A): Arm's length price determination for transaction between Parent and Subsidiary

Particulars	Amount
Unit price charged to Bio chem BD Limited (AE)	$200.00
Unit price charged to Independent Customer (Third party)	$190.00
Add: Cost of Transportation	$3.50
Add: Cost of Insurance	$5.00
Adjusted unit price*	$198.50
Arm's length price per unit using internal CUP	$198.50
Transfer pricing adjustment in US$ (500*($200-$198.50))	$750.00
Transfer pricing adjustment in Tk. (1 US$ = 110 Tk.)	Tk. 82,500

Example 4 (B): External CUP

The German entity sells the same vaccine to other subsidiaries at the following price:

Market	Selling Price (Vaccines)
USA	$225.00
China	$215.00
Brazil	$210.00

Solution 4 (B):

Arm's length price determination for transaction between Parent and Subsidiary

There is no specific guidance on how to determine External CUP using external price when multiple prices are available. Common practice is using average of selling prices. Using average selling price of the above three market:

Particulars	Amount
Average price per unit using external CUP	$216.67
Packing cost incurred by parent	$15.00
Arm's length price per unit using external CUP (Average Price)	$201.67
Unit price charged to Bio chem BD Limited (AE)	$200.00
Less: Packaging Cost **(B)**	$5.50
Adjusted unit price charged to Bio chem BD Limited by AE **(A-B)**	$194.50

Transfer Pricing adjustment is not required because AE charged lower price than the external selling prices of the same product to other subsidiaries.

Example 5 [**Resale Price Method (RPM)**]

Ryans Bangladesh Limited trades IT related product only. Ryans purchases all its laptop from Dell Limited (A related Party). It also purchases its laptop from HP Limited but without warranty. Warranty cost for laptop is Tk. 1,500.

Particulars	Dell Limited (AE)	HP Limited
Purchase price of Ryans	15,000	19,000
Selling price of Ryan	18,000	26,000
Other expenses	1,000	1,500

Calculate the arm's length price of each laptop it procures from the related party.

Solution

Details of the Gross Profit Margin is as follows:

Particulars	Dell Limited (AE)	HP Limited
Selling price of Ryan	18,000	26,000
Less: Purchase price of Ryans	15,000	19,000
Less: Other expenses	1,000	1,500
Gross Margin	2,000	5,500
Gross Margin on Sales	11%	21%

Calculation of ALP is as follow:

Particulars	Amount (Tk)
Selling price of Ryan	18,000
Less: Other expenses	1,000

Less: Arm's length resale margin @21%	3,780
Add: Warranty Cost	1,500
Adjusted Arm's Length Price	**14,720**
Price Paid to AE	15,000
Adjustment per product	280

Example 6 [Cost Plus Method (CPM)]

Executive Cover Limited (ECL) manufactures I-phone cases for its associated enterprise. IPhone cases are manufactured by several other companies including Candy Casing Limited (CCL). Both CCL & ECL manufactures the same product

Details of the transactions of both the parties are given below:

Particulars	ECL	CCL
Selling price	12,000	13,000
Manufacturing cost	8,000	8,250
Cost of packaging	-	250

ECL manufactures 15,000 I-phone cases for its AE during the year. Please calculate the arm's length price of each I-phone cases and required adjustment.

Solution

Details of the Gross Profit Margin are as follows:

Particulars	ECL	CCL
Selling price	12,000	13,000
Less: Manufacturing cost	8,000	8,250
Less: Cost of packaging	Nil	250
Gross Margin	4,000	4,500
Total Cost	8,000	8,500
Mark up on cost	50%	53%

Calculation of ALP is as follow:

Particulars	ECL
Total Cost	8,000
Add: Arm's length Mark Up @53%	4,240
Adjusted Arm's Length Price	**12,240**
Selling Price to AE	12,000
Adjustment per I-phone Case	240
Total Transfer Pricing adjustment	3,600,000

Example 7 [Profit Split Method]

Kevlin Private Limited of India sells all of its manufactured goods to Kevlin Private Bangladesh Limited (AE of KPL India) and after further processing KPL (Bangladesh) sells those products to the customers all over Bangladesh.

Profit & Loss Statement of KPL (India) and KPL (Bangladesh)

Particulars	KPL(India)	KPL(Bangladesh)
Sales	$55	$ 100
Purchase	$ (10)	$ (55)
Manufacturing costs	$ (15)	$ (20)
Gross Profit	$ 30	$ 25
Research & Development	$ (15)	$ (10)
Operating expenses	$ (10)	$ (10)
Operating Profit	$5	$ 5

It is established, for both jurisdictions, that third-party comparable manufacturers without unique and valuable intangibles earn a return on manufacturing costs (excluding purchases) of 10% (ratio of net profit to the direct and indirect costs of manufacturing).

Recalculate Arm's length profit of KPL (India) and KPL (Bangladesh) using profit split method.

Solution

Calculation of residual profit:

Particulars	KPL (India)	KPL (Bangladesh)	Total
Total operating profit earned by KPL (India & Bangladesh)	$ 5.00	$ 5.00	$ 10.00
Less: Return on manufacturing costs (Manufacturing cost x 10%)	$ 1.50	$ 2.00	$ 3.50
Residual profit	$ 3.50	$ 3.00	$ 6.50
Proportion of R & D Cost	$ 15	$ 10	$ 25.00
Percentage of Proportion of R&D Expenses (R&D expense / Total R & D Expense x 100%)	60%	40%	

Calculation of Residual Profit (Operating Profit) $ 5.40 $ 4.60

(Return on Manufacturing cost + Proportion of R&D Expense X Total Residual Profit)

Adjusted Profit & Loss Statement of KPL (India) and KPL (Bangladesh)

Particulars	KPL (India)	KPL (Bangladesh)
Sales	$ 55.40	$ 100.00
Purchase	$ (10.00)	$ (55.40)
Manufacturing costs	$ (15.00)	$ (20.00)
Gross Profit	$ 30.40	$ 24.60
R&D	$ (15.00)	$ (10.00)
Operating expenses	$ (10.00)	$ (10.00)
Operating Profit	$ 5.40	$ 4.60

Example 8: [Transaction Net Margin Method (TNMM)]

Tiger IT Bangladesh Limited (TIL-BD) procures software (Data X) from Gameloft Singapore Limited at Tk. 1,500. The company incurs promotional expense of Tk. 600 and sells the software to its customer at Tk. 3,000.

Tiger IT Bangladesh Limited (TIL-BD) also procures its software (Foto Z) from Tiger IT UK Limited (TIL-UK) at Tk. 700. The company incurs promotional expense of Tk. 200 per software and sells the software at Tk. 1,200 to its customer.

Please find the arm's length price for the software assuming the difference in product is immaterial.

Solution

Computation of Net Profit Margin

Particulars	**Data X (Tk.)**
Sales Price	3,000
Less: Purchase price	1,500
Less: Promotional Expense	600
Net Profit	900
Net Profit Margin Ration (% of sale)	30%

Calculation of ALP is as follow:

Particulars	**Amount**
Sales price of Foto Z (A)	1,200
Net Profit Margin Ratio	30%
Net Profit Margin (B) [A X Net Profit Margin Ratio]	360
Total Cost (A-B)	840
Less: Promotional Expense	200
Adjusted Arm's Length Price per software	**640**
Price Paid to AE	700
Transfer pricing adjustment per software	**60**

Example 9

A company (ABC Ltd) has received interest free loan of Tk. 15,000,000 from its parent (XYZ Ltd) as working capital on 10 December 2025. The company repaid the loan on 01 May 2026. The financial year of the company is from July 2025 to June 2026.

Now, the group CFO is in the view that, the TP return is not required to file as the there is no closing balance in the financial statements. He approached your tax partner for opinion on whether this need to be file or not.

You are required to prepare a memorandum for the tax partner for the above queries.

Solution

To,
Tax Partner.
ABC & Co.
Chartered Accountants

Subject: **Memorandum on filing Statement of International Transactions under Section 233(5)**

Dear Sir,

As per Section 233 (5), international transaction means in the nature of Purchase, Sale, Lease of tangible or intangible property, provision of services, lending money, borrowing of money between associated enterprises.

As the ABC Limited (subsidiary) received interest free loan from XYZ limited (Parent) it falls under international transaction for which TP return must be filed as per section 233(5). Though there is no closing Balance but as the transaction incurred during this year, it must be reported under Part-II Interest Free loan, advances and investments.

However, as the transaction for the year is less than Tk. 30,000,000, so no certificate from a qualified chartered accountant is required. Also, there is no need to mention transfer pricing method rather it can be considered only as disclosure.

Example 10

A German based research institute developed a vaccine for protecting the children from harmful seasonal flue which was not developed by any other entity in the world. The German based institute will supply the vaccine to Bangladesh at fixed value of USD 250, the rate is the same for the supply to other country by the institute.

Now, the entity wants to open a subsidiary in Bangladesh and approaches your firm for the transfer pricing implication and method.

You are required to prepare a memorandum for the tax partner for the above queries.

Solution

To,
Tax Partner.
ABC & Co.
Chartered Accountants

Subject: **Memorandum on Transfer Pricing Method and Implication for newly developed vaccine**

Dear Sir,

As per section 238, the subsidiary needs to file the TP return for purchasing the vaccine from its parent based in Germany.

In case of determining the transfer pricing method, we need to take into the fact that, this is a very unusual product (Vaccine) and the vaccine is being sold by the institute to all other countries at a fixed price. As the subsidiary will act as only as a distributor and resale the product, the Transfer pricing method would be "Comparable uncontrolled Price" TPM code: 01".

Also, as the vaccine is supplied to all the countries of the world at the same rate ($250), there will not be any transfer pricing adjustment.

Example 11

Expo Ltd. is a foreign subsidiary company of BGD Ltd. The Company sells air conditioners to Expo Ltd. at a price of Tk. 40,000 each for sale to its dealers in Vietnam. In other States, BGD Ltd. is directly selling to their dealers at Tk. 45,000 with a warranty of two years (Tk. 3,500 for each air conditioner). Expo Ltd. does not offer such warranty. Quantity sold to Expo Ltd. is 10,000 units and to dealers of BGD Ltd. is 5,000 units. Discuss the method to be applied to arrive at the Arm's Length Price (ALP) and compute the ALP. How is the assessment of BGD Ltd. going to be affected?

Solution

Expo Ltd. and BGD Ltd. are associated enterprise as Expo Ltd is subsidiary of BGD Ltd. Comparable product (Air Conditioner) is sold to dealers (Uncontrolled transactions). Hence, in given circumstances Comparable Uncontrolled Price (CUP) Method for determining arm's length price can be applied.

Particulars	Amount (Tk.)
Sale price charged to Dealers of BGD Ltd.	45,000
Less cost of warranty included in price	3,500
Arm's length price	41,500
Actual price paid by Expo Ltd. to BGD Ltd.	40,000
Difference per unit 1,500	1,500
Addition required to be made in the computations of the total income of BGD Ltd. (1500 x 10,000 units)	15,000,000

Tk. 15,000,000 is to be shown as adjustment for Arm's length price for international transaction u/s 235.

Example 12

TTT Ltd. Singapore holds 27 % shares in Blackrock Ltd. Bangladesh. Further, Tihami Ltd. USA holds 32% shares in Blackrock Ltd. Bangladesh. Blackrock Ltd. Bangladesh develops software and does both onsite and offsite consultancies. Tihami Ltd USA has a worldwide presence.

Tihami Ltd. USA received an order from SA Ltd. USA for developing a software product. In order to execute the same, TTT Ltd. Singapore, Tihami Ltd. USA & Blackrock Ltd. Bangladesh has contributed integrally to the development of the software product. Tihami Ltd USA finally delivers the product to SA Ltd. USA and receives consideration of $50,000.

Tihami Ltd. USA in turn pays to TTT Ltd. Singapore and Blackrock Ltd. Bangladesh a sum of $10,000 and $12,000 respectively to keeps the balance to itself. In the entire transaction a profit of $10,000 is earned. Blackrock Ltd. Bangladesh incurred total cost of $9,500 in executing its functions relating to above project.

On the basis of functions performed, risks assumed and assets employed, the relative contribution may be taken at 50%, 20 %, 30% for Blackrock Ltd. Bangladesh, TTT Ltd. Singapore, Tihami Ltd USA respectively. Calculate the arm's length price and the profit that requires adjustment.

Solution 12: The ALP shall be determined as under:

Particulars	Amount in USD
Price charged by Tihami Ltd USA to SA Ltd. USA	50,000
Blackrock Ltd. Bangladesh's share of revenue	12,000

TTT Ltd. Singapore's share of revenue	10,000
Tihami Ltd USA's share of revenue	28,000
Combined total profits	10,000
Evaluation of relative contribution:	
Blackrock Ltd. Bangladesh 50% of $10,000	5,000
TTT Ltd. Singapore 20% of $10,000	2,000
Tihami Ltd USA 30% of $10,000	3,000
Total cost of Blackrock Ltd. Bangladesh	9,500
Income of Blackrock Ltd. Bangladesh on ALP (9,500+ 5,000)	**14,500**
Actual revenue of Blackrock Ltd. Bangladesh	12,000
Increased income in USD	2,500
Increased income in Tk. (2,500 x 110)	**Tk. 275,000**

Example 13

CloudNet Bangladesh Ltd ("CloudNet BD") is a 100% subsidiary of CloudNet Global S.A., based in Estonia. CloudNet BD provides high-end data center management services. For the income year 2024-25, the company reported a net profit of BDT. 8 Crores.

The company's financial statements revealed two international transactions with its parent company:

1. Global Infrastructure Support Fee: BDT. 10,000,000 (1 Crore). The parent company charges this fee based on a "Global Cost Allocation" model, which includes a 15% markup on the costs incurred in Estonia.
2. Brand License Fee: BDT. 5,000,000 (0.5 Crore). This is a fixed annual fee for using the "CloudNet" trademark in Bangladesh.

During a tax audit, the Deputy Commissioner of Taxes (DCT) raised the following issues:

- The Benefit Test: The DCT noted that CloudNet BD has its own local team of 20 IT engineers and questioned why a support fee was paid to Estonia.
- Arm's Length Markup: The DCT identified local independent IT support firms that provide similar services with an average net profit markup of 6%.
- Reporting Compliance: CloudNet BD did not file the "Statement of International Transactions" with its tax return. When the DCT issued a notice to provide a Transfer Pricing Report from a Chartered Accountant, the company refused, arguing that their total international transactions (BDT. 1.5 Crores) are well below the legal threshold for such reporting.

Requirements:

a) Calculate the Transfer Pricing Adjustment for the "Global Infrastructure Support Fee" using the Cost Plus Method (CPM), assuming the DCT accepts the base costs but mandates the local benchmark markup of 6%.

b) Analyze the validity of CloudNet BD's refusal to provide an Accountant's Report. Under Section 239 of the Income Tax Act, 2023, what is the threshold for this

requirement? Also, discuss the company's obligation regarding the Statement of International Transactions under Section 238.

c) Describe the "Benefit Test" criteria that CloudNet BD must satisfy to prevent the DCT from disallowing the entire BDT. 1 Crore service fee.

Solution (a):

Calculation of Transfer Pricing (TP) Adjustment

To determine the adjustment, we first back-calculate the actual cost incurred by the Estonian parent and then apply the arm's length markup (6%).

1. Determine the Parent's Base Cost:

a. Total Fee Paid (including 15% markup) = BDT. 10,000,000
b. Base Cost = 10,000,000÷1.15
= 8,695,652

2. Determine the Arm's Length Price (ALP) using CPM (6% markup):

a. ALP = Base Cost + (Base Cost × 6%)

b. ALP = 8,695,652×1.06

=BDT. 9,217,391

3. TP Adjustment (Disallowance):

a. Actual Price Paid: BDT. 10,000,000
b. Arm's Length Price: BDT. 9,217,391
c. Amount to be added back to Income: BDT. 782,609

Solution (b):

Compliance Requirements and Thresholds (Section 238 & 239)

- **Accountant's Report (Section 239):** CloudNet BD's refusal to provide a report from a Chartered Accountant is legally valid. According to Section 239, the DCT can only mandate a report from a CA/CMA if the total value of international transactions in an income year exceeds BDT. 3 (three) Crore. Since CloudNet BD's total transactions are only BDT. 1.5 Crore (1 Cr + 0.5 Cr), they are not obligated to furnish this specific report.
- **Statement of International Transactions (Section 238):** The company is legally non-compliant here. Section 238 requires every person who has entered into an international transaction to file a statement in the prescribed form along with their tax return, regardless of the transaction value.
- **Penalty for Section 238 (Section 278):** Failure to file this statement attracts a penalty of up to 2% of the value of the international transactions (i.e., 2% of 1.5 Crore = BDT. 300,000).

Solution (c):

The "Benefit Test" for Intra-group Services

To justify the BDT. 1 Crore payment and avoid a full disallowance, CloudNet BD must prove:

1. **Actual Rendering:** Documentary evidence (logs, project reports) that the Estonian parent actually performed services.
2. **Economic/Commercial Value:** The service provided a specific benefit that enhanced CloudNet BD's commercial position or helped it earn revenue.
3. **Willingness to Pay:** An independent enterprise in similar circumstances would have been willing to pay an independent provider for these services.
4. **Non-Duplication:** The services are distinct and not already covered by the company's local 20-member IT team.
5. **Not Shareholder Activity:** The fee does not relate to activities performed solely for the benefit of the parent company (e.g., group-level reporting or Estonian regulatory filings).

Chapter 28
Refunds

Introduction

Learning objectives
Examination context

Topic list

28.1 Direct refund
28.2 Entitlement to refund
28.3 Claim of refund for deceased or disabled persons
28.4 Correctness of assessment, etc. not to be questioned
28.5 Refund on the basis of appeal order
28.6 Claim for refund
28.7 Adjustment of refund against tax

Worked examples

Introduction

Learning objectives

- Recognize the requirement to issue refund voucher
- Define the entitlement of refund.
- Recognize the claim of refund for deceased or disabled persons
- Define the refund on the basis of orders in appeal
- Calculation of interest on delayed refund
- Define the adjustment of refund against tax

Practical significance

When any amount of tax is refundable as per tax law the DCT shall issue refund voucher unless such refund is set off against tax. The refund shall be entitled when the amount of tax paid exceeds the properly chargeable tax or when income of one person included in income of another person.

Where through death, incapacity, insolvency, liquidation or other cause, a person, is unable to claim or receive any refund due to him, the legal representative shall be entitled that refund. In case of refund on the basis of orders in appeal, the amount is payable within 30 days. Interest is also payable if there is delay in payment of refund more than 2 months from the claim of refund. In certain cases, the refundable amount can be adjusted against tax.

Stop and think

Excess payment of tax is refundable or adjustable against tax. Do you think that refundable tax can be received or adjusted even in some cases with interest?

Working context

Excess payment of tax by a taxpayer may be incurred in many ways. Refund of such tax is a legal right for that taxpayer. Accountants support to calculate and claim the refundable tax on behalf and in favour of the clients that is sometime very essential.

Detailed knowledge on the refund procedures can help accountants to provide this service to their clients.

Examination context

Exam requirements

In the examination, candidates may be required to:

- Identify the requirement to issue refund voucher.
- Mentioned who are entitled to refund.
- Recognize the claim of refund for deceased or disabled persons.
- Recognize the refund on the basis of appeal order.
- Calculate interest on delayed refund.
- Mention how refund is adjustable against tax.

Question practice

For question practice on these topics, go to the suggested answers covering this chapter.

Examiner's comments on how students should tackle questions

Candidates have historically prepared well for this area of the syllabus. Better prepared candidates are able to perform well in the more difficult areas.

CHAPTER 28

REFUND

Section overview

- DCT shall issue refund voucher when any amount of tax is refundable unless such refund is adjustable against tax.
- Legal representative of a disable person shall be entitled to get refund.
- Refund on the basis of appeal order is payable within 60 days of receiving such revised order from the DCT.
- Interest is also payable in case of delay in payment of refund.
- Refundable amount can be adjusted against tax.

28.1 Direct refund: Section 215:

Tax may be recovered by electronically transferring the amount from the taxpayer's bank account to the Government's designated bank account.

Except in the cases specified in sub-sections (4) and (5) of section 170A, where a return claiming a refund is processed under the self-assessment procedure under section 180, the Deputy Commissioner of Taxes (DCT) shall complete the processing within 120 days. Where a refund becomes due, it shall be electronically transferred to the bank account specified in the return.

In all other cases, any refund shall be electronically transferred to the bank account specified in the taxpayer's online refund application within 60 days from the date of submission of the application.

28.2 Entitlement to refund: Section 224

Where a person can demonstrate to the DCT that the tax amount paid by him or on his behalf or deemed to be paid by him or on his behalf, for a given year exceeds the rightful amount chargeable under the Act for that specific year, is eligible to receive a refund for the surplus amount.

In a situation where income of a person is encompassed within the total income of another person through any provision of the Act, solely the latter person shall be entitled to claim a refund concerning that particular income.

28.3 Claim of refund for deceased or disabled persons: Section 227

Where through death, incapacity, insolvency, liquidation or other cause, a person, is unable to claim or receive any refund due to him, his legal representative, or the trustee, guardian or receiver, as the case may be, shall entitled to claim or receive such refund for the benefit of such person or estate.

28.4 Correctness of assessment etc. not to be questioned: Section 228

In any claim for refund under this chapter, it shall not be open to the claimant to question the correctness or validity of any assessment or other matter which has become final and conclusive or to ask for a review of the same, and the claimant shall not be entitled to any relief on any such issue raised except refund of the tax paid in excess.

28.5 Refund on the basis of appeal order: Section 229

Where, as a result of any order passed in appeal or other proceeding under this Act, refund of any amount becomes due to an assessee, the DCT shall refund the amount, unless set off against tax or treated as payment of tax as per provisions of section 225 to the assessee, within 60 days from the date on which the refund has become due without his having to make any claim in that behalf.

28.6 Claim for refund: Section 226

Where a refund becomes due under this Act but is not electronically transferred to the taxpayer's bank account within the time and in the manner specified in section 215, the taxpayer may bring the matter to the notice of the Commissioner of Taxes or the Board.

If the refund is not granted within the prescribed time without reasonable cause, the failure shall constitute misconduct on the part of the responsible tax official, and appropriate action may be taken in accordance with the applicable service rules.

28.7 Adjustment of refund against tax: Section 225

Where, according to the provisions in this Act, the Income Tax Ordinance, 1984, the Gift-tax Act, 1990, or the Wealth-tax Act, 1963, there is a determined refund or repayment owed to a person, the entirety or a portion of the owed amount might be offset against the tax liability of that person as per this Act.

Refunds that are utilized to settle outstanding tax obligations shall be considered as tax refunds issued to the taxpayer, and the DCT will duly document this adjustment.

Example 1

A refund of tax becomes due to an assessee on reduction of total income in appeal filed by him, but the DCT does not take any action to make the refund. What are the remedies open to the assessee?

Solution

1. The aggrieved assessee can file appeal to the AJCT or the Commissioner (Appeals) against the refusal of the DCT to make the refund.
2. The assessee can apply to the DCT to adjust the refundable amount against his arrear tax demand, if any, u/s 226 of the Income Tax Act, 2023.

Chapter 29

Appeal, Tribunal, Reference, Revision and ADR

Introduction

Learning objectives
Examination context

Topic list

29.1 First appeal
29.2 Appeal against the order of Tax Recovery Officer
29.3 Second appeal
29.4 Reference to the High Court and appellate Division of the Supreme Court
29.5 Summary of appeal and reference
29.6 Revision power of the Commissioner of Taxes
29.7 Alternative Dispute Resolution (ADR)

Self-assessment questions

Introduction

Learning objectives

- Identify the conditions and procedures for different appeal, tribunal and references.
- Mention the different orders of tax authorities for which an assessee may be aggrieved.
- Define various appeals to the different appeal authorities in different situations.
- Identify the decisions or results of appeal come from different appeal stages.

Practical significance

An assessee not being a company or an assessee being a company in respect of certain cases aggrieved by any order of a DCT or IJCT can appeal to the AJCT or the Commissioner (Appeals) against such order. Appeal can also be made to the AJCT against the order of TRO.

An assessee may appeal to the Taxes Appellate Tribunal if he is aggrieved by an order of an AJCT or the Commissioner (Appeals). The Taxes Appellate Tribunal may, after giving both the parties an opportunity of being heard, pass such orders on the appeal as it thinks fit. The Taxes Appellate Tribunal may dispose of the appeal if the appellant does not appear when the appeal is called for hearing.

The assessee or the Commissioner may refer any question of law arising out of the order of the Taxes Appellate Tribunal communicated to him to the High Court Division. The High Court Division of the Supreme Court shall pass such orders as are necessary to dispose of the case in conformity with the judgment delivered by it.

For the appeal and reference, the appellant need to comply with some conditions and maintain some procedures to make his appeal valid.

Stop and think

The aggrieved parties in certain cases can appeal to the different appeal authorities. Do you think that the appeal and reference procedures are enough to get the proper judgment by the aggrieved parties under the Act?

Working context

The appeal and reference procedure under tax law is the most complex and risky area for the aggrieved parties. The assessee being a client is sometimes very much required the service from an accountant. Accountants being tax expert can provide the practical and useful advice and service to their clients in such cases.

Detailed and reasonable knowledge on appeal and reference can help accountants to provide practical service to their clients in this regard.

Examination context

Exam requirements

In the examination, candidates may be required to:

- Identify the conditions for appeal made by the assessee against order of the DCT.
- Recognize the procedures of appeal before AJCT or the Commissioner (Appeals).
- Demonstrate the decision in appeal by the AJCT or the Commissioner (Appeals).
- Identify the appeal against order of the TRO
- Define the appeal to the Taxes Appellate Tribunal.
- Identify the disposal of appeal by the Taxes Appellate Tribunal.
- Define the reference to the High Court Division of the Supreme Court.
- Mention the decision of the High Court Division of the Supreme Court
- Identify the appeal to the Appellate Division of the Supreme Court against the judgment of the High Court Division.

Question practice

For question practice on these topics, go to the suggested answers covering this chapter.

Examiner's comments on how students should tackle questions

Candidates have prepared well for this area of the syllabus.

APPEAL AND REFERANCE

Section overview

- There are different orders of tax authorities by which an assessee may be aggrieved.
- The aggrieved assessee can appeal to appropriate appeal forum
- The aggrieved tax authority can also file appeal in certain cases.
- Appeal can be filed to different appeal authorities including Taxes Appellate Tribunal
- Appeal can also be preferred to the High Court Division of the Supreme Court.
- There are some procedures of filing appeal including time limitation.
- Judgment by the AJCT or the Commissioner (Appeals) or Taxes Appellate Tribunal.
- The Taxes Appellate Tribunal can also dispose the appeal if the appellant does not appear when the appeal is called for hearing.
- The High Court Division shall pass such orders as are necessary to dispose of the case in conformity with the judgment delivered by it.
- The assessee can prefer application to the Alternative Dispute Resolution (ADR) instead of appeal, Tribunal or Higher Court.

29.1 First appeal: Section 286, 287, 288 & 289

Any taxpayer aggrieved by the order of any income tax authority regarding the following matters may appeal to the respective appellate tax authority i.e., Commissioner of Taxes (Appeals) and Appellate Joint Commissioner of Taxes –

(a) assessment of income;
(b) computation of tax liability or refund;
(c) set off or carry forward of loss;
(d) imposition of penalty or interest;
(e) charge and computation of surcharge or any other sum;
(f) credit of tax;
(g) payment of a refund.

Appeal in the following cases shall be made to the Commissioner of Taxes (Appeals):

(a) appeal by a company;
(b) appeal against an order under section 213;
(c) appeal against any order of adjustment or penalty involving international transactions.

No appeal is allowed in respect of income computed as a share of the taxed income. No appeal shall be filed against any order if 1% of the difference between the tax assessed on the basis of the order of DCT and tax liability admitted by the taxpayer is not paid.

Appeal under section 286 shall be filed in a prescribed form and manner along with a fee of Tk. 200 and filed within 45 days from the date of serving demand notice in relation to any assessment or penalty, and in other cases, from the date of an order is served. However, appellate authority may admit an appeal after expiry of said period if satisfied by the reason for delay.

Appellate authority shall fix a day and place for hearing and give notice to the appellant and the DCT. The appellate authority may allow the appellant to go into any ground of appeal which was not included earlier mistakenly, before or at the time of hearing. Appellate authority may enquire or ask for particulars or direct further enquiry to be made by the DCT before disposing of appeal. Appellate authority shall not admit any documents or evidence which was not produced before the DCT unless satisfied with reasons.

Appellate income tax authority in disposing an appeal, may confirm, reduce, enhance, set aside or annual the assessment or penalty or pass any order as he thinks fit. Order of appeal shall be communicated to the appellant, DCT and Commissioner within 30 days of the date of passing such order. An appeal shall be deemed to have been allowed if Appellate income tax authority fails to make an order within 150 days from the end of the month of filing of appeal.

Question

Can the first appellate authority dismiss an appeal for non-appearance of the appellant on the hearing date of appeal?

Answer

The first appellate authority is not empowered to dismiss an appeal for having the appellant absent on the hearing date. The appellate authority should pass an appellate order on merit after examination of the assessment records made available by the concerned DCT.

29.2 Appeal against the order of Tax Recovery Officer (TRO): Section 290

Any person aggrieved by an order of the TRO (either IACT or IJCT) under section 217 may, within 30 days from the date of service of the order, appeal to the CT to whom the TRO is subordinate, and decision of the CT on such appeal shall be final.

29.3 Second appeal: Section 291 and 292

Appeal against the order of CT or the Commissioner of Taxes (Appeals) as the case may be filed with the Taxes Appellate Tribunal.

Such appeal by an assessee must be filed, within 60 days of the communication of the appeal order, in the prescribed form accompanied by a fee of Tk. 1,000. In the case of appeal filed by an assessee the tax to be paid @3% of the amount representing difference between the taxes determined on the basis of the order of the CT or the CT (Appeals) and assessed tax.

The DCT can file an appeal to the Taxes Appellate Tribunal with the prior approval of the Commissioner of Taxes.

Appeal shall be deemed to have been allowed if Tribunal fails to deliver an order within 180 days from the end of the month of filing the appeal. However, if an additional member is appointment to hear the case because of differences of opinion by the two members then the period shall be 240 days.

The Taxes Appellate Tribunal shall communicate its order on the appeal to the assessee and to the Commissioner of Taxes within 30 days from the date of such order.

Question

Can the Taxes Appellate Tribunal pass an order ex-parte for non-appearance of the appellant on the hearing date of appeal?

Answer

If the appellant does not appear when the appeal is called for hearing, the Tribunal may dismiss the appeal for default. If the appellant makes on application within 30 days of such order of dismissal, for restoration of the appeal on the ground that notice of the appeal was not served on him or that the service was not valid in law or that he was prevented by sufficient cause from appearing on the hearing day and the Tribunal if satisfied, the order of dismissal shall be vacated and a fresh date of appeal hearing be fixed and disposed of on merit.

29.4 Reference to the High Court and Appellate Division of the Supreme Court: Section 293, 294 and 295

The assessee or the Commissioner may within 90 days from the date of receipt of the order of the Taxes Appellate Tribunal refer to the High Court Division of the Supreme Court in the prescribed form and manner, question of law arising out of the order of the tribunal.

Provided that no reference by an assessee shall be entertained unless the assessee pay 10% of the difference between the tax as determined by the order of the Tribunal and the admitted tax liabilities.

Section 293(3) has specified the documents need to be submitted along with the reference application submitted to the High Court Division.

The High Court Division shall, upon hearing any case referred to it under this section, decide the question of law raised thereby and shall deliver its judgment thereon stating the grounds

on which such decision is founded. The judgment of the Court shall be sent to the Registrar to the Appellate Tribunal which shall pass such orders as are necessary to dispose of the case in conformity with the judgment.

It is important to note that notwithstanding a reference made under section 293, tax shall be payable in accordance with the assessment made in the case unless recovery thereof has been stayed by the High Court Division. Therefore, it shall be noted that while filing such reference application by an assessee should also be made to stay the demand of disputed tax.

An appeal shall lie to the Appellate division against a judgment of the High Court Division if the High Court Division certifies that the order to be fit for appeal to the Appellate Division. Provision of the Code of Civil Procedure, 1908 relating to the appeals to the Appellate Division shall so far as may be, apply in regard to the appeals under Section 295 in the like manner as they apply in the case of appeals from decrees of the High Court Division.

29.5 Summary of appeal and reference

A close scrutiny of above discussions reveals the following situations for easy understanding:

Appeal against the order of	Appeal by	Appeal to	Time limit
Tax Recovery Officer	Any person aggrieved by an order of the TRO	Commissioner of Taxes	Within 30 days
Deputy Commissioner of Taxes	Any aggrieved assessee, not being a company	Appellate Joint/Additional Commissioner of Taxes	Within 45 days
	Any partner	Appellate Joint/Additional Commissioner of Taxes	Within 45 days
	Any aggrieved assessee, being a company	Commissioner of Taxes (Appeals)	Within 45 days
Inspecting Joint/Additional Commissioner of Taxes	any assessee aggrieved	Commissioner of Taxes (Appeals)	Within 45 days
Appellate Joint/Additional Commissioner of Taxes or the Commissioner of Taxes (Appeals)	Any assessee or the Deputy Commissioner of Taxes	Taxes Appellate Tribunal	Within 60 days
Taxes Appellate Tribunal	The assessee or the Deputy Commissioner of Taxes	High Court Division of the Supreme Court (for reference only)	Within 90 days

29.6 Revision power of the Commissioner of Taxes: Section 285

An assessee may also file revision petition before the Commissioner of Taxes within 60 days of receipt of Order of the DCT or AJCT/AACT, who are subordinate to the Commissioner, on payment of fees of Tk. 200 along with payment of assessed tax liability. Revision petition will be deemed to have been allowed the Commissioner fails to make an order within 60 days from the date of filing of the application for revision.

29.7 Alternative Dispute Resolution (ADR): Section 297

Any dispute of an assessee lying with any income tax authority, Taxes Appellate Tribunal or Supreme Court may be resolved through ADR. Assessee can also go directly to the ADR against the assessment or re-assessment done by the DCT. If the case in pending an Appeal, Tribunal or Supreme Court then also an assessee can prefer ADR taking permission from the concerned appeal forum. After obtaining such permission from the appeal forum, the appeal (both from assessee and department) shall remain stayed during the ADR negotiation process.

Procedure to file application to ADR:

- 4(four) set of application in the prescribed form shall have to be submitted to the respective appeal authority.
- Fee Tk. 500 per year is to be paid and copy of which is to be attached with the ADR application.
- Application for ADR is to be filed within 30 days from the date of receiving demand notice or the date of receiving permission from the appeal authority /court as the case may be.
- Where the case is under process at appeal/tribunal/court, then the copy of permission is to be attached with the application of ADR.
- Assessee shall not be eligible for application to ADR if he does not file return of income for the concerned year and does not pay tax as per return.

Procedure of disposal by the ADR:

(1) Board will nominate a facilitator from the panel of facilitators and convey it to the applicant, facilitator and the concerned Commissioner of Taxes. Board may, however, change the facilitator if any objection raised by the applicant or by the tax department.

(2) Upon receiving the application of ADR, the Facilitator shall forward a copy of the application to the respective DCT and call for his opinion on the grounds of the application and also whether the conditions of return submission and tax payment as per return by the assessee have been complied with.

(3) If the DCT fails to give his opinion regarding fulfillment of the above-mentioned conditions within 5 working days from receiving the copy, the Facilitator may deem that the conditions thereto have been fulfilled.

Panel of Facilitators:

NBR will form a panel of facilitators. The following persons shall be eligible for appointment as a facilitator by the NBR:

- An expert retired income tax official not below the rank of Joint Commissioner.
- A retired official of judicial service not below the rank of District Judge.
- A Chartered Accountant practiced income tax for a period not less than 8 years.
- A Cost and Management Accountant practiced income tax for a period not less than 10 years.

- An Income Tax Practitioner within the meaning of section 327 and practiced income tax for a period not less than 20 years.
- A professional legislative expert not below the rank of Deputy Secretary.
- A business man expert at income tax law.

Methodology to be followed by the Facilitator to mitigate the dispute:

1. The Facilitator will notify in writing both the applicant and the Commissioner of Taxes or the Commissioner's Representative to attend the meeting for settlement of disputes.
2. He may adjourn the meeting from time to time;
3. He may call for records or evidences from the DCT or from the applicant with a view to settle the dispute;
4. Before disposing of the application, he can cause to make such enquiry by any income tax authority as he thinks fit.
5. The Facilitator will assist the applicant assessee and the Commissioner's representative to agree on resolving the dispute or disputes through consultations and meetings.
6. Dispute may be resolved by an agreement either wholly or in part where both the parties of the dispute accept the points for determination of the facts or laws applicable in the dispute.
7. Where an agreement is reached, either wholly or in part, between the assessee and the Commissioner`s Representative, the Facilitator shall record, in writing, the details of the agreement.
8. The recording of every such agreement shall describe the terms of the agreement including any tax payable or refundable and any other necessary and appropriate matter and the manner in which any sums due under the agreement shall be paid and such other matters as the Facilitator may think fit to make the agreement effective.
9. The agreement shall be void if it is subsequently found that it has been concluded by fraud or misrepresentation of facts.
10. The agreement shall be signed by the assessee and the Commissioner`s Representative and the facilitator.
11. Where no agreement, whether wholly or in part, is reached or the dispute resolution is ended in disagreement between the applicant-assessee and the concerned Commissioner`s Representative for non-cooperation of either of the parties, the Facilitator shall communicate it, in writing recording reasons thereof, within 15 days from the date of disagreement, to the applicant and the Board, the concerned court/ Tribunal/ appellate authority and income tax authority, as the case may be, about such unsuccessful dispute resolution.
12. Where the agreement is reached, recorded and signed accordingly containing time and mode of payment of payable dues or refund, as the case may be, the Facilitator shall communicate the same to the assessee and the concerned DCT for compliance with the agreement.
13. No agreement shall be deemed to have been reached if the Facilitator fails to make an agreement within 2 months from the end of the month in which the application is filed.
14. Where there is a successful agreement, the Facilitator shall communicate the copy of the agreement to all the parties within 15 days from the date on which the Facilitator and the parties have signed the agreement.

Effect of agreement:

(1) Where an agreement is reached, it shall be binding on both the parties and it cannot be challenged in any authority, Tribunal or court either by the assessee or by the department.

(2) Every agreement shall be conclusive as to the matters state therein and no matter covered by such agreement shall be reopened.

Limitation for appeal where agreement is not concluded.

(1) Where an agreement is not reached wholly or partially, the assessee may prefer an appeal -

(a) to the Appellate Joint Commissioner of Taxes or Appellate Additional Commissioner of Taxes or Commissioner of Taxes (Appeals) as the case may be, where the dispute arises against the order of the DCT.

(b) to the Taxes Appellate Tribunal where the dispute arises against the order of the Appellate Joint Commissioner of Taxes or Appellate Additional Commissioner of Taxes or Commissioner of Taxes (Appeals), as the case may be; and

(c) to the Court from where the assessee-applicant has got permission to apply for ADR.

(2) In computing the period of limitations for filing appeal the time elapsed between the filing of the application and the decision or order of the ADR shall be excluded.

Fees to be paid to Facilitator

The facilitator is entitled to receive fees from both the assessee and the Govt. The quantum of fees is to be computed in the following manner:

The fee is Tk. 50,000 but not less than Tk. 5,000. 50% of fee is to be paid by the Govt. or Govt.

approved agency and remaining 50% by the assessee.

Recently, the NBR issued SRO No. 243-Law/Incometax-37/2024 on June 27, 2024, concerning the Income Tax Alternative Dispute Resolution Rule, 2024.

Self-assessment questions

(a) What are the various Income Tax Appellate Authorities under ITA, 2023?

(b) What are the time limits and relaxation thereof, if any, in respect of the following matters under the ITA, 2023?

i) Filing of appeal to the AJCT u/s. 286;

ii) Filing of appeal to the Commissioner of Taxes (Appeals) u/s.286;

iii) Filing of appeal to the Taxes Appellate Tribunal u/s. 291;

iv) Filing of reference application to the High Court Division and appeal to the Appellate Division of the Supreme Court u/s. 293, 294 and 295.

(c) Discuss the provisions relating to service of notice u/s. 335 of the IT Act.

(d) Differentiate between question of fact and question of law?

(e) "Taxes Appellate Tribunal is the highest fact-finding Authority" - Do you agree with this statement?

(f) What is the procedure to file application to the ADR?

(g) Time limits have been prescribed in sections 289 and 292 to dispose of appeals filed with the AJCT/CT (Appeals) and Appellate Tribunals, respectively. However, no time limit has been prescribed to dispose of reference to the High Court Division and Appeal to the Appellate Division under sections 293, 294 and 295. What could be the reason for not giving any time limits in sections 293, 294 and 295.

Chapter 30

Ethics

Introduction

Learning objectives
Examination context

Topic list

30.1 Fundamental principles
30.2 Threat and safeguards framework
30.3 Ethical conflict resolution
30.4 Disclosure of information
30.5 Conflict of interest
30.6 Basic principles of taxation work
30.7 Tax authorities' errors
30.8 Anti-money laundering
30.9 Tax evasion Vs. tax avoidance

Example

Introduction

Learning objectives

Identify the guidance given in the IFAC Code of Ethics for Professional Accountants in relation to tax practice with regard to:

- Identify ethical issues arising from tax work undertaken, explain the relevance and importance of these issues and provides guidance in given scenarios
- Differentiate between tax avoidance and tax evasion
- Judge when to refer matters for specialist help

Practical significance

Belonging to a professional body requires adherence to a code of ethics and have had claims for breaches of confidentiality. This is part of what differentiates a Chartered Accountant from unqualified accountants. Clients, members of the public, and the government recognize that we are required to adhere to exacting standards and so expect a certain standard of behavior from us.

Money laundering has been a major problem in the past and as part of new laws designed to combat this, professionals are required to participate in its prevention by reporting certain suspicions relating to the proceeds of crime.

Stop and think

Accountants have been penalized for non-compliance with the Code of Ethics. Even in the short time, that the anti-money laundering regulations have existed, accountants have been prosecuted. It is essential that professional accountants should act ethically in all of their work.

What sort of questions should you ask a potential client apart from the obvious ones? Should you always do what the client wants whether you agree or not?

Working context

Ethical considerations underpin all of your studies as well as your work experience. You will often make ethical decisions without even realizing it, but sometimes you may find yourself in a quandary and be unsure how to act. This is when the Code of Ethics will be of assistance. You need to know what to look out for and how to act. You should always take particular care in relation to client confidentiality; not always an easy task.

Syllabus links

The topics covered in this chapter are essential knowledge for the whole of your Taxation studies. They will ensure that advice and communication is appropriate and in keeping with the requirements of the ICAB.

Examination context

Exam requirements

In the examination, students may be required to:

- Apply the five fundamental principles to given scenarios
- Determine safeguards to be put in place when threats are made to the fundamental principles
- Advise on the ethical resolution of conflicts
- Give appropriate guidance relating to conflicts of interest and money laundering

Question practice

For question practice on these topics, go to the end of this workbook covering this chapter

30.1 Fundamental Principles

Section overview

- The International Federation of Accountants (IFAC) has produced a Code of Ethics for professional accountants (IFAC Code).
- ICAB has adopted and published IFAC Code of Ethics for ICAB Members.
- The IFAC Code aims to ensure high quality ethical standards for use by professional accountants around the world.
- Part A of the IFAC Codes (the Codes) establishes the fundamental principles of professional ethics for accountants.

Definition

Professional accountant: A member of the ICAB.

The Codes require a professional accountant to comply with the following five fundamental principles:

- Integrity
- Objectivity
- Professional competence and due care
- Confidentiality
- Professional behavior

The purpose of this chapter is to provide background information which will assist your understanding of the framework of the Bangladesh taxation system, why governments impose tax and the principles of taxation.

The Bangladesh taxation system has developed over centuries from the then British India in 1860 to the present condition on a piecemeal basis. Successive ruler and governments have changed the taxation system in accordance with their need.

Integrity

Definition

Integrity: Requires all professional accountants to be straightforward and honest in professional and business relationships.

A professional accountant should not be associated with any information where he believes that the information:

- Contains a materially false or misleading statement
- Contains statements or information furnished recklessly
- Omits or obscures information required to be included where such omission or obscurity would be misleading

Objectivity

Objectivity: Imposes an obligation on professional accountants not to compromise their professional or business judgment because of bias, conflict of interest or the undue influence of others.

Relationships that bias or unduly influence the professional judgment of the professional accountant should be avoided.

Professional competence and due care

Professional competence and due care: Require professional accountants to:

Maintain professional knowledge and skill at the level required to ensure that clients or employers receive competent professional service based on current developments in practice, legislation and techniques; and

Act diligently in accordance with applicable technical and professional standards when providing professional services.

Competent professional service requires competence to be achieved in two phases:

Attainment of professional competence; and Maintenance of professional competence, requiring a continuing awareness and understanding of relevant issues.

Steps should be taken to ensure that those working for the professional accountant have appropriate training and supervision.

Any limitations relating to the service being provided must be made clear to clients and other users to ensure that misinterpretation of facts or opinions does not take place.

Confidentiality

Confidentiality: Imposes an obligation on professional accountants to refrain from:

Disclosing outside the firm confidential information acquired as a result of professional and business relationships without proper and specific authority or unless there is a legal or professional right or duty to disclose; and

Using confidential information acquired as a result of professional and business relationships to their personal advantage or the advantage of third parties.

A professional accountant should maintain confidentiality even in a social environment. The professional accountant should be alert to the possibility of inadvertent disclosure, particularly in circumstances involving long association with a business associate or a close or immediate family member.

A professional accountant should also consider the need to maintain confidentiality of information within the firm. All reasonable steps should be taken to ensure that staff under the professional accountant's control and persons from whom advice and assistance is obtained respect the professional accountant's duty of confidentiality.

A professional accountant should also maintain confidentiality of information disclosed by a prospective client or employer.

The need to comply with the principle of confidentiality continues even after the end of relationships between a professional accountant and a client or employer. When a professional accountant changes employment or acquires a new client, the professional accountant is entitled to use prior experience. The professional accountant should not, however, use or disclose any confidential information either acquired or received as a result of a professional or business relationship.

Professional behavior

Professional behavior: Imposes an obligation on a professional accountant to comply with relevant laws and regulations and avoid any action that may bring discredit to the profession.

This includes actions which a reasonable and informed third party, having knowledge of all relevant information, would conclude negatively affects the good reputation of the profession.

Professional accountants should be honest and truthful and should not:

Make exaggerated claims for the services they are able to offer, the qualifications they possess, or experience they have gained

Make disparaging references or unsubstantiated comparisons to the work of others

30.2 Threats and safeguards framework

Section overview

- The circumstances in which professional accountants operate may give rise to specific threats to compliance with the five fundamental principles.
- The Codes provide a framework to help identify, evaluate and respond to these threats.
- The professional accountant is then able to apply safeguards to eliminate the threats or reduce them to an acceptable level.
- As a result, compliance with the five fundamental principles is not compromised.

Threats

The professional accountant is obliged to evaluate any threat as soon as he knows, or should be expected to know, of its existence.

Both qualitative and quantitative factors should be taken into account in considering the significance of the threat.

Most threats to compliance with the fundamental principles fall into the following categories:

- **Self-interest threats**, which may occur as a result of the financial or other interests of a professional accountant or of an immediate or close family member.
- **Self-review threats,** which may occur when a previous judgment needs to be reevaluated by the professional accountant responsible for that judgment.
- **Advocacy threats**, which may occur when a professional accountant promotes a position or opinion to the point that subsequent objectivity may be compromised.
- **Familiarity threats**, which may occur when, because of a close relationship, a professional accountant becomes too sympathetic to the interests of others.
- **Intimidation threats**, which may occur when a professional accountant may be deterred from acting objectively by threats, actual or perceived.

Safeguards

If a professional accountant cannot implement appropriate safeguards, he should decline or discontinue the specific professional service involved, or where necessary resign from the client.

Safeguards that may eliminate or reduce such threats to an acceptable level fall into two broad categories:

- Safeguards created by the profession, legislation or regulation.
- Safeguards in the work environment.

Safeguards created by the profession, legislation or regulation include, but are not restricted to:

- Educational, training and experience requirements for entry into the profession
- Continuing professional development requirements
- Corporate governance regulations
- Professional standards
- Professional or regulatory monitoring and disciplinary procedures

- External review by a legally empowered third party of the reports, returns, communications or information produced by a professional accountant

Certain safeguards may increase the likelihood of identifying or deterring unethical behavior. Such safeguards, which may be created by the accounting profession, legislation, regulation or an employing organization, include, but are not restricted to:

- Effective, well publicized complaints systems operated by the employing organization, the profession or a regulator, which enable colleagues, employers and members of the public to draw attention to unprofessional or unethical behavior
- An explicitly stated duty to report breaches of ethical requirements

The nature of the safeguards to be applied will vary depending on the circumstances. In exercising professional judgment, a professional accountant should consider what a reasonable and informed third party, having knowledge of all relevant information, including the significance of the threat and the safeguards applied, would conclude to be unacceptable.

30.3 Ethical conflict resolution

Section overview

- To ensure compliance with the fundamental principles a professional accountant may need to resolve a conflict in applying the principles.
- The conflict resolution process may be formal or informal.
- In both cases the same steps are to be followed.

Conflict resolution process

When initiating either a formal or informal conflict resolution process, a professional accountant should consider the following five factors:

- Relevant facts
- Relevant parties
- Ethical issues involved
- Fundamental principles related to the matter in question
- Established internal procedures
- Alternative courses of action

Having considered these issues, the appropriate course of action can be determined which resolves the conflict with all or some of the five fundamental principles. If the matter remains unresolved, the professional accountant should consult with other appropriate persons within the firm for help in obtaining resolution.

Where a matter involves a conflict with, or within, an organization, a professional accountant should also consider consulting with those charged with governance of the organization.

It is advisable for the professional accountant to document the issue and details of any discussions held or decisions taken, concerning that issue.

If a significant conflict cannot be resolved, a professional accountant may wish to obtain professional advice from the relevant professional body or legal advisors, and thereby obtain guidance on ethical and legal issues without breaching confidentiality.

If, after exhausting all relevant possibilities, the ethical conflict remains unresolved, a professional accountant should, where possible, refuse to remain associated with the matter creating the conflict.

The professional accountant may determine that, in the circumstances, it is appropriate to withdraw from the engagement team or specific assignment, or to resign altogether from the engagement or the firm.

Interactive question 1: Ethical conflict resolution [Difficulty level: Exam standard]

Mr. X, a member of the ICAB, is the reporting accountant of a pension company. Over the years he has developed a close working relationship with the finance director Mr. Y.

Recently he has become concerned about the financial controls within the company being overridden by Mr. Y, with the possibility of substantial funds being withdrawn from the company bank account. Mr. X discussed this at a formal end of audit meeting with Mr. Y, who assured him that the issue would be rectified immediately but that she felt there was no real issue and the controls were overridden for good reasons.

Mr. X is not satisfied with the explanations given and wishes to take further steps to resolve the ethical conflict.

Requirement: Outline the options open to Mr. X

Answer

Mr. X may first approach the other directors of the company in order to resolve the ethical conflict with Mr. Y. If this course of action does not give Mr. X sufficient comfort that the conflict is resolved he will have to consider going outside the company.

Mr. X may obtain professional advice from the ICAB or the legal advisors, and thereby obtain guidance on ethical issues without breaching confidentiality. Mr. X should consider obtaining legal advice to determine whether there is a requirement to report.

If the ethical conflict remains unresolved, Mr. X should refuse to remain associated with the matter creating the conflict. He may determine that, in the circumstances, it is appropriate to resign altogether from the engagement.

30.4 Disclosure of information

Section overview

- Part A of the Codes contains a section relating to confidentiality.
- The confidentiality section explains when a professional accountant may disclose information to third parties without threatening the fundamental principle of confidentiality.

When to disclose

A professional accountant may disclose confidential information if:

- Disclosure is permitted by law and is authorized by the client or the employer Disclosure is required by law, for example:
- Production of documents or other provision of evidence in the course of legal proceedings, or
- Disclosure to the appropriate public authorities of infringements of the law, e.g. under antimony laundering legislation
- There is a professional duty or right to disclose, when not prohibited by law:
- To comply with the quality review of a member body or professional body

- To respond to an inquiry or investigation by a member body or regulatory body
- To protect the professional interests of a professional accountant in legal proceedings
- To comply with technical standards and ethics requirements

Factors to consider regarding disclosure

In deciding whether to disclose confidential information, professional accountants should consider the following:

- Whether the interests of all parties, including third parties whose interests may be affected, could be harmed if the client or employer consents to the disclosure of information by the professional accountant
- Whether all the relevant information is known and substantiated, to the extent it is practicable to do so. When the situation involves unsubstantiated facts, incomplete information or unsubstantiated conclusions, professional judgment should be used in determining the type of disclosure to be made, if any
- The type of communication that is expected and to whom it is addressed; in particular, professional accountants should be satisfied that the parties to whom the communication is addressed are appropriate recipients

Worked example: Disclosure of information:

You have just obtained Mr. Jamal as a client. He has a source of income which may or may not be taxable depending on his personal circumstances which are uncertain.

Requirement: Discuss the ethical considerations you must bear in mind when deciding whether to disclose the income on his tax returns.

Solution

There is a possible legal obligation to disclose the source to Tax Authorities, but the situation is unclear.

You must use your professional judgment, based on all facts. If disclosure is not to be made the exact reasons for non-disclosure should be recorded and Mr. Jamal advised of the reason for nondisclosure.

If you decide that disclosure is required, the client should be notified. If he does not accept the advice, you should decide whether you can continue to act for Mr. Jamal

Interactive question 2:

You are a Chartered Accountant and working in Y Ltd. ("Company") as a tax manager. The Company is engaged in the business of export of the goods manufactured by it. The bank, through which export proceeds of Y Ltd. is received, deducts tax at the specified rate from the total export proceeds in accordance with the provisions of section 123 of the Income Tax Act, 2023. Export income of Y Ltd. falls under the scope of section 163 of the ITA, 2023. Generally, the Company does not have additional income from export as referred to in section 163 of the ITA, 2023.

In the income year 2025-26, a warehouse owned by the company was leased out to another company for a term of 3 years. Y Ltd. received rent on the warehouse for the income year 2025-26 but no tax was deducted at source from the rent paid by the lessee. The management of Y Ltd. is thinking of assessment of income of the company for the income year 2025-26 under section163 of the ITA, 2023, upon considering the tax collected at source by the bank from the export proceeds as minimum tax. In a meeting with the management team of Y Ltd.

on tax issues, you have been asked to consider whether it is possible to ignore income from house property so that no demand for additional income tax arises. To discuss the issue further, a meeting would be held next week.

Requirements

(a) Prepare a briefing note as regards tax evasion, tax avoidance and professional ethics to be followed by a Chartered Accountant rendering taxation services.

(b) Enumerate the steps should be taken to deal with unethical request from the management, if any.

Solution

(a) Briefing Note for the Management Team

Subject: Tax Evasion, Tax Avoidance and Professional Ethics to be followed by a Chartered Accountant rendering Taxation Services.

Tax Evasion:

Tax evasion is unlawful dodging in tax payments by tax payers. It is a process whereby a person illegitimately pays less tax than the law mandates. Tax evasion often entails taxpayers deliberately misrepresenting the true state of their affairs to the tax authorities to reduce their tax liability and includes dishonest tax reporting, such as declaring less income, profits or gains than the amounts actually earned, overstating deductions or suppressing turnover.

Tax Avoidance:

On the other hand, tax avoidance is the process whereby a person plans his or her finances so as to apply all exemptions and deductions provided by tax laws to reduce taxable income. Through tax avoidance, a person takes advantage of all legal opportunities to minimize his or her tax. Tax avoidance must be distinguished from Tax Evasion, which is the employment of unlawful methods to circumvent the payment of taxes. Tax evasion is a crime; tax avoidance is the legal way to reduce tax burden.

Professional Ethics to be followed by a Chartered Accountant rendering Taxation Service:

A professional accountant rendering taxation service is entitled to put forward the best position in favor of his employer provided the service is rendered with professional competence, does not in any way impair integrity and objectivity, and is in the opinion of the professional accountant consistent with the law. Doubt may be resolved in favor of the employer if there is reasonable support for the position. A professional accountant should not hold out to an employer the assurance that the tax return prepared and the tax advice offered are beyond challenge. Instead, the professional accountant should ensure that the employers are aware of the limitations attaching to tax advice and services so that they do not misinterpret an expression of opinion as an assertion of fact. A professional accountant should not be associated with any return or communication in which there is reason to believe that it:

(i) Contains a false or misleading statement;

(ii) Contains statements or information furnished recklessly or without any real knowledge of whether they are true or false; or

(iii) Omits or obscures information required to be submitted and such omission or obscurity would mislead the revenue authorities.

(b) In light of the aforementioned academic discussion, I will take following steps if there is any unethical request from my employer:

(i) I will put my tax advice on record, either in the form of a letter or in a memorandum, while providing the requested opinions on ignoring/concealing income from house property.

(ii) I will let my employer know the consequences of error/omission/concealment of income as provided in the income tax laws for the time being in force and will recommend that appropriate disclosure be made to the revenue authorities.

(iii) If my employer does not accept my suggestion, I will inform them that it is not possible to act for them in connection with the evasion of tax or pertinent return of income.

(iv) I will follow the established policies of Y Ltd. to seek a resolution of such conflict.

(v) If those policies do not resolve the ethical conflict, I will bring the problem to the notice of the next higher reviewing level such as the Executive Committee, Board of Directors or Shareholders. I will also seek counseling and advice on a confidential basis with an independent advisor to obtain an understanding of possible courses of action.

(vi) If the ethical conflict still exists, I will consider whether continued association with Y Ltd. in any capacity is consistent with professional responsibilities and as a last resort I may have no other recourse on the tax evasion issue than to resign and to submit an information memorandum to an appropriate representative of Y Ltd.

30.5 Conflicts of interest

Section overview

- Part B of both the IFAC Code and the ICAEW Code illustrate how the fundamental principles are applied in certain situations for professional accountants in public practice.
- One of the illustrations given in Part B contains details relating to conflicts of interest.

The threat of a conflict of interest

A professional accountant should take reasonable steps to identify circumstances that could pose a conflict of interest. These may give rise to threats to compliance with the fundamental principles.

A conflict may arise between the firm and the client or between two conflicting clients being managed by the same firm. For example, where a firm acts for:

- A Client which has specific interests which conflict with those of the firm;
- Financial involvements between the client and the firm e.g., where a loan is made by or to a client;
- Both a husband and wife in a divorce settlement;
- A company and for its directors in their personal capacity; or
- Two competing business

Evaluation of threats includes consideration as to whether the professional accountant has any business interests or relationships with the client or a third party that could give rise to threats. If there are other than clearly insignificant, safeguards should be considered and applied as necessary.

Safeguards

Depending upon the circumstances giving rise to the conflict, safeguards should ordinarily include the professional accountant in public practice:

- Notifying the client of the firm's business interest or activities that may represent a conflict of interest
- Notifying all known relevant parties that the professional accountant is acting for two or more parties in respect of a matter where their respective interests are in conflict
- Notifying the client that the professional accountant does not act exclusively for any one client in the provision of proposed services (for example, in a particular market sector or with respect to a specific service)

In each case the professional accountant should obtain the consent of the relevant parties to act.

Where a professional accountant has requested consent from a client to act for another party (which may or may not be an existing client) and that consent has been refused, then he must not continue to act for one of the parties in the matter giving rise to the conflict of interest.

The following additional safeguards should also be considered:

- The use of separate engagement teams
- Procedures to prevent access to information (e.g. strict physical separation of such teams, confidential and secure data filing)
- Clear guidelines for members of the engagement team on issues of security and confidentiality
- The use of confidentiality agreements signed by employees and partners of the firm
- Regular review of the application of safeguards by a senior individual not involved with relevant client engagements

Where a conflict of interest poses a threat to one or more of the fundamental principles that cannot be eliminated or reduced to an acceptable level through the application of safeguards, the professional accountant should conclude that it is not appropriate to accept a specific engagement or that resignation from one or more conflicting engagements is required.

Interactive question 3: Conflict of interest (Difficulty level: Exam standard)

A professional Accountant in Public Practice has had two partners, Mr. S and Mr. R as clients for many years. Mr. S is intending to sell his share of the partnership to Mr. R so that can continue as a sole trader. Both have asked if you will be their advisor.

Requirements

Outline the accountants' position with regard to the potential conflict of interest.

Answer

The firm should not usually act for both parties in a transaction. However, this can cause particular problems where both have previously been clients.

The firm has three options,

- To act for both
- To act for one
- To act for neither

In a situation where there is an element of doubt, the latter is probably the preferred course of action.

30.6 Basic principles of taxation work

Section overview

- One of the topics included in the statement is an explanation as to the accountant's relationship with the client.

Agent or principal

It is very important that it is understood when an accountant is acting as an agent on behalf of a client and when he is acting as the principal. The two different capacities carry different degrees of risk and potential liability.

An explanation as to when an accountant is acting in each capacity should be given in a client engagement letter. The letter should also explain the scope of the client's and the accountant's responsibilities in each case.

Agent

An accountant acts as agent when he merely prepares documents on behalf of a client. The client retains responsibility for the accuracy of the document itself. The accountant is thus an agent when performing tax compliance work such as preparing and submitting a tax return on behalf of a client. The client would be required to sign the return prior to its submission.
The accountant takes no responsibility for any information which he passes on to the tax authorities when acting as an agent. The accountant is not normally liable if any of the information proves to be incorrect.

Acting as an agent is therefore considered to be a low risk activity.

Principal

An accountant acts as principal when he provides advice to the client as to the taxation consequences of different courses of action. The accountant takes full responsibility for the advice given and may be liable to the taxpayer in the event the advice turns out to be incorrect or inappropriate.

Where an accountant does not have the professional skill required to act as a principal in a particular case, he may still accept the engagement. However, he must ensure that the opinion of a suitably qualified accountant is sought.

Acting as a principal is therefore considered to be a high-risk activity.

30.7 Tax authority's errors

Section overview

One of the topics included in the statement is Tax Authority's errors.

Tax authority's errors

It may be apparent to the professional accountant that a mistake has been made by Tax Authorities, such as:

- The raising of an inadequate assessment
- An under collection of tax or interest
- An over repayment of tax or interest

The mistake may be:

- Misinterpretation of law

- A calculation or clerical error
- A misunderstanding on the part of tax Authorities of the facts as presented

Professional accountants are advised to include in their letters of engagement authority to advise Tax Authorities of errors, so that consent from the client is not needed. Where no such authority has been obtained, the procedure set out below must be followed.

Where the accountant becomes aware that Tax Authorities, in full possession of the facts, has made a material error in dealing with the affairs of a client, the professional accountant should seek the client's authority to write to Tax Authorities for correction of error.

In cases of a Tax Authorities error, the professional accountant should refer the matter to the client. The client should be:

- Asked to authorize the professional accountant to advise Tax Authorities of the error; and
- Warned of the possible legal consequences if he is reluctant to give the authority sought, including interest and penalties and possible criminal prosecution; and

Advised that if consent is not given, the accountant will consider taking independent legal advice with a view to:

- Notifying Tax Authorities in any event, and notifying the client of his action; and
- Ceasing to act for the client.

The professional accountant should ensure that a written record is kept of all advice given to clients in connection with Tax Authorities errors.

If a professional accountant is specifically asked by Tax Authorities to agree a figure, he must agree what he believes to be the correct figure; this may be a figure negotiated in the course of discussions following full disclosure of the facts and circumstances. He may not accept a figure he knows to be incorrect, and he does not need to seek his client's authority to disclose to Tax Authorities its errors in this case.

30.8 Anti-money laundering

Section overview

- Money Laundering Prevention Act, 2002 has been published with the purpose of combating money laundering
- Accountants should comply the requirement relating to money-laundering

Money laundering

Definition

Money laundering is the process of changing large amounts of money obtained from crimes, such as drug trafficking into origination from a legitimate source.

Money Laundering is the process by which criminals attempt to conceal the true origin and ownership of the proceeds of criminal activities. If successful, the money can lose its criminal identity and appear legitimate.

In terms of section 2 (tha) of Money Laundering Prevention Act, 2002, "Money Laundering" means:

(a) Properties acquired or earned directly or indirectly through illegal means;

(b) Illegal transfer, conversion, concealment of location or assistance in the above act of the properties acquired or earned directly or indirectly through legal or illegal means."

In this Act, "Properties means movable or immovable properties of any nature and description".

The term Money Laundering is used for a number of offences involving the proceeds of crime or terrorist funds. It now includes possessing, or in any way dealing with, or concealing, the proceeds of any crime.

Someone is engaged in money laundering under where they:

- Acquire or earn properties directly or indirectly through illegal means
- Transfer, convert, conceal location or assist in the above act of the properties acquired or earned directly or indirectly through legal or illegal means

Where a professional accountant suspects that a client is involved in money laundering, he should report this to the authorities.

Tax related offences

Tax related offences are not in a special category. The proceeds or monetary advantage arising from tax offences are treated no differently from the proceeds of theft, drug trafficking or other criminal conduct.

Anti-money laundering procedures

Business needs to maintain some procedures:

Appoint a Money Laundering Reporting Officer (MLRO) and implement internal reporting procedures

- Train staff to ensure that they are aware of the relevant legislation, know how to recognize and deal with potential money laundering, how to report suspicions to the MLRO, and how to identify clients
- Establish internal procedures appropriate to deter and prevent money laundering, and make relevant individuals aware of the procedures
- Verify the identity of new clients and maintain evidence of identification
- Maintain records of client identification, and any transactions undertaken for or with the client
- Report suspicions of money laundering

Records of client identification and transactions also need to be maintained for few years.

Client confidentiality in relation to money laundering

An accountant should disclose confidential information without client consent in certain circumstances. In order to disclose confidential information, the accountant must have knowledge or suspicion, or reasonable grounds for knowledge or suspicion, that a person has committed a money laundering offence.

Disclosure without reasonable grounds for knowledge or suspicion will increase the risk of a business or an individual being open to an action for breach of confidentiality. **Punishment for money laundering**

If any person is engaged in Money Laundering in any way he will be regarded as a person who has committed a crime and the concerned accused for that crime will be sentenced to

imprisonment for at least a period of six months and a maximum of seven years and will be fined for an amount not exceeding double the amount involved in the crime.

30.9 Tax evasion vs. tax avoidance

Section overview

- Tax evasion is illegal and tax avoidance is legal.
- Tax evasion could lead to prosecution for both the client and his accountant
- Tax avoidance through legal procedure

Tax evasion

Tax evasion consists of seeking to mislead tax authorities by either:

- Suppressing information to which tax authorities is entitled, for example by:
- Failing to notify tax authorities of a liability to tax
- Understating income or gains
- Omitting to disclose a relevant fact Or

Providing tax authorities with deliberately false information, for example by:

- Deducting expenses that have not been incurred
- Claiming capital allowances on plant that has not been purchased

Minor cases of tax evasion are generally settled out of court via the payment of penalties. However, there is a statutory offence of evading income tax that can be dealt with in a magistrate's court.

Serious cases of tax evasion, particularly those involving fraud, continue to be the subject of criminal prosecutions which may lead to fines and/or imprisonment on conviction.

Furthermore, tax evasion offences will fall within the definition of money laundering and in certain cases individuals may be prosecuted under one of the money laundering offences. This includes both the under declaring of income and the over claiming of expenses.

If the assets of any clients were derived from illegal activities or if the client has committed tax evasion that considered under money laundering, a threat to compliance with the fundamental principles would be created. In such situations, the professional accountant may consider seeking legal advice and he should report this to the authorities.

Tax avoidance

Tax avoidance is not defined, but is broadly any legal method of reducing the tax burden.
The distinction between tax evasion and tax avoidance is usually obvious as avoidance has no intention of misleading tax authorities.

The accountant should take care in situations, for example, where a client believes that his tax avoidance has been successful and so does not submit a tax return.

Example-1

(a) You have been invited by the organizers of a seminar to deliver lecture on the responsibilities of a Chartered Accountant rendering professional tax services. The organizers of the seminar informed you about the average understanding level of the participants. According to the organizers, the participants might have perception that a Chartered Accountant rendering professional tax services is obliged to act absolutely in the interest of his/her client/employer.

Requirements:

Prepare handouts addressing the following issues for distribution at the seminar to be held next month:

i) Responsibilities of a practicing Chartered Accountant to the public while rendering tax advisory services.

ii) Guidance for a Chartered Accountant, working in the tax department of a company, on conflict of loyalties.

Answer-1 (a):

(a) Responsibilities of a practicing Chartered Accountant to the public while rendering tax advisory services

A distinguishing mark of a profession is acceptance of its responsibility to the public. The accountancy profession's public consists of clients, credit grantors, governments, employers, employees, investors, the business and financial community, and others who rely on the objectivity and integrity of professional accountants to maintain the orderly functioning of commerce.

This reliance imposes a public interest responsibility on the accountancy profession. The public interest is defined as the collective well-being of the community of people and institutions the professional accountant serves.

Professional accountants have an important role in society. Investors, creditors, employers and other sectors of the business community, as well as the government and the public at large rely on professional accountants for sound financial accounting and reporting, effective financial management and competent advice on a variety of business and taxation matters. The attitude and behavior of professional accountants in providing such services have an impact on the economic well-being of their community and country.

It is in the best interest of the worldwide accountancy profession to make known to users of the services provided by professional accountants that they are executed at the highest level of performance and in accordance with ethical requirements that strive to ensure such performance. Tax experts help to establish confidence and efficiency in, and the fair application of, the tax system. A professional accountant's responsibility is not exclusively to satisfy the needs of an individual client or employer. The standards of the accountancy profession are heavily determined by the public interest. As such, a Chartered Accountant in practice, who advises on tax matters, also bears significant responsibilities to the public.

(b) Guidance for a Chartered Accountant, working in the tax department of a company, on conflict of loyalties

Employed professional accountants owe a duty of loyalty to their employer as well as to their profession and there may be times when the two are in conflict. An employee's normal priority should be to support his or her organization's legitimate and ethical objectives and the rules and procedures drawn up in support of them. However, an employee cannot legitimately be required to:

(a) Break the law;

(b) Breach the rules and standards of their profession;

(c) Lie to or mislead (including misleading by keeping silent) those acting as auditors to the employer; or

(d) Put their name to or otherwise be associated with a statement which materially misrepresents the facts.

Differences in view about the correct judgment on accounting or ethical matters should normally be raised and resolved within the employee's organization, initially with the employee's immediate superior and possibly thereafter, where disagreement about a significant ethical issue remains, with higher levels of management or non-executive directors.

If employed accountants cannot resolve any material issue involving a conflict between their employers and their professional requirements they may, after exhausting all other relevant possibilities, have no other recourse but to consider resignation. Employees should state their reasons for doing so to the employer but their duty of confidentiality normally precludes them from communicating the issue to others (unless legally or professionally required to do so).

Chapter 31

Tax Planning

Topic List

31.0 What does tax planning really mean?

31.1 How tax planning and financial planning are connected?

31.0 What does tax planning really mean?

Tax planning is the art of arranging affairs in ways that postpone or avoid taxes. By employing effective tax planning strategies, anyone can have more money to save and invest or more money to spend or both. It's choice.

Put another way, tax planning means deferring and flat-out avoiding taxes by taking advantage of beneficial tax-law provisions, increasing and accelerating tax deductions and investment tax rebates, and generally making maximum use of all applicable area under our beloved IT Act, 2023.

Of course, we should not change your financial behavior solely to avoid taxes. Truly effective tax planning strategies are those that permit us to do what we want while reducing tax burden along the way.

Thus, 'tax planning' means dealing with the tax matters of a taxpayer with a view to maximizing the after-tax rate of return on investments after ensuring voluntary tax compliance. For this purpose, each taxpayer has to

1. Ensure that proper records are kept;
2. Deduct tax at source where it is necessary;
3. Pay advance tax in time, if applicable;
4. File returns in time;
5. Comply with notices received from the tax authorities; and
6. Be aware of legal remedies where it does not have its rights under the law recognized.

Tax planning takes maximum advantage of the exemptions, deductions, rebates, reliefs and other tax concessions allowed by taxation statutes, leading to the reduction of the tax liability of the tax payer.

31.1 How tax planning and financial planning are connected?

Financial planning is the art of implementing strategies that help us to reach our financial goals, be they short-term or long-term. That sounds pretty simple. However, if the actual execution was simple, there would be a lot richer folks.

Tax planning and financial planning are closely linked, because taxes are such a large expense item as we go through life. If we become really successful, taxes will probably be our single biggest expense over the long haul. So, planning to reduce taxes is a critically important piece of the overall financial planning process.

Example 1

Mr. Shin, Chief Financial Officer (CFO) of Techno world Inc., a Singapore based IT company has appointed you as tax consultant and sought your opinion on the areas of tax planning so as to prepare an effective business plan.

Techno world wants to expand its business in Bangladesh by providing IT based solutions in many industries along with BPO services. It wants to set up a liaison office. But it has been advised by BIDA to incorporate a company in Bangladesh with 100% equity ownership to run the business.

In the first year it has a plan of selling Tk. 1Bn of IT and Tk. 500 Mn of BPO services with 10% increment in each of the following two years. If the service charges are remitted from Bangladesh, the purchaser will deduct 20% of withholding tax of it and 15% VAT will be borne by the service recipient. Techno world achieves 20% income before tax on net proceeds and has 25% corporate tax rate in Singapore. If it incorporates a company in Bangladesh, the

services it will deliver will fall under ITES (information technology enable services) and in accordance of business plan it will achieve 30% Income before tax. Under double taxation avoidance agreement, Dividend from Bangladesh to Singapore is subject to maximum 15% tax withholding.

Requirement:

Give your opinion to Techno world elaborating the aspects of the above-mentioned options with demonstrating financial impact.

Solution

Mr. Shin,
Chief Financial Officer (CFO) Techno world Inc.

Subject: Opinion regarding tax planning and techniques

Dear Sir,

We refer your letter dated 01 April 2026 where you have narrated a plan of business with Bangladesh and requested us to provide our opinion on the areas of tax planning which will enable you to prepare an effective business plan. We are submitting the following analysis and suggestions which will curtail the tax burden for your prospective business complying the tax legislations presently enforced in Bangladesh.

Techno world wants to expand its business in Bangladesh by providing IT based solutions in many industries along with BPO services. Initially it wants to set up a liaison office. It has been advised by BIDA to incorporate a company in Bangladesh with 100% equity ownership to run the business. Hence, there are two options in hands, namely, selling services from abroad where liaison office will play a coordination role and setting a local fully owned subsidiary of Techno world to deliver the services to Bangladeshi customers locally.

Relevant tax regulations in Bangladesh:

(a) As per para (21) of 6th Schedule, Part I of ITA, 2023, income derived from some business of a person being resident or non-resident Bangladeshi between July 2024 to June 2027 shall be exempted income, subject to services includes--Software development; Software or application customization, Nationwide Telecommunication Transmission Network (NTTN), Digital content development and management, Digital animation development, Website development, Website services, Web listing, IT process outsourcing, Website hosting, Digital graphic design, Digital data entry and processing, Digital data analytics, Geographic information service (GIS), IT support and software maintenance service, Software test lab service, Call Centre service, Overseas medical transcriptions, Search Engine Optimization service, Document conversion, imaging and digital archiving, Robotic process outsourcing, Cyber security services, Cloud service, System Integration, E-learning platform, E-book publications, Mobile application, development service; freelancing and content creation.

(b) Under Finance Act 2026, the corporate tax rate of a non-listed company is 27.5%.

(c) Under section 117 of ITA, 2023, the tax deduction rate on payment of dividend is 20%.

(d) Based on article 24 of Double Taxation Avoidance Treaty between Singapore and Bangladesh, Tax deducted at source in Bangladesh will be eligible to take credit in Singapore to the extent of tax computed on the same income.

(e) As per sec 119 of ITA, 2023, foreign remittance on account of IT solutions and BPO related services to a non-resident Bangladeshi is subject to deduction of tax at source @ 20% under the category of Technical service fees or Technical knowhow fees.

(f) As per VAT law, for the import of services, service recipient will be responsible to pay VAT and will be eligible for input VAT credit against the treasury challan of the deposit of VAT.

Analysis of tax legislations applicable for Techno world:

Techno world has two alternatives for doing business here in Bangladesh. It can sell services from abroad where liaison office will play a coordination role or set a local fully owned subsidiary of Techno world Singapore to deliver the services to Bangladeshi customers locally.

From the perspective of tax laws, if it sells services to Bangladesh from Singapore, it will receive the proceeds in Singapore, which will be remitted by the service recipients in Bangladesh. This remittance will be subject to withholding tax @ 20% as per ITA, 2023 after which the net proceeds will be remitted to Techno world from Bangladesh. In Singapore, Techno world will be eligible to take the credit of tax deducted at source in Bangladesh. VAT will be borne by the service recipient and will be eligible for input VAT credit. It will incur cost neither to Techno world nor to the service recipients in Bangladesh.

If Techno world Singapore sets a local fully owned subsidiary in Bangladesh, it will be subject to 27.5% corporate tax rate. Moreover, in accordance with double taxation avoidance treaty between Singapore and Bangladesh, the payment of dividend from Bangladesh is subject to 15% tax withholding in Bangladesh which we can assume will be available for full foreign tax credit by Techno world in Singapore.

Outcome in Business plan after tax impacts:

Techno world sells services to Bangladesh from Singapore				
Particulars	**Equation**	**Year 1**	**Year 2**	**Year 3**
Gross proceeds	A	1,500,000,000	1,650,000,000	1,815,000,000
Tax deduction at source in BD @ 20%	B	300,000,000	330,000,000	363,000,000
Remittance i.e.Net proceeds	C=A-B	1,200,000,000	1,320,000,000	1,452,000,000
Income before tax (20% on net proceeds)	D	240,000,000	264,000,000	290,000,000
Corporate tax (25%)	E	60,000,000	66,000,000	72,500,000
Credit on corporate tax on business from BD under DTAA	F	60,000,000	66,000,000	72,500,000
Net profit after tax for Techno world	D-E+F	240,000,000	264,000,000	290,000,000

Techno world sets a fully owned subsidiary in Bangladesh				
Particulars	**Equation**	**Year 1**	**Year 2**	**Year 3**
Gross proceeds	A	1,500,000,000	1,650,000,000	1,815,000,000
Income before tax (30% on Gross proceeds)	B	450,000,000	495,000,000	544,500,000
Corporate tax rate in BD (27.5%)	C	123,750,000	136,125,000	149,737,500

Income after tax / Gross dividend income of Techno world	D=B-C	326,250,000	358,875,000	394,762,500
Withholding tax on dividend (15%)	E	43,875,000	48,262,500	53,088,750

Corporate tax of Techno world (25%) on dividend	G= 25% of D	81,562,500	89,718,750	98,690,625
Withholding tax credit on dividend taken by Techno world under DTAA	H=E	43,875,000	48,262,500	53,088,750
Additional tax in Singapore	I=G-H	37,687,500	41,456,250	45,601,875
Net profit after tax for Techno world	J=F-I	244,687,500	269,156,250	296,071,875

Suggestions:

From the above table of business plan analysis, it is found that, for the first three years in Singapore Techno world will earn Tk. 794,000,000 if it sells services from Singapore to Bangladesh and Tk. 809,915,625 if it sets a fully owned subsidiary in Bangladesh.

Hence, after putting the taxation impacts, considering the change in financial of Techno world, Singapore, you should opt to set a local fully owned subsidiary of Techno world Singapore to deliver the services to Bangladeshi customers locally.

Thank you very much for taking us to your confidence. Should you require any clarification, please do not hesitate to contact us.

Thanking you,

Chapter 32

Gift Tax

Introduction

Gift Tax
Examination context

Topic List

32.1 Meaning of gift
32.2 Valuation of gift
32.3 Gift Tax Authorities
32.4 Submission of Gift Tax Return
32.5 Rate of Gift Tax
32.6 Exemption from gift tax
32.7 Limitation of implementing gift tax law

Introduction

The Gift Tax Act, 1963, which was repealed in 1985 has been re-introduced under the name **"The Gift Tax Act, 1990"** with the provisions almost similar to those in the act of 1963 but with more liberal exemptions. The gift tax is chargeable on gifts executed by any person in a financial year with effect from the 1st day of July. 1990 at the rates prescribed in the Schedule.

Examination context

Exam requirements

In the examination, candidates may be required to:

- Identify the nature of gift
- When gift is taxable
- Who will bear gift tax- donor or receiver
- When gift tax is payable

32.1 Meaning of Gift

"Gift" means the transfer of any immovable or movable property by one person to another voluntarily and without any consideration of money or money's worth.

32.2 Valuation of Gift:

The value of the property transferred as gift, other than cash, shall be determined in terms of its value to be obtained had the property been sold in the open market on the date of gift. Where the value of the property is not determinable at this process, its value shall be determined as per rules.

32.3 Gift Tax Authorities

The following income tax authorities are also the gift tax authorities: -

(1) Commissioner of Taxes,

(2) Appellate Additional/Joint Commissioner of Taxes,

(3) Inspecting Additional/Joint Commissioner of Taxes,

(4) Deputy Commissioner of Taxes and

(5) Tax Recovery Officer

32.4 Submission of gift tax return

Any person making a taxable gift during any financial year requires to submit gift tax return to the Deputy Commissioner of Taxes (DCT) before the fifteenth day of September of the corresponding assessment year. Tax based on Gift tax return is to be paid on or before submission of return.

32.5 Rate of Gift Tax

On the first Tk. 500,000 of taxable gift	----	5%
On the next Tk. 1,000,000 of taxable gift	----	10%
On the next Tk. 2,000,000 of taxable gift	----	15%
On the balance of taxable gift	----	20%

32.6 Exemption from Gift Tax:

Gift tax shall not be applicable under Gift Tax Act for gifts made by any person in respect of the following:

(1) Where the gifted property is situated outside Bangladesh.

(2) Where the gift is made to the Government or any local authority.

(3) Where the gift is made to the following funds or institutions for charitable purposes:

I. Any educational institution (including polytechnic institute) either run by the Government or recognized by any Education Board or any university established under the law in force in Bangladesh.

II. Any hospital recognized or run by the Government or any local Authority or any hospital that receives charity from the Government.

III. Any flood or disaster management fund either established or approved by the Government.

IV. Any Government approved religious or charitable institution (other than private religious institution or fund which does not ensure the benefit of the public as a whole) up to 20% of total income or Tk. 100,000 whichever is lower.

(4) Where the gift is made to any dependent relative up to Tk. 20,000 on the occasion of his/her marriage.

(5) Where the gift is made to any dependent (other than wife) by way of insurance premium up to Tk. 20,000

(6) Gift made under a will.

(7) Gift in contemplation of death.

(8) Gift made to son, daughter, father, mother, spouse, own brother and sister.

In addition to the above exemptions, no gift tax shall be applicable for any gift made by any person in a financial year not exceeding Tk. 20,000. The Government may by notification in the official gazette exempt any class of gift or any class of person from gift tax.

32.7 Limitation of implementing gift tax law:

Gift tax law will, however, not apply in case of gifts made by:

(1) A body corporate established or constituted by or under any law.

(2) Any institution or fund, income of which is exempt from payment of income tax as per provision of Paragraph 11 and 12 of Part I of the Sixth Schedule of the Income Tax Act, 2023.

(3) As per provision of Paragraph 35 of Part I of the Sixth Schedule of the Income Tax Act, 2023 income is exempt from tax when a capital asset is received as a gift from a spouse, parent, or child, provided that both the donor and the recipient report it in their tax returns. However, if the gift is transferred from abroad through banking channels, the donor does not need to show it in their tax return.

Example

Gifts within Bangladesh, Mr. Harun made several gifts: he gifted a piece of land valued at Tk. 800,000 to his dependent sister, and a share of a firm valued at Tk. 1,000,000 to his brother in contemplation of death. He also provided Tk. 800,000 in cash to his youngest daughter to start a business. Additionally, he made donations totaling Tk. 510,000 to various organizations, including the Prime Minister's Relief Fund, Khulna University, Dhaka Ahsania Mission, and Aga Khan Development Network. Mr. Harun gifted a house in Khulna valued at Tk. 2,500,000 to his wife and a motor car costing Tk. 800,000 to his younger brother on the occasion of his marriage. Furthermore, he gave a house in Khulna to a friend, valued at Tk. 1,000,000, but received Tk. 200,000 in consideration for it.

Gift outside Bangladesh, Mr. Harun donated a furnished flat in India worth Tk. 500,000 to his wife and also gave office furniture from his Dubai business office, valued at Tk. 460,000, to his son-in-law upon withdrawal of his investment from the Dubai.

Calculate Mr. Harun's taxable gift and the corresponding gift tax for the income year 2024-2025.

Solution:

Mr. Harun
Computation of Taxable Gift
Assessment Year: 2026 – 2027

Particulates	Amount	Amount
Gift to dependent sister a piece of land	800,000	
Less: Fully Exempted [U/s 4(1)(h)]	800,000	-
Gift to brother the share of firm in contemplation of death	1,000,000	
Less: Fully exempted [U/s 4(1)(g) or (h)]	1,000,000	-
Cash donation to daughter for starting business	800,000	
Less: Fully Exempted [U/s 4(1)(h)]	800,000	-
Donation to approved sectors	330,000	
Less: Fully Exempted [U/s 4(1)(c)]	330,000	
Donated a house at Khulna to his wife	2,500,000	
Less: Fully Exempted [U/s 4(1)(h)]	2,500,000	
Gift to the brother in the event of marriage	800,000	
Less: Fully Exempted [U/s 4(1)(h)]	800,000	-
Gift to a friend with inadequate consideration:		
Value of the property	1,000,000	
Consideration received	200,000	800,000

Gift outside Bangladesh:			
Donation of a flat to wife in India		500,000	
Donation of furniture to son-in-law in Dubai		460,000	
Total value of gift outside Bangladesh		960,000	
Less: Fully Exempted [u/s 4(1)(a)]		960,000	-
Total			**800,000**
Less: General Exemption [u/s 4(2)]			20,000
Taxable Gift			**780,000**
Computation of Gift tax:			
on first Tk. 500,000 @5%	500,000	5%	25,000
on balance @ 10%	280,000	10%	28,000

Total Gift Tax Tk. 53,000

Chapter 33

Value Added Tax

Introduction

Learning objectives

Examination context

Topic List

33.1	Introduction
33.2	Statutory definitions
33.3	VAT Registration & Turnover Tax Enlistment
33.4	Imposition of VAT
33.5	Manner of VAT Collection
33.6	Assessment of Net Payable Tax by the Taxpayer & Payment Thereof
33.7	Input Tax Credit
33.8	Withholding VAT
33.9	Carryforward of Negative Net Amount & Refunds
33.10	Supplementary Duty (SD)
33.11	Books & Documents to be maintained for VAT purposes
33.12	Submission of VAT Return
33.13	VAT Authorities & Officers
33.14	Consequence of Non-compliance
33.15	Recovery of Arrear Tax
33.16	Audit and Investigation
33.17	Offence, Trial & punishment
33.18	Appeals, Revisions & Miscellaneous
33.19	Surcharge
33.20	Excise duty
Annexure A	Summary of important Mushak Forms
Annexure B	Table showing list of VAT Rates
Annexure C	Comparison between VAT & Turnover Tax
Annexure D	Sample questions and answars

Introduction

Learning objectives

- Understanding the concept of VAT, Turnover Tax and Supplementary Duty
- Getting familiar with the relevant rules and procedures of VAT, Turnover Tax and Supplementary Duty
- Computation of cost for calculating VAT and computing VAT payable
- Understanding VAT rates (including reduced tax rate and specific tax amount) and base value
- Documentation under VAT system
- Knowing the consequences of non-compliance of VAT rules and regulations

Practical significance

Value Added Tax (VAT) (including Supplementary Duty) is an important source of revenue financing to the Government of Bangladesh. In financial year 2026-2027, it comprises more than 52% of NBR tax revenue and thus the Government heavily relies on VAT for raising fund for running a big administration. VAT is the tax that is paid on the value added by the respective taxpayer. VAT is regulated by the Value Added Tax and Supplementary Duty Act, 2012, Value Added Tax and Supplementary Duty Rules, 2016, and SROs, notifications, orders, explanations made there-under. Unless exempted, VAT is chargeable and payable on all goods imported, produced and services rendered in Bangladesh @ 15% except on exports and deemed exports on which tax is imposed at zero percent. Some persons in some cases required to register for the purposes of VAT by submitting application with some documents. Determination of cost on which VAT will be computed is very important to VAT practitioners. Method and time of payment of VAT need to be followed as per the Act and Rules. Various books of accounts and documents are required to be maintained for VAT purposes. On certain goods and services, VAT is applicable at reduced rates or fixed amount which have been detailed in 3rd schedule of the VAT & SD Act, 2012. In an economy like Bangladesh where a significant portion of Government revenue comes from VAT, knowing VAT with all technicalities is very significant. VAT & SD Act also addresses required rules and provisions for Turnover Tax and Supplementary Duty.

There are some differences between VAT and Turnover Tax. Turnover Tax is a tax on the turnover of a manufacturer or producer of taxable goods or a trader of taxable goods or a provider of taxable services, as the case may be, who is not required to register for the purposes of VAT. The rate of turnover tax is 4% on turnover. There are some guidelines, rules and procedures on Turnover tax relating to registration, payment, books of accounts and documents to be maintained and penalties.

Input tax is the amount of VAT paid earlier by a taxpayer on his inputs. For claiming credit of input tax some conditions are required to be fulfilled.

Supplementary duty is an indirect tax, in addition to VAT, on luxuries, not essential and not socially desirable goods and services. The rate of supplementary duty varies from 5% to 500%.

Stop and think

Think about other types of tax and VAT. Do you realize the significance of VAT, Turnover Tax and Supplementary Duty?

Working context

The revenue collection through VAT is increasing sharply day by day. Supplementary Duty also has significance as sources for revenue to the Government. On the other hand, Turnover Tax is not very significant as a source of revenue. Different methods, rules, conditions and procedures relating to VAT and other taxes are very important to know.

Clients are sometime expecting expert opinion in calculating VAT and other legal procedures relating to VAT and other taxes from accountants. Hence, accountants should have clear concept with practical exposure in this area, so that they can take the opportunity to provide the expert service to their clients.

Examination context

Exam requirements

In the examination, candidates may be required to:

a. Demonstrate the concept of VAT, Turnover Tax and Supplementary Duty and identify the application of tax rate.
b. Explain the registration procedures, method of computation of VAT payable, time of payment of VAT and Turnover Tax.
c. Identify documents required for VAT administration.
d. Identify the different schedule for VAT and Supplementary Duty.
e. Identify the VAT authorities and their power and functions.
f. Explain the consequences for non-compliance of VAT rules and regulation.

Question practice

For practicing question on these topics please go through the suggested answers at the end of this workbook.

Examiner's comments on how students tackle questions

Candidates need to be careful on different VAT bases and rates for computing VAT payable with the respective dates of payments and the adjustments of VAT deducted/collected at sources with VAT payable to compute the net amount.

Section overview

- ➔ VAT is a multi-tiered tax system, where VAT is levied on the value addition of goods or services at different levels. If not exempted and not included in the Third Schedule, VAT will be applicable at the rate of 15%.
- ➔ There is no obligation to register unless it falls under the scope of Section 4 of the Act and General Order 17/2019; Issue Date - 17th July, 2019 No obligation to register if not covered.
- ➔ The supplier of taxable goods, services or immovable property and the importer of taxable goods or services shall pay VAT.
- ➔ Reduced rates or specific rates are applicable on certain goods or services, which are described in the Third Schedule to the Act.
- ➔ There are some specific method and time of payment of VAT.
- ➔ Some books of accounts and documents are required to be maintained by the VAT payer.
- ➔ There are clear differences between VAT, Turnover Tax and Supplementary Duty.
- ➔ The rate of Turnover Tax is 4%.
- ➔ Input tax is VAT paid by a registered person on receipt of a supply, which is rebateable.
- ➔ Supplementary duty is in addition to VAT. Supplementary duty is levied on any goods or services subject to VAT, which is specified in the Second Schedule to the Act. Supplementary duty is not levied at trading level. Supplementary duties are generally imposed on elite goods, socially undesirable goods and unnecessary goods. Supplementary duties discourage import of goods.
- ➔ Supplementary duty may vary from 5% to 500% for goods and from 10% to 30% for services.

33.1 Introduction

Value Added Tax (commonly known as VAT) is the tax on the value-added amount by a taxpayer. In an economy where value addition is significant and value is added at different levels, Government has sufficient rationality to impose such taxes.

VAT is an important type of indirect tax where impact and incidence of taxes fall on different persons. If tax burden can be shifted to another person then it is called indirect tax. The ultimate burden of VAT falls on final consumers as different persons have the mechanism to shift the burden onto the shoulders of others. For example, the traders, on whom VAT is charged, transfer the tax burden to subsequent traders until the goods reach to the final buyers or customers who cannot shift the incidence or burden to anyone else. VAT is levied on expenditure rather on income and that is why it is sometimes called expenditure tax.

In Bangladesh, up to 30 June 2019, VAT was regulated by the Value Added Tax Act, 1991, Value Added Tax Rules, 1991; Finance Acts and various rules, regulations and notifications issued under this Act. In the Parliament, the new Value Added Tax and Supplementary Duty Act, 2012 (hereinafter referred to as the VAT and SD Act) (Act No. 47 of 2012) has already been enacted on 10 December 2012. Moreover, in order to implement the Act, NBR issued Value Added Tax and Supplementary Duty Rules, 2016 (hereinafter referred to as the VAT and SD Rules) on 3 November 2016. Chapter two, chapter twelve and chapter fifteen, and sections 128, 132, 134, and 135 of the new Act came into force at once. But the remaining provision of the Act along with the Rules came into force from July 2019 vide SRO No. 168-Ain/2019/25-Mushak dated 13 June 2019 and SRO No. 169-Ain/2019/25-Mushak dated 13 June 2019 respectively.

Unless exempted by the First Schedule, according to section 15(3) of the VAT & SD Act, VAT is chargeable and payable on all goods and services imported, produced or rendered in Bangladesh @ 15% except on exports and deemed exports on which tax is imposed at zero (0) percent.

The zero rate is an actual tax rate of VAT, the same as 15 percent. An entity may claim refund of VAT paid on purchases and can be claimed against the liability i.e., zero. On the other hand, an entity cannot claim any rebate/credit of VAT on purchase to produce exempted goods and has no tax liability against which to offset it and thereby pays tax on input which must be wholly passed on or absorbed. In this way, the zero rate allows an entity complete exemption because, for instance, the entity can claim full amount of tax he has paid on his input and, therefore, pays no tax, while all the previous stages have passed their tax liability fully forward. Initially it will involve the required cost of administration without yielding any revenue. But this will bring all economic activities under the VAT system which will help achieving the ultimate objective of having an elastic tax system for the country.

When VAT (output tax) is imposed on "full value", taxpayer pays VAT (output tax) at 15%; and when VAT (output tax) is imposed on "estimated added value", the taxpayer pays VAT (output tax) at 1.5%, 2%, 2.4%, 4.5%, 5%, 7.5%, or 10% or Fixed amount.

VAT is computed as a percentage of the value added on goods or services. It is charged on the value of consumption, applied at each point of transactions of goods or services from primary production to final consumption. At every stage one has to pay as well as collect VAT before reaching the stage of the final consumption. So, everyone, except the final consumer, does not have to bear any VAT from his own account. Because whatever the person other than the final consumer has paid as VAT at the time of purchase, he shall collect that amount of VAT from the persons who shall buy his goods or services and also collect tax on value which is added by him before selling. Value addition by the seller is the difference between the selling prices of the goods or services (Output) and the cost of raw materials (input) purchased. The amount of value addition may consist of processing cost, such as wages, overheads etc. and profit.

Thus, VAT collection increases at every stage because of the value addition that is maximized at the final stage. This value addition stops when any goods or a service is purchased for final consumption and the consumer has to bear the full amount of VAT. At each point of transaction, the tax is passed onto the shoulder of next person in the form of higher price, which consists of selling price plus VAT. This process illustrates that a business does not bear VAT. Being at the final point in the chain of total transaction, the final consumer bears the whole amount of the tax. The basic procedure of VAT system is explained below with an example assuming five layers of transactions from importer to final consumer.

Supplier / Consumer	Value of Input / Import / Raw materials (excluding VAT)	Value addition		Value of Output / Sales / supplies	VAT Paid on input / Import /Raw materials	VAT Levied on Output / Sales / supplies	Total invoice price including VAT	VAT Paid / Payable at different stage
		Processing Cost	Profit					
A	B	C	D	E = (B+C+D)	F = (B×15%)	G = (E×15%)	H = (E+G)	I = (G-F)
Importer:	100	10	20	130	15.00	19.50	149.50	19.50*
Producer:	130	35	15	180	19.50	27.00	207.00	7.50
Wholesaler:	180	5	20	205	27.00	30.75	235.75	3.75
Retailer:	205	5	15	225	30.75	33.75	258.75	3.00
Final consumer:	225	-	-	-	-	-	-	-
							Total	**33.75**

*Including VAT paid at import stage

The above table illustrates the computation of VAT at different stages. Except for importer, VAT payable in column (I) is computed by deducting VAT paid on input (F) from VAT levied on output (G). In case of importer, the process has started from him in this illustration and importer himself is responsible to pay total VAT to the Government Treasury at this stage. However, the importer has collected the total VAT paid to Government from his customer i.e. the producer. In other cases, such as producer who is responsible for payment of VAT of Tk. 7.50, this amount has been computed by deducting the VAT paid by the producer at input purchase stage (Tk. 19.50) from the VAT levied on sale (Tk. 27) which is to be collected from the wholesaler. In other words, this is exactly 15% of value addition (C+D) by the producer (15% of Tk. 50) as in all other cases except importer and final consumer.

Though the above illustration gives a view that VAT is a very simple system of taxation for the taxpayer and Government but practically this illustration reflects the system partially. Because in Bangladesh, exceptions in VAT system are observed due to the presence of reduced rate, fixed amount of VAT and VAT exemption etc.

Under the reduced rate system, reduced amount (lower than the standard rate of 15%) are allowed to be collected from the consumers (who may or may not be the final consumers) and the seller cannot set off his/her input tax against his/her output tax.

In case of VAT exemption, VAT is exempted at output stage and VAT paid at input stage cannot be set off and should be treated as cost. However, in case of zero-rated VAT (for export), the amount paid as VAT at input purchase stage can be recovered.

Turnover tax

The VAT and SD Act has provisions for levying and collecting turnover tax. 'Turnover' refers to the total amount received or due by a person against the supply of taxable goods or services at a given time. Manufacturers and suppliers of any taxable goods or service providers (excluding goods / services covered under compulsory registration) have no obligation to accept VAT registration if their annual turnover is not more than Tk. 50 (fifty) lakh. All those entities have to be listed under turnover tax and pay turnover tax at the rate of 4% on the prescribed annual turnover.

Supplementary Duty

Supplementary duty is also levied under the Value Added Tax and Supplementary Duty Act. Supplementary duties are usually imposed on luxury goods, not essentials and socially unwanted goods or services. The VAT registered person also collects supplementary duty where applicable at the time of collection of VAT and at the time of submission of VAT deposits to the exchequer in a separate account through treasury challan. Since the supplementary duty paid by a registered person is not considered as input tax, he cannot avail an input tax rebate against the supplementary duty. However, if the goods or services are exported, the input tax can be refunded along with the supplementary duty (decreasing adjustment allowed) paid on the goods used in the production or service of the exported goods.

For the financial year 2026-27, there are 19 levels of supplementary duty through the Second Schedule to the VAT Act (Section 55 of the VAT and SD Act). These are 0%, 5%, 10%, 15%, 20%, 25%, 30%, 40%, 45%, 55%, 60%, 67%, 100%, 150%, 200%, 250%, 300%, 350% and 500%.

33.2 Statutory definitions

33.2.1 Statutory definitions as per VAT & SD Act 2012

Important terms relating to VAT are defined in section 2 of the VAT & SD Act. Some of the definitions are presented below with specific references:

(1) **"Economic activity"** means any activity carried on regularly or continuously for making supply of any goods, services or immovable property, and

(a) also includes the following activities, namely-

(i) any business, profession, vocation, means of earning livelihood, manufacture or undertaking of any kind, whether or not for profit;

(ii) Supply of any goods, service or property made under any lease, license, or a similar arrangement,

(iii) any one-off initiative in the nature of a commercial activity or enterprise; or

(iv) any activity carried out at the beginning or at the end of such an activity; but

(b) shall not include the following activities, namely-

(i) any service rendered by an employee to his employer;

(ii) any service rendered by any director of a company:

provided that the services rendered by a director, who holds the office of the directorship for the purposes of the business of the company, shall be regarded as an economic activity;

(iii) any recreational pursuit or hobby carried on a non-commercial basis; or

(iv) any prescribed activity carried on by the Government without any commercial motive; [section 2(6)].

(2) **"Advance tax"** means any tax payable in advance under section 31(2) on a taxable import; [section 2(8)].

(3) **"Resident"** means an individual who –

(a) normally lives in Bangladesh; or

(b) stays in Bangladesh for more than 182 (one hundred and eighty-two) days in a current calendar year; or

(c) stays in Bangladesh for more than 90 (ninety) days in a calendar year and stayed in Bangladesh for more than 365 (three hundred and sixty-five) days during the four immediately preceding calendar years; and also includes the following entity, namely–

i. a company, if it is incorporated under the prevalent laws of Bangladesh or its center of control and management is in Bangladesh;

ii. a Trust, if a Trustee thereof is a resident of Bangladesh or the center of control and management of the Trust is in Bangladesh;

iii. an association of persons other than a Trust, if it is formed in Bangladesh or its center of control and management is in Bangladesh;

iv. all government entities; or

v. a property development joint venture; [section 2(15)].

(4) **"Input"** means all raw materials, laboratory reagents, laboratory equipment, laboratory accessories, any particular used as fuel, packing materials, services, machines and parts of machines.

Following goods and services will not be considered as input:

(a) Land, structure, office equipment and fixtures, buildings/ infrastructures construction, upgrading, modernization, replacement, expansion, renovation and maintenance, repair, renovation

(b) All furniture, office supplies, stationary materials, refrigerators and freezers, air conditioner, fan, lighting materials, generator purchase or repair

(c) Interior design, architectural planning and design

(d) Purchase, rental and lease of vehicles

(e) Travelling, entertainment, employee welfare, development activities and goods and services associated with it

(f) Rent of premises, offices, showrooms or similar areas, called by whatever name, of a business establishment

Provided that, goods or services imported, purchased, acquired or otherwise collected for the purpose of sale, exchange or transfer in the case of conducting of business by a trader mentioned in paragraph (3) of the Third Schedule of this Act shall be deemed to be "inputs" [section 2(18Ka)]

(5) **"Input tax"** means the VAT (except advance tax) paid at import stage on goods or services as input and VAT paid against purchased or collected as input from local sources by any registered person; [section 2(19)].

(6) **"Output tax"** means the VAT and supplementary duty payable by any registered person for the following activities, namely–

(a) supply of any taxable goods, service or immovable property by such person; or
(b) import of any taxable service by such person; [section 2(20)].

(7) "**Withholding Entity**" means:

a) a Government entity;
b) a non-government organization approved by the NGO Affairs Bureau or the Directorate-General of Social Welfare;
c) a bank, insurance company or a similar financial institution;
d) an educational institution of secondary level or above;
e) a limited company; or
f) any person or organization with an annual turnover of more than 10 Crore Taka. [section 2(21)]

(8) **"Import"** means bringing in any goods from outside to within the geographical boundary of Bangladesh; [section 2(16)].

(9) **"Imported service"** means service supplied from outside Bangladesh; [section 2(17)].

(10) **"Electronic Service"** means the following services provided over a telecommunications network, local or global information network, or similar means, namely–

- websites, web-hosting, or remote maintenance of programs and equipment
- software and the updating thereof delivered remotely
- images, texts, and information delivered
- access to databases
- self-education packages
- music, films, and games; and
- political, cultural, artistic, sporting, scientific and any entertainment broadcasts and events including television telecasts; [section 2(18)].

(11) **"Tax"** means VAT, turnover tax, supplementary duty, and shall in relation to realization of arrears, also include any interest, monetary penalty or fine; [section 2(24)].

(12) **"Tax Invoice"** means a document issued by any supplier under section 51; [section 2(25)].

(13) **"Tax assessment"** means an assessment of net payable tax by any taxpayer under chapter five; [section 2(27)].

(14) **"Tax determination"** means determination of tax by appropriate officer under chapter eleven; [section 2(28)].

(15) **"Tax fraction"** means the following fraction, namely:

$$\frac{R}{100 + R}$$ where R is the VAT rate specified in section 15(3); [section 2(29)].

(16) **"Tax period"** means one month specified in the Gregorian Calendar [section 2(30)]

(17) **"Taxable import"** means any import, other than an exempt import; [section 2(31)].

(18) **"Taxable supply"** means a supply other than an exempted supply, which is made through the process of economic activities; [section 2(32)].

(19) **"Tax rate"** means, depending on the context-

a. VAT rate specified in section 15(3);
b. supplementary duty rate specified in section 55(4);
c. turnover tax rate specified in section 63(1); [section 2(33)].

(20) **"Company"** means an entity incorporated as a company under any law prevailing in Bangladesh or in any other country [section 2(38)].

(21) **"Centrally registered entity"** means entity centrally registered under section 5; [section 2(37)].

(22) "**Credit note**" means any document issued by the taxpayer in support of a decreasing adjustment. [section 2(39)]

(23) **"Turnover"** means, in relation to a person, all the money received or receivable by such person within a prescribed time or tax period against the supply of taxable goods or the rendering of taxable services manufactured, imported or purchased by means of his economic activities; [section 2(42)].

(24) "**Debit note**" means any document issued by the taxpayer in support of an increasing adjustment. [section 2(44)]

(25) **"Enlistment threshold"** means the limit of Taka 30 (thirty) lakh as turnover of an economic activity of any person in a 12 (twelve) month- period, but does not include the following, namely-

(a) the value of an exempted supply;
(b) the value of sale of a capital asset;
(c) the value of a sale of an organization of economic activities or any portion thereof; or
(d) the value of a supply made as a consequence of permanently closing down an economic activity; [section 2(48)].

(26) "**Specified place**" means any of the following places at or through which economic activities inside or outside Bangladesh are carried on, namely–

a) a place of management;
b) a branch, an office, a factory, or a workshop;
c) a mine, a gas well, a quarry for extraction of stones or any other similar mineral resource; or
d) a location of any construction or installation project; [section 2(52)].

(27) **"Registration threshold"** means the limit of Taka 50 (fifty) lakh as turnover of an economic activity of any person in a 12 (twelve) month-period, but does not include the following, namely-

(a) the value of an exempted supply;
(b) the value of sale of a capital asset;
(c) the value of a sale of an organization of economic activities or any portion thereof;
(d) the value of a supply made as a consequence of permanently closing down an economic activity;

provided that, this registration threshold shall not apply in case of registering any person under sub-section (2) of section 4; [section 2(57)].

(28) **"Fair market price"** means–

(a) the consideration for a supply arrived at on the basis of a normal relation between a buyer and a seller, who are not associated with each other;
(b) if it is not possible to arrive at a fair market price as prescribed in clause (a) above, it would then be the consideration of a similar supply made previously under similar circumstances;
(c) if it is not possible to arrive at a fair market price by the above means, it may be determined by the Board on the basis of an objective approximation of considerations arrived at in the course of normal business relations among buyers and sellers, who are not associated with one another; [section 2(58)].

(29) "**Consideration**" means the money paid or payable, whether directly or indirectly, against a supply, or the fair market price of a thing paid or payable in lieu of cash,
and also includes the money realized or realizable on the following accounts, namely–

(a) any tax imposed under this or any other Act that is–
i) payable by the supplier on, or by reason of, a supply; and
ii) included in, or added to, the price charged to the recipient;
(b) any money realized as service charge; or
(c) any money payable in relation to a loan agreement under finance lease or hire purchase and included in the consideration for supply of goods under hire purchase or finance lease;

But does not include any discount in price given at the time of a supply; [section 2(59)]

(30) **"Declaration of goods"** means any goods as defined in sub-section (31) of section 2 of the Customs Act, 2023; [section 2(60A)]

(31) "**Supply of goods**" means-

a) the transfer of right of goods through sale, exchange, or sale otherwise; or
b) giving the right to use the goods on lease, rent, installment, hire purchase or by any other means, and it also includes the sale of goods under finance lease. [section 2(61)].

(32) **"Deemed export"** would mean to include one or more of the following supplies, namely–

(a) supply of any goods or service in a prescribed manner against foreign currency and destined for consumption outside Bangladesh;
(b) supply of any goods or service in a prescribed manner within the territory of Bangladesh against foreign currency through an international tender; or
(c) supply of any goods or service in a prescribed manner within the territory of Bangladesh against foreign currency under cover of a local letter of credit; [section 2(62)].

(33) **"Representative"** means–

(a) for a mentally or physically challenged individual, a guardian or a manager appointed by him;
(b) for a company other than a company in liquidation, the chief executive officer of the company or any appropriate officer or representative appointed by the chief executive officer;
(c) for a partnership, a partner thereof;
(d) for a Trust, any Trustee of the Trust or an executor or administrator of such Trust;
(e) for an association of persons, its chairman, secretary or the treasurer;
(f) for a government entity, the chief executive officer of the entity or any appropriate officer or representative appointed by the chief executive officer;
(g) for a foreign government, any officer appointed by such foreign government;
(h) for a non-resident, any VAT Agent appointed by him;
(i) VAT consultant appointed by any person; or
(j) any other prescribed representative; [section 2(63)].

(34) "**Manufacturing**" means–

(a) transforming or reshaping of any substance by processing individually or in combination with any other substance, material or components of production for changing, transforming or reshaping it into a different specific substance or goods so that it becomes useable differently or specifically;
(b) any incidental or related processes required to complete the production of goods;
(c) any printing, publication, lithography or engraving processes;
(d) any assembling, mixing, cutting, liquefaction, bottling, packaging or repackaging; or
(e) all processes adopted for production or manufacture of goods, including intermediary or an incomplete process; [section 2(65)]

(35) **"Increasing adjustment"** means any of the following adjustments, namely-

(a) an increasing adjustment in respect of withholding tax;
(b) an increasing adjustment required for an annual re-calculation;
(c) an increasing adjustment if a payment is not made through banking channels;
(d) an increasing adjustment for goods put to a private use;
(e) an increasing adjustment on being registered;
(f) an increasing adjustment on cancellation of registration;
(g) an increasing adjustment for less paid VAT in any earlier tax period;
(h) an increasing adjustment for a change in the VAT rate
(i) an increasing adjustment for the payment of any interest, monetary penalty, fine, fee, unpaid taxes etc.; or
(j) any other prescribed increasing adjustment; [section 2(71)].

(36) "**Person**" means any natural person, and also includes the following entities, namely-

a) a company;
b) an association of persons
c) a government entity
d) a foreign government or a department designated, or any official appointed, by it
e) an inter-state or international organization
f) a joint venture for property development or any other similar initiative; or
g) other business organization; [section 2(74)].

(37) **"Association of persons"** means any partnership, Trust or any similar association of persons, but does not include any company or unincorporated joint venture; [section 2(75)].

(38) **"Business identification number"** means a unique business identification number mentioned in the VAT registration certificate or turnover tax certificate issued to a registered or enlisted person; [section 2(76)].

(39) **"Trader"** means such a person who in exchange of consideration sells to any other person or otherwise transfers the goods imported, purchased, acquired or collected otherwise without any change in shape, nature, characteristics or quality; [section 2(76A)].

(40) **"Value"** means-

a. the value of taxable in section 28; or
b. value of supply specified in section 32; [section 2(78)].

(41) **"Value added tax"** or **"VAT"** means the value added tax imposed under section 15; [section 2(79)].

(42) **"Export"** means any supply from inside to outside the geographical limits of Bangladesh in exchange of foreign currency, and also includes a "**deemed export**". [section 2(82)]

(43) **"Adjustment event"** means any of the following events, namely–

(a) cancellation of any supply;
(b) alteration of the consideration for any supply;
(c) return of any supplied goods, in part or in full, to the supplier;
(d) conversion of a supply into a zero-rated or an exempted one as a result of an alteration in the nature of such supply; or
(e) any other prescribed event; [section 2(87)].

(44) **"Supplementary duty"** means the supplementary duty imposed under section 55; [section 2(89)].

(45) **"Goods subject to supplementary duty"** means any goods specified in the second schedule; [section 2(90)].

(46) **"Service subject to supplementary duty"** means any service specified in the second schedule; [section 2(91)].

(47) **"Withholding tax deduction certificate"** means a document specified in section 53; [section 2(92)].

(48) **"Government entity"** means –

a. a government or any of its ministries, divisions, or attached departments;
b. a semi- government entity or an autonomous body;
c. a state-owned enterprise; or
d. a local authority, council, or a similar organization; [section 2(93)].

(49) **"Supply"** means any supply, and it includes the following namely-

a. supply of goods;

b. supply of immovable property;
c. supply of services; or
d. combination of supplies of the above clauses (a), (b) and (c); [section 2(94)].

(50) **"Time of supply"** means–

(a) in relation to supply of goods, the time when the possession of the goods are conferred or they are removed;
(b) in relation to supply of services, the time when the services are rendered, generated, transferred or assigned; or
(c) in relation to supply of any immovable property, the time when the property is delivered or created or transferred or assigned; [section 2(96)].

(51) **"Associate"** means such a relation between two persons as would make one act or reasonably expected to act in accordance with the intention of the other, or make both act or reasonably expected to act in accordance with the intention of a third person, and it also includes the following persons, namely–

(a) a partner of a partnership;
(b) a shareholder of a company;
(c) a Trust and a beneficiary of such Trust; or
(d) a joint venture for property development and the landowner as a partner of that joint venture, builder, or other related person;
(e) representative, VAT Agent, distributor, licensee or persons with similar relationship

Provided that persons with employment relations shall not be included in this [section 2(97)].

(52) **"Service"** means any service but does not include any goods, immovable property and money; [section 2(99)].

(53) **"Supply of service"** mean such a supply as is not a supply of goods, money or immovable property, which, without prejudice to the generality shall include the following, namely-

a. a grant, assignment, termination, or conferment of a right
b. making a facility, an opportunity, or an advantage available
c. an agreement to perform an act, to refrain from performing an act or accepting a situation or to tolerate an act or a situation; and
d. the issuance, transfer or conferment of a license, permit, certificate, concession, authorization, or a similar right; [section 2(100)].

(54) **"Immovable property"** means title or right on immovable property where irrespective of whether land, or any building established on land or any structure permanently attached or established on it or not; [section 2(101)].

(55) **"Supply of immovable property"** means to include the following supplies-

a) An interest in, or right over, land;
b) A personal right consisting of an invitation to confer a right or interest on land;
c) Issuance of a license to occupy land including supply of residential accommodation or a contractual right exercisable over, or in relation to, land;

d) A right to acquire anything mentioned in clause (a) (b) and (c) or the option to exercise that right in future; [section 2(102)].

(56) **"Decreasing adjustment"** means any of the following adjustments, namely–

(a) a decreasing adjustment for the money paid as advance tax;
(b) a decreasing adjustment in respect of withholding taxes against provided supply by supplier;
(c) a decreasing adjustment applicable as a result of an annual re-calculation;
(d) a decreasing adjustment against credit note issue;
(e) a decreasing adjustment where there is a decrease in the VAT rate;
(f) a decreasing adjustment claimed for a negative net amount carried forward from a previous tax period;
(g) a decreasing adjustment allowed for VAT overpaid in a previous tax period;
(gg) a decreasing adjustment on being registered; or
(h) any other prescribed decreasing adjustment. [section 2(103)].

33.2.2 Statutory definitions as per VAT & SD Rule 2016

(1) **"Import value"** means the value determined in accordance with section 27 of the Customs Act, 2023 (Act No. 57 of 2023); [rule 2(kha)].

(2) "**Bonded warehouse**" and **"Special bonded warehouse"** means bonded warehouse and special bonded warehouse as defined in Chapter Sixteen of the Customs Act, 2023 (Act No. 57 of 2023), respectively; [rule 2(Jha].

(3) **"Contract manufacturer"** means the manufacturer, who manufactures goods under contract in exchange of consideration, using input supplied by the brand owner or using his own input; [rule 2(khakha)].

(4) **"Related person"** means two persons registered or enlisted under the Act, who holds a minimum of 50 (fifty) percent shares of the same ownership; [rule 2(cha)].

(5) **"Backward linkage industry"** means any industrial undertaking which supplies goods or services against Inland Back-to-Back LC or Inland LC in foreign currency to any registered person who is under an obligation in the Inland Back-to-Back LC to supply goods or services to an Actual exporter in exchange of foreign currency; [rule 2(chacha)].

(6) **"Actual exporter or exporter"** means such person or establishment who directly exports to Export Processing Area or outside Bangladesh its produced goods or services or goods or services collected otherwise, observing the formalities laid down in the provisions of Export Policy Order published from time to time by the Government and foreign exchange related provisions published from time to time by Bangladesh Bank; [rule 2(chhachha)].

(7) **"Supply under barter process"** means such a supply which is transacted between two related persons; [rule 2(neo)].

33.3 VAT Registration & Turnover Tax Enlistment

When registrations are required for the purposes of VAT

(1) Each of the following persons shall, from the first day of a month, be required to be registered for VAT, namely–

(a) a person whose turnover exceeds the registration threshold (i.e. Tk. 50 lakh) within a 12 (twelve)- month-period closing at the end of the month preceding that month; or

(b) a person whose estimated turnover exceeds the registration threshold (i.e. Tk. 50 lakh) within the succeeding 12 (twelve)- month-period beginning at the start of the preceding month.

Example: Assume that today is 15 July 2026. XYZ Ltd prepared its financial statements for YE 30 June 2026 and reported sales revenue is Tk. 5,001,000

Assume that today is 27 July 2026. ABC Ltd prepared its financial statements for the month of June 2026 and reported sales of Tk. 200,000. However, the company is expecting its average revenue per month will be Tk. 450,000 for next 11 month.

XYZ 1: Actual sales: XYZ Ltd. is required to obtain VAT registration.
ABC 2: Projected sales: ABC Ltd. is required to obtain VAT registration.

Mandatory Registration

Every person carrying on the following economic activities must be registered for VAT regardless of the turnover threshold, if he–

(a) supplies or manufactures or imports goods or services which are subject to supplementary duty in Bangladesh;
(b) supplies goods or service or both against any contract or work order or through participating in the tender;
(c) Involved in any export and import business
(d) Establishes branch office or liaison office or project office of a foreign organization
(e) Appointed as VAT agent
(f) Engaged in economic activities related to supplies, manufactures or imports of specific goods or services or in any specific geographical area as determined by the National Board of Revenue (NBR)

It shall be mandatory to present Business Identification Number (BIN) or proof of enlistment in the following cases, namely:-

(a) In case of opening and maintaining a current account or STD account by any business organization with any bank or NBFI or any other financial institution;
(b) In case of taking a loan from any bank or NBFI or any other financial institution by any business organization;
(c) In case of renewal of trade license;
(d) In case of opening a merchant account of any Mobile Financial Services (MFS);
(e) In case of accepting or renewing membership of a trade organization;
(f) In case of obtaining electricity and gas connection by any business organization; and
(g) In case of obtaining vehicle registration in the name of a business organization from BRTA.

Additionally, as per **General Order (GO) No.17/Mushak/2019 dated 17 July 2019,** mandatory VAT registration is applicable for those who manufacture goods, supply services

and, goods as per Table 1, 2 & 3 respectively of the said GO, irrespective of their turnover being below the VAT registration threshold.

Example

SL	Content	Example
1	Table-1 Manufacturer of goods	Chocolate, noodles, biscuit, soap, detergent, plastic goods, leather goods, wooden goods, all kinds of goods made of ceramic and porcelain, electric bulb
2	Table-2 Service provider	Construction firm, consultancy firm and supervisory firm, procurement provider, human resources supply or management organization, ITES
3	Super shop, shopping mall irrespective of place Goods under table-3 in case of supply at trading stage by organization situated within the area of district town and city corporation	Table 3: Cement, all kinds of goods made of ceramic and porcelain, GP Sheet/ CI Sheet, MS products, sanitaryware, aluminum fittings, all kinds of electric and electronics goods including air conditioner, refrigerator, television.

Unit or Central Registration

(1) If any person preserves centrally all accounts, tax deposit and VAT records in automated system through software and records of economic activity relating to the supply of identical or similar goods or service or both from one or more places, then, may take one central VAT registration in prescribed conditions and procedures.

Provided that in spite of the supply of identical or similar goods or services, if accounts, tax payment and records of economic activities of a unit is maintained separately then separate registration shall have to be taken for each unit.

Any person, involved in supply under special schemes of tobacco products as per section 58, cannot obtain central registration**.**

On the other hand, there is a guideline for cigarette manufacturer as to transfer of input, machinery, spare parts and supply of manufactured cigarette (Nothi No. 08.01.0000.068.24.002.15/250 dated 31 August 2021)

NBR has also issued an **SRO No. 263-Ain/2019/79-Mushak dated 18 August 2019** which further specifies the following conditions required to be satisfied for obtaining central VAT registration:

Applicability

a. As per (Ka) of sub-rule (2) of rule (1) of the said SRO if any manufacturer produces and supplies identical or similar goods from one or more places.

b. As per (Kha) of sub-rule (2) of rule (1) of the said SRO, if any commercial importer supplies the imported goods through its owned and controlled sales unit.

c. As per (Ga) of sub-rule (2) of rule (1) of the said SRO, if any trader sells or supplies procured or collected goods through its owned and controlled sales unit.

d. As per (Gha) of sub-rule (2) of rule (1) of the said SRO, if any service provider provides identical or similar services through different branches under his own ownership and control.

e. As per (Uma) of sub-rule (2) of rule (1) of the said SRO, where a manufacturer, after manufacturing, supplies goods from one or more places through sales centre under his

own ownership and control after paying 15% VAT or reduced rate or specific tax as mentioned in the third schedule provided that it will not be applicable in case of conditional notification, where exemption is granted at manufacturing stage for additional part of specific rate.

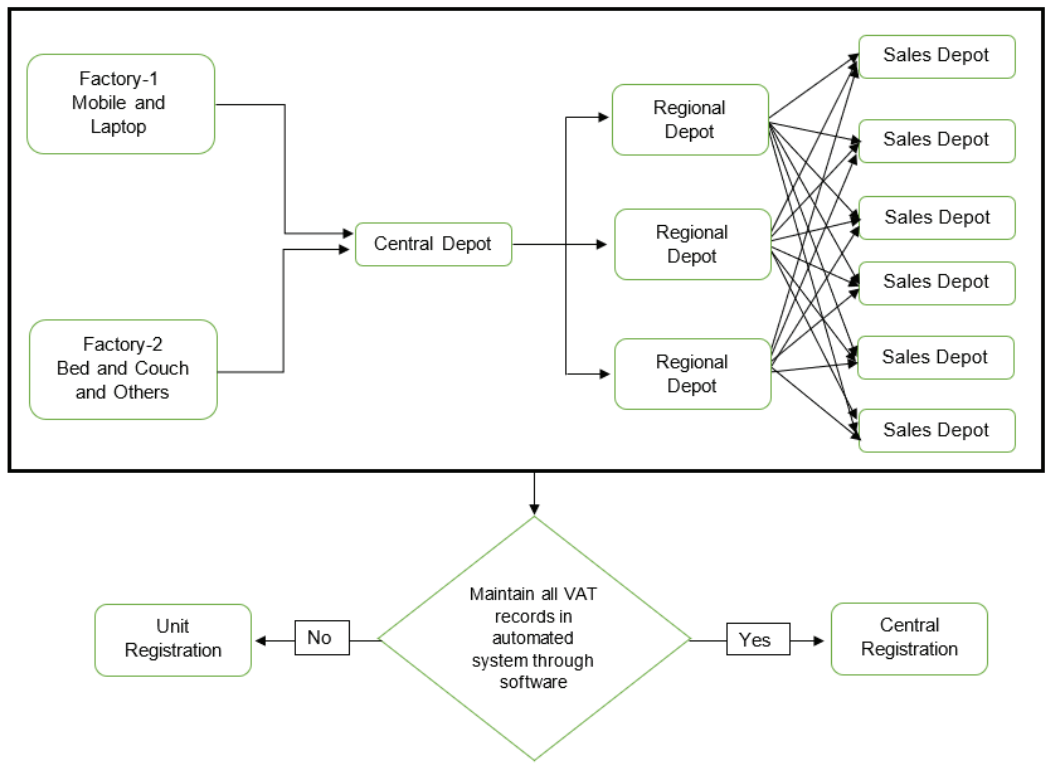

f. As per (cha) of sub-rule (2) of rule (1) of the said SRO, where a manufacturer, after manufacturing, supplies goods from one or more places after paying applicable VAT through different sales center or depot or warehouse under his own ownership and control.

As per the SRO No. 263-Ain/2019/79-Mushak dated 18 August 2019, "Similar Goods" means homogeneous according to nature of consumption/use, such as medicine, electronics goods, food, cosmetics, toiletries, plastic goods etc. and its packaging or intermediate input.

Example 1: ABC Company owns 2 factories, 1 central depot, 3 regional depots and 6 sales depots. Factory-1 manufactures mobile phones and laptops of different model and price. Factory-2 also manufactures TV, fridge and some other kinds of electronic items. The products manufactured by the two factories are first transferred to the central depot, which are then stored in regional depots. Finally, these products are sold to distributors via the sales depots. All books of accounts and records are maintained centrally in automated system through software.

Question: Will the company be eligible for central registration?

Solution: The company maintains the records of economic activity centrally in automated system through software and manufactures, stores and supplies **"similar goods" (i.e., as it is categorized as electronics items)** from all their factories, central depot, regional depots and sales depots respectively. Hence, ABC company is eligible to obtain central registration for all their units.

Implication of central registration in case of intercompany goods and service transfer:

If goods and services are transferred within units of centrally registered company, then this kind of movement will not be treated as a supply, therefore input/output tax will not arise against the supply.

Procedure for VAT registration for resident

Each person who has obligation to take registration, prior to the passage of 15 days from the day on which obligation for registration has been transpired shall submit application for VAT registration to the concerned Divisional Officer in form **"Mushak-2.1**" along with required information. The application can also be made online through eVAT system.

Documents to be submitted for VAT registration are as follows**:**

(a) Trade License;
(b) Partnership deed/ Memorandum of Association (MoA) and Articles of Association (AoA) / Relevant ownership certificate;
(c) TIN Certificate (if any);
(d) IRC/ERC Certificate (if any);
(e) Incorporation certificate;
(f) List of all related selling centers in the case of "central registration";
(g) List of all input along with HS code;
(h) BIDA Permission/registration certificate (for industrial undertaking);
(i) Passport and e-TIN of shareholders;
(j) Bank Solvency Certificate.

Mandatory documents to be submitted for VAT registration are as follows:

- Trade License,
- E-TIN Certificate,
- NIDd/Passport of the owner,
- Last one month's bank statement/Bank Solvency Certificate,
- House Rental Agreement/Deed,
- IRC/ERC (If applicable)
- Layout Plan, (If applicable)
- Machinery List. (If applicable)

Application may be submitted to the following places, namely:-

a) in online to the VAT online system (eVAT system) of the Board;
b) in any service center determined by Customs, Excise and VAT Commissionerate or Divisional Office convenient to the applicant;
c) in any service center designated by the Board or by the respective Commissioner;
d) in any fair conducted by the Board or by the respective Commissioner; and
e) in any other place designated by an order of the Board.

In case of application in the prescribed manner other than eVAT system, the application has to be sent to the VAT online system (eVAT system) within the following working day of the submission of application.

In case of online application submission in eVAT system, the system will automatically verify the required information of the application and-

(a) If the application meets the system-prescribed criteria (Valid), the system will immediately display a notification to the applicant of successful submission of the application and will immediately send a VAT Registration Certificate containing Business Identification Number (BIN) in Form 'VAT-2.3' to the applicant's registered email address, the registration will be deemed to be effective from the moment of issuance of the said certificate;

Explanation. For the purpose of these rules, 'Valid Application' shall mean an application in which all the mandatory information have been furnished in the eVAT system correctly and the attached documents have been uploaded in the system-prescribed format.

(b) If the application fails to meet the system-prescribed criteria, the system shall immediately instruct the applicant to re-submit a revised application, mentioning the details of the error:

Provided that, in the case of applications submitted in the prescribed manner other than eVAT system, the above provision of issuing instant BIN by the system shall be similarly applicable by the concerned divisional officer.

After the issuance of the VAT registration certificate through the eVAT system, the eVAT system shall automatically issue a registration notification to the respective revenue officer and divisional officer. After receiving the notification, the respective revenue officer shall conduct on-site verification activities in due course.

If the respective revenue officer finds any discrepancy or irregularity during the on-site verification, he shall inform the concerned divisional officer through the eVAT system before the date of filing next return in which the said discrepancy or irregularity was found.

After being informed, the divisional officer shall issue a show cause notice against the concerned taxpayer through the eVAT system, the notice shall direct the taxpayer to submit a written reply within a specified time limit and the date and time of submission of the reply shall be mentioned.

If the taxpayer fails to file a reply to the show-cause notice or if the reply filed is not considered satisfactory to the Divisional Officer after hearing, he may-

a) suspend the validity of the registration issued; or
b) limit the scope of services provided against the said registration by order:

Provided that before making an order of suspension or limitation, the taxpayer shall be given a reasonable opportunity of being heard.

If the divisional officer fails to resolve the matter raised before the due date of the next tax return for the tax period in which the irregularity or discrepancy has been filed, the validity of the order of suspension of the relevant registration certificate issued from the eVAT system shall be deemed to be cancelled automatically and the registration of the concerned taxpayer shall be reinstated.

For import or export of such persons whose registration or enlistment is not obligatory under the Act, including tax refund under section 71 and sub-section (4) of section 31 of the Act, casual Business Identification Number can be given with assistance from Customs system.

VAT registration by non-resident

A non-resident having no specified place in Bangladesh and providing electronic service, etc. to the unregistered person in Bangladesh is required to take VAT registration as non-resident through VAT form Mushak-2.2 along with required information. There is a definition of electronic service in section 2(18) of the VAT and SD Act.

Appointment of VAT agent by non-resident:

i. A non-resident, who does not carry on an economic activity from a specified place in Bangladesh, shall appoint a VAT agent.

ii. Such VAT Agent of a non-resident shall ensure all responsibilities and carry out all activities of the non-resident. However, the non-resident shall be liable for the payment of all dues including taxes, fines, penalties, and interests that may be imposed on the non-resident.

iii. The VAT registration of the economic activities by a VAT agent shall be in the name of the principal.

Use of Business Identification Number (BIN)

a) All imports- exports except baggage imports.
b) Registration of land or building in the name of registered or enlisted person.
c) Obtaining Import Registration Certificate (IRC) and Export Registration Certificate (ERC).
d) Making any supply to a withholding entity.
e) Participation in any tender.
f) Enlistment in any organization.
g) Approval of Bond License.
h) Approval of bank loan in favor of registered or enlisted person.
i) In any other case determined by an order of the Board.

Voluntary VAT Registration

Any person making a taxable supply in the process of economic activities, who is not required to be registered, may apply for voluntarily registration to the Divisional Officer.

Once one obtains voluntary VAT registration, all the provisions of the VAT & SD Act, 2012 shall be binding on them as on other registered persons and, they will need to continue being registered for at least 1 year from the date of registration before being eligible for cancellation.

Enlistment for Turnover Tax

Concept of Turnover Tax

Turnover Tax is a tax, as an alternative to VAT, on the turnover of a manufacturer or producer of taxable goods or a trader of taxable goods or a provider of taxable services, as the case may be, whose turnover is within the turnover threshold as mentioned in section 2(48) of the VAT & SD ACT, 2012.

Turnover Tax is administered under VAT and SD Act and Rules. It is a liberal and easier tax treatment for the small enterprises (supplies and services).

Turnover means, in relation to a person, all the money received or receivable by such person within a prescribed time or tax period against the supply of taxable goods or the rendering of taxable services manufactured, imported or purchased by means of his economic activities.

Turnover Tax is imposed and collected on the said total money under section 63 of VAT & SD Act, 2012.

Person eligible for enlistment for Turnover Tax

If any person, carrying on an economic activity, exceed the enlistment threshold (i.e. 30 lakh) at any time of a 12 (twelve)-month period, but does not exceed the registration threshold (i.e. tk. 50 lakh), such person shall make, within 30 (thirty) days, make an application to eVAT system for enlistment as a turnover taxpayer on such conditions and in such manner as may be prescribed.

The eVAT system shall, after reviewing the application automatically, within such time, on such terms and in such manner as may be prescribed, enlist such person and immediately issue a certificate containing an enlistment number in favor of such person.

Procedure for Enlistment for Turnover Tax

If turnover at any time of a 12 (twelve) month period of any supplier of goods or provider of services is above Tk. 30 lakh and does not exceed Tk. 50 lakh, he shall apply to the Divisional Officer of VAT in form **Mushak-2.1** for enlistment for the purposes of turnover tax.

Application may be submitted to the following places, namely:-

(a) At the VAT online system (eVAT system) of the Board through online;

(b) In any service center determined by Customs, Excise and VAT Commissionerate or Divisional Office convenient for the applicant or any other place determined by the Board through an order;

(c) At any service center determined by the Board or by the concerned Commissioner; or

(d) At any fair run by the Board or by the concerned Commissioner.

In case of an application in the prescribed manner other than eVAT system, the application shall have to be sent to the VAT online system within the next day of the submission of application.

In case of online application submission in eVAT system, the system will automatically verify the required information of the application and if the application meets the system-prescribed criteria (Valid), the system will immediately display a notification to the applicant of successful submission of the application and will immediately send an Enlistment Certificate containing Business Identification Number (BIN) in Form 'VAT-2.3' to the applicant's registered email address.

After the issuance of the enlistment certificate through the eVAT system, the eVAT system shall automatically issue an enlistment notification to the concerned revenue officer and divisional officer, thereafter the provisions of on-site verification, show cause notice issuance and disposal under the VAT Laws shall apply in the same manner as they do for VAT registration.

If the application fails to meet the system-prescribed criteria, the system shall immediately instruct the applicant to re-submit a revised application, mentioning the details of the error.

Once enlisted, no renewal for enlistment is required. No fee is payable for enlistment for the purposes of turnover tax.

If, after enlistment, the turnover of an enlisted person exceeds Tk. 50 lakh during a continuous period of 12 months, he will need to apply within next 30 days after the end of 12 months for VAT registration to the VAT Divisional Officer in form **Mushak-2.1**.

Registration or enlistment, by the Commissioner, Suo moto, of persons required to be registered or enlisted:

If, after proper enquiry, the Divisional Officer is satisfied that a person was required to be registered or enlisted but failed to make an application, he shall, *Suo moto*, register such person for VAT or enlist him for turnover tax and issue the appropriate certificate in form Mushak-2.3 through e-VAT system.

Responsibility of a registered or enlisted person to display certificates:

Every registered or enlisted person shall display the VAT registration certificate or turnover tax certificate, or a certified copy thereof, in such a specified place of his economic activity as makes it easily visible.

Cancellation of VAT Registration:

Registered person may apply for cancellation of VAT registration to the respective divisional officer through Form **"Mushk-2.4"**, If-

a) He fails to commence economic activity following registration.
b) He closes his economic activity.
c) His economic activity has been declared as exempted.
d) His annual turnover falls below the limit of registration for 2 consecutive years.

If any application is filed, the Divisional Officer after proper enquiry about the matter-

(a) If he considers the reasons for the cancellation of registration to be proper, shall suspend the registration temporarily and make him informed through the e-VAT system; or

(b) If he does not consider the reasons for the cancellation of registration to be proper or if the application is incomplete or if for any other reason deems that it is not proper to cancel the registration, he will suspend the registration temporarily or take any other decision by giving the person an opportunity of being heard and inform him through the e-VAT system.

Within 15 (fifteen) days of submission of final return, if the information contained therein are found to be proper following its verification, the Divisional officer shall cancel the registration.

If registration of a registered person is cancelled, then he shall:

- Refrain from using or issuing tax invoice, withholding VAT certificate, receipt, credit note, debit note, etc. at the earliest
- Return the VAT registration certificate and all its certified copies to the respective officer and pay the arrears of tax and submit his final VAT return

Cancellation of Turnover Tax Enlistment:

An enlisted person may file application to the divisional officer in form **"Mushak-2.4"** for cancellation of his enlistment for the following reasons, namely-

a. if he ceases to carry on any economic activity;
b. if the turnover of his economic activity remains below the enlistment threshold proportionately for three consecutive tax periods.

If an application is filed, the Divisional Officer following proper enquiry-

a) shall inform the person after temporarily suspending his enlistment if there are valid reasons for the cancellation of his enlistment; or
b) if the reasons for the cancellation or enlistment are not proper or if the application is incomplete or if for some other reasons it is not proper to cancel the enlistment, the Divisional Officer shall inform the person temporarily suspending his enlistment or taking any other lawful decision after giving him an opportunity of being heard.

If the enlistment of any enlisted person is temporarily suspended, he–

(a) will desist from all the activities related to Turnover Tax immediately; and
(b) will return to the Divisional officer enlistment certificate as well as all its attested copies within 15 (fifteen) days of temporary suspension and if there is arrear due, he will pay it and will submit final Turnover Tax return.

Informing changes in registration/enlistment:

Every registered or enlisted person, is required to inform the Divisional officer through the e-VAT system regarding any change in following areas relating to his economic activity in form "**Mushak-2.1**" for online submission and in form "**Mushak-2.4**" for hard copy application within 15 days of change of information:

- ❖ name or type of the business or any other commercial name;
- ❖ address or any other contact details;
- ❖ places of his economic activity;
- ❖ any bank account of such person;
- ❖ nature of one or more of the economic activities;
- ❖ transfer in ownership or partnership;
- ❖ any other prescribed information.

Informing change in place of business:

If and registered or enlisted person needs to change the place of business, he has to submit application to the respective Divisional Officer where he is registered or enlisted 15 (fifteen) days prior to that change.

33.4 Imposition of VAT

VAT shall be imposed and payable on the taxable import and taxable supply; and the payable amount of VAT shall be assessed and determined by multiplying the applicable VAT rate with the value of the taxable import or of the taxable supply.

The rate of VAT

As per section 15 of VAT & SD Act, VAT shall be imposable at:

- 15% on taxable import or taxable supply
- Reduced rate of VAT or specific amount of VAT for the specific goods or service mentioned in the 3rd Schedule of VAT & SD Act, 2012
- 15% VAT instead of reduced rate of VAT or specific amount of VAT as per 3rd Schedule

Particulars	**Rate**
Standard Rate	15%
Reduced Rate	5%, 7.5%, 10%,
	2% for: • Petroleum nature products • 1-1,600sqft for Building Construction firm • Land Development Organization • Flat re-registration 2.4% - Medicine 4.5% - for 1,601sqft above for Building Construction firm
Specific Tax amount	Specific Tax amount
Trade VAT (except traders of Petroleum nature products and Medicine)	7.5%
Wholesale traders	1.5%

Provision related to Wholesale traders-

Wholesaler means a trader, who sells limited types of goods of the same nature in single consignment to the retailer or to any other wholesaler at a large quantity and the place at which it is traded is known as wholesale market. However, if the wholesaler also sells lesser quantity of goods to the final consumer in addition to such sales, he will be treated as Wholesaler.

However, the percentage of retail sale cannot exceed more than 20% of total sales of a tax period. VAT rate for Wholesale traders is 1.5% on its sales.

Conditions

- Applicable for wholesale selling of Clothes (including Saree, lungi, three-pieces etc.) and paper related goods;
- Certificate according to Annexure-Kha has to be received from the Divisional officer based on approval of respective Commissioner;
- No refund of AT

VAT records:

- Issuance of serially numbered tax invoice in form "Mushak- 6.3Ka" as per Annexure-Ga during supply of goods
- Maintaining records in form "Mushak -6.2.1Ka" as per Annexure-Gha
- Submission of VAT return in form "Mushak-9.1.1" after end of three tax period (alternatively, provision for voluntary submission after end of each tax period is available).

Persons liable to pay VAT

- In relation to taxable import – the importer
- In relation to any taxable supply in Bangladesh – the supplier
- In relation to any taxable supply of imported service – the recipient of supply
- In relation to other cases – Supplier or recipient of supply

Supplies made in Bangladesh:

The following supplies shall be treated to be made in Bangladesh namely–

a. any supply made by a resident;
b. any supply made by a non-resident carrying on an economic activity at or through a specified place in Bangladesh;
c. any supply other than the ones mentioned in clause (b) made by a non-resident if the supply-
   (i) relates to immovable property and land attached to it situates in Bangladesh;
   (ii) relates to any goods and that is transferred, conferred, installed or assembled in Bangladesh;
   (iii) is any of the following and is made to an unregistered person -
      a) the services are physically performed in Bangladesh by the service provider staying in Bangladesh at the time of supply;
      b) the services are directly related to land located in Bangladesh;
      c) the services are radio or television broad-casting or telecasting services received at an address in Bangladesh;

d) the services are electronic services delivered to a person located in Bangladesh at the time of supply;

e) the supply is of a telecommunications service that is initiated by a person who is located in Bangladesh at the time of supply, other than a telecommunications supplier or a person who is a global roaming temporarily staying in Bangladesh.

VAT Agent of non-residents

A non-resident, who does not carry on an economic activity from a specified place in Bangladesh, shall appoint a VAT Agent in terms of section 19 of the VAT & SD Act.

Such VAT Agent of a non-resident shall bear all responsibilities and carry out all activities of the non-resident.

However, the non-resident shall be liable for the payment of all dues including taxes, fines, penalties, and interests that may be imposed on the non-resident.

An online application in the form **"Mushak-3.1"** is needed to be made to the Director General, Customs, Excise and VAT Training Academy in order to be appointed as VAT Agent.

For example-

Non-residents providing electronic services viz. following services on or through a telecommunications network, a local or global information network, or similar means in Bangladesh are required to appoint a VAT Agent in case of providing services to VAT unregistered person:

- websites, web-hosting or remote maintenance of programmes and equipment
- Software and updating thereof by way of remote delivery of services
- Images, texts and information delivered
- Access to databases
- Self-education packages
- Music, films and games and
- Political, cultural, artistic, sporting scientific and entertainment broadcasts and telecasts and events, including telecasts

Imposition and collection of VAT on imported service

All services imported into Bangladesh, except the exempted services mentioned in the First Schedule, shall be considered as taxable supplies and the VAT applicable on such supplies shall be 15 (fifteen) percent.

The liability to pay VAT payable on the value of imported services prescribed in accordance with Section 32, shall lie with the recipient of the service supply, which shall be the output tax of such person.

If any person, carries on economic activity from more than one places within and outside of Bangladesh:

(a) such person shall be treated as separate persons; and
(b) if a person within the country receives any taxable service from a person outside the country shall be considered as an import of service;

A bank or any other financial imstitution or an authorized foreign exchange dealer, deposit the applicable VAT to the government treasury through Treasury Challan on behalf of the importer of the service mentioning the importer's circle code and economic code while making partial or full payment for imported services and a copy of the said "treasury challan"

shall be provided to the service importer as proof of tax payment, which shall be considered as a tax invoice for the service importer.

If imported service is treated as input of the service importer, he shall be entitled to take input tax credit against the above-mentioned tax invoice complying the provisions of Section 46 of the Act.

Payment of VAT on imported services

NBR has issued "VAT Deduction and Collection at Source Rules, 2025" [SRO No. 182-Law/2025/310-Mushak dated 27 May 2025 w.e.f. 01 July 2025] which provided clarification on payment of VAT on imported services.

In case where the recipient of supply of imported services is:

Unregistered person: In case of import of services by an unregistered person, the concerned bank shall collect or deduct VAT at source at the rate of 15 (fifteen) percent, at the time of payment of service value to a non-resident person located outside Bangladesh and make an increasing adjustment in the VAT return of the bank for the relevant tax period.

Registered person: In the case of import of services by a registered person-

(a) The liability to pay VAT applicable against 'import of services' as per section 20 of the Act shall lie with the service receiver, i.e. the VAT paid shall be the importer's output tax. In case, partial or full value of imported services is paid through any bank or a financial institution or any authorized dealer, the bank shall deposit the applicable VAT for the said service into the government treasury on behalf of the importer using the importer's relevant circle code or economic code-and provide a copy of the treasury challan to the importer. This treasury challan shall be treated as a tax invoice for the importer.

(b) The service importer shall record the output tax payable against the imported service in Part 3 (Supply - Output Tax) of the return and make an entry in Note-58 of Part 9 (Treasury Deposit) regarding the payment of the tax to the government treasury. The importer shall record and display the VAT paid against the imported service to the extent that it is eligible for input tax credit under the provisions of Section 46 of the Act-in Part 4 (Purchase Input Tax) of the return.

Zero-rated goods/services supply

The following supplies are zero-rated supply:
In case of **goods**:

- Supply of goods for export (not applicable to any goods re-imported or intended for re-import)
- Goods located outside Bangladesh at the time of supply (such goods are not assembled, installed or imported into Bangladesh, by the supplier)
- Supply of Goods anywhere outside Bangladesh after it is imported but before it is entered for home consumption (such goods shall be deemed to have been located outside Bangladesh at the time of supply)
- Supply of any goods to a Tourist or to a foreign Visitor (For consumption outside Bangladesh and Seller holds a license to sell duty-free goods)
- Supply of Goods outside Bangladesh on lease, hire, under license or other supplies relating to use of such goods (If goods remain outside Bangladesh during the whole of the specified period)

- Supply of a goods usable for repair, maintenance, cleaning, renovation, modification or other similar work of any goods under specific terms and conditions
- Supply of goods for the repair or replacement of a goods under warranty under specific terms and conditions
- Supply of a goods usable for repair, maintenance, cleaning, renovation, modification or other similar work of any goods (Physically affecting an ocean-going ship or an aircraft or any other vessel of the like kind engaged in international transport)
- Supply of stores, or of spare parts relating to an aircraft or an ocean-going ship engaged in international transport (Stores or parts are for use, consumption, or sale on the aircraft or the ship during a flight or a voyage)

In case of **services**:

- Supply of service directly related to any land situated outside Bangladesh
- Supply of service physically given on goods situated outside Bangladesh
- Supply of a service of repair, maintenance, cleaning, renovation, modification etc. of any goods under specific terms and conditions
- Supply of service included in the customs value of an imported goods
- Export of service outside Bangladesh
- Supply of a service outside Bangladesh for the protection of intellectual property rights and relating to filing of a case, its prosecution, conferment of right, its protection, transfer, transfer of right, Licensing or enforcement of rights
- Supply of telecommunications service by a telecommunications supplier to a non-resident telecommunications supplier
- supply of a service in favour of a goods under warranty of repair or replacement under specific terms and conditions
- Supply of insurance services to the international transport of goods
- Supply of services of repair, maintenance, cleaning, renovation, modification, or otherwise physically affecting an aircraft or an ocean-going ship engaged in international transport
- A supply to a non-resident and a non- registered, of services directly connected to the operation or management of an ocean-going ship or an aircraft engaged in international transport

Point to note:

- If any supply is both exempted and zero-rated, then the said supply shall be treated as zero-rated.
- 0% on export, of any goods whether re-imported or intended to be re-imported, **shall not** be applicable

Supply of goods for export

Examples of Deemed Export

1. Work order obtained vide international tender by a VAT registered person in Bangladesh:
    - For supplying any goods or services within Bangladesh through letter of credit or agreement in foreign currency
    - Subject to submitting certain documents to the Divisional officer

2. Performance of partial activity (included in the work order obtained in international tender by any organization located inside or outside Bangladesh) by a VAT registered person in Bangladesh

   - Against letter of credit established in foreign currency
   - For supplying any goods or services within Bangladesh
   - Subject to submitting certain documents to the Divisional officer

VAT exemptions

The following supplies shall be exempted from VAT:

- Any supply or import specified in the 1st Schedule of VAT & SD Act 2012
- Goods or services subject to Turnover Tax
- Supply in respect of receiving exempt supplies or future right of purchase or sale
- As per SRO No. 127-Law/2026/332-VAT dated 7 June 2026 w.e.f. 11 June 2026, goods at import stage listed in Table-1, Goods at both import and manufacturing stage listed in Table-2, Goods at manufacturing stage listed in Table-3, services listed in Table-4 and goods at trading stage listed in Table-5 and at Manufacturing and Trading stage for goods of SRO No. 203-Law/2025/25/Customs dated 29 May 2025 w.e.f. 02 June 2025 for entity enjoying concessionary benefit subject to conditions.
- Exemption above the amount as mentioned in tables of SRO No. 164-Law/2025/292-VAT dated 27 May 2025 w.e.f. 02 June 2025.

Table-1 (Import Stage)

Heading No.	H.S. Code	Details of goods	Amount of VAT
72.01	7201.10.00	Non-alloy pig iron containing by weight 0.5% or less of phosphorus	Tk. 1,200 (per M.T.)
	7201.20.00	Non-alloy pig iron containing by weight more than 0.5% of phosphorus	
	7201.50.00	Alloy pig iron; spiegeleisen	
72.03	7203.10.00	Ferrous products obtained by direct reduction of iron ore	Tk. 1,000 (per M.T.)
	7203.90.00	Other	
72.04	7204.10.00	Waste and scrap of cast iron	Tk. 1,800 (per M.T.)
	7204.21.00	Of stainless steel	Tk. 600 (per M.T.)
	7204.29.00	Other	Tk. 1,800 (per M.T.)
	7204.30.00	Waste and scrap of tinned iron or steel	
	7204.41.00	Turning, shavings, chips, milling waste, sawdust, filings, trimmings and stampings, whether or not in bundles	
	7204.49.00	Other	
	7204.50.00	Remelting scrap ingots	
89.08	8908.00.00	Vessels and other floating structures for breaking up	Tk. 1,800 (per M.T.)

Table-2 (Manufacturing Stage)

Heading No.	H.S. Code	Details of goods	Amount of VAT
72.02	7202.11.00 & 7202.30.00	(a) Ferromanganese and Ferro-silico-manganese alloy	Tk. 1,500 (per M.T.)
	7202.21.00	(b) Ferro-silicon alloy	Tk. 1,900 (per M.T.)

Table-3 (Trading Stage)

Heading No.	H.S. Code	Details of goods	Amount of VAT
72.13 to 72.16	Related H.S. Code	MS products	Tk. 200 (per M.T.)

Imposition of Turnover Tax

Turnover tax shall be @ 4% of turnover.

As per section 45(2) of the VAT & SD Act, the net payable tax assessed in the process outlined under sub-section (1) of section 45 shall, in the prescribed manner, be paid by the taxpayer before filing the return for such tax period and as per Rule 25(1) of the VAT & SD Rule, the registered or enlisted person, after determining the net tax of a specific tax period shall pay it to the government treasury in specific code of accounts. So turnover tax is required to be paid before submission of turnover tax return.

No input tax credit is allowed for both the seller and buyer of goods or services enlisted for Turnover Tax.

33.5 Manner of VAT Collection

A.1: On Imports

VAT on the taxable imports shall be collected in the same manner and at the same time as the customs duty collects on such imports under the Customs Act even if import duty is not imposable on such import.

Determination of value of taxable imports

In case of importation of goods, the amount on which the VAT will be payable, will be determined by adding:

a. the value of goods determined for the imposition of import duty as per Customs Act; and
b. Customs Duty (CD), Regulatory Duty (RD), Supplementary Duty (SD), or other duties and taxes {except Advance tax (AT), and Advance Income Tax (AIT)} payable on the import of the goods, if any.

Calculation of value of taxable supply at import stage:

The value of goods assessed for the purpose of imposing import duties under the Customs Act, i.e. Assessable Value (AV) is determined under section 27 of the Customs Act, 2023.

Example: AV is Tk 50,000, CD @25%, RD @5%, SD @20%, VAT @15%, AT @7.5%

Tax Type	Base value Formula	Base Value	Tax Rate	Tax Amount
CD	AV *Rate of CD	50,000	25	12,500
RD	AV *Rate of RD	50,000	5	2,500
SD	AV+CD+RD =Total Value *Rate of SD	65,000	20	13,000
VAT	AV+CD+SD+RD =Total Value *Rate of VAT	78,000	15	11,700
AT	AV+CD+SD+RD =Total Value *Rate of AT	78,000	7.5	5,850
				45,550

A.2: Re-imported goods after being exported

Determination of value of re-imported goods

Base value to impose VAT shall be total of followings:

- value to the extent that it is enhanced as a result of the repairments, plus
- expenses incurred on their insurance, freight and landing charges

Provided that the forms, features, characteristics and the qualitative standards of the goods remain unchanged after such repairs.

A.3: Imports for exports

A goods brought for export, without being released for consumption inside Bangladesh, **shall not** be liable to pay any VAT.

Advance Tax

Advance Tax (AT) @ 7.5% shall be payable on the value of the taxable import at the same time and in the same manner as VAT is payable.

Every registered or enlisted importer who has paid advance tax at import stage can make decreasing adjustment (except wholesale traders paying 1.5% on its sales) of the total AT paid in the same tax period or within next six tax period. If percentage (%) of value addition does not exceed 50%, Commercial Importer shall not require to pay VAT at first supply of such goods subject to issuance of Tax Invoice in prescribed manner.

In this regard, NBR has issued a General Order regarding the procedures for adjustments of AT and payment of VAT at local stage after import by commercial importer. [G.O. No.-06/VAT/2025 dated 15 July 2025 w.e.f. 15 July 2025]

The rate of advance tax applicable on the import of raw materials used for manufacturing/production purposes is 2%.

The following documents are required to be submitted to the customs house station to avail the benefit:

- ✓ Attested copy of VAT registration certificate as manufacturer
- ✓ Attested copy of Input-Output Coefficient submitted to Divisional office
- ✓ Attested copy of updated Industrial IRC
- ✓ Certificate/VAT Honour Card for submission of VAT Return of previous 12 tax periods or specified tax periods in applicable cases from the VAT online system**.** If VAT return submission certificate/VAT Honour Card cannot be received from VAT online system for a

logical reason, then certificate/VAT Honour Card issued from the respective divisional Officer shall be submitted.

Any unregistered person who has paid AT may also claim refund by applying to the Commissioner in prescribed form.

Conditions and procedure for claiming refund of AT paid:

- Importer is the ultimate consumer of the imported goods.
- File an application to any nearest Commissioner in **"Mushak-4.1"** form within 120 (One hundred and twenty) days from the date on which advance tax has been paid. The Commissioner, after verifying the received application if found to be proper shall issue a crossed cheque after approving the refund in favor of the applicant within 15 (fifteen) days of the receipt of the application or issue an order to transfer the approved money to the bank account of the applicant.

AT exemption

- Any import specified in the 1st Schedule of VAT & SD Act 2012
- Goods specified in SRO No. 181-Law/2025/309-VAT dated 27 May 2025 w.e.f. 02 June 2025 (SRO related with AT exemption)

However, for VAT exempted goods as per SRO No. 127-Law/2026/332-VAT dated 7 June 2026 of IRD, MoF, GoB, there is no exemption for AT.

B: On General Supplies

Determination of value of taxable supply

Section 32 of VAT & SD Act, states that, subject to the provision of this section, the value of a taxable supply shall be the consideration for such supply, reduced by an amount equal to the tax fraction of that consideration.

Example 1: The price of a laptop is Tk. 50,000. (VAT is included @15%). What is the value of the taxable supply?

Particulars	Tk
Price	50,000
Tax fraction (@15%)	15/115
VAT	6,522 (50,000 x 15/115)
Value of taxable supply	**43,478 (50,000 – 6,522)**

Example 2: The price of a mobile phone is Tk. 50,000 (inclusive of VAT @15%). If Supplementary Duty (SD) @10% is applicable, then what is the total Tax payable?

Particulars	Tk
Price	50,000
VAT fraction (@15%)	15/115
VAT	6,522 (50,000 x 15/115)
Value of taxable supply	43,478 (50,000 – 6,522)
SD	**3,953 (43,478 x 10/110)**
Total payable tax (SD + VAT)	**10,475 (3,953 + 6,522)**

Determination of value of taxable supply between associated entities

The value of taxable supply of goods or service which a registered person makes to an **associate** will need to be at the fair market price of such supply, reduced by the tax fraction of that price.

The value of a taxable supply a registered person makes to an associate shall be the fair market price of such supply, reduced by the Tax fraction of that price, if-

- Such supply is made for no consideration or for a consideration that is lower than the Fair Market price; and
- Such associate would not be entitled to a credit for all of the input tax arising out of such supply.

Determining fair market price

NBR has further issued SRO No. 180-Ain/2019/37-Mushak dated 13 June 2019, which prescribes regarding fair market price as follows:

(Ka). Where the buyer and seller are not associated parties, and that the fixation of the price of supply is not influenced by their non-association but is based on the normal buyer-seller relationship, then such price will be treated as fair market price for the said supply.

(Kha). Where the buyer and seller are associates and that the price at which the supply of identical or similar goods is made is equal to earlier determined price of the said supply or, if it does not change below or more than 7.5% of the earlier determined price, in that case, the price will be treated as fair market price

(Ga). Where the buyer and seller are associates and that the price at which the supply of identical or similar goods is made is not equal to earlier determined price of the said supply or, if it decreases or increases more than 7.5% of the earlier determined price, in that case, the fair market price will need to be determined based on the **five methodologies prescribed in this SRO**.

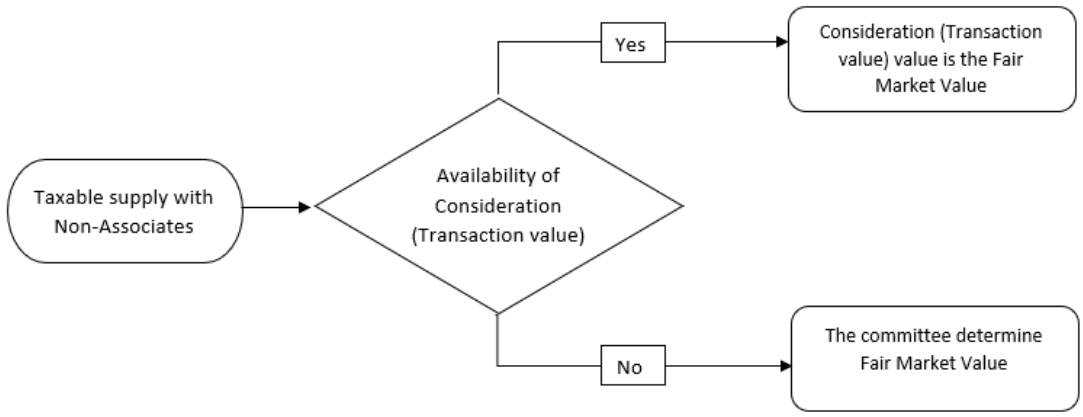

The five methods are as follows:

(1) Comparative method
(2) Deductive-inductive method
(3) Computed method
(4) Wholistic method
(5) Objective approximation method*

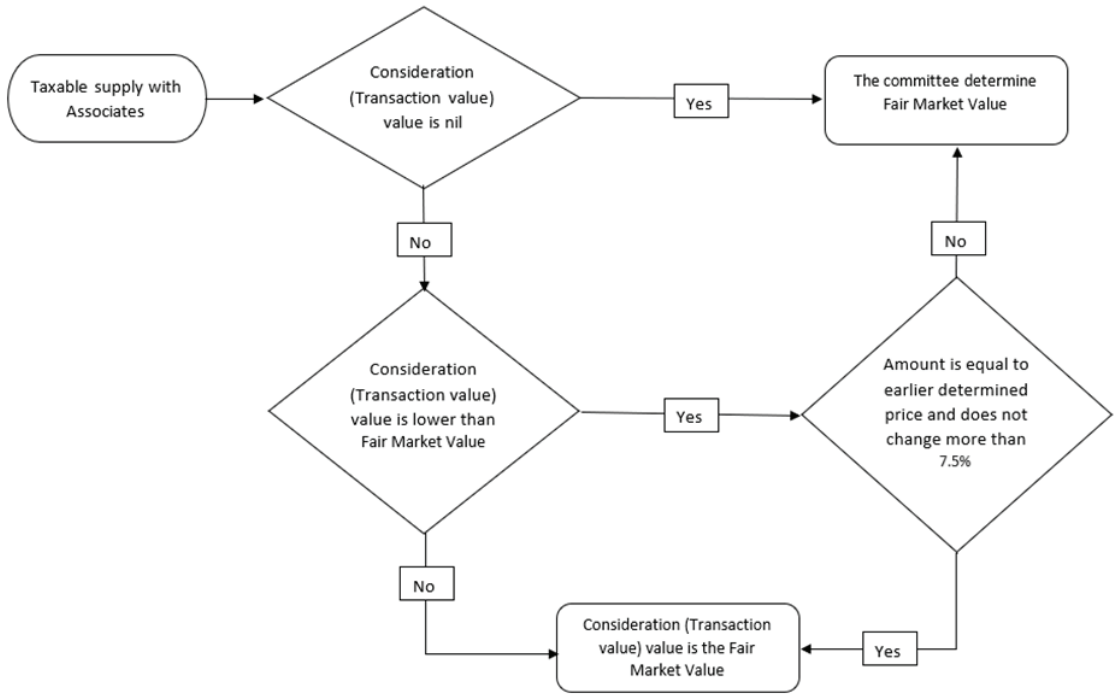

*Serial No. (5) can be applied without following the sequences upon approval from the Additional Commissioner or the Joint Commissioner. In such case, the committee to be formed by the Additional Commissioner or the Joint Commissioner will consider the average prices of minimum three and not exceeding seven identical or similar products of which price was earlier determined at the time of transaction between non-associated parties.

Determining fair market value

Non-Associates

Associates

Non applicability of Fair Market Value determination rules

- Unit price as determined by any offices or agencies of Govt. for any goods or services including Medicine and Petroleum nature products, shall be deemed to be fair market value

- In case of supply of any goods or service through tender, price mentioned in the tender shall be considered as fair market value

Determination of value of supply without consideration

Any registered person can make a supply of a maximum value of 50,000 (fifty thousand) taka as sample in a fiscal year.

Example: Company "ABC Ltd." launches a new product. To promote the product, they decide to give some products as sample to its customer worth Tk. 80,000 for one fiscal year.

VAT Implication is as follows:

No VAT on Tk. 50,000.
For remaining Tk. 30,000 will be treated as a taxable supply.

Cases where determining fair market value is applicable

Determining fair market value is applicable in case of the following situations within the purview of VAT & SD Act:

- For determining the value of free samples within the allowable limit of BDT 50,000 per fiscal year
- Determining the value of consideration of services imported from or supplied by associated person
- Determining the value of taxable supply made to an associate in exchange of zero consideration or price below fair market price and also where the associate cannot claim full input tax credit
- Supply of service or of immovable property to an employee without consideration or at a value less below fair market price
- Quantity of goods subject to SD which have not been previously accounted properly and are being identified during an audit investigation
- Any goods or services which have supplied without any consideration or with inadequate consideration on which SD is imposable

Declaration of Input-Output Coefficient

Any registered or enlisted person shall have to submit an input-output co-efficient in form "VAT-4.3" to the Divisional Officer or in online eVAT system after manufacture or prior to supply of goods, a copy of which the Divisional Officer shall send to the concerned Commissioner with recommendation within 15 (fifteen) working days.

However such declaration shall not have to be submitted in cases prescribed by the Board, in the case of service rendered by the service provider and exportable or exported goods by hundred percent export-oriented industries.

If any goods are exempted fully or partially at the local manufacturing stage by notification, at the time of any subsequent supply- any registered or enlisted person shall have to submit an input-output co-efficient in form "VAT-4.3.1" to the Divisional Officer or in online eVAT system prior to supply of goods, a copy of which the Divisional Officer shall send to the concerned Commissioner with recommendation within 15 (fifteen) working days.

Time of payment of VAT on taxable supply

Section 33 of VAT & SD Act, provides relevant provisions regarding the time of payment of VAT.

The VAT imposed on a taxable supply shall become payable on the earliest occurrence of any of the following events:

- when such supply is made
- when a tax invoice for such supply is issued
- when a part or the whole of the consideration is received
- When supply made for personal use or given to others for use.

Progressive or periodic supplies

If any supply is considered as progressive or periodic supply, VAT imposed on such supply shall be payable on the earliest occurrence of any of the following events:

- when separate invoices are issued for each such supply;
- when receivable consideration against each such supply is received in part or in full;
- when the price against progressive supplies becomes payable;

If a progressive or periodic supply of water, gas, fuel or electricity is made through a distribution network, the imposed VAT shall become payable within 90 days from the date on which invoices against each such supply are issued.

C: On Special Supplies

1. Sale of an establishment as a going concern

VAT will not be imposed if:

- Sale of a business which is acquired with an intent to carry on as a going concern will not be considered as a supply made in Bangladesh.
- A part of a running business establishment which is capable of being operated separately, such part shall be regarded as a separate economic activity and will fall under the scope of running business.

Method of selling a going concern

Seller and purchaser of any going concern shall submit continuous and unconditional bank guarantee of a scheduled bank of an amount equivalent to all payable tax and arrears to the Commissioner by a joint application in form "Mushak-4.2" before a minimum of 15 (fifteen) days of the sale of such business. Upon receipt of the application, the Commissioner will provide his approval to the sale of the going concern within 7 days, subject to verification of the submitted bank guarantee.

The seller of the going concern shall furnish to the purchaser of such business the following information, viz–

(a) latest updated information regarding ownership;
(b) complete financial statements;
(c) statement of all properties;
(d) statement of all debts;
(e) information regarding cases;
(f) statement of registration, license etc. of different government agencies; and
(g) other related information.

2. Supply of prepaid telecommunications products or services

Where a telecommunications supplier supplies a prepaid telecommunications product or a service at a discount to a telecommunications intermediary, the consideration for such a supply shall be assessed inclusive of the discount.

Where a telecommunications intermediary buys and sells a prepaid telecommunications product, such sale shall not be treated as a taxable supply.

Example: PQR Ltd. is a telecommunication products intermediary who is buying airtime from GP and Robi and selling the same to distributors as well as subscriber. PQR is purchasing airtime value of Tk. 100 at 95 from GP/Robi and selling the same to distributors at Tk. 97 or subscribers at Tk. 100.

As GP/Robi pays VAT at the time of selling the products to PQR, PQR as well as distributors of PQR will not be liable to pay any VAT.

3. Value of in-kind benefits given to an employee or officer

Where a person, registered or required to be registered:

- Makes a supply of an in-kind benefit in lieu of cash to any of his employees or officers, the price of such in-kind benefits shall be taxable.
- Supplies to any of his officers or employees a service or an immovable property without a consideration or at a price less than the fair market price, the value of such service or such immovable property shall be its fair market price.

4. Lay-by Sales

Where a supply of goods is made under a lay-by agreement–

(a) the output tax on such supply shall become payable when payments for such supply are made and, in each tax period, taxes shall be assessed and paid at the time of payment of the price; and

(b) the amount of assessed output tax in each tax period shall be the tax-fraction of the payments made in that period.

5. Treatment of cancelled Transaction

If a transaction is cancelled, and a portion of the consideration previously received is retained by the supplier, then the tax applicable on the portion thus retained may be adjusted while making adjustments.

If a transaction for any supply is cancelled and the supplier realizes any money from the recipient as a consequence of the cancellation, the amount shall be treated as the consideration for the supply in the tax period in which it is realized, and taxes shall be payable.

6. Sale of property in satisfaction of a debt

Where a person (the creditor) takes a supply, by way of sale, of the property of another person (the debtor) in full or partial settlement of a debt owed by the debtor to the creditor,–

a. the supply is deemed to have been made by the debtor;

b. the creditor is liable to pay the VAT, if any, payable on the supply; and

c. the VAT is payable in priority to the settlement of the debt before returning to the debtor of any part of the proceeds that is surplus to the debt.

The debtor is jointly and severally liable with the creditor for the VAT payable.

A creditor who is not registered but is required to pay VAT because of this section, for the conditions and in such manner as the Board prescribes.

7. Second-hand goods purchase for resale

Second-hand goods are classified as goods (with the exception of precious metal or goods made from precious metal) which have been used previously.

Second-hand goods are subject to VAT, although such VAT can be adjusted against output VAT if such goods are purchased for the purpose of reselling (without any manufacturing activities). Therefore, VAT imposable on second-hand goods that are not bought for resale will be a cost.

33.6 Assessment of Net Payable Tax by the Taxpayer & Payment Thereof

The amount of net tax payable by a taxpayer for any tax period shall be assessed in the following manner:

Net payable tax = Output Tax – Input Tax (Credit) + Increasing Adjustment – Decreasing Adjustment

Case study: Net VAT calculation

New Bangla Private Ltd. (NBPL) is an enterprise registered with Dhaka North VAT Commissionerate and engaged in shoe manufacturing. They imported raw materials from Japan paying VAT of Tk 300,000 and Advance Tax of Tk. 60,000. They have purchased raw materials from ABC Ltd. For Tk 2,500,000

NBPL purchased another type of raw materials from a registered proprietorship firm MS Hasan Traders (HT) having value of Tk 200,000 and payment is done through account payee cheque. AB Legal submitted an invoice of Tk 200,000 without issuing Form Mushak-6.3.

They sold goods with 100 invoices aggregating to Tk 7,000,000 to their customers. Out of 100 customers, 3 of them refunded some goods worth of Tk 300,000.

All these transactions took place in July 2025.

Calculate net VAT for this tax period.

Solution:

Output Tax (OT)
=Total taxable sales x tax fraction
=7,000,000 x 15/115
=913,043.48

Input Tax (IT)
(a) VAT at import = 300,000
(b) From ABC = 2,500,000 x 15/115 = 326,086.96
(c) From HT = 200,000 x 15/115 =26,086.96

Total = 652,173.92

Net payable Tax = OT – IT + IA – DA
= 913,043.48 - 652,173.92
+ 26,086.96 - 99,130.43
= **187.826.09**

Increasing Adjustment (IA)
=VDS from AB legal
=200,000 x 15/115
=26,086.96

Decreasing Adjustments (DA)
AT = 60,000
Goods Returned = (300,000 x 15/115) = 39,130.43
Total = 99,130.43

Note: As per SRO No. 182-Law/2025/310-VAT dated 27 May 2025 w.e.f. 01 July 2025, VDS amount needs not to be deposited separately, rather such can be shown as increasing adjustment in the VAT return of respective tax period.

33.7 Input Tax Credit

A registered person shall be entitled to an input tax credit of paid VAT against the VAT imposed on a taxable supply.

Conditions for claiming Input tax credit

Registered person can't claim Input tax credit unless the following conditions are met-

- Importer issues tax invoice with goods declaration number. And description of the goods in tax invoice (**"Mushak-6.3"**) must match with goods declaration.
- Output VAT on supply must be @ 15% (except export).
- Input has to be mentioned in "Input-Output Coefficient declaration" (**"Mushak-4.3"**) as input.
- Input tax credit must be claimed in same tax period or next six tax period.
- Inputs needs to be recorded on purchase register (**"Mushak-6.1" or "Mushak-6.2.1"**).
- Full payment made through MFS or banking medium, if value of taxable supply exceeds Tk. 1 lakh (**Other than intracompany transaction).**

Point to note: Input tax credit can only be claimed through VAT Return.

Input Tax credit not allowable under following circumstances:

(a) Other than intracompany transaction, if the value of a taxable supply exceeds Tk. 100,000 (one lakh) only and the consideration against such supply is paid through means other than by banking medium or Mobile Banking medium;

(b) imported services for which output VAT has not been shown in the VAT Return separately in terms of section 20;

(c) claim of input tax credit which have not been made either in the tax period or within six succeeding tax periods in which input has been purchased or acquired;

(d) VAT paid on the goods or services under the custody or possession or supervision of another person except contract manufacturing;

(e) VAT paid on inputs that have not been entered into the Purchase Account Book or Purchase-Sale Account Book prescribed by the Rules;

(f) If name, address and BIN of both the purchaser and seller does not mention in Tax invoice (Mushak-6.3);

(g) when supply is received from the importer, if the invoice issued by the importer does not contain the goods declaration number of the concerned import consignment and when there is no match between the commercial description of the goods supplied in the invoice issued by the importer and description in the goods declaration;

(h) input tax involved with Bank Guarantee portion, in case of raw-materials or goods released furnishing Bank Guarantee, until, the causes for which Bank Guarantee was furnished have been finally settled. However, provided that in such settlement, input tax credit may be availed within six tax periods following the date of release of the bank guarantee or the date of final payment of duties and taxes, whichever is later;

(i) input tax paid on inputs used in manufacturing of exempted goods or rendering of exempted services;

(j) Turnover Tax paid under the purview of turnover tax;

(k) Supplementary Duty paid on goods or service used in the manufacture of goods or rendering of service;

(l) VAT paid at a specified rate or at a rate less than 15% (except in case of export);

(m) Input tax paid against such inputs or goods not declared in the Input-Output Coefficient Declaration as input, except in case prescribed by the Board and for supply of service;

(n) Additional input tax in excess of 7.5% will not be allowed for credit if a new Input-Output Coefficient Declaration is not submitted in case of changes more than 7.5% in the total price of the input;

(o) if goods or services are supplied at a price less than the input price, the amount of input tax exceeding payable output tax;

(p) purchase of passenger vehicle or entertainment services, provided that, input VAT credit may be allowed when such purchases are part of normal course of the economic activities of the person (e.g. dealer or charterer of vehicles);

(q) such acquisition relates to a person's membership or right of entry in a club, association, or society, of a sporting, social, or recreational nature.

Documents required for claiming Input tax credit

A registered person shall, in support of his claims for input tax credit at the time of filing of returns, be in possession of the flowing documents, namely–

- **in case of an import** - a goods declaration bearing the name of the importer, address and the business identification number;
- **in case of a supply** - a tax invoice ("**Mushak-6.3**") issued by the supplier;
- **In case of imported service**- a copy of treasury challan in support of deposit of VAT;
- In case of Gas, Water, Electricity, Telephone bill, Bank, Insurance and Port, bill are considered as Tax Invoice;
- In case of electricity bill- Invoice issued by Bank, mobile banking service provider and digital payment gateway organization against paid electricity bill, will be treated as tax invoice as per defined terms and procedures.

Partial Input Tax Credit

Where, standard rated or reduced rated or specific amount of tax or exempted or zero-rated or some of such or all of such goods or services are supplied by a registered person, VAT paid on input will be taken as credit in case of supply of zero rated and standard rated goods and services only and in such case, after receiving the supply of goods or services as input, the registered person will be admissible for taking input tax credit against the entire supply in pursuance of section 46, provided that after the end of the relevant tax period, increasing adjustment of taken credit against supply of reduced rated or specific amount of tax or exempted or some of such or all of such goods or services (input) will be disclosed in the VAT return.

33.8 Withholding VAT

VAT deduction/collection at source

❑ If a supplier makes a supply, which is not exempted or zero- rated, to a withholding entity under an agreement, tender or work order or by any other means, the withholding entity shall withhold VAT at source at specified rate as determined by the rule from the consideration payable to the supplier.

- If a supplier is not registered or enlisted, and if a tax invoice is not issued, the withholding entity shall not receive any supply from such supplier and shall not pay against such supply to the supplier. However, if the withholding entity purchase from an unregistered or not enlisted person, withholding entity shall be responsible to pay applicable VAT.
- NBR issued SRO No. 182-Law/2025/310-VAT dated 27 May 2025 w.e.f. 01 July 2025, according to which, Withholding Entities are required to deduct VAT at source (VDS) in case of the following list of services irrespective of the applicable rate of VAT:

SL No.	Service Code	Description		Rate of VDS
01	S001.10	AC Hotel		15%
	S001.10	Non-AC Hotel		10%
	S001.20	Restaurant (except restaurant located in three-star or above standard residential hotel enlisted under Ministry of civil aviation and tourism, restaurant located in residential hotel with liquor bar and restaurant with liquor bar)		5%
02	S002.00	Decorators and Caterers		15%
03	S003.10	Motor Garage and Workshop		10%
04	S003.20	Dockyard		15%
05	S004.00	Construction Firm		10% (For contracts signed prior to June 30, 2025 – VAT above 7.5% is exempted)
06	S007.10	Advertising Firm		15%
	S007.20	Online advertisement		5%
07	S008.10	Printing Press		15%
08	S009.00	Auctioneers Establishment		15%
09	S010.10	Land Development Organization		2%
10	S010.20	Building Construction Organization	a. Up to 1- 1600 sq. feet	2%
			b. More than 1600 sq. feet	4.5%
			c. Re-registration irrespective of size	2%
11	S014.00	Indenting Organization		15%
12	S015.10	Freight Forwarders		15%
13	S017.00	Community Center		15%
14	S020.00	Survey Firm		15%
15	S021.00	Plant or Capital Equipment Rent Providing Organization		15%
16	S024.00	Furniture distribution center	a) at manufacturing stage (VAT @15%, in case of supply directly from the factory of manufacturer to the consumer)	7.5%
			b) at distribution stage (show room)	7.5%

SL No.	Service Code	Description		Rate of VDS
			[subject to having 7.5% VAT paid Tax Invoice at manufacturing stage. Otherwise, 15%]	
17	S028.00	Courier and Express Mail Service		15%
18	S031.00	Repairing or servicing of taxable goods in exchange of money by a person, organization or agency		15%
19	S032.00	Consultancy and supervisory firm		15%
20	S033.00	Lessor		15%
21	S034.00	Audit and accounting firm		15%
22	S037.00	Procurement provider		10%
23	S040.00	Security Services		15%
24	S043.00	Television and online broadcast program provider		15%
25	S045.00	Legal Advisors		15%
26	S048.00	Transport Contractor	a. In the case of petroleum transportation	5%
			b. In any other cases	15%
27	S049.00	Rent-A-Car service provider		15%
28	S050.10	Architect, Interior Designers or Interior decorators		15%
29	S050.20	Graphic Designer		15%
30	S051.00	Engineering firm		15%
31	S052.00	Sound and Lighting instrument renter		15%
32	S053.00	Participants in board meetings		15%
33	S054.00	Advertisement Broadcasting agency through Satellite channel		15%
34	S058.00	Rental of chartered planes or helicopters		15%
35	S060.00	Purchaser of auctioned goods		15%
36	S065.00	Building, Floor and Premises cleaning/maintenance establishment		15%
37	S066.00	Lottery's Ticket Seller		15%
38	S067.00	Immigration advisor		15%
39	S071.00	Event management		15%
40	S072.00	Human resource supplier or management organization		15%
41	S083.00	Semiconductor assembly, testing and packaging service		15%
42	S099.10	Information Technology Enabled Services		5%
43	S099.20	Other Miscellaneous services		15%
44	S099.30	Sponsorship services		15%
45	S099.50	Credit Rating Agency		15%

Technical Note: VDS must be adjusted in the same tax period in which the VAT was deducted on the supply of goods or services or within the next 6 tax periods following the month of payment. If it cannot be adjusted within the timeline, it will be elapsed. Withholding VAT Certificate (Mushak-6.6) is required in case of making decreasing adjustment for VDS.

Goods/services that are exempted from VDS:

- Goods supplied by manufacturers at any VAT rate accompanied with Tax Invoice (Mushak-6.3)
- Goods supplied by trader with Tax Invoice (Mushak 6.3) mentioning the rate of VAT at 15%, subject to providing certificate/VAT Honor Card received from eVAT system or certificate/VAT Honor Card received from respective Divisional Officer (logical reason, if fails to receive the same from eVAT system relating to regular submission of VAT Return.
- Provision of services that are subject to VAT at any rate and are not mentioned in the Mandatory VDS list (as above) as per SRO No. 182-Law/2025/310-VAT dated 27 May 2025 w.e.f. 01 July 2025.
- Supply of utilities such as fuel, gas, water (WASA), electricity, telephone, mobile phone bill.
- Supply of goods and services which are exempted under the 1st Schedule of the VAT & SD Act, 2012
- Supplies that are considered zero rated within the purview of section 21 of the VAT & SD Act, 2012
- If furniture manufacturer, Advertisement agency and Television and online broadcast program provider through Satellite channel issues tax invoice duly attested by RO or ARO with the rate of 15%.
- Tax Invoice (Fiscal Receipt) issued from Electronic Fiscal Device (EFD) or Sales Data Controller (SDC) or Public Key Infrastructure (PKI) or Point of Sales (POS) wherein name and BIN number of purchasers are incorporated.
- Purchase of local medicine from trader.
- Any supply by a registered startup organization.
- If a contract manufacturer issues Form VAT-6.3 displaying VAT at the rate of 15 (fifteen) percent.
- Any service falling under SRO No. 186-law/2019/43-VAT, dated 13 June 2019, other than those services as mentioned in the table of the VDS Rules.

VDS Against Import of Service from Outside the Geographical Area of Bangladesh

(1) **Unregistered person: I**n case of import of services by an unregistered person, the concerned bank shall collect or deduct VAT at source at the rate of 15 (fifteen) percent, at the time of payment of service price to a non-resident person located outside Bangladesh and make an increasing adjustment in the VAT return of the bank for the relevant tax period.

(2) **Registered person:** In the case of import of services by a registered person-

(a) The liability to pay VAT applicable against 'import of services' as per section 20 of the Act shall lie with the service receiver, i.e. the VAT paid shall be the importer's output tax. The partial or full value of the imported services is paid through any bank or a financial institution or any authorized dealer, the bank shall deposit the applicable VAT for the said service into the government treasury on behalf of the importer using the importer's relevant circle code or economic code-and provide a copy of the treasury challan to the importer. This treasury challan shall be treated as a tax invoice for the importer.

(b) The service importer shall record the output tax payable against the imported service in Part 3 (Supply - Output Tax) of the return and make an entry in Note-58 of Part 9 (Treasury Deposit) regarding the payment of the tax to the government treasury. The importer shall record and display the VAT paid against the imported service to the extent that it is eligible for input tax credit under the provisions of Section 46 of the Act-in Part 4 (Purchase Input Tax) of the return. It should be noted that the bank submitting the treasury challan on behalf of the service importer shall not record any entry regarding said treasury challan in its own tax return. However, if the bank receives any fee, charge, or commission against the services rendered, it must declare the amount of such fee/commission and the VAT (where applicable) in Part 3 (Supply - Output Tax) of the tax return.

Provision of VAT Deduction at Source (VDS) for sub-contract project

If under any project, VAT payable by any service recipient is collected or deducted at source and deposited to the government treasury in prescribed manner while paying service value or commission by service recipient or as the case may be by the person paying the service value or commission and if that service provider appoints any sub-contractor, agent or any other service rendering person with the purpose of providing a part of the entire service, in such case, VAT shall not be applicable only in respect of the supply by the first sub-contractor, subject to submission of documentary evidence of collection or deduction of VAT applicable at the first stage and depositing into the government exchequer on the same service from the sub-contractor, agent or other service provider appointed by the said service provider. Please note, the rule does not apply in case of purchase of goods under the project.

Deposit of Withheld VAT by the VAT Registered Withholding Entity

Any person responsible for deducting VAT at source shall make an increasing adjustment in the VAT Return of related tax period after deduction of VAT. Further, net payable tax (if any) assessed in the processes outlined under sub-section (1) of section 45 of the VAT and SD Act, 2012 shall be deposited before submission of VAT Return of the respective tax period..

The VAT rate for the service of renting space and facilities shall be 15 percent, and the liability to pay this amount through A-Challan or e-payment shall lie with the service receiver. In this case, he shall first make an increasing adjustment in Part-5 of the VAT return regarding the VAT payable on the received service. Subsequently, the service receiver shall deposit the VAT amount corresponding to said increasing adjustment into the government treasury through A-Challan or e-payment; and the proof of VAT paid by the service receiver at the time of filing the return shall be indicated in the designated section for treasury deposits within the return.

Simple interest at the rate of 2% half yearly shall be recoverable, if the person failed to collect, deduct and deposit the same.

Issuing Withholding VAT certificate (Mushak-6.6) to the supplier

Certificate to the supplier shall be issued in three copies:

(i) Main copy to the respective VAT Circle Office
(ii) 2nd copy to the Supplier
(iii) 3rd copy for preservation of 5 years

Timeline for Issuing Certificate to the Supplier-

- In case of withholding entity or supply recipient is VAT registered or enlisted - As per sub-clause (AA) of clause (Cha) of sub-rule (1) of Rule 40 of the VAT & SD Rules, 2016 and as per clause (Kha) of sub-rule (2) of rule 6 of the VAT Deduction and Collection at Source Rules, 2025, within 3 working days of submission of VAT Return of the respective tax period.
- In case of withholding entity or supply receiver is not VAT registered or enlisted - As per sub-clause (E) of clause (Cha) of sub-rule (1) of Rule 40 of the VAT & SD Rules, 2016 and as per sub-rule (3) of rule 6 of the VAT Deduction and Collection at Source Rules, 2025, within 3 working days of deposit of withholding VAT (withholding VAT to be deposited within 15 days of making payment of consideration).

Adjustments for Withholding VAT

Person	Adjustment
For Supplier	Decreasing adjustment made in the VAT Return (Mushak-9.1Note-29), subject to receiving Withholding VAT certificate (Mushak-6.6). Decreasing adjustment need to be taken in the month of payment of consideration or within subsequent 6 (six) tax period
For Withholding Entity	Increasing adjustment shall be made in the relevant month's VAT Return (Mushak-9.1,Note-24).

30.9 Carry forward of negative net amount and refunds

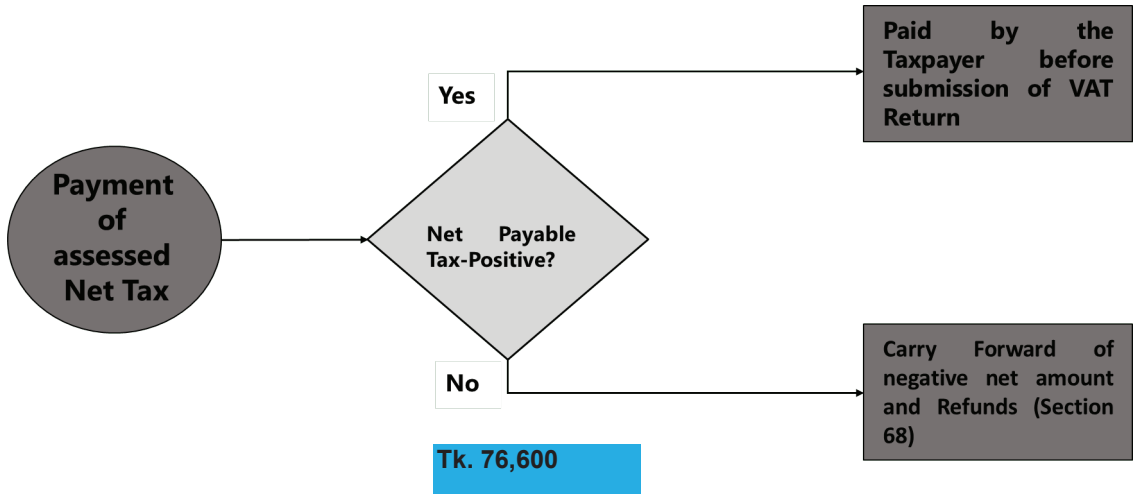

Net tax payable amount = Output Tax – Input Tax (Credit) + Increasing Adjustment – Decreasing Adjustment

If, in a tax period, the sum of input tax and the receivable decreasing adjustments exceeds the sum of output tax, supplementary duty and increasing adjustments for such tax period, resulting in a net negative payable amount of money, then–
the excess amount of money shall be carried forward and may be deducted over the following 6 (six) tax periods. .

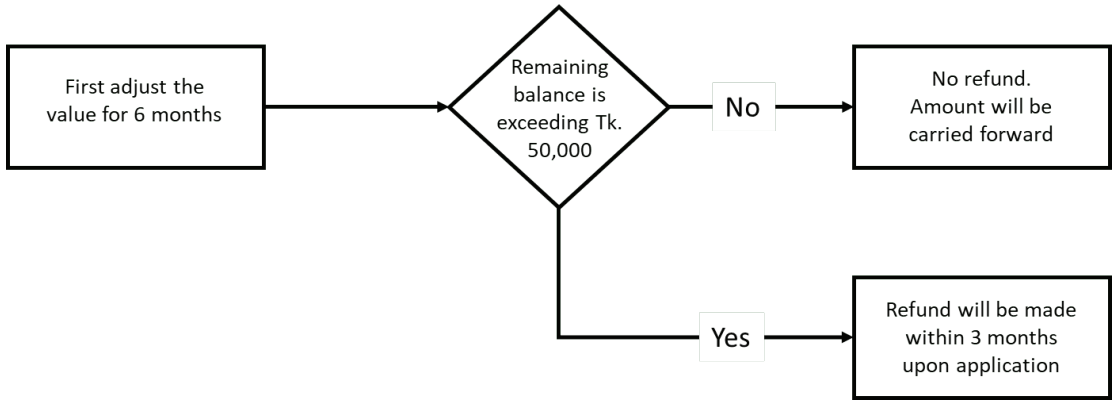

Example: Suppose XYZ is a limited company. For the current month:

1. Total output VAT & SD payable is Tk. 100,000
2. Total input tax credit is Tk. 26,600 (Tk. 10,000 for imported goods, Tk. 10,000 for locally procured services, Tk 5,000 @5% VAT for Electricity & Newsprint @ Tk. 1,600 per metric ton)
3. VAT deducted at source by the company is Tk. 100,000
4. Tk. 250,000 was paid as Advance Tax (AT).

	Particulars		Amount	Amount
	Total of Payable Output Tax & SD	(A)	Tk. 100,000	
Less:	Total Input Tax Credit	(B)	Tk. 26,600	
		C = (A - B)	Tk. 73,400	
Add:	Total Increasing Adjustment	(D)	Tk. 100,000	
		E = (C + D)	Tk. 173,400	
Less:	Total Decreasing Adjustment	(F)	Tk. 250,000	
Net Payable Tax G = (E - F)				Tk. -76,600

Carry Forward & Refund mechanism

Conditions for applying for refund without carry forward

If the net VAT payable of a registered person is in the negative, such person will be entitled to a refund of such amount if the Commissioner is satisfied that:

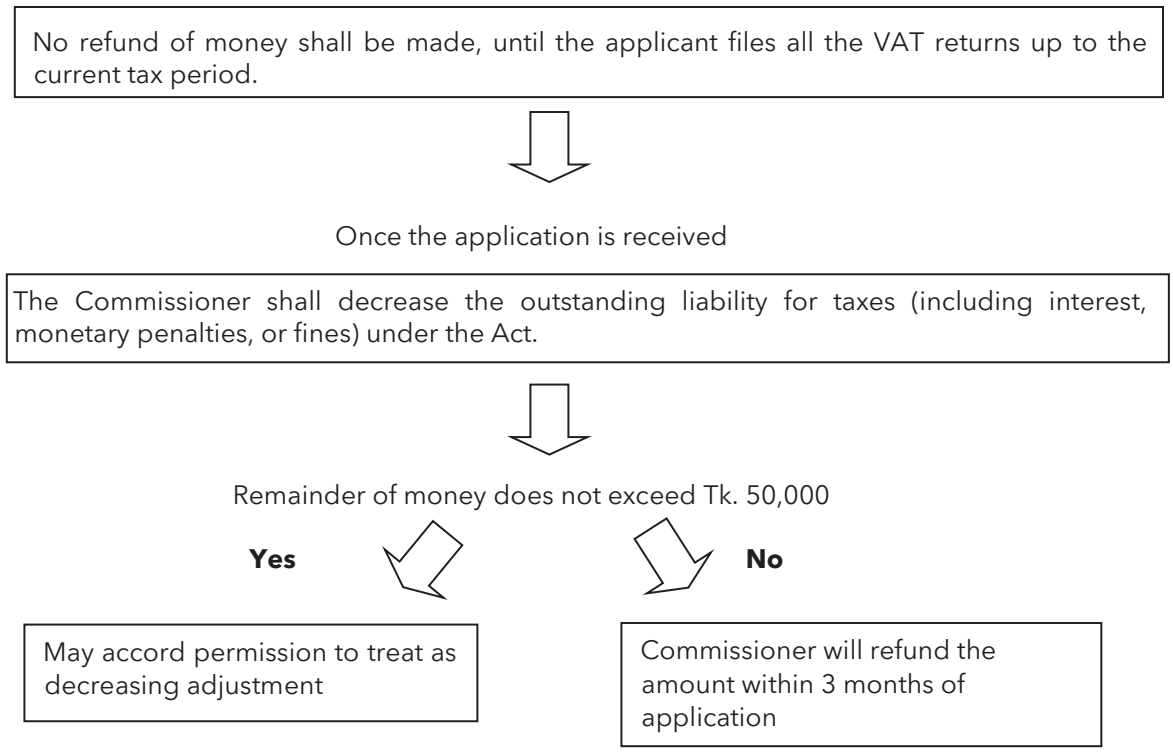

(a) fifty percent or more of such person's turnover is or will be derived from zero-rated supplies under third chapter

(b) fifty percent or more of such person's expenditure on inputs is on imports or acquisitions used in the manufacturing of zero-rated supplies under third chapter

(c) the nature of such person's economic activity regularly results in excess input tax credits or decreasing adjustments (the economic activity to which sub-section (2) of section 68 does not apply)

(d) If paid SD during import of input against export is allowed for decreasing adjustment and SD chargeable goods is not supplied by the exporter in case of local supply

Application process for the refunded amount

Application for getting refund amount shall need to be made to the Commissioner in form "**Mushak-9.1**". Upon approval of the application, the Commissioner shall deposit the returnable amount to the applicant's bank account or issue a crossed cheque in favor of the applicant.

Refund or adjustment of taxes paid in excess

If a person pays taxes in excess of what is shown as payable tax in the return for a tax period, he will be entitled to claim refund for the excess payment, within such time on such terms and in such manner as may be prescribed through an application, or show as a decreasing adjustment in the next return within 6 (six) tax period.

33.10 Supplementary Duty (SD)

Luxury goods non-essential and socially undesirable goods and the other goods and services upon which supplementary duty is imposed which is justified in the public interest.

Imposition of SD

SD is imposable on the import of goods, goods manufactured in Bangladesh and on the supply of services rendered in Bangladesh, given that they are subject to SD in Bangladesh.

SD on the supply of goods or services shall be payable at only one stage of the supply chain.

Point to note:

No SD is imposable on goods imported for the purpose of export, and not for home consumption.
No SD is imposable on the supply of goods or services that are zero-rated.

Supplementary duty is not levied at trading level.

Persons liable to pay SD:

Every person specified below is liable to pay SD namely:

a. In case of import of SD imposable goods: the importer
b. In case of supply of manufactured SD imposable goods in Bangladesh: the supplier
c. In case of supply of SD imposable services rendered in Bangladesh: the supplier of such services

Determining the rate/amount of SD payable

Amount of payable supplementary duty shall be,–
if a rate of supplementary duty is specified for the goods or services subject to such duty in column (4) of the 2nd Schedule of VAT & SD Act, the amount arrived at by multiplying the dutiable value of the goods or services by such rate.

Determining the value for imposition of SD

Goods & Services: At Import stage

The value that is arrived at by adding customs duty, regulatory duty and other duty (if any) with the value on which customs duty is leviable under section 27 of the Customs Act, 2023.

Value for SD = Assessable Value (AV) + Customs Duty (CD) + Regulatory Duty (RD) =Total Value *Rate of SD

Goods & Services: At local stage

In relation to a supply of goods or services subject to supplementary duty, the value of such taxable supply shall be arrived at by deducting the supplementary duty from the total consideration of such supply, reduced by an amount equal to the tax fraction of that consideration.

Value of taxable supply = Total consideration of supply x {1-(15/115)} x {1-(10/110)}
Where rate of VAT is 15% and rate of SD is 10%

Exceptions

Provided that if the supply of any goods or service subject to supplementary duty is made without any consideration or with inadequate consideration, the value for imposition of supplementary duty on such goods or service shall be arrived at by deducting supplementary duty from the tax fraction of the fair market price of such supply; and

In relation to any goods where VAT is imposed on the basis of maximum retail prices (MRP), the retail price described as per section 58(2) of the VAT & SD Act, 2012 shall be regarded as the value for imposition of supplementary duty.

List of Major items on which SD is imposable:

Goods: Import stage

- Fresh and chilled tomato, fresh and dried nut, fresh and dried fruits, spices, finished chocolate
- Marble, granite, cement, petroleum products
- Detergent powder, mosquito coil, printed PVC sheet
- Toilet paper, tissue paper, woven fabrics, carpet

- Diamond, imitation jewelry
- Explosive powder, revolver, pistol and other firearms.
- Liquor, motor vehicle
- TV, refrigerator, VCP, VCR, VCD, DVD

Goods: Local stage

- Cigarettes, Bidi, Zarda, Gul, Nicotine Pouch and Heated Tobacco
- Personal deodorants and antiperspirants, Shampoo
- paints
- Ceramic sink, basin, pedestal basin, commode or its parts, any type of pan and other fittings and fixtures of bathroom
- Other filament lamp, except ultra violet/infra-red lamp.
- Carbonated Beverage and energy drink, fruit juice and fruit drink
- Mineral water (up to 3 liter)

Services: Local stage

- Satellite channel distributor
- Telephone (services provided by using SIM/RIM card of mobile phone only)
- Organization renting out chartered aircraft or helicopter
- Service by BRTA
- Hotel & Restaurants (subject to conditions)
- OTT platform

Exemption of SD at manufacturing stage above the rates mentioned in below table, irrespective of the rate of SD available in table-2 of 2nd schedule -

H.S. Code	Description of goods	Maximum Retail Price	Rate of SD (%)
2402.90.00	(a) Hand-made Bidi (without filter)	8 stick per packet Taka 6	30
		10 stick per packet Taka 7.5	30
		12 Stick per packet Taka 9	30
		25 stick per packet Taka 18	30
	(b) Hand-made Bidi (with filter)	10 stick per packet Taka 10	40
		20 stick per packet Taka 19	40
SRO No. 155-Ain/2020/116-Mushak dated 11 June 2020 with amendments in time to time.			

Special Schemes for Tobacco and Alcoholic goods- MRP

SRO No. 129-Ain/2026/334-Mushak dated 7 June 2026 of the NBR.			

Decreasing adjustment for SD

Any person importing goods subject to supplementary duty may make a decreasing adjustment for the supplementary duty paid by him on the import if the goods is in compliance with the conditions of a drawback of duties under the Customs Act. Such decreasing adjustment shall be made within 6 months of the date on which the goods have been exported or the goods have been loaded into a ship, an airplane or in the other means of transport.

However, if decreasing adjustment cannot be made within 6 months for any reason, decreasing adjustment can still be made within further 6 months in the same manner subject to approval of Divisional Officer.

Collection of SD on supplies

At Import stage

The supplementary duty on imported goods subject to such duty shall be collected at the same time and in the same manner as the customs duty on such goods is collected. In relation to an import of goods, for the purposes of collecting and paying the supplementary duty, the provisions of the Customs Act, 2023 shall (with necessary modifications and adaptations) apply in such a way as if the supplementary duty payable on imports were a customs duty.

At Local stage

SD on the supply of goods or services become payable at the same time when VAT becomes payable on such supply. Supplementary duty is not levied at trading level.

Point to note: Every person who is liable to pay SD, will need to include the information relating to the SD in their VAT return.

33.11 Books and documents to be maintained for VAT purposes

Any registered person is responsible to properly maintain the below mentioned documents whichever applicable to them at their respective place or places of operations:

1. **Mushak-6.1**: Books of Accounts for purchase
2. **Mushak-6.2**: Books of Accounts for sale
3. **Mushak-6.2**.1: Books of Accounts for Purchase-Sales
4. **Mushak-6.3**: Tax Invoice
5. **Mushak-6.4**: Invoice for contractual manufacturing
6. **Mushak-6.5**: Invoice of transfer of goods between branch units that are centrally registered
7. **Mushak-6.6**: Certificate for VAT deduction at source.
8. **Mushak-6.7**: Credit Note.
9. **Mushak-6.8**: Debit Note.
10. **Mushak-6.9**: Turnover Tax invoice
11. **Mushak-6.10**: Invoice data for purchase/sales over BDT 200,000.

These books and documents shall be maintained at the business place for at least 5 years along with all documents and other records relating to his economic activities in case authorities assess the tax liability and other obligations.

The registered person may store tax related documents, accounts and other records on the server with appropriate security through Enterprise Resource Planning (ERP) software or VAT software prescribed by the Board and such stored documents shall be considered as legally acceptable evidence and in this case, they may be presented electronically to the VAT Authority.

Debit Notes & Credit Notes

In a case where debit notes or credit notes are issued additional forms need to be filled Mushak-6.7 and Mushak-6.8 respectively. The following information must be provided in the forms:

(a) serial number of the credit note, or debit note
(b) date and time of its issue
(c) Name, address and BIN Number of the supplier
(d) the serial number, date and time of the relevant original tax invoice
(e) the nature of the adjustment
(f) the effect on the amount of VAT
(g) Name, address and BIN number (If applicable) of recipient if effect of payable VAT is more than BDT. 5,000 on supply

Please note that if a credit note does not contain information specified in (g) above, no decreasing adjustment can be claimed in support of the note.

Books of Accounts

The under mentioned books of accounts is prepared and maintained as per prescribed rules:

- Purchase Accounts book (Mushak-6.1)

A registered person shall preserve in Mushak-6.1 accounts of all his purchases related to his economic activity

- Sales Accounts book (Mushak-6.2)

A registered person shall preserve in Mushak-6.2 accounts of all his purchases related to his economic activity

- Purchase-sales account book (Mushak-6.2.1)

If a registered person purchases the goods which he supplies without any processing, then he shall preserve in Mushak-6.2.1 form accounts of all his purchase-sale of those goods. .(Trader & Importer)

- Tax invoice (Mushak-6.3)

Every registered supplier shall issue two copies of serially numbered Tax invoice on or before the date when VAT becomes payable on the supply provided, which should contain the following information:

(i) Date and time of the issue of the invoice
(ii) Name, address and BIN (If applicable) of the supplier
(iii) Name, address and BIN (in case where the value of the supply is above TK.25,000) of the buyer (where applicable)
(iv) Description of the goods/services
(v) Quantity of the goods supplied
(vi) Value of supply (excluding VAT)
(vii) The rate of VAT applicable for the supply
(viii) Amount of VAT payable
(ix) Summation of value of supply and VAT payable
(x) Fiscal year-wise serially numbered tax invoice

- Invoice for contractual manufacturing (Mushak-6.4)

For the purpose of manufacturing goods under contract manufacturing arrangement, the owner shall have to transfer the input of the goods to be manufactured to the contract

manufacturer in Form "**Mushak-6.4**". Similarly, the contract manufacturer shall issue form "**Mushak-6.4**" at the time of transferring the manufactured goods to the owner.

- ❑ Invoice for transfer of goods for entity with Central Registration (Mushak-6.5)

  In case where a registered person transfers the goods from his one branch to another branch (including warehouse), shall have to issue invoice in form Mushak-6.5. Please note that this is applicable in case of central registration.

Books and documents required to be maintained for Turnover Tax purposes

1 Purchases and sales register in form Mushak-6.1 & 6.2 respectively or where applicable Mushak-6.2.1;
2 Turnover tax invoice (Mushak–6.9) in serially numbered (fiscal year-wise);
3 Treasury challan in favor of payments of turnover tax; and
4 Turnover Tax return in form Mushak-9.2.

- ❑ Submission of information related to purchase-sale (Mushak-6.10)

  Statement of purchases / sales more than BDT 0.2 million in form "Mushak-6.10" will be submitted on or before submitting return of the respective tax period.

33.12 Submission of VAT return

Main filing of return

Every registered and enlisted person or required to be enlisted or registered, is required to file for VAT return in form "Mushak-9.1" or "Mushak-9.1.1" (in applicable cases) and Turnover Tax return in form "Mushak-9.2" (or in form"Mushak-9.2.1" in applicable cases) respectively for every three tax period (single tax period for voluntary filing) in which the following important matters of his business activities are reflected:

- Aggregation of sales
- Accounts of payable taxes
- Aggregation of purchase
- Accounts of deduction at source / rebate
- Final accounts and balance
- Accounts of deduction by customer at source

Information on the payment of any supplementary duty should be included in the VAT return.

Submission of VAT return should be made through online (except online to the concerned local VAT office-circle office) no later than 15 days after the end of every three tax period under prescribed form and procedure. However, any registered or enlisted or eligible to be registered or eligible to be enlisted person may voluntarily file a return on any day of the subsequent tax period in each tax period. If the 15th day is a government holiday, VAT return can be submitted on the next working day.

"Provided further that any government, semi- government or autonomous organization, bank, insurance and person or institution filing a zero return may submit the return not later than 20 days after the end of the tax period."

Further, the board, in public interest, by an order, may extend the time for submission of return exempting from collection of interest and fine.

Late filing of return

Application can be made to the Commissioner for extending the time for filing return to up to 1 month from due date. Note that the application in form Mushak-9.3 must be submitted within 7 days after the end of the tax period.

If the Commissioner considers the reasons mentioned in the application as valid, he shall grant his approval within 7 (seven) days of receiving the application. If the Commissioner does not give his decision within the specified time, it shall be deemed to have been approved.

Unless the late submission of return is approved by the concerned Commissioner, registered or enlisted person shall be liable to pay a fine under Clause (f) of Sub-Section (1) of Section 85 and interest under Section 127 for delay period of payment of VAT (if any), which is also payable even if approval for the late submission of return is granted.

If for the above-mentioned case, the return is not filed on time and no application is made for the extension of time, Tk. 2,000 (two thousand) fine and interest on payable VAT (if any) under section 127 will be payable for the delay period. In case an application is made, only interest will be payable.

Amendments to return

In case of any errors in a VAT return already filed, Section 66 allows you to make an application in the form Mushak-9.4 to file an amended return. The Board will determine to allow any decreasing adjustments which arise due to the amendments. No monetary penalty will be charged.

The submitted return may be amended in the following cases:

(a) If there is any clerical error;
(b) If the amount of tax paid is less because of some errors in calculation;
(c) If the amount of tax paid is more because of some errors in calculation; or
(d) If any other types of error are committed excepting forgery.

VAT return cannot be amended due to failure towards decreasing adjustment or input tax credit within specified time

Application for amendment–

(a) Can be submitted within 4 (four) years of submission of the relevant return;
(b) Cannot be submitted if the VAT authority starts any audit or enquiry or in any other manner the error is discovered.

The Commissioner shall give his decision on the said application within 30 (thirty) days of receiving such an application if net tax of the concerned tax period requires to be lessened through amendment of return. In case, the application is not approved within the specified time period, it shall be deemed to have been approved.

In case any request of amendment of return is submitted by the taxpayer before the receipt of the audit notice and because of the submission of amended return the amount of net payable tax is increased, in that case–

(a) interest will have to be calculated on the applicable less paid tax under Section 127; and
(b) to pay the less paid tax along with the interest, no penalty or fine can be imposed for reasons of amendment of return.

Where a request to amend the return is submitted by the taxpayer before the receipt of audit notice and because of the amendment of return the amount of net payable tax decreases, in that case–

(a) **In case of VAT return:** The taxpayer will be able to make a decreasing adjustment equal to the additional amount within the tax period determined by the Commissioner;
(b) **In case of Turnover Tax return:** The taxpayer will be able to deduct an amount from his payable Turnover Tax equal to the additional amount within the tax period determined by the Commissioner; or
(c) **In case of withholding entity:** Will receive tax refund according to the Act as determined by the Commissioner.

33.13 VAT authorities & officers

The following are the VAT authorities under section 78 of the VAT & SD ACT, 2012:

1. Chief Commissioner;
2. Commissioner;
3. Commissioner (Appeal);
4. Commissioner (LTU);
5. Director General, Central Intelligence Cell;
6. Director General, VAT Audit, Intelligence and Investigation Directorate;
7. Director General, Customs, Excise and VAT Training Academy
8. Director General, Duty Exemption and Drawback Office
9. Additional Commissioner or Additional Director General or Director (CIC);
10. Joint Commissioner or Joint Director (CIC) or Director;
11. Deputy Commissioner or Deputy Director;
12. Assistant Commissioner or Assistant Director;
13. Revenue Officer;
14. Assistant Revenue Officer;
15. Any other officer appointed by the Board.

Duties and responsibilities of the VAT Authority.

The Board shall, under the provisions of this Act, carry out all the functions, including the policy making functions, and discharge all the duties and exercise all the powers of the VAT Authority.

SRO No. 183-Ain/2019/40-Mushak dated 13 June 2019 of NBR delegated power of Commissioner.

The VAT officials shall perform, while remaining under the control, surveillance and supervision of the Board, all or any of the functions, discharge all or any of the responsibilities and duties, and exercise all or any of the powers described below, namely:

a) tax collection and activities relating to keeping accounts thereof;
b) application of the provisions of this Act and the rules made thereunder and administrative functions; and
c) any other function or duties and responsibilities assigned to them by the Board to carry out the purposes of this Act.

Subject to such limitations and conditions as may be determined by the Board, by a general or special order, the VAT officers shall, under the provisions of this Act or the rules made thereunder, perform all:

- such functions, discharge such responsibilities and duties, and exercise such powers as may be bestowed upon them; and an official junior in rank and status shall perform all such

functions, discharge all such responsibilities and duties, and exercise all such powers as may be given by an officer senior in rank and status to such official; and

- such functions, discharge such responsibilities and duties, and exercise such powers through an arrangement whereunder a senior officer may perform all the duties and responsibilities of a junior officer.

33.14 Consequences of non-compliance

Non-compliance covers a wider range of situations starting from registration to the collection and payment of VAT as per the provisions mentioned in VAT & SD Act. According to Section 85 of the VAT & SD Act an assessed may be penalized for the following offences:

If any person:

Sl. No.	Non-compliances or irregularities	Amount of monetary penalty
(a)	Non-compliance or irregularity for not applying for registration or enlistment within the prescribed time-limit;	10 (ten) thousand taka only
(b)	Non-compliance or irregularity for not displaying the registration or turnover tax certificate in a visible place;	10 (ten) thousand taka only
(c)	Non-compliance or irregularity for not informing the Commissioner of the change in the information of the economic activity;	10 (ten) thousand taka only
(d)	Non-compliance or irregularity for not applying for cancellation of registration or enlistment within the prescribed time-limit	10 (ten) thousand taka only
(e)	Non-compliance or irregularity for not abiding by the provision of section 9(5);	10 (ten) thousand taka only
(f)	Non-compliance or irregularity for not filing the VAT or turnover tax return within the prescribed time period;	2 (two) thousand taka only
(g)	Non-compliance or irregularity for not making inclusion of the output tax in the return;	Half or equal of the amount of output tax not included;
(h)	Irregularities for taking more input tax credit than entitlement in the return;	Minimum 30% or maximum 50% of the amount of input tax irregularly taken;
(i)	Irregularity relating to making an increase of a decreasing adjustment or making a decrease of an increasing adjustment in the return;	Minimum 30% and maximum 50% of the amount of increased decreasing adjustment or decreased increasing adjustment;
(j)	Non-compliance or irregularity for not issuing tax invoice, credit note, debit note, combined tax invoice and withholding certificate;	10 (ten) thousand taka only
(k)	Non-compliance or irregularity for not keeping records in the prescribed manner;	10 (ten) thousand taka only
(l)	Non-compliance or irregularity for not furnishing fixed security;	10 (ten) thousand taka only
(m)	Irregularity for willingly evading or attempting to evade assessment and payment of taxes;	Half or equal of the amount of taxes evaded.

(n)	Non-compliance or irregularity for not filing the input-output coefficient within the prescribed time period;	10 (ten) thousand taka only
(o)	If a company claim exemption through SRO without complying the conditions said in the SRO, they will be penalized	25,000 (twenty-five) thousand only

Penalty for unintentional VAT avoidance:

No penalty will be imposed when unintentionally VAT avoidance occurred.

Declaration of temporary abstention from giving supply:

Any registered or enlisted person desirous of temporary abstention from giving taxable supply, he shall minimum of 48 hours before such abstention inform it to the Divisional Officer and the Divisional Officer or the officer nominated by him within 24 hours shall take on site accounts of input in stock and goods prepared or services of the registered or enlisted person.

If any registered or enlisted person remains abstained from making taxable supply and if subsequently wants to commence it again, has to inform to the concerned Divisional Officer on the proceeding working day of such commencement.

If a registered entity is temporary closed, VAT authority will not impose any penalty for non-submission of return during the closing period.

The following Table shows the monetary limits of the VAT officers in initiating a proceeding for adjudication:

SL No.	Officer	Power
(a)	Revenue Officer	Value of goods or value of taxable service not exceeding Tk. 5 lakh only
(b)	Assistant Commissioner	Value of goods or value of taxable service not exceeding Tk. 20 lakh only
(c)	Deputy Commissioner	Value of goods or value of taxable service not exceeding Tk. 30 lakh only
(d)	Joint Commissioner	Value of goods or value of taxable service not exceeding Tk. 50 lakh
(e)	Additional Commissioner	Value of goods or value of taxable service not exceeding Tk. 1 Crore
(f)	Commissioner	Value of goods or value of taxable service exceeding Tk. 1 Crore

33.15 Recovery of Arrear Tax

Where any amount of VAT, supplementary duty, turnover tax, interest, monetary penalty or fine remains payable by a defaulting taxpayer, the Commissioner shall initiate a proceeding for the recovery of such arrear taxes from such defaulter.

An arrear tax shall become payable, if:

a) the amount of arrear taxes is shown as payable in return and remains unpaid;
b) the amount of arrear taxes is shown in the notice or certificate of tax determination served on the taxpayer and the defaulting taxpayer fails to pay it by the last date specified in such notice or certificate; or

c) an amount of arrear tax becomes payable on the disposal of any proceeding under this Act.

The Commissioner or tax recovery officer shall, if an arrear tax becomes payable by a defaulting taxpayer, send a notice to such defaulting taxpayer for the recovery of such taxes.

In a proceeding relating to the recovery of arrear taxes, and in relation to fixing the liability and the amount of such taxes, such notice or certificate shall be treated to be the conclusive proof.

The Commissioner or tax recovery officer shall, in matters of recovery of arrear taxes, take the following actions, namely:

a) deduct, in the prescribed manner, the amount of arrear tax from the money the defaulting taxpayer may have under the control of any authority of Income Tax, Customs, VAT or Excise;
b) direct any other person or associate or financial institution or bank holding any money of the defaulting taxpayer to pay the amount by such person or bank;
c) issue an order directing to stop the supply of any goods or any service from the business premises of the defaulting taxpayer;
d) lock the business identification number in the Goods Declaration processing system in the Custom House to stop clearance of imported goods of the defaulting taxpayer;
e) issue an order, in the prescribed manner, directing to freeze the bank accounts of the defaulting taxpayer;
f) issue an order directing to seal the business premises of the defaulting taxpayer or seal such business premises within the prescribed time and in the prescribed manner;
g) recover the arrear taxes by attaching and selling, in the prescribed manner, any of the defaulting taxpayer's immovable property and by seizing and selling any of his movable property; or
h) take a security deposit from a guarantor of the defaulting taxpayer in such manner and on such terms as may be prescribed;
i) request the concerned authority to disconnect the gas, water and electricity connections of the business premises of the defaulting taxpayer until the said tax is paid in full.

In relation to the recovery of arrear taxes by a Customs Commissioner, such arrear taxes shall be collected in the same way as Customs duty on imports is collected.

Power of VAT officer under the Code of Civil Procedure

In relation to the recovery of money under the Code of Civil Procedure, an officer of VAT, duly empowered in this behalf and subject to the provisions of this Act, shall have the same powers as those of a Civil Court for the recovery of arrear taxes.

Change in jurisdiction for recovery of arrear tax

Where a defaulting taxpayer resides in, or has an economic activity or a property within, the jurisdiction of any other Commissioner, the Commissioner may make a request to such other Commissioner to recover the arrear tax, and such Commissioner shall, on such request, recover the arrear tax in such a manner as if the tax were an arrear in his jurisdiction.

33.16 Audit and Investigation

In order to prevent tax evasion, the Commissioner or the Director-General may conduct audit and investigation into all affairs of a taxpayer's economic activities.

An officer of VAT, duly empowered by the Commissioner or the Director-General, shall, after conducting the audit and investigation in accordance with the procedure laid down in the Audit Manual, submit a final audit report to the Commissioner or the Director-General in form **"Mushak-13.3".**

If tax liability of any taxpayer for the audited period is identified, then the Commissioner or Director-General shall determine the tax liability after considering the interest payable on such unpaid tax and, will refer to the concerned officer for initiating next proceedings for the collection of the unpaid tax.

Notwithstanding anything contained in section 73, in case of 100% export-oriented industries, the Commissioner cannot demand any arear tax for any tax period, more than three years before the concerned tax period for realization of arrear tax

If any person or organization is selected for audit, he or she shall submit all the documents to the VAT Authority within 2 (two) months of the date of notice by the VAT Authority and the concerned VAT Authority shall complete the audit activities within 1 (one) year thereafter:

Provided that, if any person or organization fails to submit the documents within the prescribed time due to reasonable cause, the VAT Authority may extend the time by 1 (one) month on the application of such person or organization and if the person or organization fails to submit the documents within that time also, the VAT Authority may complete the audit activities on the basis of best judgment assessment recording the reason in writing.

Tax Determination timeline

Tax Determination procedure should be completed within 120 days of submission of the Written explanation.

Powers of the VAT officers

An Officer of VAT, duly authorized in this respect, and for authorized purposes, may, through service of a notice, ask for the following information from any person, namely:

(a) necessary information relating to any person for conducting the audit and the investigation; or
(b) any document or evidence under the custody of any person.

Such an authorized VAT officer shall have the following powers, namely:

(a) to make copies of any record;
(b) to seize any record in the prescribed manner;
(c) to seal any record or good; and
(d) to take steps, in the prescribed cases and manner, to freeze bank accounts of any person.

In relation to the seizure of any record, document or a goods, those shall be returned, under such procedure as may be prescribed, to such person from whom they were seized.

Powers and functions of the Customs Officers

Every Customs Officer, in applying, and giving effect to, any provision of this Act or any rule made thereunder, shall have the following responsibilities, namely:

a) to collect VAT and advance tax imposed on taxable imports; and
b) to collect supplementary duty payable on imports of goods subject to supplementary duty

A Customs Officer shall be entitled to exercise the powers conferred upon him by the Customs Act in such a manner as if the provisions of imposition of Customs duty on importable goods under the Customs Act is applicable to the VAT and supplementary duty imposed under this Act.

Supervised supply, observation and surveillance

Where a taxpayer does not comply with the provisions of this Act with an intention of evading payment of supplementary duty, an Officer of VAT may, under orders from the Commissioner or Director General observe, and keep surveillance on, any supervised supply, in a prescribed manner, at any place relating to his economic activities subject to supplementary duty to determine the actual tax liability of such taxpayer.

33.17 Offence, Trial & Punishment

Offences relating to VAT registration certificate or turnover tax certificate and tax invoice, and punishment thereof, whoever dishonestly:

- makes or uses a fake VAT registration certificate, turnover tax certificate or tax invoice and withholding VAT certificate bearing a forged or false business identification number; or
- makes or uses a forged or false tax invoice, credit note, debit note, withholding VAT certificate;
- produces, stores, transports, markets or uses counterfeit or forged or reused stamps or bandrolls or assists in such activities; or
- produces, stores, transports, markets or sells any goods bearing counterfeit or forged or reused stamps or bandrolls or assists in such activities; or
- produces, stores, transports, markets or sells any goods which are required to bear a bandroll or stamp but without a bandroll or stamp or assists in such activities; or
- evades tax payable by any other means; or
- claims a tax refund without such person being entitled to such refund,

Shall be punished with imprisonment for a term which may extend to **one year, or with a fine** equal to the amount of tax payable, or with both.

- If any person gives any false information regarding online VAT registration or enlistment then the VAT authority will take action under the applicable law.

Offence and punishment relating to false or misleading statement or description

Whoever dishonestly makes a false or misleading statement or description in any tax document submitted to any VAT officer shall be punished with imprisonment for a term which may extend to **6 (six) months, or with a fine equal** to the amount of tax payable, or with both.

Offence and punishment for obstructions

Whoever, with a mala fide intention, obstructs or attempts to obstruct any VAT officer in discharging his duties under this Act or any rule made there under shall be punished with imprisonment for a term which may extend to **6 (six) months, or with a fine which may be not less than 10 (ten) thousand taka and not more than 2 (two) lakh taka, or with both.**

Offence committed by any company, association of persons or property development joint venture

If an offence is committed by any company or association of persons or property development joint venture, every director, partner, chief executive, manager, secretary, official, employee, representative or VAT Agent thereof having involvement with such offence shall be deemed to have committed such offence unless he proves that such offence was committed without his knowledge or he tried his best to prevent the commission of such offence.

No imprisonment, **except for paying fine**, shall be imposable upon the director, partner, chief executive, manager, secretary, official, employee, representative or VAT Agent of such company, on whom the same judicial proceeding is lodged against as that of the company.

Prior approval before filing a case

Without the prior approval of the Commissioner, no case in respect of any offence shall be filed in any court.

Fine additional to the tax payable

The fine imposed as punishment by a Judicial Magistrate or a Metropolitan Magistrate shall be in addition to VAT, supplementary duty, turnover tax or monetary penalty.

33.18 Appeals, Revisions & Miscellaneous

Appeals & Revisions

Appeal to Commissioner

A person may lodge an appeal in the prescribed manner to the Commissioner (Appeal) within 90 (ninety) days from the date of issue of decision or order. Time extension may be possible for 60 days.

At the time of filing appeal, person shall pay 1% of the tax specified in the order (except the penalty amount).

The Commissioner shall dispose of the appeal within a period not exceeding 1 year.

Appeal to Customs, Excise and VAT Appeal Tribunal

A person may lodge an appeal in the prescribed manner to the Appeal Tribunal within 90 (ninety) days from the date of issue of decision or order.

Applicant will have extra 60 days upon discretion of the president, Appeal Tribunal to appeal if he/she fails to appeal within 90 days.

At the time of filing appeal, person shall pay 1% of the tax specified in the order (except the penalty amount).

In case where the Appeal Tribunal fails to dispose of the appeal within a period of two years, the appeal shall be deemed to have been granted by the Appellate Tribunal.

Appeal to the High Court Division of the Supreme Court

A person may prefer an appeal to the High Court Division of the Supreme Court against any question of law arising by the decision or order.

At the time of filing appeal, a person shall pay 2% of the tax specified except penalty amount.

Alternative Dispute Resolution (ADR)

- A taxpayer may, in the prescribed manner, on the prescribed terms and within the prescribed time, apply to a facilitator, selected by him from the prescribed panel, to have a dispute resolved through alternative dispute resolution process; and the facilitator may, in the prescribed manner, on the prescribed terms and within the prescribed time, take steps to resolve such dispute, on the basis of consensus, through alternative means.

The National Board of Revenue may, by notification in the official Gazette, designate, from time to time, one or more of the VAT Commissionerate for processing the applications of alternative dispute resolution.

If a dispute is resolved on the basis of consensus through alternative dispute resolution, no objection in respect of such consensus shall be raised in any court, and the disputes which

cannot be resolved on such consensus through alternative dispute resolution process, may again be taken up for proceeding under the provisions of the VAT and SD Act.

If a dispute or any part thereof could not be resolved through alternative dispute resolution process, the time spent for such resolution shall not be included in calculating the time for filing an appeal.

Explanation: "dispute" means a dispute arising out of the application of any provision of the VAT and SD Act or any Rule made thereunder, but does not include forgery or criminal offence or a dispute involving a question of law.

- If any dispute under disposal of Appeal Commissionerate or Appeal Tribunal or at the High Court Division or the Appellate Division of the Supreme Court of Bangladesh is desired to be settled then the concerned registered or eligible to be registered or enlisted or eligible to be enlisted person, concerned Commissioner (Appeal) or the President (Appeal Tribunal), or where applicable, the Appellate Division of the Supreme Court of Bangladesh or the High Court Division may submit applications, with related documents about the disputed matter in Form "Mushak-17.1" form-

  (a) to concerned Commissioner (Appeal) or the President (Appeal Tribunal) in respect of the case or dispute under trial or disposal at Appeal Commissionerate or Appeal Tribunal; or
  (b) to concerned Division in respect of the case or dispute under trial or disposal at Appellate Division of the Supreme Court of Bangladesh or the High Court Division;

  While filing application, the applicant shall mention the name of one of Facilitators from the list prepared under rule 101.

  The case shall remain stayed in the concerned court for alternative dispute resolution process taken by the Appellate Division or the High Court Division.

  - Provisions related to objection against the Facilitator; eligibility of the Facilitator, appointment and list; the duties and responsibilities of the Facilitator; the code of conduct of the Facilitator; Conflict of Interest; rights and responsibilities of the applicant in the matter of alternative dispute resolution; nomination of departmental representative for VAT Department; honorarium of the Facilitator; and preserving rights are described in the VAT and SD Rules.

Miscellaneous

Imposition of Interest

If a person fails to pay net tax payable to the Commissioner on or before the due date of payment or takes credit or makes decreasing adjustment irregularly, s/he shall be liable to pay an interest at a simple rate of one (1) percent per month (up to 24 months) on the amount of payable tax, from the next day after the date the payment becomes due to the date the payment is made.

If a person pays an interest and an amount to which the interest relates is found not to have been payable, the interest paid on such amount shall be refundable to such person.
Interest shall be payable in additional to any monetary penalty or fine.

However, 2% bi-annual interest shall be imposed for withholding VAT payable.

Special provisions regarding payment of tax or penalty or dues payable

If any registered person or person deducting VAT at source pays or deposits in the Government Treasury any tax payable or deducted at source or penalty or any other dues claimed under the VAT Act, 1991 repealed under section 137, within 6 (six) months from 1 July

2026, simple interest/additional tax at the rate of 2% per month for 24 (twenty-four) months shall be payable on such payment:

Provided that, no interest/additional tax shall be applicable to the payment of any dues before that period by the manufacturing entity, since interest/additional tax was not applicable to manufacturing entities before 1 July 2010.

If any registered person or person deducting VAT at source, under the VAT & SD Act, 2012 pays or deposits to the government treasury within 6 (six) months from 1 July 2026, any amount of payable tax or irregularly taken input tax credit or decreasing adjustments or tax deducted at source or fine imposed or any other dues prior to 1 July 2022, simple interest shall be payable for 24 (twenty-four) months at the rate applicable in that case.

Appointment of VAT Consultant

Any person may be appointed from among Chartered Accountant or Cost and Management Accountant or Chartered Secretary or licensed VAT consultant for providing advice to a taxpayer or for representing him in any proceedings.

Eligible persons to obtain VAT consultant license are required to complete the Mushak 18.1 form on VAT online, along with the required documents, and send it by post to the Customs, Excise and VAT Training Academy,Chittagong.

Following the approval of the application, applicants are required to sit for examination according to the specified syllabus defined by the order of the Board, as well attend a viva.

The Board shall issue a VAT Consultant license in form "**Mushak-18.1Ka" with proper security features.**

In order to obtain VAT Consultant license:

- VAT registration is not required before application
- Application fee is Tk. 1,000
- Not required to renew the license

Maintenance of VAT Software

As per General Order (GO) No. 16/Mushak/2019 dated 30 June 2019 it is mandatory for every registered organization having turnover of more than Tk. 5 crore in previous fiscal year to maintain all books of account and documents related with VAT in a VAT software as approved by NBR. Hence, if the turnover of each registration unit exceeds Tk. 5 crore, in that case, you will be required to implement VAT software. Entities are allowed to use their own software, as long as it complies with the specifications as prescribed by NBR subject to obtaining approval from NBR.

Further, in case of taking central VAT registration, maintaining VAT records through software is mandatory. However, the Company may keep its VAT records relating to "Mushak-6.1", "Mushak-6.2" and "Mushak-6.2.1" in Enterprise Resource Planning (ERP) Software System.

Submission of audit report

Limited companies are required to submit previous year's audited Financial Statement including income-expenditure within 6 months of the current fiscal year. Permission for time extension up to 6 more months can be granted upon application to the Commissioner.

33.19 Surcharge

The Development Surcharge and Levy (Imposition and Collection) Act, 2015:

"Surcharge" means any fee or charge imposed on goods or services at the stage of import, manufacturing or supply, which is imposed in addition to the existing tax, fee or charge on that goods or service.

Surcharge is currently applicable in following cases-

a) Development Surcharge:

1% on the entire amount or income received by a mobile operator in case of services provided through the use of SIM or RUIM card or memory card.

Imposition and collection of this surcharge are governed by the Development Surcharge (Imposition and Collection) Rules, 2016.

b) Health Development Surcharge

1% on imported or locally manufactured tobacco related products.

Collection and payment of this surcharge are governed by the Health Development Surcharge (Collection and Payment) Rules, 2017.

c) Environment Protection Surcharge

1% on goods manufactured by specified organization.

Collection and payment of this surcharge are governed by the Environment Protection Surcharge (Collection and Payment) Rules, 2017.

List of specified organizations are available in the SRO No.- 08.01.0000.068.25.050.14-718-VAT/2014 dated 22 February 2015 of the National Board of Revenue.

d) Information and Communication Technology Development Surcharge 2% on imported cellular mobile telephone sets.

Collection and payment of this surcharge are governed by the Information and Communication Technology Development Surcharge (Collection and Payment) Rules, 2017.

33.20 Excise Duty

Excise Duty is collected under the Excise and Salt Act, 1944.

The Excise and Salt Act, 1944 extends to the whole of Bangladesh except the area of Export Processing Zones declared under section 10 of the Bangladesh Export Processing Zones Authority Act, 1980.

Presently, excise duty is applicable in following cases-

- Services rendered by bank or financial institute.
- Services rendered by airlines.

Rate of duty against the services rendered by bank or financial institute and airlines are available under SRO no.-136-law/2024/242-excise dated 27 May 2024 of the Internal Resources Division (Excise Wing), Ministry of Finance.

Any amount of excise duty chargeable under the Excises and Salt Act, 1944 in excess of the rates specified in the table of above-mentioned SRO is exempted. Further, entire amount of excise duty chargeable on the accounts of depositors or foreign lenders maintained with an Offshore Banking Unit operating under the Offshore Banking Act, 2024 is also exempted.

Annexure A: Summary of important Mushak Forms

Form Name	Description
Mushak 2.1	VAT or Turnover Tax Registration form
Mushak 2.2	VAT Registration form for Non-resident
Mushak 2.3	Registration Certificate for VAT/enlistment certificate for Turnover Tax
Mushak 2.4	Cancellation or Changes to Registration/Enlistment
Mushak 2.5	Change in information or new inclusion of information after VAT registration or turnover tax enlistment
Mushak 3.1	Application for VAT Agent
Mushak 3.2	VAT Agent Registration certificate
Mushak 4.1	Application for refund of paid Advance Tax at import stage
Mushak 4.2	Joint application for transfer of liabilities for Purchase-Sale of Running Business
Mushak 4.3	Declaration of Input-Output Coefficient
Mushak 4.3.1	Coefficient Declaration
Mushak 4.4	Disposal of unused or unusable input
Mushak 4.5	Dispose of damaged or destroyed goods in accident
Mushak 4.6	Dispose and supply of wastage or by products
Mushak 6.1	Purchase account book
Mushak 6.2	Sales account book
Mushak 6.2.1	Purchase-Sales account book
Mushak 6.3	Tax Invoice
Mushak 6.4	Invoice for Contractual Manufacturing
Mushak 6.5	Invoice for transfer of goods for entity with Central Registration
Mushak 6.6	Withholding VAT certificate
Mushak 6.7	Credit note
Mushak 6.8	Debit note
Mushak 6.9	Turnover Tax invoice
Mushak 6.10	Information of purchase-sale invoices exceeding BDT 200,000/-
Mushak 7.1	Application for adjustment of supplementary duty
Mushak 9.1	VAT Return
Mushak 9.1.1	VAT Return
Mushak 9.2	Specific Turnover Tax Return
Mushak 9.2.1	Turnover Tax (easy) Return
Mushak 9.3	Application for late submission of VAT return
Mushak 9.4	Application for amendment of VAT return
Mushak-10.1	Diplomatic or international agency tax refund application
Mushak-10.2	Foreign Tourist Value Added Tax Refund Certificate
Mushak-10.3	Application for approval of issue of VAT refund certificate to foreign tourists
Mushak-11.1	Notice for submission of late filing
Mushak-12.1	Delegation of powers of entry, search, detention and seizure List
Mushak-12.2	Notice of entry, search, seizure and seizure of residence
Mushak-12.3	Crockery or Seizure List
Mushak-12.4	Preliminary Report of Seizure
Mushak-12.5	Final Seizure Report

Mushak-12.6	Irregularities/tax evasion cases
Mushak-12.7	Application form for release of impounded vehicles
Mushak-12.8	Personal bond for impounded vehicle interim relief
Mushak-12.9	Warrant to freeze bank account for collection of government revenue
Mushak-12.10	Bank Account Freeze Enforcement Report
Mushak-12.11	Freezed bank account is manageable order
Mushak-12.12	Show cause notice
Mushak-12.13	Finality of assessment of tax and imposition of penalty order
Mushak-13.1	Initial report prior to initiation of supervised delivery
Mushak-13.2	Daily report of supervised deliveries
Mushak-13.3	Final report on supervised delivery
Mushak-14.1	Recovery of Tax Arrears Certificate
Mushak-14.2	Notice of collection of state dues
Mushak-14.3	Compliance report of state debt collection notices
Mushak-14.4	Notice of closure of business premises of defaulting taxpayer
Mushak-14.5	Compliance with notice of closure of business premises Report
Mushak-14.6	Notice of closure of business premises of defaulting taxpayer
Mushak-14.7	Cessation of service provision in locked business premises of defaulting taxpayer
Mushak-14.8	Resumption of service delivery following unlocking of locked business arenas
Mushak-14.9	Dues collection proceedings
Mushak-14.10	Order of attachment of movable property
Mushak-14.11	Order of Immovable Property Crocke
Mushak-14.12	Request for stay of decree of Honorable Court
Mushak-14.13	Certificate of Sale of Crockery or Seizured Property
Mushak-14.14	Immovable Property Crocke/Immovable Property Withdrawal of seizure order
Mushak-16.1	Notice to give confessional statement
Mushak-16.2	Confessional statement
Mushak-17.1	Application for settlement of case in alternative dispute resolution system
Mushak-17.2	Preservation of receipt/receipt and settlement information of applications received under Alternative Dispute Resolution
Mushak-17.3	Terms of Agreement
Mushak-18.1	Application Form for VAT Consultant License
Mushak-18.1Ka	VAT Consultant License
Mushak-18.2	Application form for obtaining certified copies of documents
Mushak-18.3	Application Form for Obtaining Mushak Clearance
Mushak-18.4	Mushak clearance
Mushak-18.5	VAT honour card
Mushak-18.6	Certificate issued for adjustment of amount deposited as current account under Value Added Tax Act, 1991

Annexure B: Table showing list of VAT rates

VAT	Rate
Import stage	15%
Export stage	0%
Local supply	15%
Reduced rates:	
Goods & Services as per Table-3 of 3rd Schedule of VAT & SD Act, 2012	10%
Goods & Services as per Table-2 of 3rd Schedule of VAT & SD Act, 2012	7.5%
Goods & Services as per Table-1 of 3rd Schedule of VAT & SD Act, 2012	5%
Trading stage as per Paragraph 3 of 3rd Schedule of VAT & SD Act, 2012	7.5%
For Building Construction organization as per Paragraph 3 of 3rd Schedule of VAT & SD Act, 2012	4.5% (for 1,601sqft and above) 2% (1-1,600sqft)
For land development organization	2%
For re-registration of building	2%
For Medicine at local trading stage as per Paragraph 3 of 3rd Schedule of VAT & SD Act, 2012	2.4%
For diesel, kerosene, octane, petrol and furnace oil as per Paragraph 3 of 3rd Schedule of VAT & SD Act, 2012	2%
Specified Amount (example):	
Newsprint paper	Tk. 1,600/ton
Thread	Tk. 5/Kg
Bricks of different grades	Tk. 500/ Tk. 600/ Tk. 800 per thousand
Scrap/Ship Scrap	Tk. 1,500 per metric ton
M.S. Product of different grades	Tk. 2,100/ Tk. 1,900/ Tk. 2,000/ Tk. 3,400 per metric ton
Advance Tax	2%, 7.5%
Turnover Tax	4%
Supplementary Duty on goods and services:	
At Import stage as per Table-1 of 2nd Schedule	10%, 20%, 30%, 40%, 45%, 60%, 100%, 150%, 200%, 250%, 300%, 350%, 500%
At Local supply stage as per Table-2 of 2nd Schedule	0%, 5%, 10%, 15%, 25%, 30%, 40%, 55%, 67%
At service stage as per Table-3 of 2nd Schedule	10%, 15%, 20%, 25%, 30%

Annexure C: Comparison between VAT & Turnover Tax

Particulars	VAT	Turnover Tax
1. Type	Registration	Enlistment
2. Tax rate	Taxpayer pays VAT at 15%, which may be "full" invoice value or reduced value or specific rate or amount as the case may be.	Taxpayer pays turnover tax at 4% on of the "full" invoice value.
3. Rebate/Credit against input tax	Taxpayer can take rebate/credit of input tax paid by him.	Taxpayer cannot take rebate/credit on input tax paid by him.
4. Rebate/Credit of VAT paid by purchaser	The purchaser can take rebate/credit on the VAT paid by him earlier.	The purchaser cannot take credit on the VAT paid by him earlier.
5. Tax payment	The taxpayer pays VAT before submitting VAT return.	The taxpayer pays turnover tax before submitting turnover tax return.
6. Books and documents	The taxpayer maintains purchase register, sales register and prescribed invoices.	The taxpayer maintains purchase register, sales register and prescribed invoices.
7. Return	The taxpayer submits VAT return in form VAT-9.1 or VAT-9.1.1.	The taxpayer submits turnover tax return in Form VAT- 9.2 or VAT-9.2.1.

Annexure D: Sample questions and answers

Registration

1. You are a tax adviser and one of your clients is seeking advice regarding registration. The client currently has a central office through which they provide consulting services, one warehouse and a factory which is involved in the manufacturing and assembling of certain equipment sold by the central office, for which the factory receives a percentage of the total revenue. The client also imports heavy machineries and equipment, which are stored at the warehouse before being sold. The factory currently charges Output VAT @15% and operates under the input VAT rebate system, whereas the central office charges output VAT ranging from 5% to 15% and does not claim rebate on input VAT.

Determine whether the client should obtain unit or central registration based on the nature of their operations.

Solution: NBR has issued SRO No. 263-Ain/2019/79-Mushak dated 18 August 2019, which specifies the following conditions required for obtaining central registration:

As per (Ka) of sub-rule (2) of rule 1 of the said SRO, if any manufacturer produces and supplies identical or similar goods from one or more places.

As per (Kha) of sub-rule (2) of rule 1 of the said SRO, if any commercial importer supplies the imported goods through its owned and controlled sales unit.

As per (Ga) of sub-rule (2) of rule 1 of the said SRO, if any trader sells or supplies its procured and collected goods through its owned and controlled sales unit.

As per (Gha) of sub-rule (2) of rule 1 of the said SRO, if any service provider provides identical or similar services through different branches under his own ownership and control.

As per (Uma) of sub-rule (2) of rule 1 of the said SRO, where a manufacturer, after manufacturing, supplies goods from one or more places through sales centre under his own ownership and control after paying 15% VAT or reduced rate or specific tax as mentioned in the third schedule, provided that it will not be applicable in case of conditional notification, where exemption is granted at manufacturing stage for additional part of specific rate.

As per (cha) of sub-rule (2) of rule 1 of the said SRO, where a manufacturer, after manufacturing, supplies goods from one or more places after paying applicable VAT through different sales center or depot or warehouse under his own ownership and control.

Furthermore, the SRO defines "similar goods" to mean homogeneous according to nature of consumption or use, e.g.: medicines, electronics products, Food, cosmetic, toiletries, plastic products etc. and their packaging or intermediate input.

If clause (Ka) and (Uma) of the aforementioned SRO are considered, then central registration is unlikely to apply for the client because of the following reason:

- The factory manufactures equipment and the central office provides consulting services and they are not similar or identical as per the nature of their consumption or use.

Hence, the client would need to opt for unit registration.

VAT Imposition

Determining the taxable supply at import stage and comparison between Trade and Credit VAT system

2. One of your clients plans to import cosmetic products and supply the same to small retailers through a channel of distributors. As per the VAT & SD Act, there are two options available for application of VAT at the time of supplying the imported goods to the distributors, i.e. applying the Trade VAT system where Output VAT will be fixed @7.5%, or the credit method where Output VAT will be fixed @15%.

In relation to the above for doing a simulation, you have been given following information on the product per unit:

Description (per unit)	**Amount (TK.)**
Selling price inclusive of VAT	385
Commercial Value	82
Customs Duty	25%
Regulatory Duty	5%
Supplementary Duty	60%
VAT	15%
Advance Income Tax	5%
Advance Tax	7.5%
Operational cost	20
Profit	?

Requirement:

Advise your client on the best option they should consider in view of the overall financial aspects of the options.

Solution:

Calculation of Assessable Value:

The assessable value is determined on the value actually paid or payable or the nearest ascertainable equivalent value at the time and place of importation, with addition of (a) freight actually paid, (b) landing charge/local cost and (c) insurance expenditure.

Particulars	**Tk.**
Commercial value	82
Freight (20% of Commercial value)	16.4
CFR value	98.4
Insurance (1% of CFR value)	0.98
Landing charge [1% *(Cost + freight+ Insurance)]	0.99
Assessable Value (AV)	**100.37**

Calculation of duties & taxes:

Types of Duty	**Calculation**	**Tax base**	**Amount (Tk.)**
Customs Duty (CD)	AV*25%	100.37	25.09
Regulatory Duty (RD)	AV*5%	100.37	5.02
Supplementary Duty (SD)	(AV+CD+RD)*60%	130.48	78.29
VAT	(AV+CD+RD+SD)* 15%	208.77	31.31

Advance Income Tax (AIT)	AV*5%	100.37	5.02
Advance Tax (AT)	(AV+CD+RD+SD)* 7.5%	208.77	15.66
Total duties & taxes including AV	**AV+CD+RD+SD+ VAT+AIT+AT**		**260.76**

Client can adjust or claim input tax credit against paid VAT (subject to payment of output VAT @15%), AT, and AIT.

As per section 31 of the VAT and SD Act, 2012 and rule 19 of the VAT & SD Rules, 2016, every importer who is VAT registered may claim decreasing adjustment for AT in the VAT return of the same tax period or within the next six tax period. Accordingly, if the percentage (%) of value addition does not exceed 50%, Commercial Importer shall not require to pay VAT at first supply of such goods subject to issuing Tax Invoice in prescribed manner.

In this regard, NBR has issued a General Order regarding the procedures for adjustments of AT and payment of VAT at local stage after import by commercial importer. [G.O. No.-06/VAT/2025 dated 15 July 2025 w.e.f. 15 July 2025]

Additionally, with reference ITA, 2023, importer will be eligible to claim tax credit for the advance income tax (AIT) paid at import stage against their corporate tax liability.

Client may also claim credit on their input VAT with the submission of Input-output Coefficient declaration in prescribed form "Mushak-4.3" along with conditions prescribed u/s 46 of VAT & SD Act. However, this is to note that to avail the input tax credit, they will need to sell their products @ 15% VAT. This means that applying reduced VAT rate @ 7.5%, will not allow the company to claim input tax credit.

As per section 46 of VAT & SD Act, credit on input tax can be claimed in the VAT return subject to meeting the major conditions stated as follows:

- Output VAT on supply must be @ 15%.
- Input has to be mentioned in "Input-Output Coefficients declaration" (Mushak-4.3) as input.
- Input needs to be booked on purchase-sales account book (Mushak-6.2.1) in the instant case

Comparison between Trade VAT and Credit VAT System:

Pursuant to General Order No. 06-Mushak/2025 dated 15 July 2025, issued by the National Board of Revenue (NBR), regarding the procedure for adjustment of Advance Tax (AT) paid at the import stage and the payment of output VAT by commercial importers, four prescribed methods have been outlined as follows:

Method - (a): Final settlement based on AT paid @ 7.5% at import stage – if the first supply by the commercial importer is considered as Procurement Provider, then this benefit shall not be applicable.
Method - (b): Reduced rated Output VAT @ 7.5% - Value addition of more than 50%
Method - (c): Standard rated Output VAT @ 15% - Value addition of more than 50%
Method - (d): Standard rated Output VAT @ 15% - Actual value addition

As Method (a) is final settlement, hence an analysis of the remaining applicable methods is presented in the table below:

Particulars	Value addition more than 50%		Actual Value addition (less than 50%)
	Reduced rated Output VAT @ 7.5% [Method - (b)]	**Standard rated Output VAT @ 15% [Method - (c)]**	**Standard rated Output VAT @ 15% [Method - (d)]**
Cost of Sale	260.76	260.76	260.76
Less: Input Tax Credit	-	31.31	31.31
Less: AT as a decreasing adjustment	15.66	15.66	15.66
Total VAT/AT creditable or adjustable	**15.66**	**46.97**	**46.97**
Less: AIT claimable	5.02	5.02	5.02
Net Cost of the product	**240.08**	**208.77**	**208.77**
Selling Price (VAT inclusive)	385	385	385 (Note)
Selling Price (VAT exclusive)	358.14	334.78	334.78
Net Cost of Product	240.08	208.77	208.77
Gross profit	118.06	126..01	126.01
Less: Operational cost	20.00	20.00	20.00
Net profit	**98.06**	**106.01**	**106.01**
Output VAT payable	26.86	50.22	50.22
Net VAT payable	**11.20**	**3.25**	**3.25**

Note: To maintain the same selling price, a value-addition of more than 50% has been assumed, consistent with Method (c). However, the client may opt for either Method (c), where the value addition exceeds 50%, or Method (d), which is based on actual value addition and may be less than 50%. It is important to note that the selection of either method should be aligned with the selling price determined by the client's business model.

Further, it appears from the above calculation that credit VAT system will be more beneficial for the client to operate business because net profit is higher where rate of output VAT is 15%.

Implication of reverse charged

3. XYL Ltd, a company incorporated in Bangladesh, has entered into an offshore contract with Xavier A.S., a company based in USA to render onshore consultancy services in Bangladesh. Please note that XYL Ltd is VAT registered.

Based on the above background, XYL Ltd has sought your professional opinion about implication of VAT at the time of make payment to XYL A.S.

Solution:

As per section 2(17) of the VAT & SD Act, the transaction constitutes as import of service, and as per clause (Ga) of section 16 of the VAT & SD Act, service recipient is liable to pay VAT against importation of service. Further, as per section 20 of the VAT & SD Act, all services imported into Bangladesh, except the exempted services mentioned in the First Schedule, shall be considered as taxable supplies and the VAT applicable on such supplies shall be 15 (fifteen) percent. The liability to pay VAT payable on the value of imported services prescribed in accordance with Section 32, shall lie with the recipient of the service supply, which shall be the output tax of such person.

VAT deduction mechanism at the time of remitting the payment

NBR issued SRO No. 182-Law/2025/310-VAT dated 27 May 2025 w.e.f. 01 July 2025 which provides guidelines on payment of VAT on imported services, according to which, the bank shall deposit the applicable VAT for the said service into the government treasury on behalf of XYL Ltd. using XYL Ltd.'s relevant circle code or economic code-and provide a copy of the treasury challan to XYL Ltd. This treasury challan shall be treated as a tax invoice for XYL Ltd. to claim input tax credit under the provisions of section 46 of the VAT & SD Act, 2012.

VAT implication on Export of service

4. KZY Bangladesh, a subsidiary of KZY Singapore, offers inspection services to foreign apparel brands. The parent company KZY Singapore, collects orders from apparel brands in Singapore and places the inspection requests to KZY Bangladesh. In response to such requests, KZY Bangladesh inspects the quality of clothing manufactured in the export oriented RMG factories in Bangladesh and accordingly sends the inspection report to KZY Singapore. KZY Bangladesh receives the payment from KZY Singapore in foreign currency for the services rendered.

Should KZY Bangladesh consider the service rendered to KZY Singapore as a zero-rated supply of service?

Solution:

As per section 24(5) of the VAT and SD Act, the supply of a service shall be zero-rated if it is exported outside Bangladesh.

Further, as per section 24(6) of the VAT and SD Act, the supply of a service shall be zero-rated, if–

a) the recipient of such a supply is–

   i. a non-resident who stays outside Bangladesh at the time of supply of the service; or
   ii. a resident and receives such service, in effect, staying outside Bangladesh at the time of the supply of the service; and

b) such service is not–

   i. directly related to any land situated in Bangladesh;
   ii. physically given on any goods situated in Bangladesh at the time of the supply;
   iii. provided, by global roaming services, to a person temporarily outside Bangladesh.

KZY Bangladesh, renders services to a non-resident based in Singapore. However, the inspection service rendered by KZY Bangladesh involves physical inspection of finished products or raw materials in RMG factories situated in Bangladesh.

In terms of section 24(5) of the VAT & SD Act, 2012, export of service outside Bangladesh shall be zero rated. However, with reference to section 24(6)(b) (i) & (ii) for a service, to be qualified as zero-rated supply, it should not be directly related to any land situated in Bangladesh / not be physically given on any goods situated in Bangladesh at the time of the supply.

Please do note that the VAT law has not separately defined the meaning of services which should fall within the purview of the "services which are physically given to any goods situated in Bangladesh". However, definition of "Services directly related to land" is available in the VAT law. But from our plain reading and apparent understanding of section 24(6)(b)(ii) of the said Act, the services rendered by KZY Bangladesh are unlikely to qualify as a zero-rated supply as the services are physically performed on the "goods" situated in Bangladesh. Hence, the services are more likely to be subject to VAT as per VAT and SD Act, 2012.

VDS implication on sub-contract project

5. Luminous Ltd currently works as contractor in many government projects. In order to complete the projects, Luminous Ltd also hires sub-contractors to do part of the work. Luminous Ltd receives the full payment against the work done, which it then pays to sub-contractors on proportionate basis.

Advise Luminous Ltd in light of VAT & SD Act and relevant SROs, regarding the treatment of VAT deduction at source (VDS) when making payment to sub-contractors.

Solution:

As per section 49(5) of the VAT & SD Act, if under any project, VAT payable by any service recipient is collected or deducted at source and deposited to the government treasury in prescribed manner while paying service value or commission by service recipient or as the case may be by the person paying the service value or commission and if that service provider appoints any sub-contractor, agent or any other service rendering person with the purpose of providing a part of the entire service, VAT shall not be applicable only in respect of the supply by the first sub-contractor, subject to submission of documentary evidence of collection or deduction of VAT applicable at the first stage and depositing into the government exchequer. Please note, the rule does not apply in case of purchase of goods under the project.

In order to avail this benefit, documents providing evidence of early stage's collection/deduction of VAT and the deposition of such VAT to the Government Treasury must be submitted.

Hence in light of the aforementioned section, if Luminous Ltd, being the main contractor of a project, can provide proof of the VAT deduction by the project owner, i.e. "Mushak-6.6" provided by the project owner, then VAT would not be applicable on the transaction with Luminous Ltd. and sub-contractor and Luminous Ltd shall make payment to the sub-contractors without deduction of VAT.

VAT Return

6. PARACOM is involved in the business of publishing books. On the sale of books, PARACOM collects VAT @ 15% from its customers. The following transactions have been shared with you from the accounts department of PARACOM to compute the VAT liability for the month of July 2026.

Particulars	Amount	VAT Rate	VAT
Books exported to Vietnam	500,000	0%	
Books sold to local distributors	1,500,000	15%	
Books sold to SSF at reduced rate (SSF will deduct VAT at source however SSF has not paid during July)	60,000	7.5%	
Exempted goods used as raw materials	50,000	Exempted	
Paper imported from India	300,000	15%	
AT paid on paper paid from India	300,000	2%	
Other raw materials procured from local suppliers at standard rate	200,000	15%	
Services procured at standard rate	150,000	15%	
Purchase air-conditioner for office	60,000	7.5%	
Repair of factory premises	20,000	7.5%	
VAT deducted at source from suppliers during July			8,000
Issuance of debit note during July			6,000
VAT against office rent			5,000
Issuance of credit note			8,000

a) Calculate Net VAT payable when submitting the VAT return for the month of July 2026

Solution:

a)
Output VAT = 225,000+4,500 =229,500
Input VAT = 45,000+30,000+22,500 = 97,500
Increasing Adjustment = 8,000+6,000+5,000 = 19,000
Decreasing Adjustment = 6,000+8,000 = 14,000
Net VAT liability = Output VAT – Input VAT + Increasing Adjustment – Decreasing Adjustment = 229,500-97,500+19,000-14,000 = 137,000

Note: According to VAT Deduction and Collection at Source Rules, 2025, amount of VAT Deducted at Source (VDS) and VAT on office rent shall have to be shown as increasing adjustment in the respective month's VAT Return i.e., there is no requirement to deposit VDS amount separately w.e.f. 01 July 2025, however, VAT on office rent is required to be deposited separately w.e.f. 01 July 2026.

Invoicing

7. In reference to question 1, what are the compliance requirements with respect to documentation that the client needs to maintain when supplying goods between the three units.

Solution:

As per section 51 of the VAT & SD Act, 2012, every registered supplier shall, at the date when VAT becomes payable on the taxable supply, issue, on or before such date, a tax invoice in "Mushak-6.3" form against each supply.

Since the client is required to obtain unit registration, hence within the purview of section 51 of the VAT & SD Act, 2012 and rule 40 of VAT & SD Rules, 2016, supply of goods/services between each of the three locations will be considered as taxable supply and accordingly Mushak-6.3 will be required to be issued as and when the supply is made.

VAT Audit

8. Mr. Abedin is the Managing Director of Xoom Limited. Xoom Limited manufactures and sells animal food. Xoom Limited obtained its VAT registration on 20 June 2025. Mr. Abedin has operated under the assumption that animal food is VAT exempted. Hence, to this date he has not submitted any VAT return or maintained any documentation for VAT purposes.

Recently local VAT authority paid a visit to Xoom Limited's premises and have asked for their audited financial statements. Xoom Limited's latest financial year ended on 31 December 2025, and the FS is as follows: -

Xoom Limited
Statement of Financial Position
As at 31 December 2025

In Taka	**31-Dec-25**
Assets	
Non-current assets	
Property, plant & equipment	500,000,000
Total non-current assets	500,000,000
Current assets	
Advance, deposit & prepayments	5,000,000
Cash & cash equivalents	20,000,000
Total current assets	**25,000,000**

Total assets	**525,000,000**
Equity	
Share capital	510,000,000
Share money deposit	10,000,000
Retained earnings	
Total equity attributable to equity holders	520,000,000
Non-current liabilities	
Lease liability	3,000,000
Total non-current liabilities	**3,000,000**
Current liabilities	
Payable for expenses	1,500,000
Provision for tax	5000,000
Total current liabilities	**2,000,000**
Total equity and current liabilities	**525,000,000**

Xoom Limited
Statement of Comprehensive Income
For the year ended 31 December 2025

In Taka	**31-Dec-25**
Revenue	70,000,000
Cost of sales	50,000,000
Gross profit	**20,000,000**
Administrative expenses	5,000,000
Operating profit	**1,5000,000**
Other income/(loss)	-
Finance expenses	
Profit before income tax	**1,5000,000**
Income tax expenses	
Current tax	
Deferred tax	-
Profit for the year	
Other comprehensive income	-
Total comprehensive Profit for the year	

Please note that, vendors of Xoom Limited are all VAT registered and provide tax invoice along with their supply. However, Xoom Limited does not deduct any VAT from any vendors.

Requirement:

Assume that you are a VAT advisor and today's date is 3 July 2026. Mr. Abedin wishes to know what the consequences are that Xoom Limited may face following the VAT audit.

Solution:

Xoom Limited manufactures animal food, which is likely to fall under H.S Code No. "23.09". As per the First Schedule of VAT & SD Act, there is no H.S. Code No. 23.09 listed there, meaning that such goods are not exempted from VAT by the Act. However, the Government through issuance of SRO No 127-Law/2026/332-VAT dated 07 June 2026 has further exempted certain goods and services. The goods under the "H.S. Code No. 23.09" are listed in the Table-2 of the said SRO, meaning that animal feed is exempted from VAT at import and manufacturing stage subject to maintaining compliance with the conditions mentioned in the SRO. To avail this exemption benefit, Xoom will need to comply with the provision of section 51, 53, 54, 64 and 107 of the VAT & SD Act with regards to the maintenance of accounts, Tax Invoice and submission of return. If Xoom fails to comply with the conditions then they will be penalized as per section 85(1) of the VAT & SD Act.
As per section 51, 53, 54, 64 and 107 of the VAT & SD Act, Xoom Limited must maintain the following documents:

- Mushak-6.1: Books of Accounts for purchase
- Mushak-6.2: Books of Accounts for sale
- Mushak-6.3: Tax Invoice
- Mushak-6.6: Certificate for tax deduction at source.
- Mushak-6.7: Credit Note
- Mushak-6.8: Debit Note
- Mushak-6.10: Invoice data for purchase/sales over two lakh taka

Furthermore, they must submit VAT return (Mushak-9.1), to be able to avail the exemption. Since Xoom Limited does not maintain any documentation, the VAT authority may penalize the company BDT 25,000 as per section 85(1) of the VAT & SD Act.

Furthermore, as per section 2(21) of the VAT and SD Act, Xoom shall be considered as a withholding entity and consequently they are required to withhold VAT as per the VAT Deduction and Collection at Source Rules, 2025**.** Given that**,** they currently do not withhold any VAT from the vendors, VAT authority should ask them to pay VDS as per the SRO and may also impose 2% half yearly interest on the VDS payable amount.

Additionally, they haven't submitted any VAT returns until now. And following the inspection, they will be required to submit all the previous VAT returns along with the penalty of BDT 2,000 (two thousand taka) for every late submission of VAT return as per section 85(1) of VAT and SD Act.

Trader vs. Procurement provider

9. Zaber Enterprise is a trading company selling and distributing foreign manufactured specialty chemicals in Bangladesh. AZ Ltd is the principal supplier of Zaber Enterprise, who imports the products from Thailand and supplies to Zaber Enterprise while charging VAT @7.5%. Zaber Enterprise sells the goods to customers who are mainly limited companies who uses the chemicals for production purposes.

Requirement:

a. At what rate of VAT should Zaber Enterprise deduct VAT at source when making payment to AZ Ltd?

b. At what rate of VAT, customer of Zaber Enterprise shall deduct VAT at source?
c. Will Zaber Enterprise be required to deposit VDS amount separately to the Government Exchequer?

Solution:

a. Currently, AZ Ltd follows trade VAT system and issues Mushak-6.3 to Zaber Enterprise while applying VAT @7.5%.

   Therefore, Zaber Enterprise, being a withholding entity will deduct VAT at source @10% considering Procurement Provider in accordance with Rule 4 of the VAT Deduction and Collection at Source Rules, 2025.

b. Same argument shall apply as mentioned under response to "a", that is Zaber Enterprise will be considered as procurement provider within the purview of definition of procurement provider as well as explanation given under the VAT Deduction and Collection at Source Rules, 2025. Hence customers will deduct VAT @10% when making payment to Zaber Enterprise.

c. No, Zaber Enterprise will not require to deposit the VDS amount separately. As per the guidelines provided under the VAT Deduction and Collection at Source Rules, 2025, Zaber Enterprise is required to show the deducted VAT as increasing adjustment in the VAT Return of respective month.

ITES

10. KZ Ltd is a VAT registered entity, planning to procure digital content development and management services from LETO Solutions Ltd., against which LETO Solutions will be raising an invoice (i.e., Mushak-6.3) applying VAT @5%, while considering this as IT Enabled Services (ITES).

The Finance Manager of KZ Ltd has now approached you to clarify whether LETO Solutions is right to raise an invoice applying VAT @5%.

Requirement:

Provide clarification whether the service will be considered as ITES while stating relevant provisions of the law.

Solution:

The service provided by LETO Solutions Ltd, will be considered as ITES within the purview of VAT & SD Act. Further, since digital content development and management services has been specifically mentioned under service code No. S099.10, the applicable VAT rate in that case is 5%. KZ Ltd, being a withholding entity, should deduct VAT @5% when making payment to LETO Solutions Ltd in the light of the VAT Deduction and Collection at Source Rules, 2025.

Refund

11. Azur Bangladesh paid input VAT of Tk. 500,000,000 in August 2026 but output VAT was Tk. 350,000,000. This has created a refund of Tk. 150,000,000 for the month of August 2026. They have approached you to advise on how they can utilize the refund in the light of VAT and SD Act, 2012?

Solution:

As per section 68 of the VAT & SD Act, if in a Tax period, the sum of input tax and the decreasing adjustment exceeds the sum of output tax, supplementary duty and increasing adjustment for such VAT period, resulting in net negative payable amount money, in which case the excess amount of

money shall be carried forward and may be deducted over the following six Tax periods, after which any remaining excess money shall be refunded in accordance with the provision of this section.

Furthermore, if the remaining excess money exceeds BDT. 50,000, in which case, the Commissioner shall refund the amount within 3 months of application.

Hence, Azur Bangladesh can claim back the refund from VAT authority if they have the refund amount of more than BDT. 50,000 after adjusting for 6 Tax periods.

Application for getting refund amount shall need to be made to the Commissioner through form "**Mushak-9.1**". Upon approval of the application, the Commissioner shall deposit the returnable amount to the applicant's bank account or issue a crossed check in favor of the applicant.

Filling out Mushak-4.3 (Input-Output coefficient)

12. The following information is available on a single product of a manufacturing company:

No.	Item Name	Price per unit
1	Raw Materials	20.00
2	Salary & Allowance	1.50
3	Laboratory Equipment	2.00
4	Stationery Item Purchase	0.50
5	Electricity Bill	0.10
6	Gas Bill	0.20
7	Bank Interest	0.65
8	Machinery Items	0.60
9	Transport Service	1.00
10	Wrapping Materials	0.50
11	Wages	0.70
12	Advertising Expense	0.45
13	Overhead Expense	2.00
14	Laboratory Re-agent	1.00
15	Depreciation of Machineries	0.85
16	Commission charges paid	1.00
17	Other Expense	0.15
18	WASA Bill	0.10
19	Entertainment Expense	0.20
20	Profit	5.50

Requirement:

Please complete Form Mushak-4.3. In this case, what is input cost, value addition and selling price? What is the rate

Solution:

Input and value addition will be displayed as follows:

No.	**Item Name**	**Cost Per Unit**	**Input**	**Value addition**	**Price**
1	Raw Materials	20.00	20.00		
2	Salary & Allowance	1.50		1.50	
3	Laboratory Equipment	2.00	2.00		

4	Stationery Purchase	0.50		0.50	
5	Electricity Bill	0.10	0.10		
6	Gas Bill	0.20	0.20		
7	Bank Interest	0.65		0.65	
8	Machinery Items	0.60	0.60		
9	Transport Service	1.00	1.00		
10	Wrapping Materials	0.50	0.50		
11	Wages	0.70		0.70	
12	Advertising Expense	0.45	0.45		
13	Overhead Expense	2.00		2.00	
14	Laboratory Re-agent	1.00	1.00		
15	Depreciation of Machineries	1.85		1.85	
16	Commission charges paid	1.00		1.00	
17	Other Expense	0.15		0.15	
18	WASA Bill	0.10	0.10		
19	Entertainment Expense	0.20		0.20	
20	Profit	5.50		5.50	
	Total		25.95	14.05	40.00

Hence, input cost is Tk. 25.95 and value addition is Tk. 14.05.

VAT @15% will be applicable at the time of supply. Accordingly, total selling price including VAT will be {40+ (40x15%) = Tk. 46.00}.

Rate of value addition: (14.05 / 25.95) x100 = 54.14%
